Government

PART I.

No. 7.147 — FRIDAY, DECEMBER 10, 1920.

VITAL STATISTICS TOWNS IN CEYLON THE OCTOBER. MONTH

REPORT OF THE REGISTRAR-GENERAL.

This report deals with the Vital Statistics of the 33 principal towns in the Island proclaimed under sections 31-36 of the Ordinance No. 1 of 1895.

Births.

2. The number of births registered was 1,683 (876 males and 807 females), and was equivalent to an annual rate of 29 89 per 1,000, against 28 98 in the preceding month, 25 65 in the corresponding month of last year, and 27 29 the average for the corresponding months since 1910. The rate ranged from 15.60 in Nuwara Eliya to 63.51 in Hambantota.

3. In the city of Colombo the births registered numbered 639 (331 males and 308 females), and were equivalent to an annual rate of 25.55 per 1,000, against 27.56 in the preceding month, 19.82 in the corresponding month of last year, and 22.47 the average for the corresponding months since 1910. The rate ranged from 9.54 in Kollupitiya to 40.44 in Wellawatta.

Deaths.

4. The total deaths registered during the month numbered 1,645 (886 males and 759 females). There were 1,279 deaths of residents in towns, equivalent to an annual rate of 24 · 76 per 1,000, against 24 · 55 in the preceding month, 23 · 43 in the corresponding month of last year, and 31 · 27 the average for the month of October in each year since 1910. The rate ranged from 59.19 in Anuradhapura to 7.12 in Nuwara Eliya.

5. In the city of Colombo the deaths numbered 606 (345 males and 261 females). There were 542 deaths of residents, equivalent to an annual rate of 25 · 14 per 1,000, against 21 · 95 in the preceding month, 21 · 98 in the corresponding month of last year, and 28 70 the average for the month of October in each year since 1910. The rate ranged from

36.64 in Wellawatta to 6.45 in Kollupitiya.

The still births registered numbered 144 (79 males and 65 females), as against 95 in the preceding month. 6.

Infant Mortality.

7. The mortality of infants under one year of age was equal to a rate of 228 per 1,000 births registered during the twelve months ended October 31, 1920. Reckoned on the births registered during the month only the rate was 209, against 165 in the preceding month, 194 in the corresponding month of last year, and 241 the average for the corresponding months since 1910.

8. In the city of Colombo the mortality of infants was equal to a rate of 238 per 1,000 births registered during the twelve months ended October 31, 1920. Reckoned on the births registered during the month only the rate was 216. against 138 in the preceding month, 190 in the corresponding month of last year, and 266 the average for the corresponding months since 1910.

Causes of Death.

9. The highest mortality was from *Debility*, to which 10 per cent. of the total deaths was due, 9 per cent. was due to *Convulsions*, 8 per cent. to *Pneumonia*, 7 per cent. to *Anchylostomiasis*, 6 per cent. each to *Phthisis* and *Diarrhea*, 5 per cent. each to *Enteritis* and *Bright's Disease and Nephritis*, 4 per cent. to *Dysentery*, 3 per cent. to *Enteric Fever*, 2 per cent. each to *Malaria* and *Malarial Cachexia* and *Plague*, and 1 per cent. each to *Influenza*, *Prematurity*, *Bronchitis*, and Puerperal Septicamia.

10. In Colombo the highest mortality was from Convulsions, to which 10 per cent. of the deaths was due, 9 per cent. each was due to Pneumonia and Phthisis, 8 per cent. to Debility, 5 per cent. to Enteric Fever, 4 per cent. to Plague, 3 per cent. each to Enteritis, Diarrhea, Dysentery, Bright's Disease and Nephritis, and Influenza, 2 per cent. to

Anchylostomiasis, and I per cent. each to Cancer, Bronchitis, and Tetanus.

11. Thirty-one deaths from Plague were registered (27 in Colombo, 3 in Moratuwa, and 1 in Kandy), as against 26 in the preceding month and 17 in the corresponding month of last year. 3 deaths from Smallpox (in Colombo), and

- 1 from Measles (in Negombo) were also registered.

 12. Infectious Diseases reported.—The infectious disease most prevalent during the month was Phthisis, of which 113 cases were reported (104 in Colombo, Chickenpox followed with 108 cases (64 in Colombo, 17 in Anurad's apura, 15 in Colombo, 17 in Colombo, 17 in Colombo, 17 in Colombo, 16 in Colombo, 16 in Colombo, 17 in Colombo, 17 in Colombo, 17 in Colombo, 16 in Colombo, 16 in Colombo, 17 in Colombo, 113 cases were reported (104 in Colombo), Chickenpox ionowed with 100 cases (02 in Colombo, 14 in Anurad apura, 10 in Kandy, 6 in Nuwara Eliya), Enteric Fever 95 (74 in Colombo, 7 in Galle), Measles 68 (25 in Colombo, 14 in Chilaw, 9 in Negombo, 7 in Moratuwa), Plague 36 (28 in Colombo, 6 in Moratuwa), Continued Fever 33 (20 in Colombo, 6 in Moratuwa, 5 in Kandy), Smallpox 23 (in Colombo), Dysentery 6 (5 in Moratuwa), Mumps 3 (in Colombo), and Whooping Cough 1 (in Colombo). Meteorology.
- 13. Rainfall.—Nawalapitiya recorded the highest rainfall (32.38 inches), followed by Kegalla (17.56 inches). In the other towns the rainfall ranged from 15.27 inches in Colombo to 1.20 inches in Hambantota

her towns the rainfall ranged from 15-27 mones in Colombia to 1-20 menes in Hambantota.

14. Temperature.—The mean temperature varied from 60·3° in Nuwara Eliya to 84·2° in Trincomalee, and was 4° in Colombo.

15. For detailed statistics, see Tables I. and II. for all towns, and Tables III. and IV. for the city of Colombo, in the Appendix.

Registrar-General's Office, Colombo, November 20, 1920.

Table I.—Number of Births and Deaths registered during October, 1920, their Proportion per 1,000 of the Population per Annum, and the Stillbirths and Deaths of Children under One Year and their Proportion per 1,000 Registered Births, together with the Average Birth- and Death-rates in the corresponding months since 1910, and the Mean Temperature and Rainfall in the Month in each Town of the Island proclaimed under Sections 31-36 of the Ordinance No. 1 of 1895.

a The standardized death-rates represent the crude death-rates multiplied by the respective standardizing factor in order to make correction for differences of sex- and age-constitution of the several populations in 1911, as compared blanks indicate that there are no observatories or rain gauges.

Includes population of the Island.

Includes population of the repair indige.

Includes population of the town limits.

Figuration of the repair of these fowns has not been cumerated at the Census of 1911 by age and sex, while the town of Kaimunal was created a registration division only in January, 1914, and Ambalangoda in January, 1915.

The death-rates given or "All Towns" are, therefore, independent of the towns, but are scarcely affected by their rates.

Table II.—Causes of Deaths registered during October, 1929, in each Town of the Island proclaimed under Sections 31-36 of the Ordinance No. 1 of 1895.

*The city-rate is worked differently from the ward-rates, and takes into account events in hospitals, &c., not assignable to wards.

† For explanation of "standardized death-rates, and takes into account events in hospitals, &c., not assignable to wards.

† For explanation of "standardized death-rates," see note a. Table I. The population of the several wards of the city not being available by age- and sex-constitution, their standardized The population of these two wards being a fluctuating one, their population cannot be estimated to the middle of 1920. Hence the Census figures are retained.

§ Average for the months of October, 1912–1919.

Table IV.—Causes of Deaths registered during the Month of October, 1920, in each Ward and of each Race in the City of Colombo.

All Causes									1	Ward	s.						Dea	ths a	mong	all I	Races	٠.
