18. The necessary mortgage shall be prepared and attested by the Notary of the Board, and all expenses attendant on the legal completion of the loan shall be borne by the borrower.

19. The interest payable on loans shall be considered to be due monthly in terms of the bond; in no case shall arrears of more than three months be allowed to accumulate. No notice of the interest due will be given, and any mortgagor allowing interest to remain unpaid more than fifteen days beyond due date may be required immediately to pay off both principal and interest.

20. All bonds will be made payable on demand as heretofore, and at the commencement of every year all loans will be reconsidered with reference to the then state and value of the property mortgaged, and if it be thought necessary by the Board the securities will be re-appraised at the expense of the borrowers.

21. The Secretary of the Board may from time to time inspect and report upon the existing state and value of the properties mortgaged. The expenses incurred on such inspection by the Secretary shall be considered as forming part of the cost of the working of the Establishment.

22. The Commissioners will from time to time appoint appraisers to the Loan Board, and the names of such authorized persons will be recorded in a register to be kept for that purpose.

23. The Loan Board shall have an account with each District Court. Such account shall include all sums deposited by that court under the head Sutors' or Estate Moneys, or otherwise; and each receipt and payment under its respective number shall be entered in a separate ledger to be kept for that purpose for the several District Courts of each Province.

24. As soon as possible after June 30 and December 31 in each year the Board shall audit the accounts of interest received, and shall set apart one-fifth to be paid to Government in terms of the 16th clause of "The Loan Board Ordinance, 1865," as amended by section 2 of Ordinance No. 6 of 1912, and after deducting the said one-fifth shall allot in respect of all sums in deposit in which interest is due a dividend on the interest received by the Board during the preceding half-year. But no interest or dividend shall be declared on sums under One hundred Rupees, nor on fractional parts of Ten Rupees.

25. No interest or dividend shall be declared upon any deposit for the fractional part of the half-year in which such deposit shall have been made or shall have repaid.

26. The Commissioners are empowered to close the existing "Surplus Fund" and to transfer the balance of such fund to a new account to be called the "Reserve and Depreciation Fund." The Commissioners may, before making the allotment of interest among suitors referred to in rule 24, deduct from the interest received by the Board a sum not exceeding One thousand Five hundred Rupees each half-year, and may transfer any sum so deducted to the "Reserve and Depreciation Fund."

The capital sum forming the "Reserve and Depreciation Fund" shall only be invested by the Commissioners in public securities of Great Britain, India, and the Colonies, and such capital sum shall be used solely for the purpose of making good any losses which may accrue to the Loan Board funds or the Commissioners, or any depreciation in the investments made by them. The interest earned from the investment of the "Reserve and Depreciation Fund" may be used for the payment of expenses incurred by the Commissioners in connection with the Loan Board funds and properties, such as retaining fees to Solicitors, fees for inspection of properties mortgaged to the Board, rates, taxes, cost of repairs to properties owned by the Board, additional clerical assistance, &c.

27. The funds of the Loan Board may be placed upon fixed deposit in such bank or banks in the Colony as may be determined upon from time to time by the Commissioners. Provided, however, that the amount of the said deposit in any one bank at any one time shall not exceed Three hundred thousand Rupees.

CAMBRIDGE LOCAL EXAMINATIONS, 1913.

AN Examination of Senior and Junior Candidates, in accordance with the Regulations of the Revised Code, will be held at Colombo, Moratuwa, Kandy, Galle, Jaffna, and Batticaloa on December 15, 1913, and the following days.

2. Forms of entry duly filled up should be forwarded so as to reach the Director of Public Instruction not later than 2 P.M. on Friday, August 1, 1913, together with the following fees, which should be paid as follows:—

(1) A Bank Draft on England payable to J. H. Flather, Esq., crossed "Barclay & Co.," at the rate of £1 for each candidate, as the Cambridge fee.

N.B.—The fees should not, under any circumstances, be remitted by Money Order. *No cash or Money Order, Bank Draft, or Cheque in favour of the Director of Public Instruction will be accepted.*

(2) A Post Office Order (not Postal Order), Bank Draft, or crossed cheque in my favour at the rate of Rs. 2.50 for each candidate as the local expenses fee. *Cash will not be accepted.*

NOTE.—All letters and parcels should be addressed: "The Director of Public Instruction, Colombo."

N.B.—Forms of entry will be accepted from August 2 to August 9 inclusive on payment of an extra fee of Rs. 5.

All entry forms received at the Public Instruction Office not accompanied by the Cambridge and local fees, as well as the proper birth certificate where one is required, will be immediately returned to the sender.

3. Forms of entry may be had from the Director in the second week in July. It is requested that Managers will only apply for such number of forms as they actually require, and that they will not encourage any student to enter as a candidate unless they are satisfied that he has a fair chance of passing the examination.

It is also requested that Principals of Schools will check the entry forms of their candidates and see that the instructions of the Syndicate with regard to the filling up of the forms are complied with. *The date of birth should be carefully verified, and the candidates' full names must be given without any initials.*

4. Applications for entry forms should be made from the first week in July, 1913, stating what kinds of entry forms (C, D, E, or F) and the number of forms of each kind are required.

5. Religious Knowledge, as a subject of examination, is not necessary for Colonial Students, and no grant or award under the Revised Code will be made directly or indirectly dependent on marks gained for Religious Knowledge.

6. All under-age candidates must forward with their entry forms certificates of the registration of their birth, unless such a certificate has been sent to this office for a previous examination. Those who have already forwarded certificates of birth for a previous examination *should mention the year, the examination for which they forwarded the certificates, and the centre at which they appeared for the examination.* Affidavits will not be accepted *under any circumstances.*

If the name appearing in the birth register differs, either by alteration or addition, from the name by which the candidate is known, the parent or guardian should, before obtaining a certificate, apply to the Registrar-General or his Assistant for such alteration in the manner set forth in section 7 of Ordinance No. 23 of 1900.

A certificate of baptism should be a proper extract of the Baptismal Register, *i.e.*, an exact copy of the entry of the register should be made, and at the foot of the copy the incumbent of the Church issuing it should certify to its correctness. Baptismal certificates will only be accepted if the candidate's baptism was within four months of his date of birth; otherwise he will not be allowed to compete for Prizes and Scholarships.

Principals of Schools should examine carefully all certificates of birth or baptism, and should not forward any certificate which is not a proper and reliable document.

7. As a rule, candidates are only admitted who are presented by registered secondary schools or other institutions which have been specially recognized for the purpose. Candidates will not be allowed to take the examinations as private students unless they have obtained previous permission from the Department. This permission will only be given to those who are prevented from attending school by age and other special circumstances. It will not be given to any pupil of a school or college. Private students will not be admitted as under-age candidates unless they produce a written statement from an Inspector of Schools that they are the persons actually referred to in the certificate of birth.

8. Fees cannot be returned. If notice of withdrawal is received by the Local Secretary more than sixteen days before the commencement of the examination, a voucher will be sent, which will enable the student to enter in another year without further fee to the University, subject to the usual conditions of age. The Syndicate do not undertake to grant a similar voucher in any case in which the full sixteen days' notice has not been given. Applications made within sixteen days of the examination will, however, be considered if accompanied by a certificate from a qualified doctor stating that the candidate is physically unfit to take the examination. No applications received after the commencement of the examination can be considered. Students holding vouchers must apply for fresh forms of entry and return them to Local Secretaries on or before August 1 together with the local expenses fee of Rs. 2.50 (*vide* section 2 of clause 2).

N.B.—(1) The Mathematical Prize will be awarded on the results of the Cambridge Senior Local Examination of December, 1913, to the candidate under 19 years of age who passes the best examination in the subjects of section 10.

(2) A prize of the value of Rs. 100 in books, presented by Don Carolis Hewavitarana, Mudaliyar, entitled the "Hewavitarana Science Prize," will be awarded on the results of the Junior Local Examination to the candidate under 16 years of age who passes the best examination in the subjects of section 11 "Elementary Experimental Science."

SUBSTITUTES FOR SET BOOKS AND SUBJECTS.

The pupils at any school may, on application from the authorities of the school, be allowed to substitute for the set book or books in any subject in the Local Examinations another book or books, or for any syllabus prescribed in the regulations a different syllabus, provided that the consent of the Syndicate is obtained. Such consent will not be given unless the alternative proposed in lieu of that prescribed is in the opinion of the Syndicate suitable and of equivalent length and difficulty. Any application made in accordance with this announcement must reach the General Secretary not later than November 1 for the ensuing July examination, and not later than April 1 for the ensuing December examination. A fee, to cover the extra expense involved, will be payable by the school authorities for each special paper that has to be prepared.

In the December examination Senior candidates may offer Chinese, or Sanskrit, or Arabic, as an alternative to Greek, at any centre from which an application accompanied by a special fee of £5 for each language has been received by the General Secretary not later than March 15 preceding. Special regulations relating to these subjects may be obtained from the General Secretary. The papers in these languages will be set at the same times as the papers in Greek.

EXAMINATION IN SPOKEN FRENCH AND GERMAN.

The Syndicate will arrange for the examination of candidates in Spoken French and Spoken German at schools at which the authorities are prepared to pay a fee of half-a-crown for each candidate examined in each language (the minimum payable by any school being £1 for each language), together with the travelling expenses and the hotel expenses (if any) of the Examiner or Examiners.

Two or more schools may, if they wish, combine for the examination, the minimum fee payable by the combined schools for each language being £1. All the negotiations, however, between the schools must be conducted independently of the Syndicate; and, in communications with the Syndicate or the Examiners, the Principal of one of the schools must act as the representative of all of them. The Principal of the school conducting the correspondence must also be responsible for collecting the fees, including the share payable by each school for the out-of-pocket expenses of the Examiners, and must forward them in due course to the Syndicate. The names of all the candidates must be sent to the General Secretary on the same form, and all the candidates must be examined together.

Applications must reach the General Secretary not later than May 12 or October 8, and the examination will be held at some time, before the commencement of the Local Examinations, to be fixed by the Syndicate.

Candidates entering for the Spoken Examination in either language must also enter for the Written Examination in the same language, and if they pass therein and also in the Spoken Examination, the fact of their having satisfied the Examiners in the Spoken Examination will be endorsed on their certificate.

The Spoken Examination will not be necessary for passing in the language or for the mark of distinction; it will, however, be taken into account in determining the position of candidates in the general Class List, and it will be counted towards the mark of distinction in cases where the mark of distinction would not be obtained without it.

* See note ¶ on page 777.

† Detailed schedules can be obtained on application to the General Secretary. The schedules are the same for 1913 as they were for 1912. A specimen paper in Domestic Science is appended to the schedules in that subject.

‡ The schedules are, except for Colonial candidates, the same for 1913 as for 1912.

§ See note † on page 775.

A book or a portion of a book containing less than 10,000 words will not be approved. A list of certain books already approved may be obtained from the General Secretary. Application for the approval of books outside this list must be received by the General Secretary not later than May 12 or October 8, and must be accompanied by a copy of the book.

SYLLABUS IN GEOMETRY.

GENERAL INSTRUCTIONS APPLICABLE TO THE JUNIOR AND SENIOR EXAMINATIONS.

The papers in Geometry will contain questions on Practical and on Theoretical Geometry. Every candidate will be expected to answer questions in both branches of the subject.

The questions on Practical Geometry will be set on the constructions contained in the annexed Schedule A, together with easy extensions of them. In cases where the validity of a construction is not obvious, the reasoning by which it is justified may be required. Every candidate must provide himself with a ruler graduated in inches and tenths of an inch, and in centimetres and millimetres, a set square, a protractor, compasses, and a fairly hard pencil. All figures must be drawn accurately and distinctly. Questions may be set in which the use of the set square or of the protractor is forbidden.

The questions on Theoretical Geometry will consist of theorems contained in the annexed Schedule B, together with questions upon these theorems, easy deductions from them, and arithmetical illustrations. Any proof of a proposition will be accepted which appears to the Examiners to form part of a systematic treatment of the subject ; the order in which the theorems are stated in Schedule B is not imposed as a sequence of their treatment. In the proof of theorems and deductions from them, the use of hypothetical constructions will be permitted.

JUNIOR EXAMINATION.

Attention is called to the General Instructions above.

The paper will consist of two parts, each containing questions on Practical and on Theoretical Geometry. Candidates can pass in Geometry by doing sufficiently well in Part I.

PART I.—Questions will be set on Schedules A (i.), A (ii.), and B (i.), B (ii.) (pages 780 and 781).

Candidates will also be expected to be acquainted with the forms of the simpler solid bodies, namely, the cube, the rectangular block, the tetrahedron, the sphere, the cylinder, the wedge, the pyramid, and the cone.

PART II.—Questions will be set on Schedules A (iii.) and B (iii.) (pages 780 and 781).

* The questions on part (i.) of the syllabus will form about a quarter of the paper.

SENIOR EXAMINATION.

Attention is called to the General Instructions above.

Questions will be set on Schedules A (i.), A (ii.), A (iii.), and B (i.), B (ii.), B (iii.).

For candidates for Honours questions will also be set relating to other properties of triangles and circles, and to the Elementary Geometry of the plane and the sphere.

Construction of perpendiculars to straight lines.
Construction of an angle equal to a given angle.
Construction of parallels to a given straight line.
Simple cases of the construction from sufficient data of triangles and quadrilaterals.
Division of straight lines into a given number of equal parts or into parts in any given proportions.

Construction of a square equal in area to a given polygon.

SCHEDULE B. (THEORETICAL.)

B (i.).

Angles at a Point.

If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right angles; and the converse.

If two straight lines intersect, the vertically opposite angles are equal.

Parallel Straight Lines.

When a straight line cuts two other straight lines, if (i.) a pair of alternate angles are equal, or (ii.) a pair of corresponding angles are equal, or (iii.) a pair of interior angles on the same side of the cutting line are together equal to two right angles, then the two straight lines are parallel; and the converse.

Straight lines which are parallel to the same straight line are parallel to one another.

Triangles and Rectilinear Figures.

The sum of the angles of a triangle is equal to two right angles.

If the sides of a convex polygon are produced in order, the sum of the angles so formed is equal to four right angles.

If two triangles have two sides of the one equal to two sides of the other, each to each, and also the angles contained by those sides equal, the triangles are congruent.

If two triangles have two angles of the one equal to two angles of the other, each to each, and also one side of the one equal to the corresponding side of the other, the triangles are congruent.

If two sides of a triangle are equal, the angles opposite to these sides are equal; and the converse.

If two triangles have the three sides of the one equal to the three sides of the other, each to each, the triangles are congruent.

If two right-angled triangles have their hypotenuses equal, and one side of the one equal to one side of the other, the triangles are congruent.

If two sides of a triangle are unequal, the greater side has the greater angle opposite to it; and the converse.

Of all the straight lines that can be drawn to a given straight line from a given point outside it, the perpendicular is the shortest.

The opposite sides and angles of a parallelogram are equal, each diagonal bisects the parallelogram, and the diagonals bisect one another.

If there are three or more parallel straight lines, and the intercepts made by them on any straight line that cuts them are equal, then the corresponding intercepts on any other straight line that cuts them are also equal.

Loci.

The locus of a point which is equidistant from two fixed points is the perpendicular bisector of the straight line joining the two fixed points.

The locus of a point which is equidistant from two intersecting straight lines consists of the pair of straight lines which bisect the angles between the two given lines.

B (ii.).

Areas.

Parallelograms on the same or equal bases and of the same altitude are equal in area.

Triangles on the same or equal bases and of the same altitude are equal in area.

Equal triangles on the same or equal bases are of the same altitude.

In a right-angled triangle, the square described on the hypotenuse is equal to the sum of the squares described on the sides containing the right angle; and the converse.

The Circle.

A straight line drawn from the centre of a circle to bisect a chord which is not a diameter, is at right angles to the chord; conversely, the perpendicular to a chord from the centre bisects the chord.

There is one circle, and one only, which passes through three given points not in a straight line.

Equal chords of a circle are equidistant from the centre; and the converse.

The tangent at any point of a circle and the radius through the point are perpendicular to one another.

If two circles touch, the point of contact lies on the straight line through the centres.

The angle which an arc of a circle subtends at the centre is double that which it subtends at any point on the remaining part of the circumference.

Angles in the same segment of a circle are equal; and, if the line joining two points subtends equal angles at two other points on the same side of it, the four points lie on a circle.

The angle in a semicircle is a right angle; the angle in a segment greater than a semicircle is less than a right angle; and the angle in a segment less than a semicircle is greater than a right angle.

The opposite angles of any quadrilateral inscribed in a circle are supplementary; and the converse.

B (iii.).

Areas.

Illustrations and explanations of the geometrical theorems corresponding to the following algebraical identities:—

$$\begin{aligned} k(a + b + c + \dots) &= ka + kb + kc + \dots, \\ (a + b)^2 &= a^2 + 2ab + b^2, \\ (a - b)^2 &= a^2 - 2ab + b^2, \\ a^2 - b^2 &= (a + b)(a - b). \end{aligned}$$

The square on a side of a triangle is greater or less than the sum of the squares on the other two sides, according as the angle contained by those sides is obtuse or acute. The difference is twice the rectangle contained by one of the two sides and the projection on it of the other.

The Circle.

In equal circles (or, in the same circle) (i.) if two arcs subtend equal angles at the centres, they are equal; (ii.) conversely, if two arcs are equal, they subtend equal angles at the centre.

In equal circles (or, in the same circle) (i.) if two chords are equal, they cut off equal arcs; (ii.) conversely, if two arcs are equal, the chords of the arcs are equal.

If a straight line touch a circle, and from the point of contact a chord be drawn, the angles which this chord makes with the tangent are equal to the angles in the alternate segments.

If two chords of a circle intersect either inside or outside the circle the rectangle contained by the parts of the one is equal to the rectangle contained by the parts of the other.

Proportion: Similar Triangles.

(Proofs which are only applicable to commensurable magnitudes will be accepted.)

If a straight line is drawn parallel to one side of a triangle, the other two sides are divided proportionally; and the converse.

If two triangles are equiangular their corresponding sides are proportional; and the converse.

If two triangles have one angle of the one equal to one angle of the other and the sides about these equal angles proportional, the triangles are similar.

The internal bisector of an angle of a triangle divides the opposite side internally in the ratio of the sides containing the angle, and likewise the external bisector externally.

The ratio of the areas of similar triangles is equal to the ratio of the squares on corresponding sides.

These prizes and medals are not open to Juniors above the age of 16 or to Seniors above the age of 19.

DETAILED REPORTS.

After the Class Lists of each examination have been issued, the Syndicate will be prepared to inform the Principals of Schools, on receipt of a payment of one shilling for each student, of the manner in which their pupils have acquitted themselves in the several subjects in which they have been examined, describing each as *good*, *moderately good*, &c.; and also to place their pupils in order of merit among themselves in each subject and on the whole examination. If an application is made by a school on behalf of more than fifty students, the fee payable for each student at that school after the first fifty will be sixpence.

CLASS LISTS AND CERTIFICATES.

The name of the boys who pass with credit will be arranged in three Honour Classes. In each of these classes, and also in the list of those who pass to the satisfaction of the Examiners, yet not so as to deserve Honours, the candidates will be arranged in alphabetical order under the several centres. After the name of every boy will be added the school (if any) from which he comes to attend the examination, and the name of his Schoolmaster. *The names of those who pass the Examination for Juniors above the age of 16, and of those who pass the Examination for Seniors above the age of 19 will be placed in lists by themselves, in alphabetical order, not in any Class of Honours.* Similar classes and lists will be drawn up for girls. Copies of the Class Lists will be forwarded to the candidates by the Local Secretaries.

Separate lists will also be given of those Junior candidates under the age of 16, and of those Senior candidates under the age of 19, who may specially distinguish themselves in particular parts of the examination, and in these lists the candidates will be arranged in order of merit.

The Classes of Honours are determined solely by the total number of marks obtained by the student. In the examinations for Juniors and Seniors no marks are counted for any subject unless the student passes in that subject. Regard is paid to handwriting and spelling.

The students who pass with credit or satisfy the Examiners will receive certificates to that effect, which will be sent to them through the Local Secretaries. Every Senior and Junior Certificate will specify the subjects in which the student has satisfied the Examiners or has gained the mark of distinction, and the class obtained, if any.

* Junior candidates, whether above the age of sixteen or not, who desire to qualify for registration as Medical or Dental Students or to be admitted to the first Professional Examination of the Royal College of Veterinary Surgeons, should make a statement to that effect in their forms of entry. They will then be informed in due course as to whether they have satisfied the prescribed conditions.

† It should be observed that in certain cases it is made a condition for exemption from a Preliminary Examination that all the required subjects shall be taken at one and the same time.
