39. *Failing such Registration, Shares may be sold by the Company.*—If any person who shall become entitled to be registered in respect of any share under clause 38 shall not, from any cause whatsoever, within two years after the event on the happening of which his title shall accrue, be registered in respect of such share, or if, in the case of the death of any Shareholder, no person shall, within two years after such death, be registered as a Shareholder in respect of the shares of such deceased Shareholder, the Company may sell such shares either by public auction or private contract, and give a receipt for the purchase money; and the purchaser shall be entitled to be registered in respect of such share, and shall not be bound to inquire whether the events have happened which entitled the Company to sell the same; the nett proceeds of such sale, after deducting all expenses and all moneys in respect of which the Company is entitled to a lien on the shares so sold, shall be paid to the person entitled thereto.

SURRENDER, LIEN, AND FORFEITURE OF SHARES.

40. *The Directors may accept Surrender of Shares.*—The Directors may accept, in the name and for the benefit of the Company and upon such terms and conditions as may be agreed upon, a surrender of the shares of Shareholders who may be desirous of retiring from the Company.

41. *If Call or Instalment be not paid, Notice to be given to Shareholder.*—If any Shareholder fails to pay any call or instalment on or before the day appointed for the payment of the same, the Directors may at any time thereafter, during such time as the call or instalment remains unpaid, serve a notice on such Shareholder or his executors or administrators, or the trustee or assignee in his bankruptcy, manager of a lunatic or curator of a minor requiring him to pay the same, together with any interest that may have accrued, at the rate of 9 per cent. per annum, from the date when such payment fell due, and all expenses that may have been incurred by the Company by reason of such non-payment.

42. *Terms of Notice.*—The notice shall name a day (not being less than one month from the date of the notice) on and a place or places at which such call or instalment and such interests and expenses as aforesaid are to be paid; the notice shall also state that, in the event of non-payment at or before the time and at the place appointed, the shares in respect of which the call was made or instalment is payable will be liable to be forfeited.

43. *In Default of Payment, Shares to be forfeited.*—If the requisition of such notice as aforesaid be not complied with, every or any share or shares in respect of which such notice has been given may at any time thereafter, before payment of calls or instalments, with interest and expenses due in respect thereof, be declared forfeited by a resolution of the Board to that effect.

44. *Shareholder still liable to pay Money owing at Time of Forfeiture.*—Any Shareholder whose shares have been so declared forfeited shall, notwithstanding, be liable to pay, and shall forthwith pay to the Company all calls, instalments, interest, and expenses owing upon or in respect of such shares at the time of the forfeiture, together with interest thereon from the time of forfeiture until payment at 9 per cent. per annum, and the Directors may enforce the payment thereof if they think fit.

45. *Surrendered or forfeited Shares to be the Property of the Company, and may be sold.*—Every share surrendered or so declared forfeited shall be deemed to be the property of the Company, and may be sold, re-allotted, or otherwise disposed of upon such terms and in such manner as the Board shall think fit.

46. *Effect of Surrender or Forfeiture.*—The surrender or forfeiture of a share shall involve the extinction of all the interest in, and also of all claims and demands against, the Company in respect of the share and the proceeds thereof, and all other rights incident to the share, save only such of those rights (if any) as by these presents are expressly excepted.

47. *Certificate of Surrender or Forfeiture.*—A certificate in writing under the hands of two of the Directors or of one of the Directors and the Secretary that a share has been duly surrendered or forfeited, stating the time when it was surrendered or forfeited, shall be conclusive evidence of the facts therein stated as against all persons who would have been entitled to the share but for such surrender or forfeiture, and such certificate and the receipt of the Company for the price of such share shall constitute a good title to such share, and a certificate of proprietorship shall be delivered to any person who may purchase the same from the Company, such purchaser thereupon shall be deemed the holder of such share discharged from all calls due prior to such purchase; and he shall not be bound to see to the application of the purchase money, nor shall his title to such share be affected by any irregularity in the proceedings in reference to such forfeiture or sale.

48. *Forfeiture may be remitted.*—The Directors may, in their discretion, remit or annul the forfeiture of any share within six months from the date of such forfeiture upon the payment of all moneys due to the Company from the late holder or holders of such share or shares, and all expenses incurred in relation to such forfeiture, together with such further sum of money by way of redemption money for the deficit, as they shall think fit, not being less than 9 per cent. per annum on the amount of the sums wherein default in payment had been made, but no share *bona fide* sold, re-allotted, or otherwise disposed of under Article 45 hereof shall be redeemable after sale or disposal.

49. *Company's Lien on Shares.*—The Company shall have a first charge or lien upon all the shares of any holder or joint holders for all moneys for the time being due to the Company by such holder, or by all or any of such joint holders respectively, either in respect of such shares or of other shares held by such holder or joint holders or otherwise, and whether due from any such holder individually or jointly with others, including all calls, resolutions for which shall have been passed by the Directors, although the times appointed for the payment thereof shall not have arrived; and where any share is held by more persons than one, the Company shall be entitled to the said charge or lien in respect of any money due to the Company from any of such persons. The Directors may decline to register any transfer of shares subject to such charge or lien.

50. *Lien how made Available.*—Such charge or lien may be made available by a sale of all or any of the shares subject to it, provided that no such sale shall be made except under a resolution of the Directors, and until notice in writing shall have been given to the indebted Shareholder or his executors or administrators, or the assignee in his bankruptcy, or manager of a lunatic, or curator of a minor requiring him or them to pay the amount for the time being due to the Company, and default shall have been made for twenty-eight days from such notice in paying the sum thereby required to be paid. Should the Shareholder over whose share the lien exists be in England or elsewhere abroad, ninety days' notice shall be allowed him.

51. *Proceeds how applied.*—The net proceeds of any such sale as aforesaid under the provisions of Articles 45 and 50 hereof shall be applied in or towards the satisfaction of such debts, liabilities, or engagements, and the residue (if any) shall be paid to such Shareholder or his representative.

52. *Certificate of Sale.*—A certificate in writing under the hands of two of the Directors or of one of the Directors and the Secretary that the power of sale given by Clause 50 has arisen, and is exercisable by the Company under these presents shall be conclusive evidence of such facts.

53. *Transfer on Sale how executed.*—Upon any such sale two of the Directors may execute a transfer of such share to the purchaser thereof, and such transfer, with the certificate last aforesaid, shall confer on the purchaser a complete title to such shares.

PREFERENCE SHARES.

54. *Preference and Deferred Shares.*—Any shares from time to time to be issued or created may be issued with any such right or preference, whether in respect of dividend or of payment of capital, or both, or any such other special privilege or advantage over any shares previously issued or then about to be issued (other than shares issued with a preference), or at such a premium, or with such deferred rights as compared with any shares previously issued or then about to be issued, or subject to any such conditions or provisions, and with any such right or without any right of voting, and generally on such terms as the Company may from time to time by special resolution determine.

55. *Modification of Rights and Consent.*—If at any time by the issue of preference shares or otherwise the capital is divided into shares of different classes, then the holders of any class of shares may, by an extraordinary resolution passed at a meeting of such holders, consent, on behalf of all the holders of shares of that class, to the issue or creation of any shares ranking equally therewith, or having any priority thereto, or to the abandonment of any preference or priority, or of any accrued dividend, or the reduction for any time or permanently of the dividends payable thereon, or to any scheme for the reduction of the Company's capital affecting that class of shares; and such resolution shall be binding upon all the holders of shares of that class, provided that this article shall not be read as implying the necessity for such consent in any case in which but for this Article the object of the resolutions could have been effected without it.

56. *Meetings affecting a particular Class of Shares.*—Any meeting for the purpose of the last preceding clause shall be convened and conducted in all respects as nearly as possible in the same way as an Extraordinary General Meeting of the Company, provided that no Shareholder, not being a Director, shall be entitled to notice thereof or to attend thereat,

unless he be a holder of shares of the class intended to be affected by the resolution, and that no vote shall be given except in respect of a share of that class, and that at any such meeting a poll may be demanded in writing by any Shareholders personally present and entitled to vote at the meeting.

CALLS.

57. *Directors may make Calls.*—The Directors may from time to time make such calls as they think fit upon the registered holders of shares in respect of moneys unpaid thereon, and not by the conditions of allotment made payable at fixed times, and each Shareholder shall pay the amount of every call so made on him to the persons and at the times and places appointed by the Directors, provided that two months' notice at least shall be given to the Shareholders of the time and place appointed for payment of each call.

58. *Calls, Time when made.*—A call shall be deemed to have been made at the time when the resolution authorizing the call was passed at a Board Meeting of the Directors or by resolution in writing in terms of Clause 117.

59. *Extension of Time for Payment of Call.*—The Directors shall have power, in their discretion, to give time to any one or more Shareholder or Shareholders, exclusive of the others, for payment of any call or part thereof on such terms as the Directors may determine. But no Shareholder shall be entitled to any such extension, except as a matter of grace or favour.

60. *Interest on Unpaid Call.*—If the sum payable in respect of any call or instalment is not paid on or before the day appointed for the payment thereof, the holder for the time being of the share in respect of which the call shall have been made, or the instalments shall have become due, shall pay interest for the same at the rate of 9 per cent. per annum from the day appointed for the payment thereof to the time of the actual payment, but the Directors may, when they think fit, remit altogether or in part any sum payable as interest under the clause.

61. *Payments in Anticipation of Calls.*—The Directors may at their discretion receive from any Shareholder willing to advance the same, and upon such terms as they think fit, all or any part of the amount due on his shares beyond the sum actually called up.

BORROWING POWERS.

62. The Directors shall have the power to procure from time to time such temporary advances or loans as they may find necessary or expedient for the purpose of carrying out the objects of the Company and extending the business of the Company in keeping with the objects as set out in these presents on condition that they shall, under no circumstances whatsoever, unless sanctioned by a General Meeting, raise money at a higher rate of interest than 12 per cent. per annum; also from time to time, at the discretion of the Directors, to borrow or raise at a rate of interest not exceeding the rate aforesaid from the Directors or other persons any sum or sums of money for the purposes of the Company, but so that the amount at any one time owing in respect of such moneys borrowed or raised shall not, without the sanction of a General Meeting, exceed the paid up capital of the Company. With the sanction of a General Meeting, the Directors shall be entitled to borrow such further sum or sums and at such rates of interest as such meeting shall determine. The Directors may, for the purpose of securing the re-payment of any such sum or sums of money so borrowed or raised, create and issue any mortgages, debentures, mortgage debentures, debenture stock, bonds, or obligations of the Company, charged upon all or any part of the undertaking, revenue, property, and rights and assets of the Company (both present and future), including uncalled capital or unpaid calls, or give, accept, or endorse on behalf of the Company any promissory notes or bills of exchange. Provided also that before the Directors execute any mortgage, issue any debentures, or create any debenture stock, they shall obtain the sanction thereto of the Company in General Meeting, whether Ordinary or Extraordinary, notice of the intention to obtain such sanction at such meeting having been duly given. Any such securities may be issued at par or at a premium or discount, and may from time to time be cancelled or discharged, varied, or exchanged, as the Directors may think fit, and may contain any special privileges as to redemption, surrender, drawings, allotment of shares, or otherwise. Every debenture or other instrument issued by the Company for securing the payment of money may be so framed that the moneys thereby secured shall be assignable free from any equities between the Company and the person to whom the same may be issued. A declaration under the Company's Seal contained in or endorsed upon any of the documents mentioned in this Article and subscribed to by two or more of the Directors, or by one Director and the Secretary, to the effect that the Directors have power to borrow the amount which such document may represent, shall be conclusive evidence thereof in all questions between the Company and its creditors, and no such document containing such declaration shall, as regards the creditors, be void on the ground of its being granted in excess of the aforesaid borrowing power, unless it shall be proved that such creditor was aware that it was so granted.

MEETINGS.

63. *General Meetings.*—The First General Meeting of the Company shall be held at such time not being more than six months from the date of incorporation of the Company and at such place as the Directors may determine.

64. *When subsequent General Meetings to be held.*—Other General Meetings shall be held once in every year, at such time and place as may be prescribed by the Company in General Meeting, and if no time or place is prescribed, then at such time and place as may be determined by the Directors.

65. *Distinction between Ordinary, General, and Extraordinary General Meetings.*—The General Meetings referred to in the last preceding clause shall be called Ordinary General Meetings, all other meetings of the Company shall be called Extraordinary General Meetings.

66. *When Extraordinary General Meeting to be called. Requisition.*—The Directors may, whenever they think fit, and they shall, on the written requisition of the holders of not less than one-tenth part of the shares of the Company for the time being subscribed for, forthwith proceed to convene an Extraordinary General Meeting of the Company, and in the case of such requisition the following provisions shall have effect:—

- (1) The requisition must state the objects of the Meeting, and must be signed by the requisitionists and deposited at the office, and may consist of several documents in like form, each signed by one or more requisitionists.
- (2) If the Directors of the Company do not proceed to cause a meeting to be held within twenty-one days from the date of the requisition being so deposited, the requisitionists or a majority of them in value may themselves convene the meeting, but any meeting so convened shall not be held after three months from the date of the deposit of such requisition.

EVIDENCE.

152. *Evidence in Action by Company against Shareholders.*—On the trial or hearing of any action or suit brought or instituted by the Company against any Shareholder or his representatives to recover any debt or money claimed to be due to the Company in respect of his shares, it shall be sufficient to prove that the name of the defendant is or was, when the claim arose, on the register of Shareholders of the Company as a holder of the number of shares in respect of which such claim is made, and that the amount claimed is not entered as paid in the books of the Company; and it shall not be necessary to prove the registration of the Company, nor the appointment of the Directors who made any call, nor that a quorum of Directors was present at the Board at which any call was made, nor that the meeting at which any call was made was duly convened or constituted, nor any other matter whatsoever, but the proof aforesaid shall be conclusive evidence of the debt.

PROVISIONS RELATIVE TO WINDING UP OR DISSOLUTION OF THE COMPANY.

153. *Purchase of Company's Property by Shareholders.*—Any Shareholder, whether a Director or not, and whether alone or jointly with any other Shareholder or Director, and any person not a Shareholder, may become the purchaser of the property of the Company or any part thereof in the event of a winding up or a dissolution, or at any other time when a sale of the Company's property or effects or any part thereof shall be made by the Directors, under the powers hereby or under the Ordinance conferred upon them.

154. *Distribution.*—If the Company shall be wound up and there shall be any surplus assets after payment of all debts and satisfactions of all liabilities of the Company, such surplus assets shall be applied first in repaying to the holders of the preference shares (if any) the amounts that may be due to them, whether by way of capital only or by way of dividend or arrears of dividend or otherwise, in accordance with the rights, privileges, and conditions attached thereto, and the balance in repaying to the holders of the ordinary shares the amounts paid up or reckoned as paid up on such ordinary shares. If after such payments there shall remain any surplus assets, such surplus assets shall be divided among the ordinary Shareholders in proportion to the capital paid up, or reckoned as paid up on shares which are held by them respectively at the commencement of the winding up, unless the conditions attached to the preference shares expressly entitle such shares to participate in such surplus assets.

155. *Payment in Specie and vesting in Trustees.*—If the Company shall be wound up, the liquidator, whether voluntary or official, may, with the sanction of an extraordinary resolution, divide among the contributories in specie any part of the assets of the Company, and may, with their sanction, vest any part of the assets of the Company in trustees upon such trusts for the benefit of the contributories as the liquidator, with like sanction, shall think fit.

Sale of Ebony.

AN auction sale of the under-mentioned ebony will be held at the Central Timber Depot, Kow road, Slave Island, Colombo, on Saturday, June 24, 1922, at 10 A.M., subject to the following conditions:—

- The timber will be put up in lots to suit buyers at a rate per lot, and no advance of less than Re. 1 per lot will be accepted.
- The highest bid will be accepted, subject to the approval or disapproval of the Conservator of Forests. The highest bidder will be required by the officer conducting the sale to sign the sale book kept for the purpose directly a lot has been knocked down to him.
- Payment of 25 per cent. of the successful bid to be made at time of sale, if so required.
- Depot weights must be accepted, but buyers can have the right of giving notice, before the expiration of the date of payment, of having the actual weight ascertained. Should the difference between the depot weight and the weight ascertained after re-weighing be more than $1\frac{1}{2}$ per cent., the cost of re-weighing is to be borne by the Forest Department, and if within $1\frac{1}{2}$ per cent. by the purchaser; any difference between the depot weight and the weight ascertained after re-weighing is to be paid or allowed for, as the case may be. Should two or more purchasers desire to re-weigh their timber on the same day, precedence will be given to the buyer whose notification of intention to re-weigh reaches the Assistant Conservator of Forests first.
- No timber shall be removed before payment of the full price bid, and all timber sold must be removed from the depot within ten days of date of notification of acceptance by the Conservator of Forests of such bid, and will be at the risk of the purchasers until removed.
- Should any person to whom a lot is knocked down refuse to take it over at the full price bid, or refuse or fail to sign the sale book and pay 25 per cent. of his bid when so required, or refuse or fail to pay the full purchase amount or balance thereof, as the case may be, and to remove the timber within the time specified in clause 5 above, the lot will again be put up for auction, and the original purchaser or bidder will be held liable for any loss to Government owing to a lower price being realized at the re-sale, while, if an enhanced price is realized at such re-sale, he shall, however, have no claim to the profit which shall accrue to Government.
- Agents bidding for others will be required to produce a written authority from the firm or persons for whom they bid, such authority will be retained by the Assistant Conservator of Forests, and will hold good only at the particular sale at which it is produced.

Ninetieth Annual Report of the Ceylon Savings Bank.

Board of Directors:

The Hon. the Colonial Secretary, *President*.
The Principal Collector of Customs.
The Postmaster-General.

REPORT FOR THE YEAR 1921.

The Ninetieth Annual Report on the working of the Ceylon Savings Bank is submitted, together with Statement of Accounts and Balance Sheet for the year 1921.

The number of new accounts opened during the year was 2,549, keeping up to the average of the two previous years. The number of accounts closed was 1,611, being less by 71 as compared with the previous year.

The total number of depositors at the end of the year was 41,608—the largest number since the establishment of the Bank. The amount deposited during the year was Rs. 1,896,524, which is almost equal to the average of the two previous years. The amount withdrawn was Rs. 1,676,150, which is less by Rs. 70,000 than during the previous year. The amount to the credit of depositors on 31st December last was Rs. 4,503,592, the largest since 1914.

The small number of new depositors in the Provinces, as compared with the number in the Western Province, is a matter for consideration, and it seems desirable that the facilities offered by the Bank should be made known to the public through the Kachcheries.

The rate of interest, which was three per cent. all round, was revised for the year under review by fixing it at four per cent. for sums of Rs. 1,000 and under and three per cent. on deposits over Rs. 1,000. The interest paid for the year was Rs. 143,179, which is above that for 1920 by Rs. 29,000, but there is still a profit of Rs. 14,000 on the year's transactions.

Loans on landed property, amounting to Rs. 80,000, were made during the year, and Rs. 5,650 was repaid by borrowers on this account. The total investments under this head stands at Rs. 411,218.

The Reserve Fund, which has been augmented by the profits of the year 1921, now stands at Rs. 714,115.

During the year a series of irregularities beginning from 1919 were found out. Complaints were made to the Directors by certain depositors that sums remitted for credit had not been accounted for, and a thorough investigation was made, which revealed the fact that Mr. S. W. Dabrera, the Accountant, had misappropriated and delayed credits of remittances. He was tried in the Supreme Court and convicted, and sentenced to five years' imprisonment. The total amount of defalcations and losses to the Bank by late credits amount to Rs. 3,263.64; this amount has been debited to Suspense Account No. 2; Rs. 469.20 was paid to depositors, in 1921 and the balance in 1922. The nett loss will be struck off when the security of the late Accountant, amounting to Rs. 2,000, is realized. Steps have been taken for minimizing such irregularities and for early detection of defalcations or late payments.

"Improvements in fuel."

Abstract.—The applicant describes a process for making colloidal fuel—a liquid fuel capable of being sprayed, but containing in stable suspension a high percentage of solid fuel. As an example of such a fuel, he gives a fuel oil of Viscosity 18·7° Engler at 20° C, and 9·3° Engler at 30° C. A coal pulverized so that 99·7 per cent. passes a 100-mesh screen ; 98 per cent., a 200-mesh screen ; and 85 per cent., a 300-mesh screen : a fixateur grease containing 83·5 per cent. fuel oil, 10 per cent. rosin, 5 per cent. lime, and 1½ per cent. water. These substances are blended in a paint-mixing machine, in the proportion by weight of 30·5 per cent. coal, 1·5 per cent. fixateur, and 68 per cent. oil. The resulting colloidal fuel is stable for 3 months or more.

“Method of fixing solid tyres to the rims of the wheels of vehicles.”

Abstract.—The applicant describes a device for fixing solid tyres to the rims of vehicle wheels. The device consists of a number of segments, which when united form a continuous ring round the rim; each segment consists of two parts capable of movement across the rim, and with one or more cavities with inclined faces, in which fits a correspondingly shaped block capable of being pulled down by a screw passing through the rim, and thereby forcing the segments apart and causing them to press the edges of the tyre into the groove of the edge of the rim.

The claims are:—

1. A method of fixing solid tyres to the rims of vehicle wheels, and more particularly for solid tyres, comprising the combination of the usual outer tyre for pneumatic tyres with inner elastic india-rubber elements under intermolecular tension, which method consists in the use of circular segments, which when united form a ring of the diameter of the rim upon which it fits, the said segments being formed of two parts, substantially as set forth.

2. In a method of fixing solid tyres to the rims of vehicle wheels as claimed in claim 1, segments consisting of two parts connected together by cavities and projections, the said parts being provided with inner inclined faces or walls against which co-operate inclined faces of a block, the action of said block being controlled from the outside of the rim by means of a screw screwed in the block, substantially as and for the purpose set forth.

3. A system for fixing solid tyres to the rims of vehicle wheels as claimed in claims 1 and 2, wherein inclined faces of the two parts, which constitute the segment, are adopted to press against the inner sides of the tyre for pressing and maintaining the edges of said tyre within the curved sides of the rim, after the tyre has been mounted, each segment being provided with a flat or curved surface on which is fitted the support of the inner elastic element, the two parts of the segment being closed together by blocks and wedges, the movement of which is controlled from outside of the rim by means of screws, the heads of which co-operated with the rim and are screwed in the blocks, the whole substantially as and for the purposes set forth with reference to the annexed drawings.

4. A method of fixing solid tyres to the rims of vehicle wheels, substantially as described and as illustrated in the accompanying drawings.

“Improvements in lamps for burning oil or other illuminant.”

Abstract.—The applicants describe a metal lamp having an open overflow tube through the bottom of the lamp and nearly up to the middle, to prevent the lamp being more than half filled: from the top a similar tube which carries the wick extends down to the middle, so that when the lamp is placed on its side or is inverted no liquid can escape.

The claims are:—

1. A safety non-spillable lamp to burn oil or other illuminant, having a level gauging or regulating tube centrally within it, substantially as described and illustrated.
2. A safety non-spillable lamp to burn oil or other illuminant, having an inverted tube descending internally from mouth of container, substantially as described and illustrated.
3. A safety non-spillable lamp to burn oil or other illuminant, substantially as described and illustrated.

“Improvements in or relating to the manufacture of hydrogen by the partial liquefaction of gas mixtures containing the same.”

Abstract.—The applicants state that the invention relates to the separation of hydrogen from a gaseous mixture consisting mainly of hydrogen, nitrogen, carbon monoxide, and methane. The boiling points of these substances are in the order given, that of methane being the highest. If the mixture were submitted to a temperature so low as to liquefy the nitrogen, but not the hydrogen, there would be danger of freezing the methane and so blocking the apparatus. The process described consists in allowing the compressed gases, after a preliminary purification, to pass into a column at the base, the temperature of the column being progressively lowered from the base upwards—the temperature at the base is low enough to liquefy the methane, but not the carbon monoxide, so that the mixture is freed from methane, which runs back and is subjected to a process of fractionation as it meets the incoming warmer gases, in the next stage the carbon monoxide is separated, and in the third stage the nitrogen. The three liquids are not allowed to mix, but are drawn off separately, and by their evaporation are used to produce the necessary cooling, as is also the expansion of the purified and compressed hydrogen. A form of apparatus designed to produce this result is described and illustrated.

The claims are:—

1. A process for the manufacture of hydrogen by partial liquefaction of mixtures of gases, of which the main constituents are hydrogen, nitrogen, carbon monoxide, and methane, such as the mixtures of gases comprising the aforesaid constituents obtained from coke oven or like gases, after subjecting them to a preliminary purification treatment, which process consists in subjecting the compressed and cold gaseous mixture to be treated to temperatures which decrease progressively from the temperature at which methane boils under about atmospheric pressure to a temperature about that at which nitrogen freezes under about atmospheric pressure, the conditions of operation of the process being such that the liquid produced flows back in the reverse direction to the flow of the gaseous mixture treated, whereby the said liquid encounters higher and higher temperatures towards the bottom of its course.

2. A process for the manufacture of hydrogen according to claim 1, in which the liquid produced is collected in two or more successive portions, separately from one another, and the gradation of temperatures necessary for carrying out the process is obtained by the vaporization of the said successive portions of liquid, which boil at different temperatures from one another.

3. A process for the manufacture of hydrogen according to claim 1 or 2, in which the low temperature required for the final purification of the hydrogen is obtained by expanding, with production of external work, the cold compressed hydrogen formed as a result of the operation, this compressed hydrogen being prior to its expansion heated by circulation in countercurrent and in indirect contact with a portion of the compressed gaseous mixture treated in a liquefier, whereby the said gaseous mixture is cooled and is partially liquefied.

4. A process for the manufacture of hydrogen from water gas in accordance with any of the preceding claims, in which there is added to the water gas a suitable proportion of nitrogen or gases of combustion, and, if necessary, a suitable portion of hydrogen obtained from that produced during the operation of the process, so as to ensure sufficient nitrogen and hydrogen being present in the gaseous mixture treated, for the efficient working of the process.

5. The methods for the manufacture of hydrogen by partial liquefaction of gaseous mixtures containing the same, substantially as hereinbefore described.

“Improvements in and relating to apparatus for collecting latex from rubber trees and the like.”

Abstract.—The applicants describe a cup of narrow elongated shape with semicircular ends and tapering body so shaped that all angles and curves of small radius are eliminated, so as to facilitate complete draining: with the cup is used a carrier and cover consisting of a single member, bent to an acute angle, so that the lower portion is horizontal and covers the cup, while the upper portion is sloped at about 30° to carry off rain: the lower portion has the spout attached to its inner edge, through which the latex flows into the cup.

The claims are:—

1. Apparatus for collecting latex from rubber trees, comprising a cup, a carrier with means for attachment to the tree so shaped as to form an efficient cover for the cup, a spout formed in one with the carrier to lead the latex from the tree to the cup, and means for removably suspending the cup from the carrier.
2. In apparatus for collecting latex from rubber trees as claimed in claim 1, a cup so shaped as to prevent lodgement of latex therein when emptied.
3. In apparatus for collecting latex from rubber trees as claimed in claim 1, a carrier shaped to form the two sides of a triangle, the lower member being approximately in a horizontal position when attached to the tree.
4. Apparatus for collecting latex from rubber trees, substantially as hereinbefore described.
5. Apparatus for collecting latex from rubber trees, constructed and arranged substantially as hereinbefore described and as illustrated on the accompanying drawing.

“A machine for cutting coconuts or other material into fancy grades, strips, and chips.”

Abstract.—The applicant describes a machine having a pair of chambers and cutter heads arranged on the same axis, so that an automatically operated plunger moving along this axis in turn feeds both the cutters: as the plunger moves back and forwards, the cutters in one or other chamber are functioning, and the discharge is continuous, thus doubling the output of a single head machine.

The claims are:—

1. In a machine for cutting coconuts or other similar material into fancy grade strips and chips, double chambers and cutter heads, substantially as described.
2. In a machine for cutting coconuts or other similar material into fancy grade strips and chips—an automatic feed mechanism, substantially as described.
3. In a machine for cutting coconuts or other similar material into fancy grade strips and chips—having a double chamber and cutter heads—an alternately feeding mechanism, substantially as described.

“Improvements in delivering and winding kinematograph film for projection.”

Abstract.—The applicant describes an apparatus for the delivery of kinematograph film for exhibition, in which means are provided for the delivery of the film from the inner periphery of the unused coil, so that upon its being wound in the usual manner on the outer periphery of the used coil, the latter is ready for re-exhibition without re-winding.

The claims are:—

1. Kinematograph film delivering apparatus of the kind which delivers film from the internal periphery of the unused film coil, the carrier for which is connected, through variable speed friction gear, with the mechanism for feeding film through the projector, in which the velocity ratio of said gear is governed by means touching the interior of the unused coil.
2. Apparatus as claimed in claim 1, in which a friction wheel engages a friction disc rotating with the unused coil carrier, the friction wheel being driven at a uniform speed relatively to the projector film feeding mechanism, and being traversible radially relatively to the friction disc in accordance with the internal diameter of the coil on the carrier.
3. Apparatus as claimed in claim 2, in which the friction wheel and the means contacting with the internal periphery of the film are rigidly connected for radial movement, and arranged at approximately the same radial distance.
4. Apparatus as claimed in claim 3, in which the carrier for unused film is horizontally disposed, and the friction wheel and the means contacting with the internal periphery of the film are allowed to move radially outwards by their natural tendency so to move.
5. Apparatus as claimed in claim 3, including a shaft to which the friction wheel is fixed, a carriage movable radially relatively to the film carrier, said shaft being attached to the carriage to move therewith, and an arm pivoted to the carriage and carrying a roller adapted to enter a film coil on the carrier.
6. Apparatus as claimed in claims 4 or 5, and including means for applying force to the friction wheel and contact means, said force tending to modify their radial movement.
7. Apparatus as claimed in claim 6, in which the means for applying force to the friction wheel and contact means exerts a restraining force thereon, which varies with their radial distance in regard to the coil carrier.
8. Apparatus as claimed in claim 7, in which the restraining means consists of a barrel, a plunger working in the barrel and connected to the friction wheel to be traversed on the barrel by the radial movement of the friction wheel, fluent material pressing on the plunger, and a receiver for the fluent material into which the latter is discharged as the plunger is moved outwardly of the barrel, said receiver being shaped to cause the fluent material to tend to flow back to the barrel.
9. Kinematograph film delivering apparatus of the kind which delivers film from the internal periphery of the unused film coil, the carrier for which is connected, through friction gear, with the mechanism for feeding film through the projector, having a brake for regulating the speed of the carrier.
10. Apparatus as claimed in claim 9, in which variable speed friction gear tends to drive the carrier at a constantly decreasing angular speed slightly in excess of that required to deliver film synchronously with its movement through the projector, and the brake is employed to neutralize such excess.
11. Apparatus as claimed in claim 9 or 10, in which the brake is applied by a spring, the tension of which is adjustable by a fine threaded screw or the like.
12. In a horizontal carrier for a film coil from the internal periphery of which film is delivered, a ring rotatable on the carrier, and numerous arcuate bars each pivoted to the carrier at one end and to the ring at the other end, said bars defining an approximately circular space centrally of the carrier for the reception of the film coil.
13. In a film carrier, comprising a number of radially adjustable elements adapted to grip a coil by its external periphery, a spring metal strip interposed between the coil and said elements.
14. Kinematograph apparatus substantially as described with reference to the accompanying drawings.
