

SUPPLEMENT
TO THE
Ceylon Government Gazette
PART I.

No. 7,213 — FRIDAY, SEPTEMBER 23, 1921.

**VITAL STATISTICS OF TOWNS IN CEYLON IN THE
MONTH OF JULY, 1921.**

REPORT OF THE REGISTRAR-GENERAL.

THIS report deals with the Vital Statistics of the 33 principal towns in the Island proclaimed under sections 31–36 of the Ordinance No. 1 of 1895.

Births.

2. The number of births registered was 1,737 (899 males and 838 females), and was equivalent to an annual rate of 30·03 per 1,000, against 38·46 in the preceding month, 28·67 in the corresponding month of last year, and 24·54 the average for the corresponding months since 1911. The rate ranged from 11·66 in Nuwara Eliya to 59·14 in Moratuwa.

3. In the city of Colombo the births registered numbered 677 (357 males and 320 females), and were equivalent to an annual rate of 26·11 per 1,000, against 43·92 in the preceding month, 25·15 in the corresponding month of last year, and 19·52 the average for the corresponding months since 1911. The rate, exclusive of the Fort and the Pettah Wards, ranged from 7·16 in Kollupitiya to 35·17 in Wellawatta.

Deaths.

4. The total deaths registered during the month numbered 1,878 (999 males and 879 females). There were 1,447 deaths of residents in towns, equivalent to an annual standardized rate of 27·26 per 1,000, against 28·74 in the preceding month, 29·06 in the corresponding month of last year, and 29·72 the average for the month of July in each year since 1911. The rate ranged from 89·05 in Anuradhapura to 9·75 in Nuwara Eliya.

5. In the city of Colombo the deaths numbered 643 (347 males and 296 females). There were 549 deaths of residents, equivalent to an annual standardized rate of 24·57 per 1,000, against 23·44 in the preceding month, 28·62 in the corresponding month of last year, and 28·14 the average for the month of July in each year since 1911. The rate, exclusive of the Fort and the Pettah Wards, ranged from 26·07 in Wellawatta to 4·77 in Kollupitiya.

6. The stillbirths registered numbered 121 (66 males and 55 females), as against 116 in the preceding month.

Infant Mortality.

7. The mortality of infants under one year of age was equal to a rate of 257 per 1,000 births registered during the twelve months ended July 31, 1921. Reckoned on the births registered during the month only the rate was also the same, that is, 257, against 191 in the preceding month, 226 in the corresponding month of last year, and 282 the average for the corresponding months since 1911.

8. In the city of Colombo the mortality of infants was equal to a rate of 265 per 1,000 births registered during the twelve months ended July 31, 1921. Reckoned on the births registered during the month only the rate was 266, against 151 in the preceding month, 229 in the corresponding month of last year, and 344 the average for the corresponding months since 1911.

Causes of Death.

9. The highest mortality was from *Pneumonia*, to which 13 per cent. of the total deaths was due, *Debility* caused 9 per cent., *Convulsions* 8 per cent., *Diarrhoea and Anchyllostomiasis* 6 per cent. each, *Phthisis*, *Bright's Disease* and *Nephritis*, *Dysentery*, and *Enteritis* 5 per cent. each, *Malaria* and *Malarial Cachexia* and *Influenza* 3 per cent. each, *Bronchitis* and *Prematurity* 2 per cent. each, and *Enteric Fever* and *Puerperal Septicæmia* 1 per cent. each.

10. In Colombo too the highest mortality was from *Pneumonia*, which caused 12 per cent. of the deaths. *Debility* and *Phthisis* caused 10 per cent. each, *Convulsions* 8 per cent., *Anchyllostomiasis* 5 per cent., *Diarrhoea* and *Bright's Disease* and *Nephritis* 4 per cent. each, *Enteritis*, *Bronchitis*, *Influenza*, and *Dysentery* 3 per cent. each. *Enteric Fever* and *Puerperal Septicæmia* 2 per cent. each, and *Malaria* and *Malarial Cachexia*, *Prematurity*, and *Tetanus* 1 per cent. each.

11. Three deaths from *Plague* were registered (in Colombo), as against 1 in the preceding month and 41 in the corresponding month of last year. 1 death from *Measles* was registered in Negombo.

12. *Infectious Diseases reported.*—The infectious disease most prevalent during the month was *Phthisis*, of which 132 cases were reported (126 in Colombo). *Enteric Fever* followed with 46 cases (31 in Colombo, 6 in Moratuwa), *Chicken-pox* 33 (18 in Colombo, 5 in Ratnapura), *Continued Fever* 18 (16 in Colombo), *Measles* 12 (9 in Colombo), *Dysentery* 7 (4 in Panadure), and *Plague* 3 (in Colombo).

Meteorology.

13. *Rainfall.*—Nawalapitiya recorded the highest rainfall (27·09 inches), followed by Hatton (21·02 inches). In the other towns it ranged from 11·65 inches in Nuwara Eliya to 0·15 of an inch in Kalpitiya. Colombo recorded 5·12 inches.

14. *Temperature.*—The mean temperature varied from 60·4° in Nuwara Eliya to 85·2° in Batticaloa, and was 82·0° in Colombo.

15. For detailed statistics see Tables I. and II. for all towns, and Tables III. and IV. for the city of Colombo, in the Appendix.

Registrar-General's Office,
Colombo, August 31, 1921.

G. F. FORREST,
Acting Registrar-General.

Table I.—Number of Births and Deaths registered during July, 1921, their Proportion per 1,000 of the Population per Annum, and the Stillbirths and Deaths of Children under One Year and their Proportion per 1,000 Registered Births, together with the Average Birth- and Death-rates in the corresponding months since 1911, and the Mean Temperature and Rainfall in the Month in each Town of the Island proclaimed under Sections 31–36 of the Ordinance No. 1 of 1895.

Provinces and Towns, at the Census of March 10, 1911.	Population estimated to the Middle of 1921 by Intercensal Increase.	Total Births.	Total Deaths.	Death-rate excluding non-residents				Mortality of Children under One Year

^a The standardized death-rates represent the crude death-rates multiplied by the respective standardizing factor in order to make correction for differences of sex- and age-constitution of the several populations in 1911, as compared with that of the Island.

^b Biannual mean temperatures of the town.

^c Biannual rainfall of the town.

^d Includes population of the Negombo Local Board and registration area.

^e Standardized death-rates for Kandy and Kandy and Ambalangoda districts for the end of December, 1920, by natural increase method.

^f Standardized death-rates for Kandy and Kandy and Ambalangoda districts for the end of January, 1914, and Ambalangoda in January, 1916, the death-rates given for "All Towns" are, therefore, independent of the towns, but are scarcely affected by their rates.

* The rate is worked differently from the ward rates, and takes into account events in hospitals, &c., not assignable to wards.

† For explanation of that "standardized death-rate," see note a, Table I. This population of the several wards of the city not being available by age- and sex-constitution, their standardized death-rates cannot be calculated.

‡ The population of these two wards being a fluctuating one, their population cannot be estimated to the middle of 1921. Hence the Census figures are retained.

§ Average for the months of July, 1912-1920.

Table IV.—Causes of Deaths registered during the Month of July, 1921, in each Ward and of each Race in the City of Colombo.

* One death each from Intra-Cranial Haemorrhage and Nephritis.

† 4 deaths each from Influenza and Dysentery, 2 each from Nephritis and Continued Fever, and 1 each from Worms, Jaundice, Malaria, Erysipelas, Thrush, Septicemia, Meningitis, Burns, Malarial Cachexia, and Syphilis.

[†] Here are included 37 deaths from Old Age, 14 from Matasmus, 9 from Debility, 7 from Worms, 6 from Paralysis, and 5 from Peritonitis.
