Canton River.

As the Admiralty plan of the land in the vicinity of Whampoa is very incomplete, ships visiting Canton are to furnish me with any information which may be useful in the navigation of that part of the Canton River, especially as to the situation of the principal parts of the town, and of the British Consulate, &c., and the soundings on the passage up.

Nomi Harbour.—For west entrance of Hey Sima S. W. by S. southerly, read west extreme of Hey Sima S. 33° W., distant 7½ cables.

N.B.—The bearing W. by N. ½ N. northerly refers to north extreme of Point Kadoya, and not the mountain of the same name.

JAPAN.

Nagasaki Harbour.

The Leander reports that a large flat stone, with 6 ft. of water on it at low water springs, lies S. by E. (mag.) 56 yards from the pear-shaped buoy off the Dry Dock. Shoal water extends considerably to the northward of a line between pear-shaped buoy and post. Lines 6 and 7 of the China Sea Directory, vol. IV., page 507, are incorrect, as it would be unsafe for a ship of over 280 ft. in length to lay at the mooring buoy.

The mooring buoy lies S. 72° E., 317 yards from the centre of the Caisson, and the pear-shaped buoy S. 43° W. 115 yards from the mooring buoy.

Loka Island Light.

Notice is hereby given that on or about January 12 a light will be exhibited from the tower on the north point of Loka island, which will take the place of the temporary light advertised in Notice to Mariners No. 229 of this Series.

The apparatus of the new light is fixed dioptric of the fourth order, and is arranged to show sectors of white and red light between the following approximate bearings:—

White from N. 15° W. to N. 85° 30' W.
Red from N. 85° 30' W. to S. 82° W.
White from S. 82° W. to S. 24° W.
Red from S. 24° W. round by south to S. 87° E.
White from S. 87° E. to N. 82° E.

From N. 82° E. round by north to N. 15° W. the light will be entirely obscured by Loka island.

The bearings are magnetic and taken from seaward; and until a further notice is issued the sectors are subject to alteration.

The light will be elevated 128 ft. above the sea, and in clear weather the white light should be visible from a distance of 15 miles.

The tower is round, built of stone, with a total height from the base to the crown of the lantern of 29 ft.

The tower and lightkeeper's dwellings are painted white. The approximate geographical position is latitude, 29° 58.15' N.; longitude, 122° 27' 20" E.

N.B.—This light will be exhibited mainly in the interests of Chinese junks and fishing boats, and the provision of the red sectors is experimental. Until further notice, therefore, vessels of foreign type are warned not to make use of it.

Acting Coast Inspector.

Additional Lights in Great Sandy Island Strait.

NOTICE is hereby given that on and after Thursday, January 2, the following additional lights will be exhibited to enable vessels to navigate Great Sandy Island Strait by night:—

One white light near the white beacon, marking the northern extremity of the bank N.W. of Snout Point;

One white light bearing north-easterly; and

One white light S. by E. ½ E. easterly from the first light giving with it two leads—one towards Fig-tree Camp, the other towards the Fairway Buoy;

Two lights—the front red, the other white—are placed near the Fig-tree Camp, and lead southwards of Stewart's Island;

Two lights—one white, the other red—on the bank northwards of the Stewart's Island Cutting, and leading through the centre of the channel;

Two lights—one white and the other red—on Moonboon Island, leading over to that Island;

One green light on a dolphin N.E. of Moonboon Island in 11 ft. at low water;

One white light off the western shore of Great Sandy Island;

Two lights—one red and one white—leading through Roundbush Cutting;

One red light, on a dolphin, standing in 11 ft. of water at low water, in line with the back light of the next pair of lights, and then in line with that of the last pair, leads N. 3° W., and then N.N.E. easterly, respectively, to the entrance of the cutting northward of the Roundbush;

Two lights—one red and the other white—lead through that cutting, towards a red beacon standing on a projecting spit on the west side of the channel, and afterwards lead through a cutting further to the N.E. near the lower White Cliffs;

One red light on the above red beacon;

Two white lights are placed on the shore of Great Sandy Island below the watering place, and lead just to the eastward of the Junction Buoy.

Directions at Night.

After passing the South Fairway Buoy bring the two white leading lights in one, on a north-easterly bearing, until within a short cable's distance of the lower light; then stand northwards passing it on the starboard hand bringing it on with a third white light to the S. by E. ½ E. easterly; keep them in line until the Fig-tree Lights are

nearly reached, when gradually bring them in line and keep them so until the Stewart's Island Cutting lights are coming in line; keep them in line until the Moonboon lights are in one. Leave the Moonboon line when within half a cable of the red light, and pass at a ship's length on the port hand the green light to the north-east of the Island; then pass on the starboard hand the white light on the Great Sandy Island shore at a similar distance; then keep the red and white Roundbush Lights in line until a red light to the N.N.W. is brought in line with the back light of the next or South White Cliffs lead; keep this line until nearing the red light, when steer to pass it on the port hand at a ship's length, and bring it in line with the back light of the Roundbush lead. As the South White Cliff Lights are closing, haul up and keep on that line until approaching a red light on the beacon on the West Banks, then haul well out to the N.N.E. and leave it at a good cable's distance, a spit running out thence in that direction. When well past the red light, haul in again and bring it in line with the same leading lights.

When the steep shore of Great Sandy Island is approached follow it round the light at a distance of a short half cable, and after passing the creek bring the two white lights on the Island in line, which lead into the main channel just to the eastward of the Junction Buoy.

On coming southwards, when passing the South White Cliffs keep the leading lights in line until the black beacon at the western end of the first Cutting is passed, then haul out to the W.S.W. until abreast the red light on the West Banks, when haul in and regain the line of lights.
