40. *Failing such registration, shares may be sold by the Company.*—If any person who shall become entitled to be registered in respect of any share under clause 39 shall not, from any cause whatever, within twelve calendar months after the event on the happening of which his title shall accrue, be registered in respect of such share, or if in the case of the death of any Shareholder no person shall, within twelve calendar months after such death, be registered as a Shareholder in respect of the shares of such deceased Shareholder, the Company may sell such shares, either by public auction or private contract, and give a receipt for the purchase money, and the purchaser shall be entitled to be registered in respect of such share, and shall not be bound to inquire whether the events have happened which entitled the Company to sell the same, and the nett proceeds of such sale, after deducting all expenses and all moneys in respect of which the Company is entitled to a lien on the shares so sold, shall be paid to the person entitled thereto.

SHARES (SURRENDER AND FORFEITURE).

41. *The Directors may accept surrender of shares.*—The Directors may accept, in the name and for the benefit of the Company, and upon such terms and conditions as may be agreed upon, a surrender of the shares of Shareholders who may be desirous of retiring from the Company.

42. *If call or instalment be not paid, notice to be given to Shareholder.*—If any Shareholder fail to pay any call or instalment on or before the day appointed for the payment of the same, the Directors may, at any time thereafter during such time as the call or instalment remains unpaid, serve a notice on such Shareholder or his executors or administrators or the trustee or assignee in his bankruptcy requiring him to pay the same, together with any interest that may have accrued, and all expenses that may have been incurred by the Company by reason of such non-payment.

Terms of notice.—The notice shall name a day (not being less than one month from the date of the notice) on, and a place or places at, which such call or instalment and such interest and expenses as aforesaid are to be paid. The notice shall also state that, in the event of non-payment at or before the time and at the place appointed, the shares in respect of which the call was made or instalment is payable will be liable to be forfeited.

In default of payment shares to be forfeited.—If the requisition of such notice as aforesaid be not complied with, every or any share or shares in respect of which such notice has been given may at any time thereafter, before payment of calls or instalments, interest, and expenses due in respect thereof, be declared forfeited by a resolution of the Board to that effect.

Shareholder still liable to pay money owing at time of forfeiture.—Any Shareholder whose shares have been so declared forfeited shall, notwithstanding, be liable to pay and shall forthwith pay to the Company all calls, instalments, interest, and expenses owing upon or in respect of such shares at the time of the forfeiture, together with interest thereon from the time of forfeiture until payment, at 9 per cent. per annum, and the Directors may enforce the payment thereof if they think fit.

43. *Surrendered or forfeited shares to be property of Company, and may be sold, &c.*—Every share surrendered or so declared forfeited shall be deemed to be the property of the Company, and may be sold, re-allotted, or otherwise disposed of upon such terms and in such manner as the Board shall think fit.

44. *Effect of surrender or forfeiture.*—The surrender or forfeiture of a share shall involve the extinction of all interest in, and also of all claims and demands against, the Company in respect of the share and the proceeds thereof, and all other rights incident to the share, except only such of those rights (if any) as by these presents are expressly saved.

45. *Certificate of surrender or forfeiture.*—A certificate in writing under the hands of two of the Directors and of the Secretary or Secretaries that a share has been duly surrendered or forfeited, stating the time when it was surrendered or forfeited, shall be conclusive evidence of the facts therein stated as against all persons who would have been entitled to the share but for such surrender or forfeiture, and such certificate and the receipt of the Company for the price of such share shall constitute a good title to such share, and a certificate of proprietorship shall be delivered to any person who may purchase the same from the Company, and thereupon such purchaser shall be deemed the holder of such share, discharged from all calls due prior to such purchase; and he shall not be bound to see to the application of the purchase money, nor shall his title to such share be affected by any irregularity in the proceedings in reference to such forfeiture or sale.

Forfeiture may be remitted.—The Directors may in their discretion remit or annul the forfeiture of any share within six months from the date thereof upon the payment of all moneys due to the Company from the late holder or holders of such share or shares, and all expenses incurred in relation to such forfeiture, together with such further sum of money by way of redemption money for the deficit, as they shall think fit, not being less than 9 per cent. on the amount of the sums wherein default in payment had been made, but no share *bona fide* sold or re-allotted, or otherwise disposed of under Article 43 hereof, shall be redeemable after sale or disposal.

46. *Company's lien on shares.*—The Company shall have a first charge or paramount lien upon all the shares of any holder or joint-holders for all moneys for the time being due to the Company by such holder, or by all or any of such joint-holders respectively, either in respect of such shares or of other shares held by such holder or joint-holders or otherwise, and whether due from any such holder individually or jointly with others, including all calls, resolutions for which shall have been passed by the Directors, although the times appointed for the payment thereof shall not have arrived; and where any share is held by more persons than one, the Company shall be entitled to the said charge or lien in respect of any money due to the Company from any of such persons. And the Directors may decline to register any transfer of shares subject to such charge or lien.

47. *Lien how made available.*—Such charge or lien may be made available by a sale of all or any of the shares subject to it, provided that no such sale shall be made except under a resolution of the Directors, and until notice in writing shall have been given to the indebted Shareholder or his executors or administrators, or the assignee or trustee in his bankruptcy, requiring him or them to pay the amount for the time being due to the Company, and default shall have been made for twenty-eight days from such notice in paying the sum thereby required to be paid. Should the Shareholder over whose share the lien exists be in England or elsewhere abroad, sixty days' notice shall be allowed him.

48. *Proceeds how applied.*—The nett proceeds of any such sale as aforesaid under the provisions of Articles 43 and 47 hereof shall be applied in or towards satisfaction of such debts, liabilities, or engagements, and the residue (if any) paid to such Shareholder or his representatives.

49. *Certificate of sale.*—A certificate in writing under the hands of two of the Directors and of the Secretary or Secretaries that the power of sale given by clause 47 has arisen, and is exercisable by the Company under these presents, shall be conclusive evidence of the facts therein stated.

50. *Transfer on sale how executed.*—Upon any such sale two of the Directors may execute a transfer of such share to the purchaser thereof, and such transfer, with the certificate last aforesaid, shall confer on the purchaser a complete title to such shares.

PREFERENCE SHARES.

51. *Preference and deferred shares.*—Any shares from time to time to be issued or created may from time to time be issued with any such right of preference, whether in respect of dividend or of payment of capital, or both, or any such other special privilege or advantage over any shares previously issued or then about to be issued (other than shares issued with a preference), or at such a premium, or with such deferred rights as compared with any shares previously issued or then about to be issued, or subject to any such conditions or provisions, and with any such right or without any right of voting, and generally on such terms as the Company may from time to time by special resolution determine.

52. *Resolution affecting a particular class of shares.*—If at any time by the issue of preference shares or otherwise the capital is divided into shares of different classes, then the holders of any class of shares may, by an extraordinary resolution passed at a meeting of such holders, consent, on behalf of all the holders of shares of the class, to the issue or creation of any shares ranking equally therewith, or having any priority thereto, or to the abandonment of any preference or priority, or of any accrued dividend, or the reduction for any time or permanently of the dividends payable thereon, or to any scheme for the reduction of the Company's capital affecting the class of shares; and such resolution shall be binding upon all the holders of shares of the class, provided that this Article shall not be read as implying the necessity for such consent in any case in which but for this Article the object of the resolutions could have been effected without it.

53. *Meeting affecting a particular class of shares.*—Any meeting for the purpose of the last preceding clause shall be convened and conducted in all respects as nearly as possible in the same way as an Extraordinary General Meeting of the Company, provided that no member, not being a Director, shall be entitled to notice thereof or to attend thereat, unless he be a holder of shares of the class intended to be affected by the resolution, and that no vote shall be given except in respect of a share of that class, and that at any such meeting a poll may be demanded in writing by any members personally present and entitled to vote at the meeting.

CALLS.

54. *Directors may make calls.*—The Directors may from time to time make such calls as they think fit upon the registered holders of shares in respect of moneys unpaid thereon, and not by the conditions of allotment made payable at fixed times; and each Shareholder shall pay the amount of every call so made on him to the persons and at the times and places appointed by the Directors, provided that two months' notice at least shall be given to the Shareholders of the time and place appointed for payment of each call.

Calls, time when made.—A call shall be deemed to have been made at the time when the resolution authorizing the call was passed at a Board Meeting of the Directors.

Extension of time for payment of call.—The Directors shall have power in their absolute discretion to give time to any one or more Shareholder or Shareholders, exclusive of the others, for payment of any call or part thereof on such terms as the Directors may determine. But no Shareholder shall be entitled to any such extension except as a matter of grace or favour.

55. *Interest on unpaid call.*—If the sum payable in respect of any call or instalment is not paid on or before the day appointed for the payment thereof, the holder for the time being of the share in respect of which the call shall have been made, or the instalments shall have been due, shall pay interest for the same at the rate of 9 per centum per annum from the day appointed for the payment thereof to the time of the actual payment, but the Directors may, when they think fit, remit altogether or in part any sum becoming payable for interest under this clause.

56. *Payments in anticipation of calls at interest.*—The Directors may, at their discretion, receive from any Shareholder willing to advance the same, and upon such terms as they think fit, all or any part of the amount of his shares beyond the sum actually called up.

BORROWING POWERS.

57. *Power to borrow.*—The Directors shall have power to procure from time to time, in the usual course of business, such temporary advances as they may find necessary or expedient for the purpose of defraying the expenses of working the Company's business, or of erecting, maintaining, improving, or extending buildings, machinery, or otherwise. Also from time to time at their discretion to borrow or raise from the Directors or other persons any sum or sums of money for the purposes of the Company, but so that the amount at any one time owing in respect of moneys so borrowed or raised shall not, without the sanction of a General Meeting, exceed the sum of One hundred thousand Rupees (Rs. 100,000). With the sanction of a General Meeting the Directors shall be entitled to borrow such further sum or sums and at such rate of interest as such meeting shall determine. The Directors may, for the purpose of securing the repayment of any such sum or sums of money so borrowed or raised, create and issue any bonds, mortgages, debentures, mortgage debentures, debenture stock, bonds, or obligations of the Company charged upon all or any part of the undertaking, revenue, property, and rights or assets of the Company (both present and future), including uncalled capital or unpaid calls, or give, accept, or endorse on behalf of the Company any promissory notes or bills of exchange. Provided also that before the Directors execute any mortgage or issue any debentures they shall obtain the sanction thereto of the Company in General Meeting whether Ordinary or Extraordinary. Any such securities may be issued either at par or at a premium or discount, and may from time to time be cancelled or discharged, varied or exchanged, as the Directors may think fit, and may contain any special privileges as to redemption, surrender, drawings, allotment of shares, or otherwise. Every debenture or other instrument issued by the Company for securing the payment of money may be so framed that the moneys thereby secured shall be assignable free from any equities between the Company and the person to whom the same may be issued. A declaration under the Company's seal contained in or endorsed upon any of the documents mentioned in this Article and subscribed by two or more of the Directors or by one Director and the Secretary or Secretaries, to the effect that the Directors have power to borrow the amount which such document may represent, shall be conclusive evidence thereof in all questions between the Company and its creditors, and no such documents containing such declaration shall, as regards the creditor, be void on the ground of its being granted in excess of the aforesaid borrowing power, unless it shall be proved that such creditor was aware that it was so granted.

MEETINGS.

58. *First General Meeting.*—The First General Meeting of the Company shall be held at such time, not being more than twelve months after the registration of the Company, and at such place as the Directors may determine.

59. *Subsequent General Meeting.*—Subsequent General Meetings shall be held once in every year at such time and place as may be prescribed by the Company in General Meeting, and if no time or place is prescribed, at such time and place as may be determined by the Directors.

65. *Business requiring and not requiring notification.*—Every Ordinary General Meeting shall be competent, without special notice having been given of the purposes for which it is convened, or of the business to be transacted thereat, to receive and discuss any report and any accounts presented thereto by the Directors,

74. *Poll.*—If a poll be duly demanded, the same shall be taken in such manner and at such time and place as the Chairman shall direct, and the result of the poll shall be deemed to be the resolution of the meeting at which the poll was demanded. 75. *Poll how taken.*—If at any meeting a poll be demanded by notice in writing signed by some Shareholder present at the meeting and entitled to vote, which notice shall be delivered during the meeting to the Chairman, the meeting shall, if necessary, be adjourned, and the poll shall be taken at such time and in such a manner as the Chairman shall direct, and in such case every Shareholder shall have the number of votes to which he may be entitled as hereinafter provided; and in case at any such poll there shall be an equality of votes, the Chairman of the meeting at which such poll shall have been demanded shall be entitled to a casting vote in addition to any votes to which he may be entitled as a Shareholder and proxy and attorney, and the result of such poll shall be deemed to be the resolution of the Company in such meeting.

NOTIFICATIONS UNDER "THE PATENTS ORDINANCE, 1903."

THE following specifications have been accepted :—

No. 1,048 of September 14, 1908.

George Smith Brown.—"A rubber tapping knife."

Abstract.—The tapping knife consists of handle and shank and a hexagonally shaped frame with a cross bar at the end of the shank. A double edged, or quadruple edged, cutting blade of rectangular shape is fixed across the middle of that frame by means of a screwed bolt at the centre and recesses in the edges of the frame. The hexagonal frame, besides serving to carry the blade, serves for providing guards to regulate the depth of the cut. The knife may be pushed or pulled. The blades are detachable and reversible, and may be made flat or sloping.

No. 1,074 of March 12, 1908.

Richard Bowen.—"Apparatus to be employed for building walls of concrete or the like."

Abstract.—A mould is formed by a frame work (preferably of aluminium or magnalium for the sake of lightness) consisting of sides and ends hinged and clamped ; and a tramway for moving the mould along the part of the wall already built is provided. The construction of the mould formed and used in the way described is claimed.

Seven claims ; three sheets of drawings.

THE following specifications have been accepted :—

No. 1,087 of May 14, 1909.

Wilmot Arthur de Silva—"A latex extractor."

Abstract.—A combination of a curved guide gauge forming a stock to hold a toothed cutting wheel to incise the bark of trees; an adjustable arrangement to determine the depths of the incisions into the bark of trees; and an adjustable arrangement to determine the distance one line of incisions shall be from another line of incisions in the bark of trees.

The adjustment for the depth of incision is made by mounting the wheel on a spindle set eccentric to its axis of revolution and revolving it by finger and thumb. The spindle is fixed in position by a cottar pin operated by a thumb screw.

The adjustment to determine the distance one line of incisions shall be from another is made by providing for the spindle carrying the toothed wheel to slide endwise by being pushed by finger and thumb and fixed in position by the above mentioned cottar pin.

One claim : two sheets of drawings.

No. 1,088 of May 21, 1909.

The Imperial Writing Machine Co., Ltd.—"Improvements in Typewriters."

Abstract.—This invention has for its object to adapt the adjustable tabulator stops to be always available and readily moved from place to place to set different widths of margins.

It consists of a rod parallel to the tabulator bar, on which are threaded stops having large eyes to enable freedom of movement to be obtained; those stops being readily set in place at different positions along the tabulator bar, and when removed hanging freely on the above named rod without risk of being lost.

Two claims : one sheet of drawings.

No. 1,089 of May 22, 1909.

John Allan Stuart and Mailland Shives Milne.—"An apparatus for exhibiting numbers, letters, or signs in several directions simultaneously."

Abstract.—The inventors claim a general application for the apparatus, but particularly for the purpose of exhibiting, in several directions, at any or all stages of a match, the "points" and "games" in Lawn Tennis. The drawings show the apparatus designed for this latter purpose which will be described here.

The apparatus consists of a fixed cylinder with its axis vertical and two outer rotatable shells each half the length of the fixed cylinder. The outer shells are pierced with openings: the inner cylinder is provided with figures and letters in rows and columns arranged in the four quadrants of the cylindrical surface, the upper half having figures to indicate "games," and the lower half figures and letters to indicate "points." When the upper shell is rotated and stopped at a definite position, fixed by a pointer working on a dial plate at the upper end of the cylinder, certain figures will be exhibited through the openings pierced in the upper outer shell; and if there are four such openings in each row at 90° apart the same certain figure indicating the "games" will be exhibited towards the four points of the compass, and no other of those figures will be exposed if the other rows of figures are staggered. Similarly with the lower shell, for which a separate pointer and dial plate is provided concentric with the other, and by means of which the "points" are exhibited towards the four points of the compass.

One claim : three sheets of drawings.

No. 1,092 of May 28, 1909.

Marconi's Wireless Telegraph Co., Ltd.—"Improvements in Wireless Telegraphy."

Abstract.—It has before been suggested to connect the aerial of a wireless telegraph station to the transmitting and to the receiving circuits for small portions of a second alternately and successively for the purpose of duplex telegraphy but heretofore it has been necessary to synchronise the instruments at the two stations in such a manner that when at one station the transmitter is operative and the receiver inoperative at the other station the receiver shall be operative and the transmitter inoperative.

The object of this invention is to avoid all necessity of synchronism which is very difficult to attain in practice, and for this purpose there is provided at each of two or more stations, transmitting and receiving apparatus which are rendered operative and inoperative alternately to each other in rapid succession, the operative periods of the transmitting apparatus being considerably shorter than those of the receiving apparatus, while the transmitting apparatus is such that the making of each sign occupies several operative periods and that such operative periods do not synchronise with those of the apparatus at any of the other stations.

In carrying out the invention it is preferred to employ for transmitting, the known apparatus which consists of a rotating disc having teeth or studs which cause groups of electrical oscillations to be generated at regular short intervals and for the purposes of the present invention one or more commutators are rotated synchronously with the studded wheel in such a way that they cause the receiving apparatus to be rendered operative only during the intervals between the discharges and to be rendered inoperative during the short periods when the discharges are taking place. The commutators may be made to rotate synchronously with the studded wheel or disc either by coupling them mechanically or by driving them by a synchronous motor which is worked from an alternator mechanically coupled to the disc. The commutators may render the receiver periodically inoperative either directly or indirectly as by periodically making or breaking a local circuit or an intermediate circuit which renders the receiver inoperative or by any combination of these local or intermediate

circuits. Or the commutators may render the receiver periodically inoperative by causing the aerial to be connected alternately to the transmitting and receiving apparatus. Or an entirely separate aerial at any convenient distance from the transmitting aerial may be used for receiving and the commutator made to periodically disconnect the receiving apparatus and if desirable earth the receiving aerial during the short periods the transmitting aerial is radiating. Whether using one or two aerials the commutator is preferably caused to render the receiver periodically inoperative either by disconnecting or by short circuiting the receiver and indicator which it actuates or by any combination of these methods the exact method employed depending mainly upon the nature of the receiver and indicator used. It is evident that if the two discharges which generate the electrical waves at two stations occur simultaneously neither station will be able to receive from the other, but this will hardly ever occur in practice if the speeds of the discs are unequal the periods of time during which the receiver is operative being of much longer duration than those during which the oscillations are produced. By making the ratio of the speeds of the discs at the stations the same or nearly the same as the ratio of the time between two discharges to the time between two discharges plus the time of one discharge and also by making the speeds of the disc at the stations sufficient to ensure that more than one discharge takes place for every dot signalled interference at either station from its own commutator can be entirely avoided. Thus supposing the interval between two discharges is nine times the duration of one discharge and the speeds of the discs at the stations are as ten is to nine the station with the faster disc will only miss one out of nine discharges from the station with the slower disc and the station with the slower disc will miss one out of ten discharges from the station with the faster disc. If therefore every signal consists of more than one discharge neither station will ever miss a signal from the other.

The claims are for stations and combinations of stations provided with apparatus for doing this. For example claim 5 is as follows :—

A station for duplex wireless telegraphy provided with a transmitter comprising a disc having studs round its periphery and means for driving the disc rapidly between the terminals of the oscillation circuit and with one or more commutators which are coupled mechanically or electrically so as to rotate in synchronism with the disc and disconnect an aerial or otherwise render the receiver inoperative during the times the studs on the disc bridge the gap in the oscillation circuit of the transmitter but connect an aerial or otherwise render the receiver operative during the times the studs on the disc are not bridging the gap in the oscillation circuit of the transmitter, the latter times being considerably longer than the former substantially as described.
