

SUPPLEMENT
TO THE
Ceylon Government Gazette
PART I.

No. 6,757 — FRIDAY, NOVEMBER 26, 1915.

VITAL STATISTICS OF CEYLON.

REPORT OF THE REGISTRAR-GENERAL OF MARRIAGES, BIRTHS, AND DEATHS FOR
THE SECOND QUARTER OF 1915.

INTRODUCTORY.

THREE striking facts as disclosed by the figures in this report are:—

- (a) Excess of births over deaths 15,004, an excess surpassed only in a single quarter during the past decade, namely, the first quarter of 1905, when it was 15,518.
(b) Death rate 23·3, the lowest rate recorded in any quarter during the past ten years.
(c) Deaths from Homicide 139, the highest recorded in any quarter since 1900, and more than double the average.

I.—Population.

1. The estimated population on the last day of the quarter was 4,354,418, showing an increase of 31,344 on the previous quarter, due to an excess of 15,004 births over deaths and 16,340 arrivals over departures of Indian coolies. The deaths exceed the births only in Mannar, Puttalam, Anuradhapura, and Trincomalee Districts, whilst they are less than half in Negombo, Kegalla, Matara, and Kalutara.

2. *Indian Coolies.*—There were 28,311 arrivals and 11,971 departures of Indian coolies, as against averages of 36,457 and 21,699 in the corresponding quarters of the past decade.

II.—Marriages.

3. 6,335 marriages (4,367 General and 1,968 Kandyan) were registered during the quarter, as against 5,426 in the preceding quarter, 5,235 in the corresponding quarter of the previous year and 4,587 the mean of the ten preceding second quarters. Table I. in the Appendix gives their distribution by Provinces and Districts.

III.—Births.

4. The births registered during the quarter numbered 40,113 and corresponded to an annual rate of 37·2 per 1,000 of the estimated population. This rate is 2·3 below that of the previous quarter and the same as the average of the corresponding quarters of the past decade. The estate births correspond to a rate of 36·0 per 1,000 and the urban (including those of Colombo) to 25·50. The Colombo rate is 19·77. For detailed statistics see Tables I. to V. in the Appendix.

200 stillbirths were registered in the 33 towns, as against 252 in the previous quarter and 264 in the corresponding quarter of the previous year (see Table V.).

IV.—Deaths.

5. The number of deaths registered during the quarter was 25,109, corresponding to an annual rate of 23·3. This rate is 8·6 below that of the previous quarter and is 6·1 below the average. The improvement in the death-rate is shared by all the Provinces, except the Northern and the North-Central, the healthiest being, as usual, the Western, with a rate of 18·2, and the unhealthiest the North-Central, with 41·3. Of the Districts, the improvement is discernible in all, except Jaffna, Anuradhapura, Puttalam, and Trincomalee, and is especially marked in Hambantota and Kegalla, though Negombo was the healthiest and Mannar the unhealthiest. The rate of mortality on estates is 28·4, with the highest rate (64·1) recorded for the estates of Matara. The urban rate is 25·65, and ranges from 4·20 in Kegalla to 74·36 in Mullaittivu. In the town of Colombo the death-rate is 24·83. See Tables I. to V. for detailed statistics.

V.—Infantile Mortality.

6. The infantile mortality measured by the proportion of deaths under one year to 1,000 births registered during the year ending the last day of the quarter under review is 165 for all races. The highest infantile mortality among the Sinhalese is 273 in Anuradhapura, among the Tamils it is 394 in Puttalam, and among the Moors 286 in the same District. The lowest rate among the Sinhalese is 101 in Kalutara, among the Tamils 179 in Jaffna, among the Moors 178 in Batticaloa. In the towns the infantile mortality is 221 per 1,000 births registered and is 248 in Colombo. Among the other towns (excluding Vavuniya and Lunugala) the highest rate (419) is observed in Nuwelapitiya, and the lowest (47) in Kegalla. The estate infantile mortality rate is 186. The estates of Matara record the highest rate, 287, and Colombo the lowest, 103.

VI.—Causes of Death.

7. Of the 25,109 deaths registered during the quarter, 17 per cent. were reported as due to Pyrexia. Other causes of deaths during the quarter were Infantile Convulsions, 10 per cent.; Diarrhoea and Enteritis, 10 per cent.; Diseases of the Skin and Cellular Tissue, 8 per cent.; Debility, 5 per cent.; Pneumonia, Diseases of Pregnancy, and Phthisis, 4 per cent. each; Dropsy, Senility; Intestinal Parasites, Dysentery, and Rickets, 3 per cent. each; and Anchylostomiasis, 2 per cent. Eight deaths from Plague were registered in Colombo, as against 29 in the preceding quarter and 95 in the corresponding quarter of the previous year. There were also 26 deaths from Smallpox, as against 51 in the preceding quarter and 3 in the corresponding quarter of the previous year (*vide Table VI.*).

8. Affections caused by external causes—

(a) *Suicide*.—Fourty-seven deaths were due to suicide, against 58 in the preceding quarter and 50 in the corresponding quarter of the previous year.

(b) *Homicide*.—One hundred thirty-nine deaths were due to homicide, against 56 in the preceding quarter and 50 in the corresponding quarter of the previous year. Of these, 56 were caused by firearms and 45 by cutting or piercing instruments.

(c) *Executions*.—Nine judicial executions took place during the quarter, against 11 in the preceding quarter and 8 in the corresponding quarter of the previous year.

(d) *Accidents*.—Of the 474 deaths attributed to violence, 123 were due to drowning (38 in wells and 6 in pits), 103 to fall from trees, and 33 to burns. Snake bite caused 79 deaths, and fall of heavy substances 18. Trains were responsible for 6 deaths, carts to 13, and motor cars for 2.

9. *Causes of Deaths on the Estates*.—The highest mortality on the estates was from Debility, to which was due 19 per cent. of the total deaths; Diarrhoea and Enteritis accounted for 16 per cent.; Dysentery, 11 per cent.; Anchylostomiasis, 10 per cent.; Pneumonia, 9 per cent.; Infantile Convulsions, 8 per cent.; Senility, 3 per cent.; and Phthisis, Diseases of Pregnancy, Dropsy, and Malaria, 2 per cent. each. For detailed statistics see Table VII.

10. *Causes of Deaths in the Towns*.—In the 33 towns of the Island (inclusive of Colombo), 11 per cent. of the total deaths were due to Pneumonia; 10 per cent. to Phthisis; 9 per cent. to Debility; 8 per cent. to Convulsions; 7 per cent. to Diarrhoea; 4 per cent. each to Dysentery, Anchylostomiasis, and Malaria; Cachexia; 3 per cent. each to Enteritis and Malaria; Fever; 2 per cent. each to Bright's Disease, Bronchitis, Puerperal Septicæmia, and Enteric Fever. For detailed statistics see Table VIII.

Registrar-General's Office,
Colombo, October 19, 1915.

W. L. KINDERSLEY,
Registrar-General.

* The standardized death-rates multiplied by the respective standardizing factor in order to make correction for differences of sex- and age-constitution of the several populations in 1911 as compared with that of the Island. [†] See paragraph 6 in report. [‡] Blanks under these columns indicate that there are no observatories or rain gauges.

Kalutara proclaimed in January, 1914.

Ambarangoda proclaimed in January, 1915.
