ANNEXURE.

From the ACTING GAS INSPECTOR to the CHAIRMAN, MUNICIPAL COUNCIL, Colombo.

No. 180.

Gas Inspector's Office,
Colombo, April 10, 1903.

SIR,—WITH reference to your letter No. 367 asking for particulars of the work performed by me during my term of office as Acting Gas Inspector, I have the honour to send you the following details:—

1. I had to analyze the gas according to the terms of the gas contract. The following solutions and material had therefore to be prepared, specially as they cannot be bought:—Standard solutions of potassium hydroxide, sulphuric acid, sodium hydroxide, ammonia, and barium chloride.

Sulphur in any form had to be carefully looked for in the gas and estimated. When a doubt exists as to the quantity of ammonia present in the gas, a careful analysis must be made. The time taken for the test has extended over a period of 15 hours, and the graduated apparatus had to be carefully tested. It is necessary that these analysis should be done, as bad gas would affect the lamps owned by the Council and the private consumer.

2. The gas had to be examined photometrically. This test is mainly for the benefit of private consumers, and under the new contract it will have to be very carefully and frequently done.

Before doing this, and to prevent disputes between the Gas Company and myself, I carefully standardized all the apparatus in the testing room. This should be done at least twice a year. The work consisted of the following details:—

The testing of the standard burner.

Do.	do.	meter.
Do.	do.	bar.
Do.	do.	candles.
Do.	do.	candle balance.
Do.	do.	barometer and thermometer.

I took sets of records and calculated the percentages of errors of the instruments, or, where possible, repaired them. Then the candle power of the gas was taken.

Under the new contract it will be possible to maintain 60 candle power in the street lamps, but at the same time lower the candle power of the gas itself. The private lighting of the Municipality would thus suffer with the lighting of the private consumer. It will thus be more important than ever it was to see that this candle power is often and accurately made. This should be done twice a week. The 60 candle power can be maintained in the street lamps with an inferior gas or with a gas of less than 14 candle power.

3. *Incandescent Lighting.*—It must be clearly understood that there is very little relation between the candle power of the gas and the 60 candle power to be obtained in street lamps. The work of the Gas Inspector will be very much increased, because the candle power must be taken as above mentioned, and also the candle power of any doubtful mantle in any street, and he must so adjust his various pressures in the testing room to the exact same pressure as the lamp from which the mantle was removed.

The method of procedure which I adopt is as follows :—In case a lamp gives a doubtful candle power, the mantle is brought to the testing room and its candle power taken under precisely the same conditions as it would be in the street. I need not go into details further. Then, if the mantle was bad, the Gas Company would be compelled to change it, and not before. I need hardly point out that the Gas Company would not accept the word of any person, because it is simply impossible for any one to say accurately whether a mantle is giving 45, 50, or 60 candle power. There would of course be no difficulty in reporting a lamp as small flame. I have not been able to complete all my experiments under this head, but I have done a good portion of them and prepared some records, and when in London in December, 1899, I spent some time in the testing room of the Welsback Mantle Company.

I would repeat that it is exceedingly important for the Municipality that this work be thoroughly done, and the testing placed on a proper basis, or the general result will be that the Council may not get the 60 candle power in the street lighting, nor the 14 candle power gas for private consumers.

4. *Meter Testing.*—All meters are required to be stamped and tested by a duly qualified Gas Inspector under the Meter Ordinance.

For this purpose I had to test the gas-holder, which is used for the verification of the measurement of gas meters as follows :—

- (a)—The vertical descent of the holder while its contents are being discharged.
- (b)—The adjustability of its operating weight, so that it shall deliver gas at any pressure equal to 3 in. of water.
- (c)—The uniformity of its pressure, whatever it may be, throughout the descent of the holder.
- (d)—Great accuracy in its measurement.

Meters have to be tested for soundness, for percentage fast, for percentage slow, corrections must be made for temperature, the test meter must be accurately standardized.

I need hardly point out the importance of the Inspector's duties in this respect, as he must have the qualifications to satisfy a court of justice or an arbitrator that his test is correct.

I found it necessary that the Gas Inspector should have a knowledge of accounts, and, in addition to having had a scientific training, he should have a knowledge of Mechanical Engineering.

I have not touched upon the question of the Fort arc lighting, because that is a question for an Electrical Engineer, as will be seen from the correspondence I have had during the last twelve months, and the settlement of some of the questions during the tenure of office of the late Mayor, the Hon. Mr. F. R. Ellis.

5. The remaining work which has fallen to me has been :—

- The testing of the automatic pressure recorder.
- The preparation of the lighting tables.
- The preparation of the diagrams.
- The preparation of daily pressure reports.
- The daily inspection of lighting in markets, latrines, and streets.
- The ordering of repairs to lamps.
- The removal of lamps.
- The preparation of the gas contract.
- The preparation of the specification for the gas extension.

Minutes of Proceedings of a Meeting of the Municipal Council of Kandy held in the Town Hall, Kandy, on Saturday, February 21, 1903, at 8.30 o'clock a.m., in accordance with Notice dated February 16, 1903.

Present:—Hon. Mr. J. P. Lewis, Chairman; E. Beven, Esq.; C. Vanderwall, Esq.; R. W. Jonklaas, Esq.; L. Creasy, Esq.; Dr. J. Craib; P. T. Habeeboo Lebbe, Esq.

1. The Minutes of Proceedings of the Meeting held on January 17, 1903, were read, confirmed, and signed by the Chairman.

2. The following documents were submitted:—Statements of Receipts and Expenditure from close of 1902 to January 31, 1903, on account of the Municipal Fund, comprising the (No. 1) General Revenue, (No. 2) Consolidated Rate (Police and Lighting), and (No. 3) Water-rate Accounts; Progress Report of Works done brought up to the same date; Health Officer's Report for, and Statement of Cases instituted by the several Inspectors during the month of January, 1903.

Resolved—That the several statements, together with the Minutes of Proceedings of this Meeting, as required by section 90 of the Municipal Councils' Ordinance, No. 7 of 1887, and the Health Officer's report, be forwarded to the Colonial Secretary for publication in the *Government Gazette*.

3. The following papers were laid on the table:—Reports by the several Inspectors on laundries inspected during January.

4. *Correspondence*.—(a) Read letter No. 2 dated January 16 and No. 3 dated January 26, 1903, from the Colonial Secretary, intimating the sanction by His Excellency the Governor, with the advice of the Executive Council, to the levy during 1903 of certain taxes enumerated in schedule to Chairman's letter of December 22, 1902.

(b) Read letter No. 4, dated February 7, 1903, from the Colonial Secretary, stating, in reply to the request of the Council, that the payment of the instalments of the loan obtained for improvement of road round the lake be reduced to Rs. 2,000 instead of Rs. 4,000; that the Secretary of State approves of the proposal; and inquiring how it is proposed to expend the additional Rs. 2,000 thus placed at the disposal of the Council.

It was proposed by Mr. E. Beven, seconded by Mr. C. Vanderwall, that the matter be referred to the Standing Committee on "Municipal Works."

(c) Read circular No. 14, dated January 28, 1903, from the Colonial Secretary, stating that His Excellency the Governor has directed that in future the usual commission should be paid to the employés of Government Departments for collecting road Tax from the staff of the Department.

(d) Submitted memorandum E 2, dated February 11, 1903, from the Hon. the Colonial Secretary, forwarding draft by-laws for registration of dogs, which have been approved of, and requesting to be furnished with translations in Sinhalese and Tamil.

Resolved—That Mr. Poovimanesingham (Police Court Interpreter) be asked to furnish the Council with a translation, payment being made for his services.

5. In lieu of appointing a Special Committee to deal with questions in connection with water supply, it was resolved that all such matters be referred to the Standing Committee on Municipal Works.

6. Read report by the Secretary, in accordance with Minute 2, Meeting of January 17, 1903, on space available in the market, with respect to the proposal to have separate stalls for sale of buffalo meat.

Mr. Beven gave notice that he would bring forward a motion on the subject at the next Meeting. The Secretary was instructed to send him the report.

Health Officer's Report for the Month of January, 1903.

Scavenging.—The scavenging of the town has only been fairly well carried out during this month. I refer particularly to the side drains in parts of Peradeniya road and Victoria drive.

Drains.—Are as they have been for years. See my reports.

Water Supply.—Very good. See my analysis of January 9, 1903.

Alleys.—Are as they have been for years. Please see my many reports. I am now stopping people from rebuilding such ill-constructed hovels.

Laundries.—Generally well kept.

Dairies.—Fairly well kept.

Bakeries.—Fairly well kept.

Market.—Generally well kept. I have no complaints against the market-keeper or his assistant, but they cannot possibly look after or prevent the damage done by marketing folk on busy days without the help and aid of the police.

Cattle passed this Month.—Cattle, 456; buffaloes, 105; sheep, 115; goats, 243.

Slaughter House and Exposing Shed.—Well kept.

Cooly Lines.—Fairly well kept.

Boutiques.—Well kept.

Latrines.—Generally well kept. That one at the back of the Police Court, which I have visited many times this month, has insufficient accommodation for the number who use it.

General Health.—Good. A few cases of measles and chickenpox have been reported.

ANDERSON SMITH,
Health Officer.
