

SUPPLEMENT
to
The Ceylon Government Gazette,
PART I.

No. 6,324 — FRIDAY, AUGUST 20, 1909.

**VITAL STATISTICS OF TOWNS IN CEYLON IN THE
MONTH OF JULY, 1909.**

Report of the Registrar-General.

THIS Report deals with the Vital Statistics of the 31 principal towns of the Island proclaimed under sections 31 to 36 of the Ordinance No. 1 of 1895.

Births.

2. The births registered in the 31 towns during the month numbered 1,091 (583 males and 508 females), and were equal to an annual rate of 26·52 per 1,000, against 25·92 during the preceding month, 27·54 in the corresponding month of last year, and 30·37 the monthly average for the 24 months, July, 1907, to June, 1909. Of the towns (excluding Vavuniya and Lunugala, which have a population under 1,000), the highest birth-rate was in Mullaithivu (49·81, average 31·67), and the lowest in Kegalla (4·52, average 27·77).

3. In the city of Colombo the births numbered 368 (188 males and 180 females), and were equal to an annual rate of 23·56 per 1,000, against 25·80 in the preceding month, 20·56 in the corresponding month of last year, and 25·18 the monthly average. Of the wards (omitting Fort and Galle Face and the Pettah, which contain a population mainly adult and floating), the highest birth-rate was in New Bazaar (25·96, average 23·13), and the lowest in St. Paul's (13·59, average 18·31).

Deaths.

4. The deaths registered in the 31 towns during the month numbered 1,479 (841 males and 638 females), and were equal to an annual rate of 29·85 per 1,000, against 29·06 during the preceding month, 32·58 in the corresponding month of last year, and 32·29 the monthly average. Excluding Vavuniya and Lunugala, the highest death-rate was in Batticaloa (80·95 or more than double the average 36·16), followed by Anuradhapura (72·62, average 59·82), and the lowest in Kegalla (14·13, average 23·48). The unhealthiness of Batticaloa town is abnormal, and has been increasing since April last, when the rate was 45·42. In the month under review there appears to have been an epidemic of dysentery causing 22 deaths, and pneumonia causing 11 deaths.

5. In the city of Colombo the deaths registered numbered 548 (331 males and 217 females), and were equal to an annual rate of 32·35 per 1,000, against 33·94 during the preceding month, 39·29 in the corresponding month of last year, and 35·04 the monthly average. The city was thus healthier than usual. Omitting the Fort and Galle Face ward and the Pettah ward, the lowest death-rate was in Kollupitiya (19·45, average 21·67), and the highest in Slave Island (29·60, average 28·42).

Infantile Mortality.

6. The infantile mortality of the 31 towns was equal to a rate of 271 per 1,000 births registered, against 277 in the previous month, 294 in the corresponding month of last year, and 254 the monthly average. In the towns having an estimated population of 5,000 or more, the infant mortality ranged from 448 in Batticaloa (average 343) to 103 in Trincomalee (average 269).

7. The infantile mortality in the city of Colombo was 364 per 1,000 births registered, against 323 in the previous month, 430 in the corresponding month of last year, and 329 the monthly average, and ranged from 562 in Slave Island (average 357) to 384 in San Sebastian (average 323) and 125 in Pettah (average 440).

Causes of Death.

8. Infants.—Out of the 1,479 deaths from all causes at all ages in the 31 towns, 296 were among infants under one year. Of these, the chief causes were 95 *Convulsions* (38 in Colombo, 12 in Galle, 7 in Matara, 6 in Kandy); 42 *Debility* (15 in Colombo, 7 in Batticaloa); 32 *Pneumonia* (20 in Colombo, 3 each in Moratuwa and Kandy).

9. Out of the 548 deaths from all causes at all ages in the city of Colombo, 134 were among infants under one year. Of these, the chief causes were 38 *Convulsions* (10 in Maradana exclusive of hospitals, 7 each in New Bazaar and Slave Island, 6 in Kotahena, 5 in Kollupitiya); 20 *Pneumonia* (6 in Kotahena, 4 in Slave Island); 17 *Tetanus* (5 each in Kotahena and New Bazaar); 15 *Bronchitis* (4 in New Bazaar, 3 each in San Sebastian and Kotahena).

10. **General Mortality (One Year and over).**—Out of the 1,183 deaths of persons one year and over in age, there were 166 from *Pneumonia* (of which 62 in Colombo, 12 in Kandy, 11 in Batticaloa); 140 from *Diarrhoea*; 134 from *Phthisis* (of which 89 in Colombo, 9 in Galle); 127 from *Dysentery*; 39 from *Enteric Fever* (of which 23 in Colombo, 4 in Moratuwa).

11. The highest mortality in the town of Colombo was from *Phthisis* (16 per cent. of all deaths), followed by *Pneumonia* (11 per cent.) and *Enteric Fever* (4 per cent.). The majority of the deaths were in Maradana hospitals: 28 *Phthisis*, 17 *Pneumonia*, and 10 *Enteric Fever*. Maradana exclusive of hospitals contributed more deaths from these causes than the other wards: 19 *Phthisis*, 9 *Pneumonia*, and 3 *Enteric Fever*.

12. Taking all the towns together, *Diarrhoea* and *Dysentery* contributed the highest mortality (20 per cent.), followed by *Bronchitis* and *Pneumonia* (16 per cent.), *Phthisis* (9 per cent.), and *Infantile Convulsions* (8 per cent.).

13. For detailed information see Tables I. and II. for all towns, and Tables III. and IV. for the city of Colombo, in the Appendix.

Registrar-General's Office,
Colombo, August 12, 1909.

F. ARUNACHALAM,
Registrar-General.

Table I.—Number of Births and Deaths registered during July, 1909, their Proportion per 1,000 of the Population per Annum, the Deaths of Children under One Year and their Proportion per 1,000 Registered Births, together with the average Birth- and Death-rates and Infantile mortality from July, 1907, to June, 1909, and the Mean Temperature and Rainfall in the month in each Town of the Island proclaimed under Sections 31–36 of Ord. No. 1 of 1895.

Town.	Population (inclusive of Military) at the Census of 1901.	Population estimated to the Middle of 1909 by Intercessional Increase.	Total Births.		Total Deaths. * I.e., rate calculated on the basis that the age and sex-constitution of the population of each town is the same as for the whole Island, and also (as in crude rate) excluding non-residents. ¹ Blanks indicate that there are no observatories or rain-gauges. ² Corrected death-rate for "Hation and Dicoya," Welligama, Kalpitiya, and Lunugala towns omitted where number of births is less than five. ³ Not available, as they were created registration districts after the Census of 1901, viz., in January, 1905; July, 1908; July, 1904, and October, 1907, respectively. ⁴ Population of Mannar and Trincomalee towns not having been separately enumerated at the Census of 1901, no estimate can be made of the rate of growth, 1891–1900 or 1901–1906. The population estimated for 1901 is the Census population of 1901 less (in the case of Trincomalee) the population of Mannar and Trincomalee towns (as now constituted) was not enumerated at the beginning of October, 1907. The population of Lunugala town (as now constituted) was not enumerated at the beginning of October, 1907. The estimate is of the population at the Census of 1901: the estimate of the population at the beginning of October, 1907.

* Includes six deaths of town residents, one of which occurred in the Infectious Diseases Hospital and the other five in the Enteric Hospital, both at Kankatta, registered by an extra urban Registrar.

† For explanation of "corrected death-rate," see note * Table I. The population of the several wards of the town not being available by age- and sex-constitution, their corrected death-rates cannot be calculated.

‡ The population of these two wards being a fluctuating one, their estimated population cannot be calculated. Hence the Census figures are retained.

Table IV.—Causes of Deaths registered during the Month of July, 1909, in each Ward and Race of the Colombo Municipality.

Causes of Deaths.	Ward.	Deaths among all Races.
