42 (a). *If call or instalment be not paid, notice to be given to Shareholder.*—If any Shareholder fails to pay any call or instalment on or before the day appointed for the payment of the same, the Directors may at any time thereafter, during such time as the call or instalment remains unpaid, serve a notice on such Shareholder or his executors or administrators or the trustee or assignee in his bankruptcy requiring him to pay the same, together with any interest that may have accrued, and all expenses that may have been incurred by the Company by reason of such non-payment.

(b) *Terms of notice.*—The notice shall name a day (not being less than one month from the date of the notice) on and a place or places at which such call or instalment and such interest and expenses as aforesaid are to be paid. The notice shall also state that, in the event of non-payment at or before the time and at the place appointed, the shares in respect of which the call was made or instalment is payable will be liable to be forfeited.

(c) *In default of payment, shares to be forfeited.*—If the requisitions of such notice as aforesaid be not complied with, every or any share or shares in respect of which such notice has been given may at any time thereafter, before payment of calls or instalments, with interest and expenses due in respect thereof, be declared forfeited by a resolution of the Board to that effect.

(d) *Shareholder still liable to pay money owing at time of forfeiture.*—Any Shareholder whose shares have been so declared forfeited shall, notwithstanding, be liable to pay, and shall forthwith pay, to the Company all calls, instalments, interest, and expenses owing upon or in respect of such shares at the time of the forfeiture, together with interest thereon from the time of forfeiture until payment at 9 per cent. per annum, and the Directors may enforce the payment thereof if they think fit.

43. *Surrendered or forfeited shares to be the property of the Company, and may be sold, &c.*—Every share surrendered or so declared forfeited shall be deemed to be the property of the Company, and may be sold, re-allotted, or otherwise disposed of upon such terms and in such manner as the Board shall think fit.

44. *Effect of surrender or forfeiture.*—The surrender or forfeiture of a share shall involve the extinction of all interest in, and also of all claims and demands against, the Company in respect of the share and the proceeds thereof, and all other rights incident to the share, except only such of those rights (if any) as by these presents are expressly saved.

45 (a). *Certificate of surrender or forfeiture.*—A certificate in writing under the hands of two of the Directors and of the Agent and Secretary or Agents and Secretaries that a share has been duly surrendered or forfeited, stating the time when it was surrendered or forfeited, shall be conclusive evidence of the facts therein stated as against all persons who would have been entitled to the share but for such surrender or forfeiture; such certificate and the receipt of the Company for the price of such share shall constitute a good title to such share, and a certificate of proprietorship shall be delivered to any person who may purchase the same from the Company, such purchaser thereupon shall be deemed the holder of such share, discharged from all calls due prior to such purchase; and he shall not be bound to see to the application of the purchase money, nor shall his title to such share be affected by any irregularity in the proceedings in reference to such forfeiture or sale.

(b) *Forfeiture may be remitted.*—The Directors may in their discretion remit or annul the forfeiture of any share within six months from the date thereof upon the payment of all moneys due to the Company from the late holder or holders of such share or shares, and all expenses incurred in relation to such forfeiture, together with such further sum of money by way of redemption money for the deficit, as they shall think fit, not being less than 9 per cent. per annum on the amount of the sums wherein default in payment had been made, but no share *bona fide* sold, re-allotted, or otherwise disposed of under Article 43 hereof shall be redeemable after sale or disposal.

46. *Company's lien on shares.*—The Company shall have a first charge or paramount lien upon all the shares of any holder or joint-holders for all moneys for the time being due to the Company by such holder or by all or any of such joint-holders respectively, either in respect of such shares or of other shares held by such holder or joint-holders or otherwise, and whether due from any such holder individually or jointly with others, including all calls, resolutions for which shall have been passed by the Directors, although the times appointed for the payment thereof shall not have arrived; and where any share is held by more persons than one, the Company shall be entitled to the said charge or lien in respect of any money due to the Company from any of such persons. The Directors may decline to register any transfer of shares subject to such charge or lien.

47. *Lien how made available.*—Such charge or lien may be made available by a sale of all or any of the shares subject to it, provided that no such sale shall be made except under a resolution of the Directors, and until notice in writing shall have been given to the indebted Shareholder or his executors or administrators, or the assignee or trustee in his bankruptcy, requiring him or them to pay the amount for the time being due to the Company, and default shall have been made for twenty-eight days from such notice in paying the sum thereby required to be paid. Should the Shareholder over whose share the lien exists be in England or elsewhere abroad, sixty days' notice shall be allowed him.

48. *Proceeds how applied.*—The nett proceeds of any such sale as aforesaid under the provisions of Articles 43 and 47 hereof shall be applied in or towards satisfaction of such debts, liabilities, or engagements, and the residue (if any) paid to such Shareholder or his representatives.

49. *Certificate of sale.*—A certificate in writing under the hands of two of the Directors and of the Agent and Secretary or Agents and Secretaries that the power of sale given by clause 47 has arisen, and is exercisable by the Company under these presents, shall be conclusive evidence of the facts therein stated.

50. *Transfer on sale how executed.*—Upon any such sale two of the Directors may execute a transfer of such share to the purchaser thereof, and such transfer, with the certificate last aforesaid, shall confer on the purchaser a complete title to such shares.

#### PREFERENCE SHARES.

51. *Preference and deferred shares.*—Any shares from time to time to be issued or created may from time to time be issued with any such right of preference, whether in respect of dividend or of payment of capital, or both, or any such other special privilege or advantage over any shares previously issued or then about to be issued (other than shares issued with a preference), or with such deferred rights as compared with any shares previously issued or then about to be issued, or subject to any such conditions or provisions, and with any such right or without any right of voting, and generally on such terms as the Company may from time to time by special resolution determine.

52. *Modification of rights and consent thereto.*—If at any time by the issue of preference shares or otherwise the capital is divided into shares of different classes—

- (1) The holders of any class of shares by an extraordinary resolution passed at a meeting of such holders may consent, on behalf of all the holders of shares of the class, to the issue or creation of any shares ranking equally therewith, or having any priority thereto, or to the abandonment of any preference or priority, or of any accrued dividend, or the reduction for any time or permanently of the dividends payable thereon, or to any scheme for the reduction of the Company's capital affecting the class of shares.
- (2) All or any of the rights, privileges, and conditions attached to each class may be commuted, abrogated, abandoned, added to, or otherwise modified by a special resolution of the Company in General Meeting, provided the holders of any class of shares, affected by any such commutation, abrogation, abandonment, addition, or other modification of such rights, privileges, and conditions, consent thereto, on behalf of all the holders of shares of the class, by an extraordinary resolution passed at a meeting of such holders.

Any extraordinary resolution passed under the provisions of this Article shall be binding upon all the holders of shares of the class, provided that this Article shall not be read as implying the necessity for such consent as aforesaid in any case in which but for this Article the object of the resolutions could have been effected without it.

53. *Meeting affecting a particular class of shares.*—Any meeting for the purpose of the last preceding clause shall be convened and conducted in all respects as nearly as possible in the same way as an Extraordinary General Meeting of the Company, provided that no Shareholder, not being a Director, shall be entitled to notice thereof or to attend thereat, unless he be a holder of shares of the class intended to be affected by the resolution, and that no vote shall be given except in respect of a share of that class, and that at any such meeting a poll may be demanded in writing by any shareholder personally present and entitled to vote at the meeting.

#### CALLS.

54 (a). *Directors may make calls.*—The Directors may from time to time make such calls as they think fit upon the registered holders of shares, in respect of moneys unpaid thereon, and not by the conditions of allotment made payable at fixed times; and each Shareholder shall pay the amount of every call so made on him to the persons and at the times and places appointed by the Directors, provided that two months' notice at least shall be given to the Shareholders of the time and place appointed for payment of each call.

(b) *Calls, time when made.*—A call shall be deemed to have been made at the time when the resolution authorizing the call was passed at a Board Meeting of the Directors.

(c) *Extension of time for payment of call.*—The Directors shall have power in their absolute discretion to give time to any one or more Shareholder or Shareholders, exclusive of the others, for payment of any call or part thereof on such terms as the Directors may determine. But no Shareholder shall be entitled to any such extension except as a matter of grace or favour.

55. *Interest on unpaid call.*—If the sum payable in respect of any call or instalment is not paid on or before the day appointed for the payment thereof, the holder for the time being of the share in respect of which the call shall have been made, or the instalments shall have been due, shall pay interest for the same at the rate of 9 per centum per annum from the day appointed for the payment thereof to the time of the actual payment, but the Directors may, when they think fit, remit altogether, or in part any sum becoming payable for interest under this clause.

56. *Payments in anticipation of calls.*—The Directors may at their discretion receive from any Shareholder willing to advance the same, and upon such terms as they think fit all or any part of the amount of his shares beyond the sum actually called up.

#### BORROWING POWERS.

57. *Power to borrow.*—The Directors shall have power to procure from time to time, in the usual course of business, such temporary advances on the produce in hand, or in the future to be obtained from the Company's estates, as they may find necessary or expedient for the purpose of defraying the expenses of working the Company's estates, or of erecting, maintaining, improving, or extending buildings, machinery or plantations, or otherwise. Also from time to time at their discretion to borrow or raise from the Directors or other persons any sum or sums of money for the purposes of the Company, but so that the amount at any one time owing in respect of moneys so borrowed or raised shall not, without the sanction of a General Meeting, exceed the sum of One hundred thousand Rupees (Rs. 100,000). With the sanction of a General Meeting the Directors shall be entitled to borrow such further sum or sums, and at such rate of interest, as such meeting shall determine. The Directors may, for the purpose of securing the repayment of any such sum or sums of money so borrowed or raised, create and issue any mortgages, debentures, mortgage debentures, debenture stock, bonds, or obligations of the Company, charged upon all or any part of the undertaking, revenue, property, and rights or assets of the Company (both present and future), including uncalled capital or unpaid calls, or give, accept, or endorse on behalf of the Company any promissory notes or bills of exchange. Provided also that before the Directors execute any mortgage, issue any debentures, or create any debenture stock they shall obtain the sanction thereto of the Company in General Meeting, whether Ordinary or Extraordinary. Any such securities may be issued either at par or at a premium or discount, and may from time to time be cancelled or discharged, varied or exchanged as the Directors may think fit, and may contain any special privileges as to redemption, surrender, drawings, allotment of shares, or otherwise. Every debenture or other instrument issued by the Company for securing the payment of money may be so framed that the moneys thereby secured shall be assignable free from any equities between the Company and the person to whom the same may be issued. A declaration under the Company's seal contained in or endorsed upon any of the documents mentioned in this Article and subscribed by two or more of the Directors, or by one Director and the Agent and Secretary or Agents and Secretaries, to the effect that the Directors have power to borrow the amount which such document may represent, shall be conclusive evidence thereof in all questions between the Company and its creditors, and no such document containing such declaration shall, as regards the creditor, be void on the ground of its being granted in excess of the aforesaid borrowing power unless it shall be proved that such creditor was aware that it was so granted.

#### MEETINGS.

58. *First General Meeting.*—The First General Meeting of the Company shall be held at such time, not being more than twelve months after the registration of the Company, and at such place as the Directors may determine.

59. *Subsequent General Meetings.*—Subsequent General Meetings shall be held once in every year at such time and place as may be prescribed by the Company in General Meeting, and if no time or place is prescribed, at such time and place as may be determined by the Directors.

Upon the receipt of such requisition the Directors shall forthwith proceed to convene an Extraordinary General Meeting, to be held at such time and place as they shall determine. If they do not proceed to convene the same within seven days from the delivery of the requisition, the requisitionists may themselves convene an Extraordinary General Meeting, to be held at such place and at such time as the Shareholders convening the meeting may themselves fix.

63. *Notice of resolution.*—Any Shareholder may, on giving not less than ten days' previous notice of any resolution, submit the same to a meeting. Such notice shall be given by leaving a copy of the resolution at the registered office of the Company.

65. *Business requiring and not requiring notification.*—Every Ordinary General Meeting shall be competent, without special notice having been given of the purposes for which it is convened, or of the business to be transacted thereat, to receive and discuss any report and any accounts presented thereto by the Directors, and to pass resolutions in approval or disapproval thereof, and to declare dividends, and to elect Directors and Auditors retiring in rotation, and to fix the remuneration of the Auditors, and shall also be competent to enter upon, discuss, and transact any business whatever of which special mention shall have been made in the notice or notices upon which the meeting was convened.

74. *Poll.*—If a poll be duly demanded, the same shall be taken in such manner and at such time and place as the Chairman shall direct, and the result of the poll shall be deemed to be the resolution of the meeting at which the poll was demanded. 75. *Poll how taken.*—If at any meeting a poll be demanded by notice in writing signed by some Shareholder present at the meeting and entitled to vote, which notice shall be delivered during the meeting to the Chairman, the meeting shall, if necessary, be adjourned, and the poll shall be taken at such time and in such a manner as the Chairman shall direct, and in such case every Shareholder shall have the number of votes to which he may be entitled as hereinafter provided, and in case at any such poll there shall be an equality of votes, the Chairman of the meeting at which such poll shall have been demanded shall be entitled to a casting vote in addition to any votes to which he may be entitled as a Shareholder and proxy and attorney, and the result of such poll shall be deemed to be the resolution of the Company in such meeting.

**NOTIFICATIONS UNDER "THE PATENTS ORDINANCE, 1906."**

A Certificate of Registration has been granted on British Patent No. 20,558 of September 8, 1909 (Ceylon No. 1,282).  
*Alexander Dickson.*—"Improvements relating to the treatment of Sewage."

*Abstract.*—This invention relates to certain improvements in connection with the treatment of fresh sewage whereby it is rendered serviceable for fertilising and other purposes, and in accordance therewith the separation of the organic matter is effected by adding yeast thereto. The fermentation thus set up separates the sludge from the sand and liquor and forces it to the top from whence it may be collected, and utilised for various purposes.

The proportion of yeast necessary is about  $\frac{1}{2}$  per cent. of the sewage used which is equal to about 10 cwt. ordinary brewer's yeast added to 100 tons sewage in a tank and allowed to remain for about 48 hours—the organic portion is then found at the top and can be readily taken off and utilised.

The claims are :—

(1) The treatment of sewage by the addition of yeast in order to separate the sludge so as to render same serviceable for fertilization.

(2) The treatment of sewage by the addition of yeast in order to separate the sludge and the passing of the resultant mixture through phosphates in order to neutralize any acidity substantially as described.

(3) The preparation or recovery of ammonia from briquettes made with fine coal and material separated from the sludge by the addition of yeast as described.

*Thomas Cockerill.*—"Improvements in Apparatus for the estimation of water in latex."

*Abstract.*—This invention relates to a means for estimating the amount of water contained in latex.

In carrying this invention into effect an instrument of the hydrometer type such as is used for indicating the specific gravities of liquids is used. Instead of indicating specific gravities, however, the new instrument will indicate the water contents of the latex. This latter indication may be expressed by a scale which will directly indicate the parts of water contained in the latex or by a scale which will directly indicate the amount of wet indiarubber present in the latex and which amount varies according to the amount of water contained in the latex, or by both scales.

The claims are :—

(1) An apparatus or instrument of the type of a hydrometer for ascertaining the water or indiarubber contents of latex and which instrument is so marked or graduated as to give the desired information either directly by figures marked upon it or indirectly as for example, by the aid of a table of reference, substantially as described.

(2) An apparatus or instrument for ascertaining the water or indiarubber contents of latex, such instrument being of the type of a hydrometer, and being so marked or graduated as to give the desired information by figures marked upon it, substantially as hereinbefore described.

(3) The combination of the particular scale or scales as described and substantially as illustrated with an apparatus or instrument of the type of a hydrometer substantially as described and illustrated.

(4) An instrument for ascertaining the water or indiarubber contents of latex, such instrument being of the construction hereinbefore described with reference to the drawing.

*Hans Siegwart.*—“Method of manufacture of Tubular Bodies, such as Pipes, Hollow Masts, or the like.”

*Abstract.*—This invention relates to improvements in a method of manufacture of tubular bodies such as pipes, hollow masts or the like from lengths or fillets of artificial stone or similar material.

According to this invention the lengths or fillets of artificial stone are built upon a core and secured together by some material such as cement that can be introduced between the fillets whilst soft and afterwards hardens and holds the parts together.

The fillets with the cementing medium may be held in place upon the core by a binding of sacking or other material.

The method of manufacture preferred, however, consists in mounting the fillets upon the sacking or other binding, the fillets being arranged longitudinally upon the binding and spaced apart a convenient distance. The cementing medium is then applied between the fillets and the band or binding of sacking and thus loaded (conveniently whilst in a flat state) is wrapped round the core and holds all the parts in place until the cementing medium has set.

The claims are :—

(1) A method of manufacturing tubular bodies consisting in combining fillets of hard material with a soft material, which will afterwards harden and which is to be formed tubular, substantially as described.

(2) A method of manufacturing tubular bodies as set forth in claim 1, consisting in arranging upon a band of binding material fillets of hard material, introducing between the fillets a soft material which will afterwards harden, and wrapping the band thus loaded round a core where the whole is held in place until the cementing medium has set, substantially as described.

(3) A method of manufacturing tubular bodies as set forth in claim 1 and 2, characterised by placing reinforcing rods longitudinally between the fillets before introducing the soft material, substantially as described.

(4) A method of manufacturing tubular bodies as set forth in claim 1-3, characterised by the fillets being disposed end to end in parallel rows that lie in the longitudinal direction of the body to be manufactured the fillets in one row breaking joint with those in the next, substantially as described.

*Oswald Silberrad.*—“Improvements in explosives.”

*Abstract.*—This invention relates to the preparation, purification and use of nitro-compounds and particularly to the preparation, purification and use of difficultly volatile nitrated products which remain liquid at ordinary temperatures.

The inventor says :—I have found that the neutral liquid portion from middle, heavy, and anthracene oils obtained from tar after suitable chemical washing produces on nitration under suitable conditions a mixture of nitro-compounds that are possessed of very low vapour tension and remain liquid at ordinary temperatures.

The claims are :—

(1) A process of producing a liquid difficultly volatile nitro-product, consisting in separating from coal tar a fraction boiling at between 200° to 350° centigrade or any suitable portion of said fraction and subjecting the same to nitration; as set forth.

(2) A process of effecting nitration of a difficultly nitratable substance, consisting in first acting upon it with nitric acid of suitable strength and subsequently acting upon it with nitric acid in the presence of sulphuric acid; as set forth.

(3) A process of effecting nitration of a difficultly nitratable substance, consisting in acting upon it with relatively weak nitric acid, gradually increasing the concentration of the acid acting upon the substance, and eventually causing a mixture of nitric and sulphuric acids to act upon the substance; as set forth.

(4) A process of purifying products of nitration, consisting in admixing the same with a dilute solution of an alkaline material and maintaining said admixture in agitation and at a temperature of about from 50° to 70° C. for a considerable number of hours; as set forth.

(5) A process of purifying products of nitration, consisting in admixing therewith a relatively large volume of water in the presence of a substance capable of fixing decomposition products with the formation of a relatively inert body, and gently boiling said admixture under a reflux condenser for a prolonged period; as set forth.

(6) A process of purifying products of nitration, consisting in admixing therewith a dilute solution of an alkaline material maintaining said admixture in agitation and at a temperature of about 50° to 70° C. for a number of hours, and then heating the product of nitration with an aqueous suspension of a substance capable of forming with decomposition products a relatively inert body, said heating being performed by keeping the mixture gently boiling under a reflux condenser for a number of hours; as set forth.

(7) As a new article of manufacture a liquid nitration product of a neutral coal tar fraction boiling between 200° C. and 350° C., herein referred to as Nitrol.

(8) The term “Nitrol” for the new article of manufacture above mentioned, namely the liquid nitration product of a neutral coal tar fraction boiling between 200° C. and 350° C.

- (9) Explosive containing Nitrol as an ingredient.  
 (10) A plastic explosive including Nitrol, a gelatinising agent, and an oxygen-bearing substance.  
 (11) A plastic explosive including nitrated toluene, nitrol, a gelatinising agent, and an oxygen-bearing substance.  
 (12) Explosive containing as ingredients both nitrol and nitroglycerine.  
 (13) A plastic explosive containing nitrol, nitroglycerine, a gelatinising agent, and an oxygen-bearing substance.

*Dr. Heinrich Colloseus.*—“Improved process for the separation of caoutchouc guttapercha and balata from the milky juices containing these species of rubber.”

*Abstract.*—The inventor says:—The processes hitherto proposed may be divided into two groups. According to one group the precipitation of the said species of rubber with their substances from the milky juices is effected by the addition of acids of any origin, whereas according to the other group this precipitation is effected by the addition of substances having either a precipitating or salting-out action upon the solid particles contained in suspension in the milky juices.

All those processes have the drawback that together with the rubber the albuminous substances are precipitated in a form in which they are readily decomposed and consequently cause a gradual disintegration of the caoutchouc.

This invention has now for its object to avoid the said drawback by precipitating the albuminous substances in a form wherein they will keep permanently.

The process according to this invention consists in effecting the separation of the rubber and its accompanying substances by subjecting the salt-forming constituents of the milky juices to a double decomposition.

The claims are:—

(1) A process for the separation of caoutchouc, gutta-percha, balata, and the like from the milky juices containing these species of rubber, which consists in adding to the milky juices first an alkali or other suitable equivalent, for forming water-soluble salts, and then precipitating the solid constituents of the milky juices by the addition of salts of the earthy alkali metals, earth metals, heavy metals, and the like, or their equivalents or mixtures thereof.

(2) A process as claimed in claim 1, wherein the hydroxides or oxides of the earthy alkali metals, earth metals, or heavy metals are employed instead of the salts of the earthy alkali metals, earth metals, heavy metals or the like, for the purpose of precipitating the milky juices to which an alkali or the like has been added, or wherein the alkali or the like is added together with the said oxides or hydroxides, to the milky juices.

(3) A process as claimed in claim 1 or claim 2, wherein for the purpose of effecting or promoting a fine subdivision, the milky juices are intimately mixed with an emulsifier (such as soap albuminous substances and the like) before, during, or after the addition of the alkali or the like, or the precipitants.

(4) A process as claimed in any of the preceding claims, wherein a bleaching agent is added to the milky juices at any stage of the process.

(5) A process as claimed in any of the preceding claims wherein the precipitation of the rubber is effected in the presence of an antiseptic (for instance, creosote, phenol, formaline or the like).

(6) The improved process for the separation of caoutchouc, gutta-percha, and balata from the milky juices containing these species of rubber, substantially as hereinbefore described.
