3. Application for the registration of an aircraft owned by the applicant may be made in the Colony by a person resident for the time being in the Colony or by a Company incorporated in or doing business in the Colony. Such application shall be made to the Registrar.

4. (1) The Registrar on receipt of an application for registration of an aircraft in the Colony may, if satisfied that it is in order and complies with all conditions laid down in connection with the registration of aircraft and applicable to it, grant to the applicant a certificate of registration and may assign to the aircraft a registration mark.

(2) If the Registrar has doubts as to whether an application is in order and complies with the conditions as aforesaid, he may refer the matter to the Secretary of State for Air before issuing a certificate.

(3) If it should appear to the Registrar that he has issued a certificate in an improper case he may cancel the certificate and shall forthwith report such cancellation to the Secretary of State for Air.

(4) An applicant who is aggrieved by the Registrar's refusal or cancellation of a certificate under this paragraph may appeal to the Secretary of State for Air.

5. Aircraft registered in the Colony shall be deemed to be registered British Aircraft but the certificate shall indicate that it has been issued in the Sub-Registry of the Colony.

6. The Registrar shall have the power, subject to an appeal to the Secretary of State for Air, to cancel any certificate of registration issued by him in error. Pending the decision of an appeal, a cancellation under this paragraph shall remain in force.

7. In the event of any change in the ownership of an aircraft registered in the Colony or if an aircraft registered in the Colony ceases to be owned wholly either by persons or by a company or corporation fulfilling the conditions set out in paragraph 2 of this Schedule, then—

(1) The registered owner of the aircraft shall forthwith notify the Registrar or the Secretary of State for Air of such change of ownership or as the case may be that the aircraft has ceased to be so owned as aforesaid ; and

(2) The registration and the certificate thereof shall lapse as from the date of such change of ownership or the date on which the aircraft ceased to be so owned.

8. When an aircraft registered in the Colony has been destroyed or permanently withdrawn from use the registered owner shall as soon as possible notify the Registrar or the Secretary of State for Air accordingly, and the registration and the certificate thereof shall lapse as from the date of such notification.

9. Where an aircraft within the Colony is already registered in some other part of His Majesty's dominions or in territories under His Majesty's protection, the Registrar may, at the owner's request, cancel the certificate of such registration and may, subject to the provisions of paragraph 2 of this schedule, issue a fresh certificate for the aircraft from the colonial Sub-Registry and assign it a mark appropriate to the Colony. The Registrar shall forthwith report to the Secretary of State for Air and to the registry of issue, if other than the Air Ministry, that he has endorsed or cancelled a certificate in pursuance of this paragraph and shall give the date and all necessary particulars of such endorsement or cancellation.

10. The Registrar shall transmit every month to the Air Ministry copies of all registrations and of cancellations of registration which have been entered on his register during the preceding month.

11. The Registrar may require that an application for registration shall be supported by a statutory declaration.

12. The Registrar shall charge such fees in connection with the registration of aircraft as the Governor may prescribe.

13. The register of British aircraft registered in the Colony shall be open to inspection at such times and subject to such conditions as may be prescribed.

#### B.—MARKING.

14. The British nationality mark shall be the capital letter G in Roman character, and the registration mark shall be a group assigned by the Registrar of four capital letters in Roman character, at least one of which shall be a vowel.

For the purposes of this provision the letter Y shall be treated as a vowel.

15. The aircraft shall carry affixed to the car (or basket) or to the fuselage, in a prominent position, a metal plate inscribed with the names and residence of the owner and the marks of nationality and registration.

16. The nationality and registration marks shall also be painted in black on a white ground in the following manner, and (in the case of aircraft other than State or passenger or goods aircraft) the registration mark shall be underlined with a black line :—

(a) *Flying Machines*.—The marks shall be painted once on the lower surfaces of the lower main planes, and once on the upper surfaces of the top main planes, the top of the letters to be towards the leading edge. They shall also be painted along each side of the fuselage between the main planes and the tail planes. In cases where the machine is not provided with a fuselage the marks shall be painted on the nacelle instead.

(b) *Airships and Balloons*.—In the case of airships the marks shall be painted near the maximum cross section on both sides and on the upper surface, equidistant from the letters on the sides. In the case of balloons the marks shall be painted twice near the maximum horizontal circumference as far as possible from one another. In the case both of airships and balloons the side marks shall be visible both from the sides and ground.

17. The nationality mark in the case of flying machines and airships shall also be painted on the port and starboard sides of the lower surface of the lowest tail planes or elevators and also on the upper surface of the top tail planes or elevators, whichever is the larger. It shall also be painted on both sides of the rudder, or on the outer sides of the outer rudders if more than one rudder is fitted.

In the case of balloons the nationality mark shall be painted on the basket.

18. In the case of flying machines the height of the marks on the main planes and tail planes respectively shall be equal to four-fifths of the chord, and, in the case of the rudder, shall be as large as possible. The height of the marks on the fuselage or nacelle shall be equal to four-fifths of the greatest depth of the narrowest part of that portion of the fuselage or nacelle on which the marks are painted.

In the case of airships the nationality marks painted on the tail plane shall be equal in height to four-fifths of the chord of the tail plane, and in the case of the rudder, shall be as large as possible. The height of the other marks shall be equal to at least one-twelfth of the circumference of the maximum transverse cross-section of the airship.

In the case of balloons the height of the nationality mark shall be equal to four-fifths of the height of the basket, and the height of the other marks shall be equal to at least one-twelfth of the circumference of the balloon.

In the case of all aircraft the letters of the nationality and registration marks need not exceed eight feet in height.

19. The width of the letters shall be two-thirds of their height, and the thickness shall be one-sixth of their height. The letters shall be painted in plain block type and shall be uniform in shape and size. A space equal to half the width of the letters shall be left between the letters.

20. In the case of underlined letters the thickness of the line shall be equal to the thickness of the letter. The space between the bottom of the letters and the line shall be equal to the thickness of the line.

21. Where the nationality and registration marks appear together, a hyphen of a length equal to the width of one of the letters shall be painted between the nationality mark and registration mark.

22. The nationality and registration marks shall be displayed to the best possible advantage, taking into consideration the constructional features of the aircraft. The marks must always be kept clean and visible.

## SCHEDULE II.

### Certificates of Airworthiness for Aircraft ; Detention of unairworthy Aircraft Inspection, Overhauls, &c.

#### ISSUE AND VALIDATION OF CERTIFICATES OF AIRWORTHINESS.

1. Save as hereinbefore provided, a British aircraft registered in the Colony shall not fly unless it possesses a certificate of airworthiness or validated in accordance with the provisions of this Schedule.

2. When an aircraft is registered in the Colony, in respect of which a certificate of airworthiness has been issued by the duly competent authority in any other part of His Majesty's dominions, or in any foreign contracting State, or in any foreign State with which an agreement has been concluded on behalf of His Majesty permitting the aircraft of that State to fly over British territory, the Governor may, subject to such conditions and limitations and for such period as he shall think fit, confer on such certificate validity for the purpose of this Order and may from time to time extend the validity so conferred.

3. When an aircraft which is registered in any other part of His Majesty's dominions, and in respect of which a certificate of airworthiness is in force, is within the Colony, the Governor may, upon the expiry of such certificate, issue a certificate of airworthiness in respect of the aircraft.

4. A validation conferred, or a certificate of airworthiness issued, under this Schedule shall remain valid only for such period as may be prescribed therein, unless extended or renewed for a further period by the Governor.

5. For the purpose of validating, issuing, extending the validation of, or renewing a certificate of airworthiness, the Governor may require to be furnished with such evidence as to the existing condition of the aircraft as he shall think fit.

#### DETENTION OF UNAIRWORTHY AIRCRAFT.

6. If the Governor has reason to believe, on complaint or otherwise, that a passenger or goods aircraft within the Colony is intended or is about to proceed on any flight while in a condition unfit for flight, he may give such directions and take such steps, by way of provisional detention of the aircraft or otherwise in relation thereto, as may be necessary for the purpose of causing the aircraft to be inspected by his authorized representatives, and may, upon the result of such inspection, cause the aircraft to be detained until the execution of such alterations or repairs as he may consider necessary to render the aircraft fit for flight.

#### INSPECTION, OVERHAULS, &C.

7. The Governor may issue directions as to the inspection, certification before flight, overhaul, repair, and modification of British aircraft which are registered in the Colony, or in respect of which airworthiness certificates have been issued by him, and as to the inspection and certification before flight of other British aircraft within the Colony and any directions so issued shall be complied with as if they were contained in this Order.

### SCHEDULE III.

#### Log Books.

##### LOG BOOKS TO BE KEPT.

1. (1) The following log books shall be kept in respect of British aircraft registered in the Colony :—

- (a) for every aircraft a journey log book ;
- (b) in addition, for every passenger or goods aircraft an aircraft log book and an engine log book and where more than one engine is fitted, a separate log book for each engine.

(2) Every pilot licensed under this Order shall keep a pilot's log book.

(3) The log books shall be kept up to date in the prescribed form and manner.

2. The journey log book shall be issued by the Governor ; other log books shall be in the prescribed form.

3. The log books shall be preserved for two years after the last entry therein.

##### INSTRUCTIONS FOR USE OF LOG BOOKS.

4. (1) (a) The constructor shall fill in and sign the original entries in the aircraft and engine log books so far as he is in a position to do so.

Subsequent entries therein shall be made and signed by such persons as may from time to time be prescribed.

Provided that as regards matters which could not have come to the notice of any person so prescribed the pilot shall be responsible for making and signing the entries.

(b) Entries in the journey log book shall be made and signed by such persons as may from time to time be prescribed.

(2) All entries shall be made in ink :

Provided that in the case of the journey log book the entries may be entered daily from a rough notebook kept in pencil. This rough notebook shall be produced when called for in the event of any inspection or investigation.

## SCHEDULE IV.

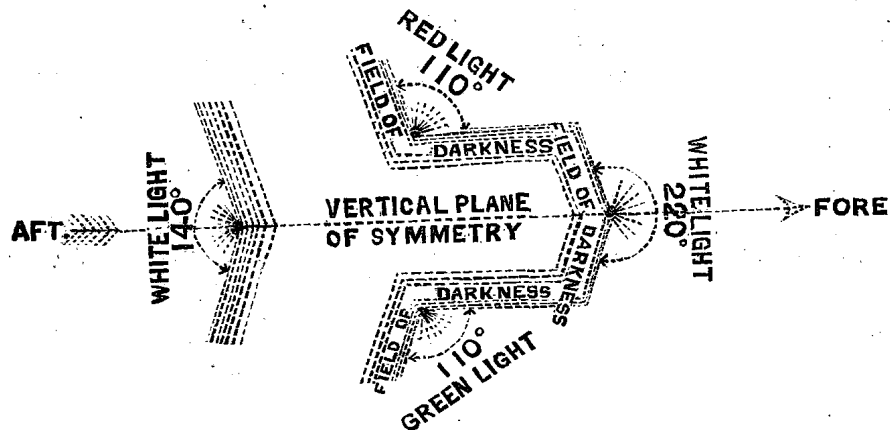

## Rules as to Lights and Signals and Rules for Air Traffic.

## SECTION I.

*Rules as to Lights.*

The word "visible" in these rules when applied to lights shall mean visible on a dark night with a clear atmosphere.

The angular limits laid down in these rules as shown in the sketch (attached) shall be determined when the aircraft is in its normal attitude for flying on a rectilinear horizontal course.

1. The rules concerning lights shall be complied with in all weathers from sunset to sunrise and during such time no other lights shall be exhibited which may be mistaken for the navigation lights hereinafter prescribed. The latter shall not be dazzling.

2. A flying machine, when in the air or manœuvring on land or water under its own power, shall carry the following lights:—

- (a) Forward, a white light visible in a dihedral angle of 220 degrees bisected by the vertical plane of symmetry of the aircraft and visible at a distance of at least 5 miles.
- (b) On the right side, a green light so constructed and fixed as to show an unbroken light between two vertical planes whose dihedral angle is 110 degrees when measured to the right from dead ahead, and visible at a distance of at least 3 miles.
- (c) On the left side, a red light so constructed and fixed as to show an unbroken light between two vertical planes whose dihedral angle is 110 degrees when measured to the left from dead ahead, and visible at a distance of at least 3 miles.
- (d) The said green and red lights shall be fitted so that the green light shall not be seen from the left side, nor the red light from the right side.
- (e) At the rear, and as far aft as possible, a white light shining rearwards and visible in a dihedral angle of 140 degrees bisected by the vertical plane of symmetry of the aircraft, and visible at a distance of at least 3 miles.
- (f) In the case where, in order to fulfil the above conditions, a single light has to be replaced by several lights, the field of visibility of each of these lights should be so limited that only one can be seen at a time.

3. The rules hereinbefore set out for the lighting of flying machines shall apply to airships subject to the following modifications:—

- (a) All lights shall be doubled, the forward and aft lights vertically, and the side lights horizontally in a fore and aft direction.
- (b) Both lights of each pair forward and aft shall be visible at the same time.

The distance between the lights comprising a pair shall not be less than 6 feet.

4. An airship, when being towed, shall carry the lights specified in paragraph 3, and, in addition, those specified in paragraph 6 of this Schedule for airships not under control.

5. (a) A flying machine, or airship, when on the surface of the water, and when not under control, that is to say, not able to manœuvre as required by the Regulations for the Prevention of Collisions at Sea, shall carry two red lights not less than 6 feet apart one over the other, and visible in all directions at a distance of at least 2 miles.

(b) Aircraft to which this paragraph applies, when not making way through the water, shall not carry the side lights, but when making way shall carry them.

6. An airship which from any cause is not under control, or which has voluntarily stopped her engine shall, in addition to the other specified lights, display conspicuously two red lights, one over the other, not less than 6 feet apart, and visible in all directions at a distance of at least 2 miles.

By day an airship, when being towed, and which from any cause is not under control, shall display conspicuously two black balls or shapes, each 2 feet in diameter, placed one over the other not less than 6 feet apart.

An airship moored, or under way but having voluntarily stopped its engines, shall display conspicuously by day a black ball or shape, 2 feet in diameter, and shall be treated by other aircraft as being not under control.

7. A free balloon shall carry one bright white light below the basket at a distance of not less than 16 feet, and to be visible in all directions at a distance of at least 2 miles.

8. A fixed balloon shall carry in the same position as the white light mentioned in paragraph 7 of this Schedule, and in lieu of that light, three lights in a vertical line in one over the other, not less than 12 feet apart. The highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be visible in all directions at a distance of at least 2 miles.

In addition, the mooring cable shall have attached to it at intervals of 1,000 feet, measured from the basket, groups of three lights similar to those mentioned in the preceding paragraph. In addition, the object to which the balloon is moored on the ground shall have a similar group of lights to mark its position.

By day the mooring cable shall have attached to it, at intervals of not more than 300 feet measured from the basket, tubular streamers not less than 8 inches in diameter and 6 feet in length, and marked with alternate bands of white and red, 18 inches in width.

9. An airship when moored near the ground shall carry the lights specified in paragraphs 2 (a) and (e) and 3 of this Schedule.

In addition, if moored but not near the ground, the airship, the mooring cable, and the object to which moored, shall be marked in accordance with the provisions of paragraph 8 of this Schedule, whether by day or by night.

Sea anchors or drogues used by airships for mooring purposes on the water are exempt from this regulation.

10. A flying machine stationary upon the land or water but not anchored or moored shall carry the lights specified in paragraph 2 of this Schedule.

11. In order to prevent collisions with surface craft :—

(a) A flying machine when at anchor or moored on the water shall carry forward, where it can best be seen, a white light, at a distance of at least 1 mile.

(b) A flying machine of 150 feet or upwards in length, when at anchor or moored on the water, shall, in the forward part of the flying machine, carry one such light, and at or near the stern of the flying machine, and at a height that it shall not be less than 20 feet lower than the forward light, another such light.

The length of a flying machine shall be deemed to be the overall length.

(c) Flying machines of 150 feet or upwards in span, when at anchor or moored in the water shall in addition carry at each lower wing tip one light as specified in (a) of this paragraph.

The span of a flying machine shall be deemed to be the maximum lateral dimension.

12. In the event of the failure at night of any of the lights specified under these rules to be carried by aircraft flying at night, such aircraft shall land as soon as it can do so without danger.

13. Nothing in these rules shall interfere with the operation of any special rules made by any State with respect to the additional station or signal lights for military aircraft, or for aircraft in formation or, with the exhibition of recognition signals adopted by owners of aircraft which have been authorized by their respective Governments and duly registered and published.

## SECTION II.

### *Rules as to Signals.*

14. (a) An aircraft wishing to land at night on an aerodrome having a ground control shall, before landing, fire a green pyrotechnical light or flash intermittently a lamp or a projector other than the navigation lights. In addition, it shall make by international Morse Code, by means of sound or luminous signals, the two-letter group constituted by its nationality letter and the last letter of its registration mark.

(b) Permission to land will be given by the same call-sign from the ground; followed by a green pyrotechnical light, or flashing a green lamp intermittently.

15. The firing of a red pyrotechnical light or the display of a red flare from the ground shall be taken as an instruction that aircraft are not to land.

16. An aircraft compelled to land at night shall before landing fire a red pyrotechnical light or make a series of short and intermittent flashes with its navigation lights.

17. When an aircraft is in distress and requires assistance, the following shall be the signals of distress to be used or displayed, either together or separately :—

(a) The international signal, SOS, by means of visual or wireless signals;

(b) The international code flag signal of distress, indicated by NC;

(c) The distant signal, consisting of a square flag having either above or below it a ball, or anything resembling a ball;

(d) A continuous sounding with any sound apparatus;

(e) A signal, consisting of a succession of white pyrotechnical lights fired at short intervals.

18. To warn an aircraft that it is in the vicinity of a prohibited zone and should change its course, the following signals shall be used :—

(a) By day: three projectiles discharged at intervals of 10 seconds each showing, on bursting, white smoke, the location of the burst indicating the direction the aircraft should follow.

(b) By night: three projectiles discharged at intervals of 10 seconds each showing, on bursting, white lights or stars, the location of the burst indicating the direction the aircraft should follow.

19. To require an aircraft to land, the following signals shall be used :—

- (a) By day : three projectiles discharged at intervals of 10 seconds each showing, on bursting, black or yellow smoke.
- (b) By night : three projectiles discharged at intervals of 10 seconds each showing, on bursting, green lights or stars.

In addition, when necessary to prevent the landing of aircraft other than the one ordered, a searchlight which shall be flashed intermittently shall be directed towards the aircraft whose landing is required.

20. (a) In the event of fog or mist rendering aerodromes invisible, their presence may be indicated by a balloon acting as an aerial buoy and/or other approved means.

(b) In fog, mist, falling snow, or heavy rainstorm, whether by day or night, an aircraft on the water shall make the following sound signals :—

- (1) If not anchored or moored, a sound at intervals of not more than two minutes, consisting of two blasts of about five seconds' duration with an interval of about one second between them.
- (2) If at anchor or moored, the rapid ringing of an efficient bell or gong for about five seconds at intervals of not more than one minute.

### SECTION III.

#### *General Rules for Air Traffic.*

21. Subject to the provisions of paragraph 43 of this Schedule, flying machines shall always give way to balloons, fixed or free, and to airships, and airships shall always give way to balloons, whether fixed or free.

22. An airship, when not under its own control, shall be classed as a free balloon.

23. Risk of collision can, when circumstances permit, be ascertained by carefully watching the compass bearing and angle of elevation of an approaching aircraft. If neither the bearing nor the angle of elevation appreciably change, such risk shall be deemed to exist.

24. The term "risk of collision" shall include all risk of accident due to undue proximity of other aircraft. Every aircraft that is required by these rules to give way to another to avoid collision shall keep a safe distance, having regard to the circumstances of the case.

25. While observing the rules regarding risk of collision contained in paragraph 24 of this Schedule, a motor-driven aircraft must always manoeuvre according to the rules contained in the following paragraphs as soon as it is apparent that, if it pursued its course, it would pass at a distance of less than 200 yards from any part of another aircraft.

26. When two motor-driven aircraft are meeting end on, or nearly end on, each shall alter its course to the right.

27. When two motor-driven aircraft are on courses which cross, the aircraft which has the other on its own right side shall keep out of the way of the other.

28. An aircraft overtaking another shall keep out of the way of the overtaken aircraft by altering its own course to the right, and must not pass by diving.

Every aircraft coming up with another aircraft from any direction more than 110 degrees from ahead of the latter, *i.e.*, in such a position with reference to the aircraft which it is overtaking that at night it would be unable to see either of that aircraft's side lights, shall be deemed to be an overtaking aircraft, and no subsequent alteration of the bearing between the two aircraft shall make the overtaking aircraft a crossing aircraft within the meaning of these rules, or relieve it of the duty of keeping clear of the overtaken aircraft until it is finally past and clear.

As by day the overtaking aircraft cannot always know with certainty whether it is forward or abaft the direction mentioned above from the other aircraft, it should, if in doubt, assume that it is an overtaking aircraft and keep out of the way.

29. Where by any of these rules one of the two aircraft is to keep out of the way, the other shall keep its course and speed. When, in consequence of thick weather or other causes, the aircraft having the right of way finds itself so close that collision cannot be avoided by the action of the giving-way aircraft alone, it shall take such action as will best aid to avert collision.

30. Every aircraft which is directed by these rules to keep out of the way of another aircraft shall, if the circumstances of the case admit, avoid crossing ahead of the other.

31. In following an officially recognized air route every aircraft, when it is safe and practicable, shall keep to the right side of such route.

32. All aircraft on land or sea about to ascend shall not attempt to take off until there is no risk of collision with alighting aircraft.

33. Every aircraft in a cloud, fog, mist, or other conditions of bad visibility shall proceed with caution, having careful regard to the existing circumstances and conditions.

34. In conforming with these rules, due regard shall be had to all dangers of navigation and collision and to any special circumstances which may render a departure from the above rules necessary in order to avoid immediate danger.

### SECTION IV.

#### *Ballast.*

35. The dropping of ballast other than fine sand or water from aircraft in the air is prohibited.

## SECTION V.

*Special Rules for Air Traffic on and in the vicinity of Aerodromes.*

36. At every aerodrome if a flying machine about to land or leave finds it necessary to make a circuit or partial circuit, such a circuit or partial circuit shall, except in case of distress, be left-handed (anti-clockwise).

37. When a flying machine starts from an aerodrome it shall not turn until 500 yards distant from the nearest point of the aerodrome, and the turning must then conform with the regulations provided in the preceding paragraph.

38. Every flying machine flying at a distance of between 500 and 3,500 yards from the nearest point of the perimeter of an aerodrome shall conform to the flying rules laid down in paragraphs 36 and 37 of this Schedule unless it is flying at a greater height than 6,000 feet.

39. Acrobatic landings are prohibited at aerodromes of contracting States used for international aerial traffic. Flying machines are prohibited from engaging in aerial acrobatics in the vicinity of these aerodromes at a distance of less than 4,000 yards from the nearest point of the perimeter of the aerodrome unless they are flying at a greater height than 6,000 feet.

40. At every licensed aerodrome the direction of the wind shall be clearly indicated by one or more of the recognized methods, *e.g.*, landing T, conical streamer, smudge fire, &c. In the event of there being no wind, a ball, easily visible, shall be hoisted on a mast and if there is a landing T it shall be fixed.

41. Every flying machine when taking off from or alighting on an aerodrome used for international air traffic shall do so up-wind, except when the natural conditions of the aerodrome do not permit, or in the event of there being no wind. In the latter case, every flying machine, when taking off or landing, shall do so in the direction indicated by an appropriate signal, or, if there is a landing T, in the direction indicated by that T.

42. In the case of two flying machines approaching an aerodrome for the purpose of landing the flying machine flying at the greater height shall be responsible for avoiding the flying machine at the lower height, and shall as regards landing observe the rules of paragraph 28 of this Schedule for passing.

43. Aircraft about to land on an aerodrome shall be given free way.

44. (1) At every aerodrome, along the perimeter and at the approaches to the hangars a neutral zone shall be set apart for flying machines manoeuvring on the ground.

(2) The part reserved for departures and landings shall be as large as possible.

(3) Every flying machine when landing or taking off, shall do so in conformity with the provisions of paragraph 41 of this Schedule, and shall leave clear on its left any flying machine which has already landed or which is at rest on the ground.

(4) Every flying machine when running along the ground in the zone reserved for departures and landings, shall do so in the direction of landing: Provided that, on aerodromes approved by the Governor for the purpose, flying machines running along the ground may be authorized to cross the part reserved for departures and landings subject to regulations approved by the Governor.

45. (1) By way of exception to the general rule laid down in sub-paragraph (3) of paragraph 44 of this Schedule, at aerodromes to which this paragraph applies, the part reserved for departures and landings may be regarded as divided into two approximately equal zones, by a vertical plane bearing in the direction of landing described in paragraph 41 of this Schedule. For an observer facing in the direction of landing, the zone on the right shall be reserved for landings, and the zone on the left for departures.

(2) The aerodromes to which this paragraph applies shall be indicated by a full, white star of five points, placed flat on the ground in the centre of the part of the ground reserved for departures and landings. The lines joining the points of the star shall form a regular pentagon of such a size that it may be inscribed in a circle the diameter of which is not less than 15 yards.

(3) At aerodromes to which this paragraph applies a flying machine when landing shall do so in conformity with paragraph 41 of this Schedule, in the left part of the zone reserved for that purpose, but leaving clear on its left any other flying machine which has already landed, and a flying machine when taking off shall do so in conformity with paragraph 41 of this schedule, in the left part of the zone reserved for that purpose, but leaving clear on its left any other flying machines which are at rest on the ground.

46. At every aerodrome while night landings thereat are expected, the following requirements shall be complied with:—

(1) The aerodrome shall be defined as accurately as possible by red lights placed on the perimeter and on any obstacles on the aerodrome;

(2) The direction of landing shall as far as possible be indicated by a luminous T, or failing this by three white lights forming an isosceles triangle, the base of which shall be about 200 yards long, and the height of which shall be at least twice as long as the base;

(3) The white lights aforesaid shall be so placed that a flying machine will land in the direction leading from the middle of the base line to the apex of the triangle;

(4) The base line shall indicate the place where a flying machine should come into contact with the ground and the apex shall indicate the point before reaching which it should come to rest.

47. No fixed balloon, kite, or moored airship shall be elevated in the vicinity of any aerodrome without a special authorization, except in the cases provided for in paragraph 20 of this Schedule.

48. Suitable signals shall be placed on all obstacles on aerodromes and, as far as possible, on fixed obstacles dangerous to flying within a zone of 500 yards of all aerodromes.

## SECTION VI.

*General.*

49. Every aircraft manoeuvring under its own power on the water shall conform to the Regulations for Preventing Collisions at Sea, and for the purposes of these regulations shall be deemed to be a steam vessel, but shall only carry the lights specified in the preceding rules, and not those specified for steam-vessels in the Regulations for Preventing Collisions at Sea, and shall not use, except as specified in paragraph 17 and 20 of this Schedule, or be deemed to hear the sound signals specified in the above-mentioned Regulations.

50. Nothing in the above rules shall exonerate any aircraft, or the owner, pilot, or crew thereof, from the consequences of any neglect in the use of lights or signals, or of any neglect to keep a proper lookout, or of the neglect of any precaution which may be required by the ordinary practice of the air, or by the special circumstances of the case.

51. Nothing in the above provisions shall interfere with the operation of any special rule or rules approved by the Governor and published relative to navigation of aircraft in the immediate vicinity of any aerodrome or other place, and it shall be obligatory on all owners, pilots, or crews of aircraft to obey such rules.

## SCHEDULE V.

**Licensing of Personnel.**

1. Save as provided by Article 4 and Article 5 of this Order, every person acting as a commander, pilot, navigator, engineer, or other operative member of the crew of a British aircraft registered in the Colony shall be the holder of a licence in respect of the capacity in which he is so acting granted or rendered valid under the provisions of this Order.

2. (1) The Governor may issue directions providing for—

(a) The grant and renewal by him of such licences as aforesaid; and

(b) The validation by him for the purpose of flying British aircraft registered in the Colony of licences granted by the duly competent authority in any foreign State.

(2) Pending the issue of such directions, licences may be granted, renewed or validated by the Governor on such conditions as he thinks fit.

3. A licence to pilot or navigate aircraft granted by the duly competent authority of any place within His Majesty's dominions shall for the purposes of this Order have the same validity and effect and may be cancelled or suspended in so far as relates to its validity within the Colony in like manner and in the like circumstances as if it had been granted under this Order.

4. In this Schedule the expression "licence" includes a certificate of competency.

## SCHEDULE VI.

**Prohibited Areas.**

1. Such specifically defined areas in the Colony as the Governor may by proclamation declare to be prohibited areas shall be prohibited areas within the meaning of this Schedule.

2. Every aircraft which finds itself above a prohibited area in contravention of this Order shall, as soon as aware of the fact, give the signal of distress provided in paragraph 17 of Schedule IV, and land as soon as possible outside the prohibited area at one of the nearest aerodromes in the Colony.

Provided that it shall not, unless compelled by stress of weather or other unavoidable cause, fly further into the prohibited area nor commence to descend while still above the prohibited area.

3. To warn an aircraft that it is in the vicinity of a prohibited area and should change its course, the signals prescribed in paragraph 18 of Schedule IV, shall be used.

## SCHEDULE VII.

## Annex H. of the Convention.

## CUSTOMS.

*General Provisions.*

1. Any aircraft going abroad shall depart only from aerodromes specially designated by the customs administration of each contracting State, and named "customs aerodromes."

Aircraft coming from abroad shall land only in such aerodromes.

2. Every aircraft which passes from one State into another is obliged to cross the frontier between certain points fixed by the contracting States. These points are shown on the aeronautical maps.

3. All necessary information concerning customs aerodromes within a State, including any alterations made to the list and any corresponding alterations necessary on the aeronautical maps and the dates when such alterations become valid, and all other information concerning any international aerodromes which may be established, shall be communicated by the State concerned to the International Commission for Air Navigation, which shall notify such information to all of the contracting States. The contracting States may agree to establish international aerodromes at which there may be joint customs services for two or more States.

4. When, by reason of a case of *force majeure* which must be duly justified, an aircraft crosses the frontier at any other point than those designated it shall land at the nearest customs aerodrome on its route. If it is forced to land before reaching this aerodrome it shall inform the nearest police or customs authorities.

It will only be permitted to leave again with the authorization of these authorities, who shall, after verification, stamp the log-book and the manifest provided for in paragraph 5: they shall inform the pilot of the customs aerodrome where he must necessarily carry out the formalities of customs clearance.

5. Before departure, or immediately after arrival, according to whether they are going to or coming back from a foreign country, pilots shall show their log-books to the authorities of the aerodrome and, if necessary, the manifest of the goods and supplies for the journey which they carry:

6. The manifest is to be kept in conformity with the attached form No. 1.

The goods must be the subject of detailed declarations in conformity with the attached form No. 2, made out by the senders.

Every contracting State has the right to prescribe for the insertion either on the manifest or on the customs declaration of such supplementary entries as it may deem necessary.

7. In the case of an aircraft transporting goods the customs officer, before departure, shall examine the manifest and declarations, make the prescribed verifications, and sign the log-book as well as the manifest. He shall verify his signature with a stamp. He shall seal the goods or sets of goods, for which such a formality is required.

On arrival the customs officer shall ensure that the seal is unbroken, shall pass the goods, shall sign the log-book, and keep the manifest.

In the case of an aircraft with no goods on board, the log-book only shall be signed by the police and customs officials.

The fuel on board shall not be liable to customs duties provided the quantity thereof does not exceed that needed for the journey as defined in the log-book.

8. As an exception to the general regulations, certain classes of aircraft, particularly postal aircraft, aircraft belonging to aerial transport companies regularly constituted and authorized and those belonging to members of recognized touring societies not engaged in the public conveyance of persons or goods, may be freed from the obligation of landing at a customs aerodrome and authorized to begin or end their journey at certain inland aerodromes appointed by the customs and police administration of each State at which customs formalities shall be complied with.

However, such aircraft shall follow the normal air-route, and make their identity known by signals agreed upon as they fly across the frontier.

*Regulations applicable to Aircraft and Goods.*

9. Aircraft landing in foreign countries are in principle liable to customs duties if such exist.

If they are to be re-exported, they shall have the benefit of the regulations as to permit by bond or deposit of the taxes.

In the case of the formation, between two or more countries of the Union, of touring societies the aircraft of the said countries will have the benefit of the regulations of the "Triptyque."

10. Goods arriving by aircraft shall be considered as coming from the country where the log-book and manifest have been signed by the customs officer.

As regards their origin and the different customs regimes, they are liable to the regulations of the same kind as are applicable to goods imported by land or sea.

11. With regard to goods exported in discharge of a temporary receiving or bonded account or liable to inland taxes, the senders shall prove their right to send the goods abroad by producing a certificate from the customs of the place of destination.

*Air Transit.*

12. When an aircraft to reach its destination must fly over one or more contracting States, without prejudice to the right of sovereignty of each of the contracting States, two cases must be distinguished :—

- (1) If the aircraft neither sets down nor takes up passengers or goods it is bound only to keep to the normal air-route and make itself known by signals when passing over the points designated for such purpose.
- (2) In other cases, it shall be bound to land at a customs aerodrome and the name of such aerodrome shall be entered in the log-book before departure. On landing, the customs authorities shall examine the papers and the cargo, and take, if need be, the necessary steps to ensure the re-exportation of the craft and goods or the payment of the dues.

The provisions of paragraph 9 (2) are applicable to goods to be re-exported. If the aircraft sets down or takes up goods, the customs officer shall verify the fact on the manifest, duly completed, and shall affix, if necessary, a new seal.

*Various Provisions.*

13. Every aircraft during flight, wherever it may be, must conform to the orders from police or customs stations and police or customs aircraft of the State over which it is flying.

14. Customs officers and excise officials, and generally speaking the representatives of the public authorities shall have free access to all starting and landing places for aircraft ; they may also search any aircraft and its cargo to exercise their rights of supervision.

15. Except in the case of postal aircraft, all unloading or throwing out in the course of flight, except of ballast, may be prohibited.

16. In addition to any penalties which may be imposed by local law for infringement of the preceding regulations, such infringement shall be reported to the State in which the aircraft is registered, and that State shall suspend for a limited time, or permanently, the certificate of registration of the offending aircraft.

17. The provisions of this Annex do not apply to military aircraft visiting a State by special authorization (Articles 30, 31, and 32 of the Convention), nor to police and customs aircraft (Articles 30 and 33 of the Convention).

No. 2,317 of June 15, 1928 (Date applied for under Section 50 of the Ordinance: July 4, 1927).

*Ernest George Enticknap.*

Improvements in or relating to machines for the manufacture of concrete blocks and the like.

*Abstract.*—The mould boxes are run on to a platen below which is a hydraulic ram. Above the mould box is a reciprocating, pressing, and tamping element. By the upward movement of the ram the material is subjected to a progressively increasing tamping pressure.

The claims are:—

1. A method of manufacturing moulded articles, concrete blocks and the like, wherein the material to be moulded is subjected to a progressively increasing tamping pressure.
2. A method of manufacturing moulded articles, concrete blocks and the like, characterized in that the material to be moulded remains in a stationary mould whilst subjected to a simultaneous pressing and tamping operation.
3. A method of manufacturing moulded articles, concrete blocks and the like wherein the material to be moulded is subjected firstly to a progressively increasing tamping pressure and finally to top and bottom pressure without tamping.
4. Means for manufacturing moulded articles, concrete blocks and the like, consisting of a table or platen to constitute or receive a mould or equivalent and reciprocating tamping means adapted to be brought into operative relation to said mould.
5. In the manufacture of moulded articles, concrete blocks and the like, a machine adapted to receive a mould and means for automatically filling and progressing same into operative position for simultaneously pressing and tamping.
6. A machine for the manufacture of moulded articles, concrete blocks and the like, comprising a table or platen arranged to receive a mould or its equivalent, a sliding head disposed above said platen and movable towards and away from the same under hydraulic pressure and a reciprocating tamping head mounted on said sliding head and adapted to be continuously reciprocated relatively to the latter.
7. A machine for the manufacture of moulded articles, concrete blocks and the like, comprising a combined pressing and tamping head carrying a reciprocateable tamping member, an eccentric and connecting rod or other means for operating said tamping member, and means for applying a final hydraulic pressure thereto and a press platen movable towards and away from the work by means of an hydraulic ram and carrying a mould and an ejector for the moulded article operated by an hydraulic piston working in a cylinder in said press platen.
8. A machine for the manufacture of moulded articles, concrete blocks and the like, having an upper tamping member and a lower press platen movable towards and away from said tamping member, said press platen and tamping member being carried on a framework so designed as to be open three sides as and for the purpose set forth.
9. A machine for the manufacture of moulded articles, concrete blocks and the like, according to claim 8, wherein moulding boxes on rail tracks are run under said machine, and wherein the machine supports a turntable concentric with the press platen for the purpose of transferring the trolleys from one set of rails to another.
10. A machine for the manufacture of moulded articles, concrete blocks and the like comprising a tamping element operated by an eccentric and connecting rod or like means and an hydraulic pressing element operated under the control of valves so arranged that the pressing member is retracted automatically when a filled mould is brought near to the machine and is automatically advanced for the purpose of applying progressively increasing tamping pressure to the work when the finished mould has been removed and the newly filled mould has been moved into position in the machine.
11. A machine for manufacturing moulded articles, concrete blocks and the like, comprising a press platen for supporting the work and a combined press and tamping element operated by a piston working in a steam cylinder arranged to apply a progressively increasing tamping pressure to the work.

Improved method of and apparatus for separating stalk from tea in the process of manufacture.

*Abstract.*—A celled roller and a plain roller are geared together with a spring pressure between them.

The tea is fed from above and after passing between the rollers a scraper is applied to the celled roller which causes the stalk to be scraped off, leaving the tea in the cells to be shaken out later.

The claims are:—

1. A manner of dividing stalk from the leaf in manufactured tea which consists in feeding the mixed tea and stalk on to a rotating celled or honey-combed roller, or a roller the surface of which is covered with small rectangular or square pits, causing the mixed tea and stalk to be pressed against the surface of said celled honey-combed roller by a pressing roller, whereby the leaf is pressed into the said cells, honey-combing or pits in the surface of the celled roller whilst the stalk, being stiffer, less fragile and capable more readily of resisting deformation, is merely crushed or flattened against the ribs or partitions forming the edges of the cells, immediately thereafter applying a scraper to the rotating celled or honey-combed roller surface which scraper removes the crushed stalk and causes it to fall along the upper side of the scraper, the leaf which is pressed into the cell, honey-combs, or pits in the celled roller falling out, or being caused to fall out, as the roller rotates further.
2. Apparatus for the purpose of separating stalk from leaf in dried or fired manufactured tea, which comprises a celled or honey-combed roller having a series of rectangular or square cavities, pits, or cells on its periphery, means for causing said celled roller to rotate, a pressing roller rotating in contact therewith, means for feeding mixed manufactured tea, including the stalk thereto to pass between the two said rollers, and a scraper or dividing surface adapted to be pressed up against or into close relation with the said celled or honey-combed roller to remove the stalk from the surface thereof after it has passed between the two said rollers, the said stalk passing away on the upper or outer side of said scraper or dividing surface and the leaf falling out of the cells, honey-comb or pits in the celled roller during the further rotation thereof.
3. Apparatus according to claim 2, in which the pressing roller is pressed against or towards the celled roller by spring means adapted to provide an elastic or springy-pressure, or to "give" slightly if hard particles or the like pass between the rollers.
4. Apparatus according to claim 2 or 3, in which the scraper or dividing surface is adjustable in position relatively to the celled roller.

5. Apparatus according to claim 2, 3, or 4, in which the celled roller is formed of a series of notched discs and of plane discs mounted alternately and bolted or clamped together to make the roller.
6. Apparatus according to claim 5, in which alternate notched discs have their spaces and projections breaking joint with those of the next notched disc on either side.
7. Apparatus according to claim 5 or 6, in which the notched discs are formed with the edges of the projections or "teeth" thereon slightly rounded as or for the purposes explained.
8. Apparatus according to claim 5, 6, or 7, wherein the plain discs have a slightly larger diameter, say 1/16 in. greater diameter, than the notched discs there between.
9. Apparatus according to any of the claims 2 to 8 in which the depressions or honey-comb in the celled roller are from  $\frac{1}{4}$  in. to  $\frac{1}{2}$  in. across and from  $\frac{1}{4}$  in. to  $\frac{5}{16}$  in. deep according to the grade and size of the tea to be treated or produced.
10. Apparatus according to any of the claims 2 to 9, in which the celled or honey-combed rollers and parts thereof are so made or arranged that they can be removed and replaced by other rollers having an unworn surface, or having a honey-comb or grid of a different size, or wherein damaged or worn parts of a roller may be replaced without needing to replace the whole roller.
11. Apparatus for separating stalk from tea constructed, arranged or adapted to function substantially as described or substantially as described and illustrated.

Improvements in and relating to colour photography.

*Abstract.*—As an example a plate may be built up of glass on which is the blue sensitive emulsion. On this is a thin celluloid support bearing the green sensitive composition, and above this is a stripping film which carries the red sensitive emulsion. Clips at the edges may be used to cut out all light and so leave marks by which correct registration may be ensured.

The claims are :—

1. The method of colour photography by the exposure simultaneously of a plurality of superimposed layers of light-sensitive compositions differing one from the other in respect of their sensitivity to light rays forming particular hands of the spectrum in such manner as to enable a corresponding number of differently coloured photographic images to be obtained by printing or projection, which when superimposed will form a composite representation of a subject in substantially its natural colours, characterized in this that the layer of light-sensitive composition which is selectively sensitive to the rays situated towards the blue end of the spectrum is located in making the exposure to obtain the negative images farthest from the source of light.
2. A process as claimed in claim 1, in which one or certain of the layers of composition is or are adapted to be stripped from their support or supports.
3. A process as claimed in claim 2, in which the layer of composition sensitive to red is in the form of a stripping film attached to a transparent support such as glass or celluloid.
4. A composite plate for use in a three-colour process of photography according to claims 1 to 3 comprising a sheet of glass coated with a layer of composition sensitive to red in the form of a stripping film, the layer of composition sensitive to green being in the form of a con-stripping film on a thin celluloid support with its coating in contact with the layer of composition sensitive to red while the layer of composition sensitive to blue is coated upon glass, the last mentioned layer being arranged in contact with the rear face of the previously mentioned celluloid support.
5. A composite negative-taking plate of film for carrying out the process claimed in claims 1 to 3 in which the supports for the several layers of light-sensitive composition are secured together by clips which may be furnished with means adapted to facilitate registration of the prints obtained in the several colours for producing the composite image.
6. A composite negative-taking plate or film as claimed in claim 5 in which the clips are furnished with V-shaped notches or projections which during the simultaneous exposure of the plurality of layers of light-sensitive composition will protect the compositions from the action of light and thereby leave impressions on the several images.
7. A composite negative-taking film for use in carrying out the process claimed in claim 1 to 3, in which a band of celluloid or equivalent supporting material is provided with a plurality of layers of suitable light-sensitive compositions, one or certain of which are in the form of stripping films.
8. The process of colour photography as claimed in claims 1 to 3 adapted for cinematograph purposes and photography with the aid of roll films in which the several layers of light-sensitive composition are associated with different films acting as supports and the films are caused to pass together through the gate of the camera which may be furnished with means adapted to facilitate registration of the positive prints or projected images obtained with the aid of the several negatives.
9. The improved method or process of colour photography substantially as hereinbefore described.

Improvements in teapots and the like having infusers.

*Abstract.*—The infuser handle is received into a socket or the like on the infuser case and is adapted to be withdrawn therefrom so that both parts can be removed from the pot.

The claims are :—

1. A teapot or the like having an infuser, of the type herein set forth, characterized in that the infuser handle is received into a socket or the like on the infuser cage and is adapted to be withdrawn from the pot after detaching same from the infuser.
2. A teapot or the like, as claimed in claim 1, wherein the infuser handle is a push-fit into the said socket of the infuser cage.
3. A teapot or the like, as claimed in claim 1 or 2, wherein the infuser handle has lateral projections adapted to lie against the outer surface of the wall of the pot and form a pivot about which the infuser will swing.
4. A teapot or the like, as claimed in any of the preceding claims, wherein the externally projecting portion of the infuser handle has opposed springy legs adapted to grip on to the pot handle.
5. A teapot or the like substantially as herein described with reference to the accompanying drawings.

### Importation of Dogs and Cats into Great Britain.

S 34/29

THE Minister of Agriculture and Fisheries in Great Britain, by virtue and in exercise of the powers vested in him under the Diseases of Animals Acts, 1894 to 1927, and of every other power enabling him in this behalf, has made an order dated November 19, 1928, entitled "The Importation of Dogs and Cats Order of 1928."

2. This order consolidates the existing orders relating to the Importation of Dogs and other canine animals and provides also for the first time that no cat or other feline animal shall be landed in Great Britain from any other country, except Ireland, the Channel Islands, and the Isle of Man, unless authorized by a licence of the Minister of Agriculture and Fisheries, subject, *inter alia*, to the condition that the animal shall be quarantined for a period of six calendar months on the premises of a Veterinary Surgeon approved by the Minister.

3. The provisions of this order also apply to a dog or cat taken from Great Britain, Ireland, the Channel Islands, or the Isle of Man, into any port in any other country (except Great Britain, Ireland, the Channel Islands, and the Isle of Man), as if the animal were an imported dog or cat, and also to any dog or cat, which has at any time before or after arrival at a port in Great Britain, been in contact with any imported dog or cat.

4. For the provisions of this order "Canine animal" or "dog" means all animals of the canine tribe, wild or domesticated. "Feline animal" or "cat" means all animals of the feline tribe, wild or domesticated. It also includes lions, tigers, leopards, lynx, cheetahs, and a variety of smaller animals.
