To have always ready for transport 10 per cent. more wood than is actually delivered monthly. The distance of transport is about 4 miles to the Yatiyantota Railway Station.

General Conditions.

The firewood shall be in lengths of 2 feet and not less than 2 inches in minimum diameter. Billets over 9 inches in diameter shall be split. All wood over 12 inches in girth to be billeted in 2 feet lengths by handsaw or cross-cut saw only. The firewood shall be stacked as directed by the Forest Officer.

2. Felling is to proceed in a straight line across the blocks as directed by Forest Officer in charge, and not at irregular intervals throughout the block.

3. Felling is to commence within two weeks of signing the contract. The work is to be completed by August 31, 1925.

4. All herbaceous and other undergrowth to be cut out in a straight line as specified above, at least a fortnight before any tree sapling or tree seedling is felled. This operation must be carried out throughout the block even where no utilizable trees remain from previous fellings.

5. Thereafter to coppice-cut with sharp cattles or other suitable instrument within two inches of the ground all saplings and seedlings which are under one inch diameter.

7. Thereafter to fell all trees over 8 inches in diameter, and on the same day to coppice all the stumps which are less than 15 inches in diameter cleanly and flush with the ground or at such height as may be required by the Divisional Forest Officer.

8. In order to perform this work systematically, cheaply, and efficiently, operation 4 above should be completed by a separate working party a fortnight before operation 5 commences. Operation 4 should always cover in advance a depth of the block sufficient to provide three weeks material for the firewood cutters. Operation 5 should be completed one week ahead of operation 6. Separate working parties should be assigned to the separate operations, and separate workmen should be detailed to keep the coppicing tools continually sharp. Surplus sharpened tools should always be ready to hand in the felling area. The cost of coppicing in this manner is estimated at 15 cents per cubic yard.

9. The contractor, if so required by the Divisional Forest Officer, shall submit a list of every carter employed by him

and be responsible for the due delivery of all wood to the railway.

10. The rate of work within the last two months of the currency of the contract to be adjusted by increases or decreases so as to make the complete supply within the time fixed.
