The birth- and death-rates for September, 1921, shown in this Table have been calculated on the Census population on March 18, 1921.

\* The factor applied for standardizing the crude death-rates is the same as that for the past decade as the age and sex distributions of the population at the Census of 1921 is not yet available.

† Banks indicate that there are no observatories or rain gauges.

‡ Standardized death-rates not available.
