

SUPPLEMENT

TO THE

Ceylon Government Gazette

PART I.

No. 6,679 — FRIDAY, NOVEMBER 6, 1914.

VITAL STATISTICS OF TOWNS IN CEYLON IN THE MONTH OF SEPTEMBER, 1914.

REPORT OF THE REGISTRAR-GENERAL.

THIS report deals with the Vital Statistics of the 32 principal towns in the Island proclaimed under sections 31-36 of the Ordinance No. 1 of 1895.

Births.

2. The births numbered 1,207 (642 males and 565 females), and were equal to an annual rate of 25·99 per 1,000, against 24·19 in the preceding month, 27·84 in the corresponding month of last year, and 29·27 the monthly average since July, 1907. The rate ranged from 10·03 in Ratnapura to 55·56 in Moratuwa.

3. In the city of Colombo the births numbered 468 (249 males and 219 females), and were equal to an annual rate* of 23·42 per 1,000, against 18·98 in the preceding month, 23·37 in the corresponding month of last year, and 24·66 the monthly average. The rate ranged from 8·79 in Kollupitiya to 34·40 in Wellawatta.

Deaths.

4. The total deaths registered during the month amounted to 1,447 (808 males and 639 females). There were 1,188 deaths of residents, equivalent to an annual rate of 27·88 per 1,000, against 29·09 in the preceding month, 26·94 in the corresponding month of last year, and 30·76 the monthly average. The rate ranged from 78·36 in Anuradhapura to 4·28 in Kegalla.

5. In the city of Colombo the deaths numbered 514 (293 males and 221 females). There were 467 deaths of residents, equivalent to an annual rate* of 27·11 per 1,000, against 27·25 in the preceding month, 27·35 in the corresponding month of last year, and 30·93 the monthly average. Kollupitiya showed the lowest death-rate, viz., 13·59, and Wellawatta the highest, 31·88.

6. Stillbirths numbered 72 (45 males and 27 females), against 74 in the preceding month.

Infantile Mortality.

7. The infantile mortality was equal to a rate of 234 per 1,000 births registered, against 245 in the preceding month, 280 in the corresponding month of last year, and 267 the monthly average. Infant mortality rates calculated on the number of births and deaths that occur in any one town of small population are misleading, and such rates are omitted from the table.

8. The infantile mortality in the city of Colombo was 267 per 1,000 births registered, against 242 in the preceding month, 340 in the corresponding month of last year, and 318 the monthly average, and ranged from 500 in Kollupitiya to 187 in Kotahena.

Causes of Death.

9. The highest mortality was from *Debility*, to which 10 per cent. of the total deaths were due, 9 per cent. each were due to *Pneumonia* and *Phthisis*, 7 per cent. each to *Diarrhœa* and *Infantile Convulsions*, 5 per cent. to *Dysentery*, 4 per cent. each to *Anchylostomiasis* and *Enteritis*, and 2 per cent. to *Bronchitis*.

10. In the city of Colombo the highest mortality was from *Phthisis*, which caused 14 per cent. of the total number of deaths in the city. 9 per cent. each were due to *Pneumonia* and *Debility*, 8 per cent. to *Infantile Convulsions*, 7 per cent. to *Enteritis*, 4 per cent. to *Bronchitis*, 3 per cent. to *Plague*, and 1 per cent. each to *Anchylostomiasis* and *Diarrhœa*. The total number of deaths registered from *Plague* was 15, against 34 in August, 52 in July, 36 in June, 30 in May, 29 in April, and 71 in March.

11. *Infectious Diseases reported*.—The most prevalent infectious disease during the month was *Phthisis*, of which 102 cases were reported (85 in Colombo), followed by *Smallpox* 70 (67 in Colombo, 2 in Hambantota, 1 in Tangalla), *Chickenpox* 65 (58 in Colombo, 4 in Kandy), *Enteric Fever* 23 (15 in Colombo), *Plague* 19 (in Colombo), *Dysentery* 19 (14 in Weligama, 5 in Matara), *Continued Fever* 14 (10 in Colombo), *Measles* 4 (2 in Colombo), *Mumps* 4 (2 in Colombo, 2 in Jaffna), *Diarrhœa* 1 (in Colombo).

Meteorology.

12. *Rainfall*.—Ratnapura recorded the highest rainfall (13·26 inches), followed by Hatton and Dikoya (11·94 inches). In the other towns the rainfall ranged from 0·81 inch in Puttalam to 9·72 inches in Nuwara Eliya.

13. *Temperature*.—The mean temperature varied from 60·6° in Nuwara Eliya to 85·6° in Anuradhapura, and was 81·6° in Colombo.

14. For detailed information see Tables I. and II. for all towns, and Tables III. and IV. for the city of Colombo, in the Appendix.

Registrar-General's Office,
Colombo, October 27, 1914.

N. W. MORGAPPAH,
for Registrar-General.

* The city-rate is worked out differently from the ward-rates, and takes into account hospital events, &c., not assignable to wards.

Table I.—Number of Births and Deaths registered during September, 1914, their Proportion per 1,000 of the Population per Annum, and the Stillbirths and the Deaths of Children under One Year and their Proportion per 1,000 Registered Births, together with the Average Birth- and Death-rates and Infantile Mortality from July, 1907, to June, 1914, and the Mean Temperature and Rainfall in the month in each Town of the Island proclaimed under Sections 31-36 of the Ordinances No. 1 of 1895.

Provinces and Towns.	Population (exclusive of the Military) at the Census of 1911.		Total Births.		Total Deaths.		Total Stillbirths.		Deaths of Town Residents.	Birth-rate.		Death-rate, excluding non-resident*.		Deaths of Children under One Year.	Mean Temperature.	Rainfall in Inches.

* The standardized death-rates represent the crude death-rates multiplied by the respective standardizing factor in order to make correction for differences of sex- and age-composition of the several populations in 1911 as compared with that of the town limits. See note * p. 1.
 † See paragraph 7 of report.
 ‡ Estimated to the end of December, 1913, by natural increase method owing to the inability of applying the intercensal method, as the limits of the town were altered between 1901 and 1911.
 § Calculated for non-estate events on the population exclusive of the estate population at the Census of 1911.
 ¶ Hence the rates in previous reports cannot be safely compared with those of subsequent ones.
 ** Standardized death-rates for Kaipitiya and Lunugala towns not available, as the population of these towns has not been enumerated at the Census of 1911 by age and sex, while the town of Kalmunai was created a registration division only in January, 1914. The death-rate given for it is therefore independent of these towns, but is carefully affected by their rates.

Table II.—Causes of Deaths registered during September, 1914, in each Town of the Island proclaimed under Sections 31-36 of the Ordinance No. 1 of 1895.

* For explanation of "standardized death-rate" see note *, Table I. The population of the several wards of the city not being available by age- and sex-constitution, their standardized death-rates cannot be calculated.

† Estimated partly on the intercensal increase method and partly on the natural increase method, i.e., population exclusive of Wellawatta Ward on the former method and that of Wellawatta added to the town on January 1, 1912, on the latter method (as it was not a separate division at the Census of 1901).

‡ The population of these two wards being a fluctuating one, their population cannot be estimated to the middle of 1914. Hence the Census figures are retained.

§ This population is estimated partly on the natural increase method and partly on the intercensal increase method, i.e., population of Wellawatta on the former method (as it was not a separate division at the Census of 1901) and that of the part of Kollupitiya taken over to Wellawatta on the latter method.

|| For the twenty-four months, January, 1912, to December, 1913.

Table IV.—Causes of Deaths registered during the Month of September, 1914, in each Ward and of each Race in the City of Colombo.
