G. FRED BULLIENS,
Superintendent of Works.

Health Officer's Report for February, 1909.

Scavenging.—The scavenging was more satisfactorily done than in the previous month.

Water Supply.—Good, but not sufficient.

Drainage.—The drains were regularly flushed and well kept during the month.

Alleys.—These were kept in a sanitary state as possible.

Bakeries.—Clean and well kept.

Cooly Lines.—These were kept clean, and the grounds attached to them cleaned and swept daily.

Night soil Depot.—The trenching grounds will, in the opinion of the Superintendent, Municipal Works, be exhausted in two or three years. It is advisable to acquire suitable land in the same locality as soon as possible.

Dairies.—Well kept.

Public Latrines.—I have received several complaints about the offensive odours from the market latrines, especially towards evening. The latrine accommodation here is absolutely insufficient, particularly on vegetable days; these latrines are used not only by stall holders and vegetable vendors, but also by boutique-keepers, rickshaw men, servants, and others who have no latrine accommodation in their own houses. It is very important that there should be no offensive odours near the market where foodstuffs are exposed for sale and, therefore, I suggest that none but stall holders should be permitted to use these latrines, and that latrine accommodation be provided for the others on a suitable spot not far from the market.

Public Market.—Clean and well kept.

Boutiques.—All well kept. The articles exposed for sale were of good quality and fit for human consumption.

Food Supply.—The food supply was good. 499 cattle, 77 buffaloes, 91 sheep, and 200 goats were slaughtered during the month. The salt and dry fish exposed for sale were of good quality and fit for food.

Public Health.—The health of the town during the month was satisfactory. One case of enteric fever, 11 cases of chickenpox, 4 cases of measles, and 1 case of smallpox were reported. The smallpox patient is a blind beggar who travels throughout the Province. He states that he lived in Kandy during the whole of January and left for Hatton on the 29th. He returned to Kandy on February 1 with fever and developed the rash on the 4th. His statement cannot be relied on. All necessary steps were taken to prevent the spread of infection.

Health Officer.
