

SUPPLEMENT
TO
The Ceylon Government Gazette,
PART I.

No. 6,227 — FRIDAY, JANUARY 31, 1908.

VITAL STATISTICS OF CEYLON.

REPORT OF THE REGISTRAR-GENERAL FOR THE THIRD QUARTER OF 1907.

I.—Population.

THE estimated population of the Island on the last day of the quarter was 3,950,098, showing an increase of 7,997 on the previous quarter, due to an excess of 4,880 births over deaths, and a further excess of 3,108 arrivals over departures of Indian coolies.

2. *Arrivals and departures of Indian coolies.*—The number of Indian coolies who arrived in the Island during the quarter amounted to 18,462 and of departures to 15,354, as against 31,752 arrivals and 17,634 departures, the averages for the corresponding quarters of the last nine years.

II.—Marriages.

3. *Marriages.*—4,024 general marriages (*i.e.*, marriages other than Kandyan or Mohammedan) were registered during the quarter and 1,408 Kandyan marriages. Their distribution by Provinces and districts is given in Table I.

4. Table VI. in the Appendix shows the marriages solemnized in the general community in each Province and district in the Island, the civil condition, nationality, the highest, lowest, and mean ages of the parties, the mode of solemnization, the number of bridegrooms and brides who were unable to sign their names in the register, &c.

5. Table VII. gives similar information in respect of the Kandyan marriages.

6. *First marriages; re-marriages.*—Of the 4,024 general marriages, 3,451 (equal to 86 per cent.) were between bachelors and spinsters, 393 between widowers and spinsters, 106 between bachelors and widows, 65 between widowers and widows, 4 between divorced men and spinsters, 3 between bachelors and divorced women, 1 between a divorced man and a widow, and 1 between a divorced man and a divorced woman. Of the 1,408 Kandyan marriages, 1,069 (equal to 76 per cent.) were between bachelors and spinsters, 148 between widowers and spinsters, 64 between bachelors and widows, 46 between widowers and widows, 34 between bachelors and divorced women, 30 between divorced men and spinsters, 10 between widowers and divorced women, 4 between divorced men and divorced women, and 3 between divorced men and widows.

7. *Age at marriage.*—The mean age at marriage for the general community was 26·7 for males and 20·1 for females, and for Kandyans 26·4 for males and 19·8 for females. It is likely that in many of these cases the couples had lived as husband and wife for years before registration of marriage, the usual religious ceremony alone having been performed in time. The figures in this chapter are based on actual registration, which is not, except among Kandyans, necessary to the validity of a marriage.

8. *Minors.*—In the general community about 4 per cent. of the bridegrooms and 52 per cent. of the brides and among the Kandyans about 13 per cent. of the bridegrooms and 75 per cent. of the brides, were under 21 years of age.

9. *Mixed marriages.*—There were 32 mixed marriages during the quarter : 2 between Europeans and Burghers, 7 between Burghers and Sinhalese, 20 between Sinhalese and Tamils, 1 between a native of Cochin and a Tamil, 1 between a Tamil and a Vedda, and, 1 between a native of Cochin and a Sinhalese.

10. *Signatures in marriage register.*—Of the 8,048 persons married in the general community during the quarter, 852 men and 2,680 women signed the register with marks ; that is to say, nearly 21 per cent. of the men and 67 per cent. of the women could not write their names. Of the 2,816 Kandyans married, 433 men and 1,303 women signed the register with marks, *i.e.*, about 31 per cent. of the men and 93 per cent. of the women could not write their names.

III.—Births and Deaths.

11. *Births.*—The births registered during the quarter numbered 29,846 (47 Europeans, 184 Burghers, 19,972 Sinhalese, 7,342 Tamils, 2,127 Moors, 108 Malays, and 66 Others), and were in the proportion of 31·3 per 1,000 persons living, as against 31·5 in the previous quarter and 34·3 the average of the corresponding quarters in the period 1898-1906.

12. *Deaths.*—The number of deaths registered during the quarter amounted to 24,966 (24 Europeans, 117 Burghers, 15,334 Sinhalese, 7,770 Tamils, 1,522 Moors, 88 Malays, and 111 Others), and was equal to an annual rate of 26·2 per 1,000 persons living, as against the average 27·3 for the third quarters in the period 1898-1906 and 30·8 the rate in the preceding quarter.

13. The births and deaths and their rates are compared in the Tables I. and II. in the Appendix for each Province and district with the results obtained in the previous quarter, the corresponding quarter of the previous year, and the average rates for the third quarters of 1898-1906 ; and are summarized for the whole Island in the following Table A :—

TABLE A.

| | | | Births. | Deaths. | | Per Mille per Annum. |
|---|-----|-----|---------|---------|-------------|----------------------|
| | | | | | Birth-rate. | Death-rate. |
| Average for nine previous third quarters in | | | | | | |
| 1898-1906 | ... | ... | 31,453 | 25,111 | 34·3 | 27·3 |
| Third quarter, 1906 | ... | ... | 32,470 | 37,997 | 32·5 | 37·9 |
| Second quarter, 1907 | ... | .. | 29,715 | 29,103 | 31·5 | 30·8 |
| Third quarter, 1907 | ... | ... | 29,846 | 24,966 | 31·3 | 26·2 |

14. It will thus appear that whilst the death-rate shows an improvement during the quarter, the birth-rate shows a deterioration. This deterioration in the birth-rate has been shared by all the Provinces in the Island, except the North-Central Province, and by all the districts, except Puttalam and Chilaw. The cause of this decline is not clear. It may have been due to (1) the increased mortality among the child-bearing women of the ages 20 and upwards during 1906 (*vide* Table J in my Administration Report on Vital Statistics for 1906), and especially during the last two quarters of that year ; (2) the considerable decrease in the number of registered marriages in 1906, the rate for that year (9·0) being the lowest recorded since 1885 (*vide* Table II. *idem*) ; and (3) the fact that the general health was exceptionally bad in 1906.

15. *Sex.*—Of the total number of births (29,846), 15,377 were of males and 14,469 were of females, *i.e.*, 1,063 males to 1,000 females. Of the total number of deaths (24,966), 13,021 were of males and 11,945 were of females. Out of equal numbers living of each sex, there died 960 males to 1,000 females.

16. *Infantile mortality.*—The deaths of infants under one year of age numbered 4,864, and were in the proportion of 163 to 1,000 registered births. The rate of infantile mortality varied in the districts from 385 (for Tamils) in Mannar, 274 (for Sinhalese) in Puttalam, 271 (for Sinhalese) in Batticaloa, 220 (for Tamils) in Trincomalee, 217 (for Tamils) in Batticaloa, 213 (for Sinhalese) in Anuradhapura, 195 (for Tamils) in Mullaitivu, 189 (for Tamils) in Puttalam, 185 (for Sinhalese) in Hambantota, 182 (for Sinhalese) in Badulla, 181 (for Sinhalese) in Ratnapura, 179 (for Sinhalese) in Nuwara Eliya, 175 (for Sinhalese) in Kurunegala, 161 (for Sinhalese) in Matale, 153 (for Moors) in Puttalam, 152 (for Tamils) in Jaffna, 148 (for Sinhalese) in Galle, 147 (for Sinhalese) in Kandy, 139 (for Sinhalese) in Kegalla, 135 (for Sinhalese) in Matara to 132 (for Sinhalese) in Colombo, 131 (for Moors) in Batticaloa, 110 (for Sinhalese) in Kalutara, 95 (for Sinhalese) in Negombo, and 94 (for Sinhalese) in Chilaw.

IV.—State of Public Health.

17. The general health of the population during the quarter was satisfactory, the death-rate (26·2) having declined from the average (27·3) for the third quarters in the period 1898-1906. The rate for the quarter shows a slight improvement on the previous quarter's rate (30·8), and a considerable improvement on the rate (37·9) for the corresponding quarter of last year. The improvement in health during the quarter compared with the third quarters of 1898-1906 has been shared by all the Provinces of the Island, except the Southern and the North-Central, while the improvement on the previous quarter and the corresponding quarter of last year was distributed over every Province.

18. The healthiest Province was, as usual, the Western, with a death-rate for all races of 21·6, followed by the Northern, 23·4, and the unhealthiest the North-Central, with a death-rate of 35·6. The healthiest district for all races was Negombo, with a death-rate for all races of 14·2, followed by Chilaw 15·4, and the unhealthiest Mullaitivu with a death-rate of 42·3.

19. Tables III., IV., and V. in the Appendix show the number of births and deaths registered in the several Provinces and districts of the Island and in the revenue subdivisions of those districts for the quarter under review, and the average for the corresponding quarters in the period 1898-1906. The birth-rates and death-rates for all ages and for infants in the several Provinces and districts of the Island are shown for the Sinhalese only in the districts which are mainly inhabited by the Sinhalese, and for the Tamils only where Tamils form the bulk of the population. In the Puttalam and the Batticaloa Districts, which contain a resident population composed of Sinhalese, Tamils, and Moors, the rates are given for each of these races.

20. *Western Province.*—The Sinhalese inhabitants of the Western Province, who on the first day of the quarter were estimated to number nearly a third of the entire Sinhalese population of the Island, were healthier than usual, and than the inhabitants of the other Provinces, and presented the lowest death-rate for all ages (18·2), against the average (20·0) and for infants (119). Colombo and Negombo Districts show improved rates as compared with the average (18·1 against 20·3 and 13·1 against 18·9 respectively), whilst Kalutara District shows an enhanced rate (22·0 against 20·1). Negombo was the healthiest district in the Island for the indigenous population (the Sinhalese), as it was also the healthiest for all races. Its infantile mortality was 95 per 1,000 births, the second lowest in the Island ; Chilaw leading with 94, and Kalutara taking the third place with 110, and Colombo the fourth place with 132. The birth-rate of the Province fell from an average of 30·3 to 26·9, all the three districts sharing in the deterioration. The highest birth-rate (28·3) was in Kalutara District, and the lowest in Colombo (26·0).

21. *Central Province.*—The Sinhalese inhabitants of this Province, who on the first day of the quarter numbered nearly 319,000, experienced better health than usual, their death-rate falling to 22·9 from the average (30·2). This improvement in health was shared by all the three districts. The improvement was greatest in the Matale district, from an average mortality of 36·6 to 25·7, and least in Nuwara Eliya from an average of 26·1 to 22·4. In Kandy, the healthiest district during the quarter, the death-rate fell to 22·2 from an average of 29·2. The birth-rate of the Province (30·8) shows a fall from the average (40·8), all the three districts sharing in the deterioration. The highest birth-rate was in the District of Matale (36·7), as also the highest death-rate (25·7).

22. *Northern Province.*—The health of the Tamil inhabitants of this Province, who form the bulk of the population, and were estimated to number a little over 315,000 on the first day of the quarter, was slightly better than usual, their death-rate for the quarter (22·9) having declined by 1·7 from the average (24·6). The improvement in health was confined to the Jaffna District, the healthiest in the Province, which recorded a death-rate of 21·1 against the average (23·5), while the other two Districts, Mannar and Mullaitivu, showed enhanced rates, viz., 42·6 against 35·5 and 45·0 against 34·8 respectively. However, Mannar and Mullaitivu show a considerable improvement on the previous quarter. The former records the highest infantile mortality in the Province as well as in the Island, *viz.*, 385 per 1,000 births registered, and the latter the highest in the Province for all ages. The birth-rate of the Province (34·0) was worse than the average (39·0), all the three districts sharing in the deterioration.

23. *Southern Province.*—The health of the Sinhalese inhabitants of the Province, who numbered over half a million on the first day of the quarter, was unsatisfactory, the death-rate for the quarter rising to 28·5 from the average (24·1). The deterioration is shared by all the three districts and was greatest in the Hambantota District, the unhealthiest in the Province, where the death-rate for the quarter rose to 32·4 from the average (24·9), and least in the Matara District, the healthiest in the Province, where the death-rate rose to 26·0 from 23·6; Galle, the principal district of the Province, showing a death-rate of 29·0 against the average (24·0). The birth-rate of the Province also fell to 30·9 from the average (36·3), a decline shared by all three districts. The highest birth-rate was in Hambantota (35·0).

24. *Eastern Province.*—This Province, which at the beginning of the quarter, was estimated to contain a population of 101,611 Tamils (of whom 84,119 were in the Batticaloa District and 17,492 in the Trincomalee District), 68,237 Moors, and 8,828 Sinhalese presented death-rates of 31·8, 23·0, and 28·8, respectively, for the Tamils, Moors, and Sinhalese against their respective averages of 30·4, 28·6, and 34·8 for the corresponding quarters of the period 1898–1906. The Tamils, who constitute the majority of the population, experienced worse health than the Moors or Sinhalese and than usual. The Moors and Sinhalese enjoyed better health. The District of Batticaloa, containing the bulk of the Tamil population, was entirely responsible for the unhealthiness among the Tamils of the Province, its death-rate rising from the average 30·2 to 32·5, while the death-rate among the Tamils in the Trincomalee District declined from the average (30·8 to 28·3). The birth-rate of the Province showed a deterioration for all three sections of the population, viz., Tamils 41·0 (average 43·1), Moors 48·0 (average 51·3), and Sinhalese 35·9 (average 37·0). The deterioration was greatest among the Moors who show the highest birth-rate as well as the lowest death-rate in the Province during the quarter. The highest death-rate was among the Tamils of the Batticaloa District, and the lowest birth-rate among the Sinhalese, the poorest as they are the smallest section of the population.

25. *North-Western Province.*—The Sinhalese, who form the bulk of the population of the Province and were estimated to number 324,898 persons on the first day of the quarter, experienced better health than usual, the death-rate for the quarter falling to 26·1 from the average (32·5) for the corresponding quarters of the last nine years. Two of its three districts shared in the improvement, the exception being Puttalam, where the death-rate rose to 35·8 from the average 30·4 and was the highest in the Province. The improvement in health is noticeable in the Kurunegala District (from 36·2 to 29·0). In the Chilaw District the death-rate declined from 19·8 to 14·3, and was the lowest in the Province, and the second lowest in the Island for the indigenous population (the Sinhalese). The District also records the lowest infantile mortality in the Island, viz., 94 per 1,000 births registered. The Sinhalese infantile mortality of the Puttalam District, viz., 274 per 1,000 births registered, was the second highest recorded during the quarter. The Moor inhabitants of the Province enjoyed better health than usual, and the Tamils worse, viz., Moors 23·1 against average (33·6), and the Tamils 48·7 against 44·2. The Sinhalese birth-rate of the Province (36·8) was lower than the average (39·9), the deterioration being shared by each of its three districts. The Tamils and Moors show enhanced birth-rates.

26. *North-Central Province.*—The North-Central Province or the Anuradhapura District, with which it is co-terminalous, showed a deterioration in the health of its Sinhalese inhabitants, its death-rate (35·0) showing an increase of 2·7 on the average (32·3). However, the rate was a great improvement on the previous quarter's rate (50·3). The birth-rate (44·7) of the Province showed also an increase on the average (41·7). This is the only Province that shows an improved birth-rate as compared with the average. The mortality among the Sinhalese infants of the Province was 213 per 1,000 registered births.

27. *Province of Uva.*—This Province, which is co-extensive with the Badulla District, showed an improvement in the health of its Sinhalese inhabitants, whose death-rate for the quarter (32·5) declined by 5·3 from the average (37·8). The birth-rate of the Province, on the other hand, showed a deterioration from the average (42·7) to (35·1).

28. *Province of Sabaragamuwa.*—The Sinhalese inhabitants of the Province enjoyed better health than usual, their death-rate falling to 22·7 from the average (29·0). The improvement was shared by both its districts, and was specially noticeable in the Kegalla District, viz., Ratnapura 26·4 (average 30·6), and Kegalla 19·9 (average 27·6). The birth-rate of the Province (32·4) has declined from the average (37·3), a decline shared by both its districts.

V—Causes of Death.

29. The causes of death registered in the Island during the quarter are shown in Table X., and are summarized below:—

TABLE B.

| District. | Cholera. | Small-pox. | Diarrhoea & Dysentery. | Fever. | Phthisis. | Bronchitis and Pneumonia. | Violence. | | | | All other Causes. | Total. |
|------------------|----------|------------|------------------------|--------|-----------|---------------------------|-----------|----------|----------|------------|-------------------|--------|
| | | | | | | | Accident. | Homicide | Suicide. | Execution. | | |
| CEYLON ... | 3 | 9 | 5,301 | 4,682 | 996 | 930 | 379 | 39 | 61 | 9 | 12,557 | 24,966 |
| Colombo ... | 3 | 8 | 511 | 505 | 245 | 197 | 41 | 11 | 10 | 4 | 1,603 | 3,138 |
| Negombo ... | — | — | 53 | 148 | 22 | 11 | 8 | 2 | 3 | — | 349 | 596 |
| Kalutara ... | — | — | 265 | 297 | 108 | 28 | 27 | 4 | 2 | — | 907 | 1,638 |
| Kandy ... | — | — | 748 | 192 | 80 | 101 | 43 | 1 | 6 | 4 | 1,426 | 2,601 |
| Matale ... | — | — | 164 | 104 | 14 | 42 | 11 | 2 | 3 | — | 391 | 731 |
| Nuwara Eliya ... | — | — | 354 | 40 | 9 | 61 | 20 | — | 2 | — | 497 | 983 |

| Puttalam ... | — | — | 34 | 61 | 4 | 4 | 6 | — | — | — | 135 | 244 |
| Chilaw ... | — | — | 26 | 54 | 12 | 10 | 8 | — | — | — | 206 | 316 |
| Anuradhapura ... | — | — | 73 | 185 | 7 | 6 | 11 | — | — | — | 417 | 699 |
| Badulla ... | — | — | 443 | 258 | 35 | 55 | 28 | 5 | 2 | — | 761 | 1,587 |
| Ratnapura ... | — | — | 343 | 174 | 54 | 17 | 25 | 1 | 3 | — | 576 | 1,193 |
| Kegalla ... | — | — | 283 | 167 | 49 | 36 | 14 | 1 | 1 | — | 773 | 1,324 |

30. *Smallpox.*—There were 9 deaths from smallpox reported for registration during the quarter. Of these, eight occurred in Colombo and the other in Matara. Of the deaths in Colombo, 6 occurred in the Infectious Diseases Hospital, Kanatta, one at Ratmalana North, and the other at No. 10, Churchyard lane, Slave Island. Of the deaths in the Infectious Diseases Hospital one was of a Tamil vagrant, a recent arrival from India, where he had evidently been infected; two were admissions from the village Kanatta (outside Municipal limits), in one of which the origin was traced to infection from cases which occurred in New Moor street, Colombo, early in July last, and in the other to infection from other cases which had occurred at Kanatta, the source of which was traced to a family of beggars who used to frequent Moor street for begging. The death at Ratmalana North was of an aged Sinhalese who is believed to have been infected while frequenting Moor street, Colombo. The death at Matara was of an aged and debilitated Sinhalese fisherman in a house at Dondra, in which chickenpox was prevailing. The patient had not left the village for months, and hence the origin of the disease could not have been traced.

31. *Cholera.*—There were 3 deaths from cholera reported for registration during the quarter. These were of Tamil coolies who were under observation at the Ragama Camp and who died at Thalagalla hospital early in June last. They were arrivals from India, and no doubt brought the infection from there.

32. *Fever and diarrhoeal diseases.*—Of the 24,966 deaths registered in the Island no less than 5,304 were due to diarrhoeal diseases and 4,682 were reported as due to various kinds of fever, i.e., fever and diarrhoeal diseases caused a little more than 40 per cent. of the total number of deaths.

33. There were 17 deaths from measles reported for registration during the quarter. Of these, 4 occurred in Colombo, 3 in Kalutara, 2 each in Negombo, Nuwara Eliya, and Galle, and 1 each in Jaffna, Anuradhapura, Badulla, and Kegalla. There were 3 deaths from chickenpox reported for registration during the quarter (2 in Colombo and 1 in Kegalla). Whooping cough caused 10 deaths (4 in Colombo, 3 in Mullaittivu, and 1 each in Galle, Batticaloa and Anuradhapura). Influenza resulted in 21 deaths (4 in Kandy, 3 in Nuwara Eliya, 2 each in Colombo, Negombo, Matale, Galle, Matara, and Kurunegala, and 1 each in Kalutara and Badulla).

34. The other chief causes of death were infantile convulsions 2,141, debility (mostly of infants from inability to suck) 1,252, phthisis 996, general dropsy 854, anaemia 841, pneumonia 819, rickets 791, old age 621, worms 592, rheumatism 277, and dochmimus duodenalis 232 (of which 122 were of estate coolies).

35. *Deaths by violence: Accidents.*—Of the 379 deaths attributed to accidents, as many as 118 were due to falls from trees, 75 to drowning (of which 14 were caused by falling into wells and 1 into a pit), 39 to burns and scalds, 37 to snake-bites, 19 to falls of heavy substances, 14 to gunshot wounds, and 10 to injuries at birth. Eight deaths were caused by taking poisonous substances; and 7 by being run over by carts, 5 by trains, and 1 by a motor car. Six deaths were due to injuries caused by elephants, 3 by crocodiles, 3 by bears, 2 by wasps, 2 by buffaloes, 2 by rats, 2 by bulls, 1 by a deer, and 1 by a dog. Four deaths were due to explosions, 3 to lightning, 3 to suffocation, 2 to falls from heights other than trees, 1 to taking an overdose of arrack, 1 to a wireshoot accident, 1 to blasting of rocks, and 2 to striking against a beam and a fence.

36. *Homicide.*—Thirty-nine deaths were due to homicide (of which 11 were in Colombo, 5 each in Kurunegala and Badulla, 4 in Kalutara, 2 each in Negombo, Matale, Jaffna, and Matara, and 1 each in Kandy, Galle, Hambantota, Batticaloa, Ratnapura, and Kegalla).

37. *Suicide.*—Sixty-one deaths resulted from suicide, of which 37 were by hanging, 9 by drowning, 6 by taking poisonous substances, 5 by gunshot wounds, 2 by trains, and 1 by cuts or stabs.

38. *Executions.*—There were nine judicial executions registered in the Island during the quarter, 4 in Colombo, 4 in Kandy, and 1 in Galle.

VI.—Health of the Estate Population.

39. The total number of births reported for registration from the estates* in the Central, Uva, and Sabaragamuwa Provinces and in the Colombo and Kalutara Districts of the Western Province during the quarter amounted to 2,817 (5 Europeans, 9 Burghers, 62 Sinhalese, 2,702 Tamils, 27 Moors, 11 Malays, and 1 Other), and the deaths numbered 3,461 (1 European, 3 Burghers, 53 Sinhalese, 3,385 Tamils, 14 Moors, 1 Malay, and 4 Others), corresponding to an annual birth-rate of 26·6 and a death-rate of 32·7 per thousand, as against their respective averages of 24·1 and 29·5 for the period 1898-1906. The Ratnapura District leads with the highest death-rate of 83·9, followed by Colombo 56·4; and Nuwara Eliya with the lowest death-rate (25·1), followed by Kandy 25·3. The highest birth-rate was in Kalutara (30·9), and the lowest in Colombo (21·5).

40. The causes of death are shown in Table XL, and may be summarized as follows:—

TABLE C.

| | | | | | | | |
|-----------------------|-----|-----|-----|-------------------|-----|-----|-----|
| Diarrhoea | ... | ... | 729 | Malarial cachexia | ... | ... | 120 |
| Dysentery | ... | ... | 644 | Old age | ... | ... | 106 |
| Debility | ... | ... | 637 | Anæmia | ... | ... | 48 |
| Pneumonia | ... | ... | 223 | Phthisis | ... | ... | 41 |

41. The following Table D gives the estate population at the Census of 1901, their birth- and death-rates for the third quarters of 1907 and 1906, the second quarter of 1907, and the averages for the third quarters of 1898-1906. But the rates are calculated on the population as enumerated and distributed at the Census of 1901, and the number and distribution of the population at present may be different.

* By "estate" is meant any land having ten or more acres in cultivation under coffee, tea, cacao, or cinchona, grouped together by Proclamation into a district under the Medical Wants Ordinance, No. 17 of 1880.

TABLE D.

| District. | Population at the Census of 1901. | Birth-rate per Mille per Annum. | | | | Death-rate per Mille per Annum. | | | |

| Kalutara ... | 16,965 | 20·0 | 33·2 | 27·4 | 30·9 | 36·1 | 64·1 | 45·6 | 51·7 |
| Total ... | 420,340 | 24·1 | 29·0 | 26·8 | 26·6 | 29·5 | 45·9 | 34·1 | 32·7 |

42. *Kandy District.*—The total number of births reported for registration from the estates in the Kandy District amounted to 1,009 (2 Europeans, 2 Burghers, 25 Sinhalese, 962 Tamils, 16 Moors, and 2 Malays), and the deaths numbered 992 (1 Burgher, 20 Sinhalese, 962 Tamils, 8 Moors, and 1 Other). The birth-rate during the quarter was equal to 25·7 as against the average 25·3 for the corresponding period of 1898-1906, and the death-rate was 25·3 as against its average 29·7 for the same period. The chief causes of death were diarrhoeal diseases 366 (185 from dysentery and 181 from diarrhoea), debility (mostly of infants from inability to suck) 237, pneumonia 62, dochmias duodenalis 43, infantile convulsions 43, general dropsy 39, fevers 32, and old age 30.

43. *Matale District.*—The total number of births reported for registration from the estates in the Matale District was 175 (4 Burghers, 1 Sinhalese, 168 Tamils, and 2 Malays), and the deaths numbered 255 (2 Burghers, 2 Sinhalese, 247 Tamils, 1 Moor, and 3 Others). The birth-rate during the quarter was equal to 26·6 as against the average 24·3 for the period 1898-1906, and the death-rate was 38·8 as against its average 43·9. The chief causes of death were diarrhoeal diseases 85 (53 from diarrhoea and 32 from dysentery), debility (mostly of infants from inability to suck) 36, pneumonia 27, dochmias duodenalis 20, general dropsy 14, fevers 13, and infantile convulsions 13.

44. *Nuwara Eliya District.*—The total number of births reported for registration from the estates in the Nuwara Eliya District amounted to 665 (2 Europeans, 11 Sinhalese, 648 Tamils, 2 Moors, and 2 Malays), and the deaths numbered 656 (1 European, 6 Sinhalese, and 649 Tamils). The birth-rate during the quarter was equal to 25·5 as against the average 22·2 for the period 1898-1906, and the death-rate was 25·1 as against its average 21·6. The chief causes of death were diarrhoeal diseases 262 (147 from diarrhoea and 115 from dysentery), debility (mostly of infants from inability to suck) 152, pneumonia 49, infantile convulsions 29, general dropsy 27, and old age 18.

45. *Badulla District.*—The total number of births reported for registration from the estates in the Badulla District amounted to 363 (2 Burghers, 6 Sinhalese, 349 Tamils, 2 Moors, and 4 Malays), and the deaths numbered 418 (5 Sinhalese, 412 Tamils, and 1 Malay). The birth-rate during the quarter was equal to 27·8 as against the average 26·7 for the period 1898-1906, and the death-rate was 32·8 as against its average 23·6. The most fatal causes of death were diarrhoeal diseases, 161 (90 from diarrhoea and 65 from dysentery), debility (mostly of infants from inability to suck) 74, fevers 36, pneumonia 36, old age 15, and malarial cachexia 14.

46. *Ratnapura District.*—The total number of births reported for registration from the estates in the Ratnapura District was 128 (1 Sinhalese, 124 Tamils, and 3 Moors), and the deaths amounted to 352 (5 Sinhalese, 346 Tamils, and 1 Moor). The birth-rate during the quarter was equal to 30·5 as against the average 24·1 for the period 1898-1906, and the death-rate was 83·9 as against its average 46·5. The most fatal causes of death were diarrhoeal diseases 161 (84 from diarrhoea and 77 from dysentery), debility (mostly of infants from inability to suck) 55, malarial cachexia 24, dochmias duodenalis 22, and infantile convulsions 19.

47. *Kegalla District.*—The total number of births reported for registration from the estates in the Kegalla District amounted to 300 (1 European, 1 Burgher, 14 Sinhalese, 281 Tamils, 2 Moors, and 1 Other), and the deaths numbered 449 (8 Sinhalese, 440 Tamils, and 1 Moor). The birth-rate during the quarter was equal to 28·7 as against the average 28·2 for the period 1898-1906, and the death-rate was 42·9 as against its average 39·4. The chief causes of death were diarrhoeal diseases 192 (107 from diarrhoea and 85 from dysentery), debility (mostly of infants from inability to suck) 50, malarial cachexia 43, pneumonia 28, old age 23, fevers 16, and general dropsy 16.

48. *Colombo District.*—The total number of births reported for registration from the estates in the Colombo District amounted to 45 (1 Sinhalese, 42 Tamils, and 2 Moors), and the deaths numbered 118 (1 Sinhalese, 115 Tamils, and 2 Moors). The birth-rate during the quarter was equal to 21·5 as against the average 17·7 for the period 1898-1906, and the death-rate was 56·4 as against its average 41·7. The principal causes of death were diarrhoeal diseases 63 (50 from diarrhoea and 13 from dysentery), debility (mostly of infants from inability to suck) 9, fevers 6, and anaemia 6.

49. *Kalutara District.*—The total number of births reported for registration from the estates in the Kalutara District was 132 (3 Sinhalese, 128 Tamils, and 1 Malay), and the deaths amounted to 221 (6 Sinhalese, 214 Tamils, and 1 Moor). The birth-rate during the quarter was equal to 30·9 as against the average 20·0 for the period 1898-1906, and the death-rate was 51·7 as against its average 36·1. The chief causes of death were diarrhoeal diseases 83 (72 from dysentery and 11 from diarrhoea), debility (mostly of infants from inability to suck) 24, dochmias duodenalis 18, general dropsy 13, and fevers 11.

VII.—Health of the Town of Colombo.]

50. The births registered in the town of Colombo numbered 1,022, and corresponded to an annual rate of 22·9, being 1·4 per 1,000 higher than the average 21·5 for the corresponding quarters in 1898-1906.

51. The deaths registered numbered 1,370. To this have to be added 13 deaths of town residents, which occurred at the Infectious Diseases Hospital, Kanatta (outside the town limits), and which were registered by an extra-urban Registrar, making a total of 1,383, and corresponding to a rate of 31·0 per mille per annum, a fall of 2·4 per 1,000 from the average 33·4.

52. As usual in the town the death-rate exceeded the birth-rate, owing mainly to the preponderance of males over females (chiefly among the Europeans, Indians Tamils, and Moors), to the presence of hospitals which add to the normal mortality of the town, and to the registration of births being still somewhat defective.

53. The subjoined Table E gives the births and deaths and their rates for each race for the third quarters of 1907 and 1906 and the average for the third quarters in 1898-1906:—

TABLE E.

| Nationality. | Population (inclusive of the Military) at the Census, 1901. | Births. | | | Deaths. | | | Birth-rate per Mille per Annum. | | Death-rate per Mille per Annum. | |
|---------------|---|---------------------------------------|------|----------------------|---------------------------------------|-------|----------------------|---------------------------------|---------------------------------------|---------------------------------|----------------------|
| | | Average of Third Quarters, 1898-1906. | | Third Quarter, 1907. | Average of Third Quarters, 1898-1906. | | Third Quarter, 1906. | Third Quarter, 1907. | Average of Third Quarters, 1898-1906. | Third Quarter, 1906. | Third Quarter, 1907. |
| All Races | 155869 | 867 | 1029 | 1022 | 1,353 | 1,749 | 1,383* | 21·5 | 23·6 | 22·9 | 33·4 |
| Europeans ... | 2,657 | 20 | 16 | 27 | 23 | 24 | 18 | 29·3 | 21·8 | 36·2 | 33·6 |
| Burghers ... | 11,861 | 91 | 117 | 95 | 77 | 90 | 72 | 30·0 | 37·0 | 29·7 | 25·5 |
| Sinhalese ... | 68,772 | 469 | 533 | 560 | 615 | 783 | 655 | 26·5 | 28·6 | 29·6 | 34·7 |
| Tamils ... | 34,640 | 103 | 149 | 120 | 323 | 485 | 308 | 11·2 | 14·1 | 11·0 | 35·1 |
| Moors ... | 28,898 | 142 | 155 | 154 | 232 | 262 | 220 | 19·7 | 19·5 | 19·0 | 32·9 |
| Malays ... | 4,493 | 29 | 47 | 44 | 41 | 45 | 48 | 24·8 | 36·0 | 32·8 | 35·2 |
| Others ... | 4,548 | 13 | 12 | 22 | 42 | 60 | 62 | 10·3 | 7·9 | 13·9 | 33·0 |
| | | | | | | | | | | 39·8 | 39·1 |

* Including 13 deaths of town residents (10 Sinhalese, 1 Tamil, and 2 Moors), which occurred at the Infectious Diseases Hospital, Kanatta (outside the town), and were registered by an extra-urban Registrar.

54. The rates are calculated on the figures for the quarter estimated upon the basis of the population as enumerated and distributed at the Census of 1901. The rates for Europeans, Malays, and the races classed together as "Others" being calculated upon small populations are not very reliable. Excluding the rates for these sections, the lowest death-rate was among the Burghers (22·5 against an average of 25·5) and the highest death-rate was among the Sinhalese 34·6, followed by 28·2 among the Tamils. The Malays, who at the last Census numbered 4,493, show a death-rate of 35·8 against 35·2, the average for the corresponding quarters in 1898-1906.

55. The highest birth-rate in the quarter was among the Europeans, 36·2, a rise of 6·9 per 1,000 over the average 29·3. The Malays come next with a birth-rate of 32·8 and the Burghers 29·7, as against their respective averages 24·8 and 30·0. The low birth-rates for Tamils and Others are due to their population being mostly a floating one and composed chiefly of males.

56. The number of births and deaths in each ward of the town, their rates per mille per annum, and certain selected causes of death during the quarter are shown in the following Table F:—

TABLE F.

| Wards. | Population (inclusive of the Military) at the Census, 1901. | Births. | | | | Deaths. | | | | Selected Causes of Death. | | | | Annual Rate per 1,000. | | | | | | | | | | | | | | | | | | | |

| Maradana : Hospitals | 30381 | 185 | 91 | 94 | 2 | 18 | 145 | 18 | 2 | — | 372 | 265 | 107 | 8 | 16 | 198 | 124 | 11 | — | 15 | — | 24 | 2 | 9 | 59 | 32 | 101 | 9 | 2 | — | — | 6·9 | 8·6 |
| Excl. of hospitals | 186 | 98 | 88 | 83 | 2 | 25 | 91 | 9 | 37 | 17 | 4 | 213 | 85 | 3 | 16 | 107 | 27 | 41 | 8 | 11 | — | 24 | 4 | — | 26 | 22 | 29 | 2 | 1 | 20·7 | 23·7 | | |
| Slave Island ... | 16927 | 120 | 59 | 61 | 5 | 6 | 49 | 15 | 18 | 23 | 4 | 140 | 68 | 72 | 1 | 7 | 44 | 21 | 31 | 27 | 9 | 2 | 5 | 8 | 11 | 17 | 15 | — | 24·5 | 28·6 | | | |
| Kollupitiya ... | 18281 | 102 | 50 | 52 | 11 | 18 | 44 | 17 | 8 | — | 4 | 119 | 59 | 60 | 3 | 12 | 68 | 26 | 8 | 1 | 1 | 1 | 3 | 1 | — | 15 | 14 | 18 | — | 2 | 18·2 | 21·3 | |

* The estimated population on the last day of the quarter was 177,602. Its distribution among the wards cannot be estimated. Hence the Census figures are retained.

57. The low birth- and death-rates of the Fort and Galle Face and the Pettah Wards are due to their population being for the most part a floating male adult one. Excluding these wards, the healthiest division of the town was St. Paul's Ward, with a death-rate of 20·1 per mille per annum, and the unhealthiest Slave Island with 28·6.

58. The following Table G, which is published for the first time, is an attempt to ascertain the comparative healthiness of each ward and race in the city. It is based on the infantile mortality which is about the most sensitive sanitary test available. In the Table G, the Census population, the births and infantile deaths and their rates are given for the three quarters of 1907 by wards and races.

Table C.—The Population at the Census of 1901, the Deaths of Children under One Year, and their Proportion per 1,000 Births registered during the First, Second, and Third Quarters of 1907, amongst the various Races in each Ward of the Colombo Municipality.

** Infantile death-rates have been omitted where the number of births is less than five.

59. Taking the latest quarter, the infantile mortality, which is 298 per 1,000 births in the whole city, exceeds 300 in every ward, except Kollupitiya, and rises as high as 390 in St. Paul's and 479 in St. Sebastian. The order of unhealthiness in descending order this quarter was St. Sebastian, St. Paul's, Slave Island, Pettah, Maradana (exclusive of hospitals), New Bazaar; in the 2nd quarter St. Paul's, St. Sebastian, Slave Island, New Bazaar, Kollupitiya, Pettah; in the 1st quarter St. Paul's, New Bazaar, St. Sebastian, Slave Island. Among the races the Moors lead with the highest infantile mortality, followed by the Tamils and the Malays. The Moor mortality for the whole town in the 3rd quarter was 432; and in some of the wards it rose as high as 773 in St. Sebastian, 667 in Slave Island, and 529 in St. Paul's. The Tamil rate for the town in the quarter was 350, rising to 667 in Maradana and 556 in New Bazaar. The Sinhalese infantile mortality is 282 for the whole city, and is highest in Maradana (396). The Burgher rate is the lowest for the city 116, and the European rate 148, the next lowest.

60. There were no deaths from cholera in the town. One death was registered in the town as due to smallpox. This was of a Moor infant who died at No. 10, Churchyard lane, Slave Island. Four deaths from the same cause occurred at the Infectious Diseases Hospital, Kanatta, to which the patients were removed from the town. (See paragraph 30 above.)

61. Phthisis, bronchitis, and pneumothorax were fatal in 350 cases (against an average of 301 in the corresponding period of the last nine years), diarrhoea and dysentery in 234 (average 251), infantile convulsions in 116 (average 112), fevers in 108 (average 125), debility in 75 (average 101), tetanus in 56 (average 45), old age in 49 (average 62), worms in 46 (average 23), dochmias duodenalis in 10 (average 16), paralysis in 7 (average 13), diseases of parturition in 6 (average 11), and anaemia in 2 (average 11).

62. Thirteen deaths were due to accidents, of which 2 were due to burns and scalds, 1 to gunshot wounds, 1 to an explosion in a pit, 2 to falls of heavy substances, 1 to a fall from a tree, 1 to striking against a fence.

63. Five deaths were attributed to homicide and 2 to suicide.

VIII.—Health of the Principal Towns.

64. This Chapter deals in detail with the Vital Statistics of the several towns of the Island proclaimed under sections 31 to 36 of the Ordinance No. 1 of 1895. This information is separately given for the towns other than Colombo now for the first time. Colombo has been so dealt with since the 2nd quarter of 1887, and the hope I then expressed, to give similar information with respect to all the principal towns of the Island, has now been realized.

65. The Registrars of these towns are qualified medical men. No death occurring there is registered unless the cause is ascertained by the Registrar's personal inspection of the deceased, or certified by a qualified medical man in attendance on the deceased; and no dead body is buried or cremated without registration being effected. This system commenced on January 1, 1893, in the town of Colombo, under the Ordinance No. 20 of 1891, and gradually extended till it embraced 29 towns at the end of the quarter, is unique in the East and has few parallels in the West.

66. We have now complete and trustworthy information as to the mortality in the towns and its causes, and the figures deserve to be considered separately from the statistics of the rest of the Island, in which the registration is not so effective nor the causes of death certified by experts. The statistics of the towns, accordingly, began to be separately tabulated from July last, and have been published in the monthly reports which were then started. The information is now gathered together for the quarter, and should be of use to all interested in the promotion of the public health.

67. No information connected with Vital Statistics is of greater value than that obtained by the registration of the causes of death. Where it has been made accurately for a series of years, you have public documents from which may be derived an accurate knowledge of the comparative prevalence of various diseases, the localities in which they prevail, the sex, age, and condition of life which they attack. You can compare the mortality from each cause in successive years, and test in some measure the effect of sanitary interference of climatic differences and of other agencies by which the prevalence of diseases may be affected. It is thus an invaluable aid to the medical practitioner and the sanitary reformer.

68. Table XIV. in the Appendix shows the population at the Census of 1901, the estimated population at the middle of 1907, the births and deaths registered during the third quarter of 1907, their proportion per 1,000 of the population per annum, the deaths of children under one year of age, and their proportion per 1,000 registered births in each town.

69. The estimated population of the 29 towns is 460,532, or about one-ninth of the total population of the Island. The population of Colombo (176,724) is nearly two-thirds of the population of all the other towns together (283,808).

70. The births registered in the towns during the quarter numbered 3,133—of which 1,654 were of males and 1,479 of females—and corresponded to an annual birth-rate per 1,000 of 26.99. The highest birth-rate for the quarter was in Jaffna (44.08) and the lowest in " Hatton and Dikoya " (15.54). In the other towns the birth-rate ranged from 44.00 in Batticaloa, 36.71 in Hambantota, 36.59 in Puttalam, and 36.56 in Negombo to 18.76 in Kegalla, 18.67 in Anuradhapura, and 17.42 in Nuwara Eliya. Colombo records a rate of 22.94.

71. The number of deaths registered was 3,872—of which 2,218 were of males and 1,654 of females—and corresponded to an annual death-rate of 19.41 per mille. 1,306 of the total deaths or nearly one-third, occurred in hospitals (with 28 deaths in jails), and exaggerated the normal mortality of the towns.

72. Corrected death-rates, as well as crude death-rates, are shown for the several towns. By a corrected rate is meant the rate calculated for the population of each town on the basis that its age-and sex-constitution is the same as for the Island, and excluding from the total deaths those of estate coolies and other persons who are not town residents. The corrected rate should thus furnish a more satisfactory test of the comparative health of towns than the crude rate. I am unable to give the corrected rates for " Hatton and Dikoya " and Kalpitiya towns, because the age- and sex-constitution of their populations was not ascertained at the last Census.

73. The lowest corrected mortality during the quarter was observed in Nuwara Eliya (10.37), and the highest in Vavuniya (64.61). In the other towns the death-rate ranged from 15.33 in Moratnwa, 18.69 in Mannar, 19.55 in Kegalla, and 19.73 in Matara to 44.01 in Anuradhapura, 51.85 in Tangalla, and 52.52 in Kurunegala. Colombo town shows 31.83.

74. In the following Table H the birth and death-rates for each town for the quarter are compared with the rates for the third quarter of last year and the average birth- and death-rates for the corresponding quarters of the preceding nine years.

TABLE H.

| Towns. | Birth-rate per Mille per Annum | | | Death-rate per Mille per Annum | | | | | |

* Births and Deaths for this town being available from 1905 only, the averages shown are for the two years 1905 and 1906.

75. The death-rates shown in this Table are the crude rates (the corrected death-rates not being available for comparison before the middle of this year), and are given inclusive as well as exclusive of hospital and jail deaths.

76. The infantile mortality for the 29 towns was equal to a rate of 224 per 1,000 registered births. In the towns having an estimated population of 5,000 or more the mortality ranged from 391 in Kurunegala and 348 in Batticaloa to 116 in Moratuwa, 109 in Matara, and 65 in Matale. The infantile mortality in the town of Colombo was 298.

77. Table X.V. in the Appendix gives for each town and race the principal causes of deaths registered during the quarter and shows the infantile mortality separately from the other mortality.

78. Out of the 3,872 deaths from all causes in the 29 towns 701 or more than one-sixth were among infants under one year. Of these, the chief causes were 211 convulsions (of which 85 in Colombo, 22 in Galle, 18 in Batticaloa, 13 each in Negombo and Trincomalee, and 12 in Kandy), 158 debility (of which 43 in Colombo, 18 in Jaffna, 17 in Batticaloa, and 14 in Kandy), 69 bronchitis and pneumonia (of which 37 in Colombo and 13 in Galle), 64 prematurity (of which 22 in Colombo, 13 in Jaffna, and 10 in Kandy), 62 diarrhoea (of which 39 in Colombo), 49 tetanus (of which 34 in Colombo), and 10 dysentery (of which 7 in Colombo).

79. Out of the 3,171 deaths of persons one year and over in age, there were 804 due to diarrhoea and dysentery, of which 189 were in Colombo, 84 in Kandy, 52 in Matale, 44 in Galle, 43 in Nawalapitiya, 40 in Kurunegala, 37 in Jaffna, 36 in Gampola, and 32 in Ratnapura ; 303 pneumonia, of which 111 were in Colombo, 27 in Kurunegala, 25 in Galle, 17 in Kandy, 13 in Kalutara, 11 each in Matale and Batticaloa, and 10 in Ratnapura ; 301 phthisis, of which 174 were in Colombo, 33 in Galle, 21 in Kandy, 11 in Jaffna, and 10 in Kalutara ; 133 enteric fever, of which 83 were in Colombo and 11 in Moratuwa ; 122 dochmias duodenalis, of which 95 were among Tamils, almost all of whom were coolies ; 79 remittent fever, of which 25 were in Jaffna, 10 in Colombo, and 9 in Moratuwa ; 76 malarial cachexia ; 76 convulsions, of which 31 were in Colombo and 8 in Jaffna ; 59 simple fever, of which 10 in Colombo, 17 in Galle, and 12 in Trincomalee ; 55 bronchitis, of which 27 were in Colombo and 8 in Jaffna.

80. Thus, of the total number of deaths of all ages in the towns, diarrhoea and dysentery accounted for nearly 23 per cent., bronchitis and pneumonia more than 11 per cent., phthisis nearly 8 per cent., and various kinds of fever more than 7 per cent.

APPENDIX.

Table I.—Area, Estimated Population, and the Number of Marriages, Births, and Deaths registered in the Third Quarter of 1907.

| Province and District. | Area in Square Miles. | Estimated Population on July 1, 1907.* | MARRIAGES. | | | BIRTHS. | | | DEATHS. | | | |

* B'': "corrected death-rate" is here meant the rate calculated for the population of each town on the basis that its age- and sex-constitution is the same as for the whole Island, and also excluding the deaths of estate coolies and other non-residents.

† Includes 13 deaths of Colombo town residents (10 Sinhalese, 1 Tamil, and 2 Moors), which occurred in the Infectious Diseases Hospital, Kanatta (outside the town), and were registered by an extra-urban Registrar.

‡ T'': population of "Hatton and Dikoya" and Kalpitiya towns at the Census of 1901 not being available by age- and sex-constitution, their corrected death-rates cannot be calculated. The death-rate given for "All Towns" is, therefore, independent of these two towns, but is scarcely affected by their rates owing to the smallness of their population.

§ The population of Mannar and Trincomalee towns at the Census of 1891 not being available, no estimate can be made of the rate of growth 1891–1900 or 1901–1907. Their population estimated for 1907 is the Census population of 1901, less (in the case of Trincomalee) the Militario who are no longer stationed there.

Table XV.—Causes of Deaths registered during the Third Quarter of 1907 in each Town of the Island proclaimed under Sections 31-36 of
Ordinance No. 1 of 1895.
