NOTIFICATIONS UNDER "THE PATENTS ORDINANCE, 1906."

THE following specification has been accepted :---

No. 1,057 of October 30, 1908.

The Auto-Hydraulic, Limited.—" Improvements in or relating to Liquid-Containers and Valve-Mechanism therefor particularly applicable for use in water and like elevators."

Abstract.—When water is allowed to fall from one level to another in a pipe, arrangements can be devised to draw in air and to compress it in a vessel at the lower level. That compressed air can be conveyed to another place at a different level and be used to force water or other liquid from that place to a higher level.

This invention relates to devices for making use of that compressed air in that way. Two containers are provided so that when one is being emptied of water or other liquid by forcing it out by the compressed air the other is being filled. Double valves for controlling admission of air first to one container and then to the other, to be blown or sucked over when one vessel is emptied of water or other liquid and air escapes through the liquid conduit of that container, are referred to but not described in detail.

The apparatus consisting of the two containers the conduit for the liquid, a double valve actuated by the pressure applied to the containers and a double valve controlling the air pressure in the way described, is the invention.

Three claims : one sheet of drawings.

E. HUMAN, Registrar of Patents.
