

SUPPLEMENT
TO THE
Ceylon Government Gazette
PART I.

No. 6,813 — FRIDAY, JULY 28, 1916.

**VITAL STATISTICS OF TOWNS IN CEYLON IN THE
MONTH OF JUNE, 1916.**

REPORT OF THE REGISTRAR-GENERAL.

THIS report deals with the Vital Statistics of the 33 principal towns in the Island proclaimed under sections 31-36 of the Ordinance No. 1 of 1895.

Births.

2. The births numbered 1,256 (708 males and 548 females), and were equal to an annual rate of 25·49 per 1,000, against 24·97 in the preceding month, 22·71 in the corresponding month of last year, and 26·40 the average of the corresponding months since 1908. The rate ranged from 13·00 in Nuwara Eliya to 50·47 in Tangalla.

3. In the city of Colombo the births numbered 415 (237 males and 178 females), and were equal to an annual rate* of 19·51 per 1,000, against 16·88 in the preceding month, 16·36 in the corresponding month of last year, and 22·57 the average of the corresponding months since 1908. The rate ranged from 11·15 in Kollupitiya to 23·03 in New Bazaar.

Deaths.

4. The total deaths registered during the month numbered 1,679 (955 males and 724 females), and was the highest recorded in any month during this year. There were 1,292 deaths of residents, equivalent to an annual rate of 28·58 per 1,000, against 28·52 in the preceding month, 26·74 in the corresponding month of last year, and 29·72 the average for the month of June in each year since 1908. The rate ranged from 68·27 in Hatton and Dikoya to 10·19 in Nuwara Eliya.

5. In the city of Colombo the deaths numbered 609 (367 males and 242 females). There were 523 deaths of residents, equivalent to an annual rate* of 28·53 per 1,000, against 26·24 in the preceding month, 28·19 in the corresponding month of last year, and 29·94 the average for the month of June in each year since 1908. The rate ranged from 34·94 in Wellawatta to 8·64 in Kollupitiya.

6. Stillbirths numbered 79 (45 males and 34 females), against 88 in the preceding month.

Infantile Mortality.

7. The infantile mortality was equal to a rate of 221 per 1,000 births registered during the year ended June 30, 1916. Reckoned on the births registered during the month only the rate was 223, against 231 in the preceding month, 274 in the corresponding month of last year, and 270 the average of the corresponding months since 1908.

8. The infantile mortality in the city of Colombo was 225 per 1,000 births registered during the year ended June 30, 1916. Calculated on the births registered during the month the rate was 236, against 256 in the preceding month, 334 in the corresponding month of last year, and 334 the average of the corresponding months since 1908.

Causes of Death.

9. The highest mortality was from *Pneumonia*, to which was due 11 per cent. of the total number of deaths, 9 per cent. were due to *Debility*, 8 per cent. to *Diarrhoea*, 7 per cent. each to *Convulsions* and *Phthisis*, 5 per cent. each to *Dysentery* and *Ankylostomiasis*, 3 per cent. to *Enteritis*, 2 per cent. each to *Bright's Disease* and *Nephritis*, *Enteric Fever*, and *Bronchitis*, and 1 per cent. to *Puerperal Septicæmia*.

10. In the city of Colombo *Pneumonia* and *Phthisis* each contributed to 12 per cent. of the total number of deaths. *Convulsions* caused 7 per cent., *Debility* and *Enteritis* 6 per cent. each, *Dysentery* and *Bright's Disease* and *Nephritis* 3 per cent. each, and *Enteric Fever*, *Bronchitis*, and *Diarrhoea* 2 per cent. each. The number of deaths registered from *Plague* was 34, an enormous increase on 9 registered during the previous month. The number has not been exceeded in any month since August, 1914. Eleven deaths from *Cholera* were registered, against 16 in the preceding month.

11. *Infectious Diseases reported*.—The most prevalent infectious disease during the month was *Measles*, of which 147 cases were reported (119 in Colombo, 18 in Kandy), followed by *Chickenpox* 145 (114 in Colombo, 17 in Badulla), *Phthisis* 104 (87 in Colombo, 6 in Galle, 5 in Batticaloa), *Enteric Fever* 63 (35 in Colombo, 16 in Galle), *Plague* 38 in Colombo), *Continued Fever* 26 (7 each in Colombo and Moratuwa, 5 in Galle), *Mumps* 11 (7 in Colombo and 4 in Kandy), *Diarrhoea* 3 (2 in Galle and 1 in Colombo), *Smallpox* 3 (1 each in Colombo, Moratuwa, and Jaffna), *Dysentery* 2 (in Moratuwa), *Cholera* 2 (in Colombo), *Whooping Cough* 1 (in Kandy), and *Diphtheria* 1 (in Colombo).

Meteorology.

12. *Rainfall*.—Hatton and Dikoya recorded the highest rainfall (22·55 inches), followed by Ratnapura (17·18 inches). In the other towns the rainfall ranged from 16·31 inches in Kegalla to 0·02 inch in Jaffna. Colombo recorded 7·97 inches.

13. *Temperature*.—The mean temperature varied from 60·8° in Nuwara Eliya to 85·8° in Batticaloa, and was 80·8° in Colombo.

14. For detailed statistics, see Tables I. and II. for all towns, and Tables III. and IV. for the city of Colombo, in the Appendix.

Registrar-General's Office,
Colombo, July 17, 1916.

N. W. MORGAPPAH,
for Registrar-General.

* The city-rate is worked differently from the ward-rates, and takes into account hospital events, &c., not assignable to wards.

Table I.—Number of Births and Deaths registered during June, 1916, their Proportion per 1,000 of the Population per Annum, and the Stillbirths and the Deaths of Children under One Year and their Proportion per 1,000 Registered Births, together with the Average Birth- and Death-rates in the corresponding months since 1908, and the Mean Temperature and Rainfall in the month in each Town of the Island proclaimed under Sections 31–36 of the Ordinance No. 1 of 1895.

The standardised death rates represent the crude death rates multiplied by the respective standardising factor in order to make correction for differences of sex- and age-constitution of the several populations in 1911 as compared with that of the Island.

The standardised death rates for the Islands did not differ materially from those of the other districts and there are no observatories or rat-gauge stations available. The increase of population is due to the extension of the town limits as from July, 1915. The standardised death rates for Kapitaya and Lunugama towns not available, as the non-enumeration of these towns has not been enumerated at the Census of 1911 by age and sex, while the town of Kalmun was created a registration division on January 1, 1911, and the town of Alimalgoda in January 1915. The death-rate given for "All Towns" is therefore independent of those towns, but is scarcely affected by their rates.

* Report not received in time of publication.

* For explanation of "standardized death-rate," see note *, Table I. The population of the several wards of the city not being available by age- and sex-constitution, their standardized death-rates cannot be calculated.

The population of these two wards being a fluctuating one, their population cannot be estimated for the middle of 1916. Hence the Census figures are retained as a permanent record.

This population is estimated partly on the nature increase method and partly on the intercensal increase method. The increase in the population of each town during the period between the two censuses is estimated by the ratio of the increase in the number of households to the number of households in the year 1910. Hence the Census figures are retained.

Population is estimated partly on the natural increase method (as it was not a separate division at the Censuses of 1901) and partly on the intercensal increase method, i.e., population of Wellawatta on the former method and that of Kollupitiya taken over to Wellawatta on the latter method.

For four months, June 1912, 1913, 1914, and 1915.

Table IV.—Causes of Deaths registered during the Month of June, 1916, in each Ward and of each Race in the City of Colombo.
