

**SUPPLEMENT**  
TO THE  
**Ceylon Government Gazette.**  
**PART I.**

**No. 6,665 — FRIDAY, SEPTEMBER 25, 1914.**

**VITAL STATISTICS OF CEYLON.**

**REPORT OF THE REGISTRAR-GENERAL OF MARRIAGES, BIRTHS, AND DEATHS FOR  
THE FIRST QUARTER OF 1914.**

**INTRODUCTORY.**

AN endeavour has been made to abridge this report as much as possible by relegating all tables to the Appendix by omitting tables which are not of special interest; by excluding the comments and tables usually devoted to the Municipality of Colombo, as these find a place in the Quarterly Reports of the Medical Officer of Health of that city; and finally, by devoting no separate chapter to the population of the estates or of the different towns,\* as statistics of these communities are dealt with under their appropriate headings of births and deaths and their causes.

**I.—Population.**

The estimated population on the last day of the quarter was 4,244,345, showing a decrease of 17,752 on the previous quarter, due to a deficit of 19,553 arrivals over departures of Indian coolies. There was an excess of 1,801 births over deaths.

2. *Indian Coolies.*—During the quarter 10,504 Indian coolies arrived in the Island and 30,057 left, as against averages of 13,145 and 19,415 respectively. The large excess of departures over arrivals was mainly due to the plague scare and the false alarm that inoculation for plague was compulsory (see paragraph 8 re plague).

**II.—Marriages.**

3. 5,682 marriages (other than Muhammadan marriages) were registered during the quarter, as against 6,660 during the preceding quarter, 5,376 during the first quarter of 1913, and 4,958 the mean of the ten preceding first quarters. Of these 4,574 were under the "General Marriages" Ordinance and 1,108 under the Kandyan. Their distribution by provinces and districts is given in Table I. in the Appendix.

**III.—Births.**

4. The births registered in the Island during the quarter totalled 45,936, corresponding to an annual rate of 43·7 per 1,000 of the population. This rate is 4·3 below that of the previous quarter, and is also 4·3 below that of the corresponding quarter of 1913, but 1·8 higher than the mean birth-rate of the ten preceding first quarters. The births on estates correspond to an annual rate of 41·3 per 1,000, and the urban births, including those of Colombo, to 31·04. The Colombo rate was 24·7. For detailed statistics see Tables I. to V., VII., and VIII.

There were 300 stillbirths registered in the thirty-two towns, as against 283 in the previous quarter and 230 in the corresponding quarter of last year. (See Table VIII.) Stillbirths are not registered in the rural registration divisions.

**IV.—Deaths.**

5. The deaths from all causes registered in the Island during the quarter numbered 44,135, and corresponded to an annual rate of 42·0 per 1,000 persons living. This rate is 8·3 higher than the mean rate in the ten preceding first quarters and 12·4 higher than the rate in the preceding quarter. In the provinces the rate ranged from 28·6 in the Western to 70·6 in the North-Central, and in all cases it was above the average; in the districts it varied between 27·4 in Negombo and 75 both in Matale and in Kurunegala. The mortality on estates during the quarter corresponded to a crude annual death-rate of 46·3 per mille, as against an average of 34·2. The rate was highest in the estates in the Kurunegala District, 124·3, average 48·9, and was very high, 88·4, in the Ratnapura estates. The urban mortality was 38·0 per mille per annum, average 32·07. Among the towns (excluding Vavuniya and Lunugala, which have a population under 1,000, and Nuwara Eliya, in which the population is largely migratory), the lowest mortality during the quarter was recorded in Kegalla, 11·42 per mille, and the highest in Jaffna, 93·79, followed by 74·09 and 64·46 in Kurunegala and Ratnapura respectively. In the town of Colombo the death-rate was 28·45, average 31. The excessive general mortality is reflected in the high infantile mortality rate (see paragraph 6), and may be attributed indirectly to the abnormal rainfall and consequent floods in December of the previous quarter. For detailed statistics see Tables I. to VI., VII., and VIII.

\* These now number 32, including the town of Kalmunai in Batticaloa District, which was proclaimed with effect from January 1, 1914.

## V.—Infantile Mortality.

6. The infantile mortality in the Island measured by the proportion of deaths under one year of age to registered births was 264 per 1,000 for all races. The highest rate among the Sinhalese was 617 in the Matale, among the Tamils 640 in the Trincomalee, and among the Moors 430 in the Puttalam District ; the lowest was 119 for Sinhalese in the Kalutara District. The estate infantile mortality rate was 267 per 1,000, and was almost identical with the Island rate ; it reached its maximum, 842 per 1,000, in the estates of the Kurunegala District, where the general rate, exclusive of estate figures, was nearly 600. In the towns the infantile mortality was 268 per 1,000 births registered, as against an average of 261, and ranged from 126 in Kalutara to 609 in Jaffna. Colombo town recorded 236, against an average of 303. Infantile mortality rates calculated on the number of births and deaths that occur in any one town of small population are misleading, and such rates are not taken into consideration.

## VI.—Causes of Death.

7. Of the total deaths, 44,135 registered during the quarter, nearly 25 per cent. were reported as due to Pyrexia—a vague term descriptive of one of the symptoms of various diseases. In towns and estates the percentage of deaths from this cause was 1 and 2 respectively. Other causes of deaths in the Island during the quarter were Infantile Convulsions 11 per cent. of the total deaths ; Diarrhoea and Enteritis, 11 per cent. ; Diseases of the Skin, 9 per cent. ; Diseases of Early Infancy, 5 per cent. ; Rickets, 4 per cent. ; Dysentery, Tuberculosis, and Pneumonia, 3 per cent. each ; Diseases and Accidents of Pregnancy, 3 per cent. ; Anaemia, Malaria, or Malarial Cachexia, 2 per cent. each ; Anchylostomiasis and Bronchitis, 1 per cent. each—*vide Table X.* for detailed statistics.

8. The quarter was signalized by the sudden outbreak of plague for the first time in the history of Ceylon. The first case was discovered on January 25 in Sea street, in the city of Colombo. The total number of deaths from plague registered in the Island in the quarter was 119, including 109 within the Municipal limits of Colombo and 10 elsewhere (4 in Colombo District, 3 in Kalutara, 2 in Kandy, and 1 in Mannar).

9. There was one death from Smallpox in the Galle town, 31 deaths from Cholera (15 in Galle District, 10 in Colombo, 3 in Kegalle, 2 in Negombo, and 1 in Kalutara), and two deaths from Beri-beri.

## 10. Affections caused by external causes—

(a) *Suicide.*—Fifty-eight deaths were due to suicide, against 55 in the previous quarter and 47 in the corresponding quarter of last year.

(b) *Homicide.*—Sixty-one deaths were due to Homicide, against 54 in the previous quarter and 46 in the corresponding quarter of last year. Of these, 7 were caused by firearms and 26 by cutting or piercing instruments.

(c) *Executions.*—Twelve judicial executions took place during the quarter, against 9 in the previous quarter and 6 in the corresponding quarter of last year.

(d) *Accidents.*—Of the 513 deaths attributed to violence, 98 were due to drowning, 110 to falls from trees, and 72 to burns (of which 15 were due to kerosine oil lamps). Vehicles caused 24 deaths, snake-bite 66.

11. *Causes of Deaths in the Estates.*—The chief causes of mortality in the estates were Diarrhoea and Enteritis, which accounted for 16 per cent. of the total deaths ; Diseases of Early Infancy, 15 per cent. ; Dysentery, 12 per cent. ; Anchylostomiasis, 10 per cent. ; Pneumonia and Convulsions of Infants, 8 per cent. each ; Debility of Infants, 5 per cent. ; Senility, 4 per cent. ; Malaria and Malarial Cachexia, 3 per cent. ; Bronchitis and Phthisis, 2 per cent. each. For detailed statistics see *Table XI.*

12. *Causes of Deaths in the Towns.*—In the 32 towns in the Island (inclusive of Colombo) of the total number of deaths, Malaria and Malarial Cachexia accounted for 10 per cent. ; Diarrhoea and Pneumonia, 8 per cent. each ; Dysentery, 7 per cent. ; Phthisis, 6 per cent. ; Convulsions of Infants, 5 per cent. ; Anchylostomiasis, 4 per cent. ; Bronchitis and Enteritis, 3 per cent. each ; Enteric Fever, 1 per cent. Six per cent. of the deaths in Colombo were due to plague. For detailed statistics see *Table XII.*

Colombo, August 28, 1914.

BERTRAM HILL,  
Registrar-General.

## APPENDIX.

Table I.—Area, Estimated Population, and the Number of Marriages, Births, and Deaths registered, in the First Quarter of 1914.
