# VITAL STATISTICS OF TOWNS IN CEYLON IN THE MONTH OF JUNE, 1908.

#### REPORT OF THE REGISTRAR-GENERAL.

This report deals with the Vital Statistics of the several towns of the Island proclaimed under sections 31 to 36 of the Ordinance No. 1 of 1895. The Registrars of these towns are qualified medical men. No death occurring there is registered unless the cause is ascertained by the Registrar's personal inspection of the deceased, or certified by a qualified medical man in attendance on the deceased, and no dead body is buried or cremated without registration being affected. This system was commenced on January 1, 1893, in the town of Colombo, under the Ordinance No. 20 of 1891, and has been gradually extended till it now embraces 30 towns.

- 2. Table I. in the Appendix shows the population at the last decennial Census of 1901, and the present estimated population and the births and deaths registered during the month, their rates, and the infantile mortality in each town with mean temperature and rainfall of each town.
  - 3. Table III. gives similar information as regards each ward in the Colombo Municipality.
- 4. The estimated population of the 30 towns is 466,362, or more than one-ninth of the total population of the Island. The population of Colombo (180,262) is nearly two-thirds of the population of all the other towns taken together (286,100).

#### Births.

- 5. The births registered in the 30 towns during the month numbered 1,165—of which 646 were of males and 519 of females—and correspond to an annual birth-rate per 1,000 of 30 39, as against 30 63 during the preceding month. Of the towns (excluding Vavuniya and Lunugala, which have a population under 1,000), the highest birth-rate was observed in Ratnapura (50 83), and the lowest in Nuwara Eliya (4 56), while there were no births recorded in Lunugala. In the other towns the birth-rate ranged from 43 73 in Mannar, 42 59 in Kegalla, 42 40 in Jaffna, and 42 26 in Matara to 20 01 in Badulla, 19 90 in Hambantota, 16 42 in "Hatton and Dikoya," and 14 91 in Kalpitiya.
- 6. The town of Colombo, where the births registered numbered 390—of which 214 were of males and 176 of females—records a birth-rate of 26·32 per mille per annum, as against 24·63 in the preceding month. The highest birth-rate was in Slave Island (28·19), and the lowest in Pettah (6·44). In the other wards the birth-rate ranged from 25·62 in Kotahena, 10·65 in Fort and Galle Face Ward.

#### Deaths.

- 7. The number of deaths registered in the 30 towns during the month was 1,424—of which 738 were of males and 686 of females—and correspond to an annual death-rate of 31 48 per mille, as against 32 07 during the previous month. 460 of the total deaths, or a little less than one-third, occurred in hospitals (with 6 deaths in jails), and exaggerated the normal mortality of the towns.
- 8. Corrected death-rates as well as crude death-rates are shown. By a corrected rate is meant the rate calculated for the population of each town on the basis that its age- and sex-constitution is the same as for the Island, and also excluding from the total deaths those of estate coolies and other persons who are not town residents. The corrected rate should thus furnish a more satisfactory test of the comparative health of the towns than the crude rate.
- 9. Among the towns the lowest corrected mortality during the month was recorded in Chilaw (2·74) and the highest in Anuradhapura (60·63). In the other towns the death-rate ranged from 14·80 in Kegalla, 17·83 in Moratuwa, 19·55 in Tangalla, and 19·56 in Matara to 41·61 in Mannar, 44·49 in Batticaloa, 47·06 in Ratnapura, 47·13 in Matale, and 50·27 in Gampola.
- 10. In the town of Colombo, the deaths registered numbered 498—of which 260 were of males and 238 of females—corresponding to an annual death-rate of 34.85 per 1,000 per annum, as against 35.50 during the preceding month. In Table III., which gives the death-rates for the several wards of the town, I am able to give only the crude rates because the age- and sex-constitution of the ward populations at the last Census has not been recorded. Omitting the Fort and Galle Face Ward and the Pettah Ward, which contain a population mainly adult male and floating, St. Paul's shows this month the lowest crude death-rate (18.96) and Kotahena the highest rate (29.47). In the other wards the death-rate ranged from 26.04 in Kollupitiya to 27.34 in New Bazaar.

#### Infantile Mortality.

- 11. The infantile mortality for the 30 towns in the month was equal to a rate of 240 per 1,000 births registered. In the towns having an estimated population of 5,000 or more the mortality ranged from 333 in Batticaloa, 317 in Jaffna, 273 each in Puttalam and Badulla to 131 in Moratuwa, 109 in Matara, 88 in Kalutara, and 59 in Kurunegala.
- 12. The infantile mortality in the town of Colombo was 318 per 1,000 births registered. The infantile mortality given for each ward in Table III., enables a comparison to be made of the health of the various wards. The lowest mortality was observed in St. Paul's (264 per 1,000), and the highest infantile mortality was in St. Sebastian (500) followed by New Bazaar (428).

#### Causes of Death.

- 13. Table II. in the Appendix gives for each town and race the principal causes of deaths registered during the month, and shows the infantile mortality separately from the other mortality.
  - 14. Table IV, gives similar information for each ward and race of the Colombo Municipality.
- 15. Infants.—Out of the 1,424 deaths from all causes in the 30 towns, 280 or nearly one-fifth were among infants under one year. Of these the chief causes were 82 Convulsions (of which 41 in Colombo, 7 in Kandy, and 4 in Galle), 54 Debility (of which 15 in Colombo, 12 in Jaffna, 6 in Batticaloa, and 4 each in Negombo and Galle), 28 Prematurity (of which 9 in Jaffna, 8 in Kandy, and 6 in Colombo), 27 Diarrhœa (of which 16 in Colombo, 3 in Galle, and 2 each in Nuwara Eliya and Jaffna), 27 Pneumonia (of which 12 in Colombo, 4 in Kandy, and 3 in Moratuwa), 17 Tetanus (of which 12 in Colombo and 4 in Jaffna), and 13 Bronchitis (of which 8 in Colombo and 2 in Jaffna).
- 16. In the Town of Colombo, Convulsions accounted for the highest mortality, and the cases were distributed as follows:—11 in Maradana exclusive of hospitals, 9 in Kotahena, 6 in New Bazaar, 5 in Slave Island, 4 in Kollupitiya, 2 each in St. Sebastian and St. Paul's, and 1 in Maradana hospitals. The next highest mortality was from Diarrheea (6 in Kotahena 3 each in Maradana hospitals and Maradana exclusive of hospitals, and 2 each in Slave Island and Kollupitiya), followed by Debitity (4 in Slave Island 3 each in St. Paul's and Maradana hospitals, and 2 in St. Sebastian), Tetanus (4 in Kotahena and 2 each in Pettah, St. Paul's, and New Bazaar), and Pneumonia (3 in New Bazaar and 2 each in Kotahena, Maradana exclusive of hospitals, and Slave Island).
- 17. One year and over.—Out of the 1,144 deaths of persons one year and over in age, there were 237 due to Diarrheea and Dysentery, of which 52 were in Colombo, 21 in Ratnapura, 16 each in Kandy and Galle, 14 in Jaffna, 13 in Kegalla, 12 in Matale, and 10 in Kurunegala; 14 due to Pneumonia of which 65 were in Colombo, 11 in Trincomalee, 10 in Galle, 6 in Moratuwa, and 5 in Matale; 90 to Phthisis, of which 41 were in Colombo, 12 in Galle, 8 in Kandy, 5 in Jaffna, and 4 in Kurunegala; 51 to Enteric Fever, of which 38 were in Colombo and 6 in Moratuwa; 51 to Malarial Cachexia of which 16 were in Matale, 5 each in Batticaloa and Kurunegala, and 4 in Puttalam; 44 to Remittent Fever, of which 11 were in Galle, 8 in Batticaloa, and 6 in Jaffna; 41 to Dochmius Duodenalis, of which 35 were among Tamils almost all of whom are coolies; 24 to Bronchitis, of which 11 were in Colombo and 2 each in Moratuwa, Trincomalee, Kurunegala, and Kegalla; 17 to Bright's Disease and Nephritis, of which 4 were in Colombo, 3 in Panadure, and 2 each in Galle and Anuradhapura; 13 to Anæmia, of which 4 were in Colombo and 2 each in Negombo, Moratuwa, and Gampola; and 10 to simple fever, of which 5 were in Jaffna and 4 in Kandy.
- 18. In the Town of Colombo the highest mortality was from Pneumonia (65), of which 18 were in Maradana hospitals, 17 in Kotahena, 7 in St. Paul's, 6 each in New Bazaar and Maradana exclusive of hospitals, 5 in Slave Island, and 4 in Kollupitiya, followed by Phthisis 41 (8 in Maradana exclusive of hospitals, 7 in Maradana hospitals, 5 each in St. Paul's and New Bazaar, and 4 each in St. Sebastian, St. Paul's, and Kollupitiya). Enteric Fever accounted for 38 deaths, the highest yet recorded in any month of this year, and the cases were distributed as follows:—14 in Maradana hospitals, 8 in Maradana exclusive of hospitals, 4 each in St. Sebastian, St. Paul's, and Kollupitya, 3 in Slave Island, and 1 in New Bazaar. Diarrhœa accounted for 35 deaths, of which 10 were in Kollupitya, 5 of this number being patients removed from the Lunatic Asylum to the Infectious Diseases Hospital, Kanatta, 9 in Kotahena, 7 in Maradana hospitals, and 6 in Slave Island; Dysentery 17, of which 11 were in Maradana hospitals and 3 in St. Paul's; and Bronchitis 11, of which 3 were in St. Sebastian and 2 each in Kotahena, New Bazaar, and Maradana exclusive of hospitals.
- 19. Percentage of principal causes of death at all ages.—Of the total number of deaths at all ages in the towns, Diarrhea and Dysentery accounted for nearly 19 per cent., Bronchitis and Pneumonia more than 14 per cent., Debility more than 8 per cent., various kinds of fever nearly 8 per cent., Infantile Convulsions more than 7 per cent., and Phthisis more than 6 per cent.
- 20. Of the total number of deaths at all ages in the town of Colombo, Bronchitis and Pneumonia accounted for more than 19 per cent., Diarrhea and Dysentery nearly 14 per cent., Infantile Convulsions more than 9 per cent., Phthisis and various kinds of fever more than 8 per cent., and Debility more than 4 per cent.

Registrar-General's Office, Colombo, July 14, 1908. P. ARUNACHALAM, Registrar-General.

Tables, when the results and Deaths registered during June, 1908, and their Proportion per 1,000 of the Population per Annum, and the Deaths of Children under One Year and their Proportion per 1,000 Registered Births, and the Mean Temperature and Rainfall observed in each Town of the Island proclaimed under One Year and their Proportion of the Island proclaimed.

By "corrected rate" is here meant the rate calculated for the population of each town on the basis that its age- and sex-constitution is the same as for the whole Island, and also

excluding the deaths of estate coolies and other non-vesidents.

Includes 8 deaths of Colombo town residents (all adults ), which occurred in the Infectious Diseases Hospital, Kanatta (outside the town), and were registered by an extra-urban Registrar.

The population of "Hatton and Dikoya," Kalpitiya, and Lunugala towns at the Census of 1901 not being available by age- and sex-constitution, their corrected death-rates cannot be calculated. The death-rate given for "All Towns" is, therefore, independent of these three towns, but is scarcely affected by their rates owing to the smallness of their population of the period of this year the Census of 1891 not being available, no estimate can be made of the rate of growth 1891-1900 or 1901-1908. Their population of Mannas and Trincomalee towns as not enumerated at the Census of 1901. The figure given is of the population of Lungala town (as now constituted) was not enumerated at the Census of 1901. The figure given is of the population of Lungala town (as now constituted) was not enumerated at the Census of 1901. The figure given is of the population of Lungala town (as now constituted) was not enumerated at the Census of 1901.

\*\* In each of these columns blanks appear against towns which do not possess observatories or rain gauges.

\* For explanation of "corrected death-rate" vide Table I. foot-note marked (\*). The population of the several wards of the town at the Census of 1901 not being available by age-and sex-constitution, their corrected death-rates cannot be calculated.

† Infantile death-rates have been omitted where the number of births is less than five.

† Includes eight deaths of town residents, which occurred in the Infoctious Diseases Hospital, Kanatta, and were registered by an extra-urban Registrar.

† The population of these two wards being a fluctuating one, their estimated population cannot be calculated. Hence the Census figures are retained.

Table IV.—Causes of Deaths registered during the Month of June, 1908; in each Ward and Race of the Colombo Municipality.
