MÁTALÉ.													
Mátalé South ...	10-38	19-29	38-20	1 50	1 75	—	Kurakkan	1 25	1 25	—	Maha reaping was over in May, and the crop was fairly satisfactory on the whole. Kohonsiya pattu suffered much from the long drought. Asgiri Udasiya pattu had no crop whatever, save from 10 amunams of land under streams. The increase of demand on European estates for native labour and garden products supplemented the deficiency of paddy and provided help to the rural population. The yala cultivation has begun in those places where there are irrigation streams. There are signs of a good rainfall for July, but unless it comes at once, which will help the cultivators to use three months paddy, little good can be expected for paddy cultivation. The garden produce has however been plentiful, especially jak, lime, orange, &c., all of which had a good demand in the market	—	—

The only cultivation done for maha in Inamaluwa korale and reaped during the quarter was 1 amunam and 2 pelas of paddy land at Etawarahena, where the crop was 6 amunams of paddy (30 bushels), i.e. one-third of the usual crop in favourable weather. Kandapalle korale and Udugoda Pallesiyapattu had equally a bad time as Wagapanaha Pallesiyapattu, in spite of the numerous tanks there, which had no rain to fill them.	—	The last rain in Inamaluwa fell in April. ## BENGAL.—No. 74.

*Australia—Cairns Harbour—Tide Signals.*

The Portmaster, Brisbane, has given notice (No. 6 of 1893) that vessels arriving at the fairway off the bar to Cairns harbour may have the depth of water available signalled to them at night if they have advised Cairns of the probable time of arrival.

Signals are made with the front leading light as follows, viz.:—

The light will be obscured one minute to draw attention, then the number of flashes made at 5-second intervals denotes the number of feet over 10 ft., e.g., two flashes at 5-second intervals denote 12 ft., three flashes 13 ft., and so on. Odd inches are denoted by the number of flashes in quick succession.

The signals will be repeated until answered by a flare light from the vessel.

Flood tide is denoted by a red light shown from the platform of the outer leading light.

EATON W. PETLEY,  
Port Officer of Calcutta.

Calcutta, March 25, 1893.

The Quarries cutting has silted up evenly, and in the Hamilton reach there are a series of shallow ridges throughout the whole cutting.

A detailed examination of all the cuttings is now being made, and if deeper water is discovered outside the recognised channels due notice will be given.

*Australia—Brisbane River—Restoration of Buoys and Beacons.*

The Portmaster, Brisbane, has given notice (No. 13 of 1893) that all the aids to navigation in the Brisbane river which were removed or destroyed by the recent floods have now been restored, with the following modifications:—

The leading beacons for the Hamilton reach channel now lead close to the northern edge of the dredged channel marking the deepest water.

The Eagle Farm flats leading beacons will be shifted to-day 150 ft. east of their former position.

The magnetic bearings of the beacons in the above cuttings are unaltered.

The old iron west beacon marking the turn between the inner and outer bar leads will be replaced by a red triangular beacon on or about the 8th instant.

Mariners are advised that the deepest water in the outer bar is on the eastern side of the cutting.

*Australia—Tasmania, West Coast—Macquarie Harbour—Signals from Staff on West Side of Entrance.*

The British Admiralty has given notice (No. 130 of 1893) that a signal staff has been erected on the bluff at the west side of the entrance to Macquarie harbour, from which the following signals are made by day:—

1. Two balls at the masthead signifies flood tide.
2. One ball at the masthead signifies ebb tide.
3. A square flag at the eastern yard-arm signifies "alter course to the eastward."
4. A square flag at the western yard-arm signifies "alter course to the westward."

Approximate position on plan No. 1,629: lat. 42° 11' 45" S., long. 145° 13' 15" E.

NOTE.—Sailing vessels, inward bound, should not attempt to cross the bar on the ebb tide without a strong commanding breeze.

In fine weather the pilot boards vessels outside the bar, but in bad weather, when the pilot cannot cross the bar, vessels should steer in with the lighthouses on Entrance island and Bushy islet in line. If the vessel is steering a safe course no flags will be shown at the signal staff, but if necessary signal (3) or signal (4) will be hoisted. When the direction of the ship's head is sufficiently altered the flag will be hauled down.

When practicable the pilot will direct the vessel's course by flags from a boat. In this case vessels should steer direct for the boat, altering course if necessary towards the side of the boat on which a flag is shown.

No stranger should attempt to enter Macquarie harbour at night unless on a lee shore and unable to keep outside.

(2) *Prohibited Anchorage near Telegraph Cable.*

Also that a submarine telegraph cable has been laid across Macquarie harbour entrance in the vicinity of Bushy island.

The position of the cable is marked by a diamond-shaped black beacon on the northern shore and by a diamond-shaped white beacon on the southern shore.

Vessels are prohibited from anchoring in the vicinity of the cable; and it is advisable that they should not anchor in the space enclosed between lines drawn from Wellington head and Bushy (Bonnet) island to the black telegraph beacon on the northern shore.

Mariners are therefore warned that Admiralty plan, Wausung river, with enlarged plan of entrance, No. 1,601, cannot be implicitly relied on; and that it is necessary either to take a pilot or obtain information as to the condition of the bar from the Customs signal station before attempting to cross it.

*Australia—Burnett River—Restoration of Buoys and Beacons.*

The Portmaster, Brisbane, has given notice (No. 15 of 1893) that the channel from the bar to Bundaberg has been buoyed and marked in accordance with the alterations caused by the recent floods.

The beacons leading across the bar bear S. W. by W.  $\frac{1}{2}$  W. (magnetic), and the least depth on that line is 4 ft. 6 in. at low water springs.

An alteration has been made in the lead up stream from Fairymead wharf; the triangular beacons there (lighted at night) now lead over to a square white beacon near Rubyana wharf.

The minimum depth in No. 1 cutting is 3 ft. 3 in. at low water springs, and a gauge showing the depth in this channel has been erected at Rubyana wharf.
