

## SUPPLEMENT

TO

# The Ceylon Government Gazette.

No. 5,086—FRIDAY, SEPTEMBER 11, 1891.

## VITAL STATISTICS OF CEYLON.

### REPORT OF THE REGISTRAR-GENERAL ON THE VITAL STATISTICS OF THE FIRST QUARTER OF 1891.

#### I.—POPULATION.

THE estimated population of the Island on the last day of the quarter was 3,002,409. This estimate is obtained by adding to the population, as enumerated on February 26 last (3,002,655\*), the excess of births over deaths registered between that date and the end of the quarter (1,694), and deducting 1,940, being the excess in the period of departures over arrivals of Indian coolies.

Table I. in the appendix gives the area and population of each province and district of the Island as enumerated at the last Census.

2. *Arrivals and Departures of Indian Coolies.*—The total number of arrivals in the quarter was 11,356, against an average number in the corresponding quarter of the preceding ten years of 8,708; and the departures were 16,795, against an average of 16,093. Thus the arrivals were 2,648 and the departures 702 in excess of their respective averages. As usual the departures exceed the arrivals, but the excess this year (5,439) was considerably below the average (7,385).

#### Arrivals and Departures in the First Quarter of each year 1881-91.

Year.	Arrivals.	Departures.	Excess of Departures over Arrivals.
1881	10,813	17,757	7,444
1882	7,749	17,085	9,336
1883	6,275	15,417	9,142
1884	6,773	14,502	7,729
1885	8,289	14,358	6,069
1886	7,018	13,699	6,681
1887	8,654	15,700	7,046
1888	14,091	18,516	4,425
1889	9,960	16,529	6,569
1890	7,954	17,365	9,411
1891	11,356	16,795	5,439

#### II.—MARRIAGES.

3. The number of general marriages—*i.e.*, marriages other than Kandyan or Mohammedan—registered this quarter was 2,595, and of Kandyan marriages 875.

Table III. shows the marriages solemnised among the general community in every province and district of the Island, the civil condition, nationality, the highest, lowest, and mean ages of the parties, the mode of solemnisation, the number of bridegrooms and brides who were unable to sign their names in the registers, &c.

Table IV. gives similar information in respect of the Kandyans.

4. *First Marriages: Re-marriages.*—Of the 2,595 general marriages, 2,284 (equal to 88 per cent.) were between bachelors and spinsters, 56 between bachelors and widows, 212 between widowers and spinsters, 37 between widowers and widows, and 6 between divorced men and spinsters. Of the 875 Kandyan marriages, 742 (equal to 85 per cent.) were between bachelors and spinsters, 18 between bachelors and widows, 64 between widowers and spinsters, 22 between widowers and widows, 16 between divorced men and spinsters, 1 between a divorced man and a widow, 10 between divorced women and bachelors, 1 between a divorced woman and a widower, and 1 between a divorced man and a divorced woman.

5. *Age at Marriage.*—The mean age at marriage for the general community was, for males 27·3 years and for females 20·1; for the Kandyans, 26·8 for males and 20·3 for females.

6. *Minors.*—In the general community, 7·4 per cent. of the bridegrooms and 72·8 per cent. of the brides were under 21; and amongst the Kandyans, 16·7 per cent. of the bridegrooms and 72·3 per cent. of the brides were under 21.

7. *Mixed Marriages.*—In this quarter there were 15 mixed marriages: 2 between Burghers and Sighalese, 12 between Sighalese and Tamils, and 1 between other races.

8. *Signatures in the Marriage Register.*—Of the 5,190 persons who were married among the general community this quarter, 623 men and 2,059 women signed the register with marks: that is to say, 76 per cent. of the men and about 21 per cent. of the women were able to write their names. Of the 1,750 persons married among the Kandyans, 323 men and 853 women signed the register with marks, or, in other words, 63 per cent. of the men and slightly over 2 per cent. of the women were able to write their names.

#### III.—BIRTHS AND DEATHS.

9. *Births.*—The births registered in the quarter numbered 26,131, and were in the proportion of 35·3 per 1,000 persons living, as against 27·4, the average of the corresponding period for the last ten years. This rate is the highest ever recorded with the exception of the extraordinary rates recorded in the fourth quarters of 1887 and 1890 (39·0 and 39·9 per 1,000 respectively), and shows an increase of 19 per cent. on the mean birth-rate.

10. *Deaths.*—The deaths registered in the quarter amounted to 23,119, being 7,559 more than the number in the corresponding quarter of last year (15,560). Of this number, 7,989 were registered in January, 7,812 in February, and 7,318 in March; each succeeding month was healthier than its predecessor. The death-rate was equal to 31·2, showing an increase of 14 per cent. on the mean rate for the first quarter in the preceding ten years.

\* The Census estimate exclusive of the military and shipping.

11. *The Births and Deaths and their Rates* in the quarter are compared in the following statement with the results obtained in the previous quarter, the first quarter of the past year, and the average of the corresponding quarters for the previous ten years:—

	Births.	Deaths.	Per Mille per Annum.
			Birth-rate.
			Death-rate.
Average of ten previous first quarters	20,684	19,085	29·7 ... 27·4
First Quarter of 1890	20,012	15,560	28·2 ... 21·9
Fourth Quarter of 1890	29,114	18,248	39·9 ... 25·0
First Quarter of 1891	26,131	23,119	35·3 ... 31·2

12. *Sex*.—Of the total number of births (26,131) registered in the quarter, 13,614 were of males and 12,517 of females, i.e., 109 males to 100 females. Of the total number of deaths (23,119), 11,896 were males and 11,223 were females. Out of equal numbers living of each sex there died 930 males to 1,000 females.

13. *Health of the Districts*.—More than half the districts show death-rates above the average. The Hambantota District, in particular, has been very unhealthy during the quarter. The death-rate rose to 96·3, expressing a rate of mortality nearly three times as great as in the corresponding period of the previous ten years (30·3). Never in the whole of the last decade has such an extraordinary rate been recorded in any district in the Island, except once, when the District of Kurunégala showed a death-rate even worse, namely, in the first quarter of 1881 (106·3), when fever prevailed in an epidemic form. A similar outbreak of fever with almost the same severity appears to have raged in Hambantota this quarter. Out of a total of 2,116 deaths, fever alone accounted for 1,598 deaths. Next to Hambantota the largest increase in the death-rate was in the Mátara District (68 per cent. over the mean), which comes with a death-rate of 38·0, also an unusual rate, being greater than has been recorded in that district since 1881. Then come the Puttalam and Chilaw Districts with an increase of 49 per cent., and a death-rate (47·8) excelled in the last ten years by only one quarter (first quarter of 1881, 49·8), and then Negombo with an increase of 37 per cent. from 18·7, the mean for the corresponding quarter in 1881–90 to 25·6; Ratnapura with an increase of 32 per cent. from 34·1 to 45·0; Badulla, with an increase of 31 per cent. from 29·8 to 39·1; and Nuwara Eliya with an increase of 19 per cent. from 17·1 to 20·4. The remaining districts showed great improvement in point of health. In Mannár the death-rate fell to 38·8 from 57·2, showing a decrease of 32 per cent.; in Jaffna, the rate fell to 20·7 from 27·7 with a decrease of 25 per cent.; in Trincomalee to 30·0 from 39·3 with a decrease of 24 per cent.; in Anurádhapura to 40·5 from 52·9 with a decrease of 23 per cent.; in Mátalé to 34·9 from 38·1 with a decrease of 8 per cent.; in Kurunégala to 46·0 from 49·6 with a decrease of 7 per cent.; and in Kalutara, the healthiest district in the Island this quarter, to 18·4 from 19·3, a decrease of 5 per cent.

The percentage of increase or decrease in the death-rate of each district in the quarter is shown in the following statement, as compared with the average for ten first quarters from 1881 to 1890:—

*Death-rate per Mille per Annum.*

District.	First Quarter of 1891.	Average of Ten First Quarters in 1881–90.	Percentage of Increase or Decrease.*
Hambantota ...	96·3	33·0	192
Mátara ...	38·0	22·6	68
Puttalam and Chilaw	47·8	32·0	49
Negombo ...	25·6	18·7	37
Ratnapura ...	45·0	34·1	32
Badulla ...	39·1	29·8	31
Nuwara Eliya	20·4	17·1	19
Galle	26·1	21·3	18
Kandy	27·6	23·6	17
Colombo	19·4	16·9	16
Mullaitivú	50·1	46·5	8
Mannár	38·8	57·2	-32
Jaffna	20·7	27·7	-25
Trincomalee	30·0	39·3	-24
Anurádhapura	40·5	52·9	-23
Mátalé	34·9	38·1	-8
Kurunégala	46·0	49·6	-7
Kalutara	18·4	19·3	-5
Batticaloa	31·7	32·4	-2
Kégalla	21·9	22·4	-2

The deaths exceeded the births this quarter in Hambantota (2,116 deaths to 845 births), Puttalam (477 deaths to 252 births), Ratnapura (1,199 deaths to 971 births), Mullaitivú (141 deaths to 89 births), and Mannár (232 deaths to 169 births).

14. *Age at Death*.—Table IX. shows the number of deaths registered in the quarter at different periods of life for either sex in each district of the Island. Of the 23,119 deaths registered in the Island this quarter, 4,976, equal to 21·5 per cent. of the total deaths, occurred under one year; 9,231, equal to 39·9 per cent., under five years; 67 persons are reported to have been centenarians, and 1,148 persons to have died at various ages between 75 and 100.

15. *Registered Causes of Death*.—Table VII. in the appendix gives the causes of deaths registered in each district of the Island and of each nationality.

16. *Fever and Diarrhoeal Diseases*.—Of the 23,119 deaths registered in the quarter, 6,442 were reported due to various forms of fever and 3,329 to diarrhoeal diseases, i.e., fever contributed 28 per cent. and diarrhoeal diseases 14 per cent. of the total deaths from all causes. In Hambantota 74 per cent. of the deaths were due to fever, and in Mátara and Puttalam 47 and 38 per cent. respectively. In the other districts the fever mortality was not far above the average.

Under this head cholera caused 496 deaths, of which 216, or more than 43 per cent., were in the Galle District.

17. *Smallpox accounts for 94 deaths*, of which 38 were in Colombo, 19 in Kalutara, 11 in Galle, 8 in Kurunégala, 7 in Kandy, 7 in Mátara, 2 in Mannár, 1 in Nuwara Eliya, and 1 in Puttalam.

To chickenpox 48 deaths are attributed (of which 25 were in Kandy) and to measles 213 (Kandy 62, Colombo 41, Badulla 26, Nuwara Eliya 23, Kurunégala 18, Kégalla 12, Mátalé, 10).

18. The other chief causes of death were infantile convulsions 1,838, rickets 1,286, convulsions 1,093, collapse 738, anaemia 722, parasitic worms 697, debility 582, phthisis 542, puerperal convulsions 324, old age 313, inflammation 260, childbirth 225, pneumonia 176, rheumatism 137, scrofula 113, pleurisy 107, ulcer 89, premature birth 78, bronchitis 72, parangi 66 (of which 42 in Kurunégala), want of breast milk 59 (of which 28 in Badulla, 6 in Nuwara Eliya, 5 in Ratnapura, 4 in Kégalla, and 4 in Batticaloa), hydrophobia 14 (of which 4 in Galle and 4 in Matara).

\* The sign (—) denotes decrease.

19. *Accidental Deaths and Suicides.*—Of the 373 deaths attributed to these causes, 87 are attributed to falling from trees, 76 to drowning, 28 to snake-bites, 24 to burns and scalds, 15 to injury at birth, 12 to gun-shot wounds, 5 to fall of heavy substances, 2 to suffocation, 4 to injury by elephants, 4 to crocodiles, 4 to buffaloes, 2 to bears, 1 to a bull, 1 to a dog, 1 to a rat, 2 to sunstroke. There were 11 cases of suicides, of which 9 were by hanging, 1 by drowning, and 1 by gun-shot wound. Four persons were run over by carts.

20. *Murders and Executions.*—Thirteen deaths registered this quarter are attributed to murder and other forms of homicide, of which no less than 12 were among the Singhalese. Two men were judicially executed (1 in Kalutara and 1 in Kandy).

#### IV.—HEALTH OF THE TOWN OF COLOMBO.

21. The town of Colombo has been very unhealthy during the quarter, the death-rate recorded having been 27·1, as against 22·9 the mean for the quarter on the previous four years. This rate, though an increase in the previous quarters (the Vital Statistics of the town were collected for the first time in 1887), is still below the actual mortality in the quarter, as the returns do not include deaths to the amount of 156 in number (all of which may be assigned to the Colombo town) which occurred in the Smallpox hospital at Kanatta—these deaths not having been reported to this Department for registration until after the end of the quarter. The death-rate of the town, including the 156 deaths, would be 32·1 per 1,000. The causes of death may be summarised as follows:—

Fever	...	...	172	Old age	...	...	19
Smallpox	...	...	25	Convulsions	...	...	19
Chickenpox	...	...	4	Rickets	...	...	16
Measles	...	...	10	Childbirth	...	...	14
Diarrhoeal diseases	...	...	78	Violent deaths	...	...	28
Infantile convulsions	...	...	142	All other causes	...	...	144
Phthisis	...	...	49				
Parasitic diseases	...	...	53				
Lung diseases	...	...	46				
Debility	...	...	29				
				Total ...	848		

22. The subjoined table gives the births and deaths and their rates of each nationality living in Colombo Municipality for the first quarter of the year, and the average of the corresponding period in the previous four years:—

Nationalities,	Popula- tion at the Census of 1891.	Births.		Deaths.		Births : Rate per Mille per Annum.	Deaths : Rate per Mille per Annum.
		Average of the First Quarters, 1887-90	First Quarter, 1891.	Average of the First Quarters, 1887-90	First Quarter, 1891.		
ALL RACES ...	126,926*	482	644	631	848	18·6	20·6
Europeans, including Military	2,542	12	14	8	6	17·5	22·3
Burghers	9,979	35	40	24	17	17·7	16·3
Sinhalese	53,329	212	241	244	304	18·5	18·3
Tamils	29,133	30	37	99	120	8·3	5·2
Moors	26,834	170	284	223	327	33·6	42·9
Malays	3,350	17	18	22	49	20·7	21·8
Others	1,759	6	10	11	25	19·7	23·1
						Average of the First Quarters, 1887-90.	First Quarter, 1891.

The increase in the death-rate is followed by a corresponding increase in the rates recorded for the several races, save the Europeans and the Burghers, who, however, show a lower death-rate than usual.

23. *European Births and Deaths.*—The European deaths were 6 in number (2 from dysentery, 2 from diseases of bladder, 1 from phthisis, and 1 from pneumonia) and correspond to a rate of 9·6, against 14·1 the mean in the first quarter of the preceding four years, and a birth-rate of 22·3 per 1,000.

24. *Births and Deaths of other Races.*—The Burgher death-rate in the quarter was very low, having been 9·6, as against a mean of 11·2 per 1,000. It is noteworthy that while the Europeans and the Burghers were in point of health better than usual, the other communities were worse. This I believe is due to the immunity these two races (Europeans and Burghers) enjoyed from the smallpox epidemic which raged during the quarter, and perhaps also to more than ordinary precaution taken by them for safeguarding their health. The returns give a total of 25 deaths in the town from smallpox; adding to this number the 156 deaths which occurred in the Smallpox hospital (not included in the returns), the total comes to 181, of which, 116 were Sinhalese, 39 were Tamils, 16 were Moors, and 7 were Malays. The rates among these races from this cause are as follows:—

Per Mille per Annum.

Sinhalese	...	...	...	...	...	8·8
Tamils	...	...	...	...	...	5·4
Moors	...	...	...	...	...	2·4
Malays	...	...	...	...	...	8·4

The Moorish mortality from smallpox (2·4) is less than one-half of that among the Tamils and about a fourth of that among the Sinhalese—a circumstance much open to doubt, as deaths from epidemics are, as a rule, more numerous in this community. There was, however, an unusual increase of deaths under the heads fever, infantile convulsions, and parasitic diseases among the Moors this quarter.

Registrar-General's Office,  
Colombo, August 15, 1891.

R. REID,  
Registrar-General.

\* The figures among the different races are distributed according to the proportion found to prevail at the Census of 1881.

## APPENDIX.
