## Ninety-Eighth Annual Report of the Ceylon Savings Bank.

Board of Directors: The Hon. the Controller of Revenue (*President*), The Postmaster-General, The Registrar-General.

Treasurer: The Hon. the Colonial Treasurer.

## REPORT FOR THE YEAR 1929.

The Ninety-eight Annual Report of the Ceylon Savings Bank is submitted, together with the statements of accounts and balance sheet for 1929, duly audited and certified by the Colonial Auditor.

The statements overleaf show that there has been steady progress all round.

**Deposits.**—The amount deposited during the year was Rs. 3,773,830·92. The number of deposits was 32,109, as against 29,967 in 1928.

**Withdrawals.**—The amount withdrawn during the year was Rs. 3,56,808·41. The number of withdrawals was 29,463, as against 26,084 in 1928.

**Number of Transactions.**—The total number of transactions in deposits and withdrawals was 61,572, as against 56,051 in 1928.

The amount to credit of depositors on December 31, 1929, was Rs. 7,593,296·62, as against Rs. 7,336,274·11 in 1928—an increase of Rs. 257,022·51, which is due to normal growth of business.

**Number of Accounts.**—The number of accounts remaining open at the end of the financial year was 54,143, as against 51,900 in 1928.

The number of accounts opened during the year was 4,068, and the number of accounts closed 1,825, leaving a nett increase of 2,243 accounts.

**Interest Paid to Depositors.**—The rate of interest paid to depositors was the same as in the preceding year, viz., 4 per cent. on sums not exceeding Rs. 1,000 and 3 per cent. on sums exceeding Rs. 1,000.

The interest paid to depositors for 1929 was Rs. 242,408·80, as against Rs. 229,913·78 in 1928—an increase of Rs. 12,495·02.

**Investment on House Property.**—The amount lent during the year under review on 40 fresh mortgages on house property within the Municipal limits of Colombo was Rs. 672,700, as against 28 mortgages in 1928 amounting to Rs. 360,500, an increase of Rs. 312,200. There is a large and steady demand for loans at 7 per cent. interest and exceptionally good business under this head was done during the year.

**Investment on Foreign Securities.**—Out of the £41,361 0s 6d 5 per cent. War Loan Stock 1929–1947 held by the Crown Agents on behalf of the Bank, £15,056 12s 3d worth of stock has been sold by them in November, 1929, for re-investment.

**Refund of Income Tax on Indian Government Paper.**—A sum of Rs. 34,765·68 had to be repaid to the Indian Government through the Imperial Bank of India. This sum represented the tax deducted prior to 1922 which had been refunded by the Indian Government in error and which had been credited to Bank funds in 1928.

**Cost of Maintaining the Bank.**—The expenses of the management of the Bank during the year amounted to Rs. 58,393·87 as against Rs. 55,442·91 in 1928 an increase of Rs. 2,950·96, due partly to the annual increments to officers and partly to the payment of arrears to the Railway Department on account of concessionary tickets to the officers of the Bank.

**Profits.**—The nett profit after providing for interest to depositors, expenses of management of the Bank, rent of premises, &c., was Rs. 20,882·71. This will as usual be added to the reserve fund. Considering the general depression in trade the result of the year's working must be considered quite satisfactory.

## GENERAL.

On representations made by the Directors of the Bank to the Rt. Hon. the Secretary of State for the Colonies has authorized them to invest in addition to the reserve fund a further sum up to one-twelfth of the Bank's funds in mortgage of Colombo house property, and one-quarter of the Bank's funds in Ceylon Government securities instead of one-third as hitherto.

Ceylon Savings Bank,  
Colombo, June 10, 1930.

By order,  
K. W. Y. ATUKORALA,  
Secretary.

**Sale of Timber.**

WRITTEN offers are invited for the purchase of timber, firewood, &c., described in the annexed schedule.

2. Offer should be made subject to the following conditions by letter, preferably under sealed and registered cover, addressed to the Divisional Forest Officers concerned and posted or handed over personally not later than midday on Monday, August 11, 1930, the envelope being marked on the left hand top corner "Offer for Purchase of Timber, &c.," and signed by tenderer.

3. Lump sums offers should be made for each item in the schedule and be written both in words and figures. Offers may be made for more than one item in the same letter, but should be quoted for each item separately.

4. In the case of offers which in the aggregate exceed Rs. 20, tenderers may remit Rs. 5 either with their offers or within two days of their offers to the Divisional Forest Officer of the Division concerned. This sum will be returned if their offers are rejected. The purchaser will be given credit for the amount in the final payment for the timber. Where the *bona fides* of any tenderer are in the opinion of the Divisional Forest Officer or the Conservator of Forests doubtful, his tender may not be entertained unless the required money deposit is made, if and when demanded by the Divisional Forest Officer.

5. The species, measurements, cubic contents, &c., of the material appearing in the schedule are to be regarded as only approximate, and intending tenderers are presumed to have inspected the timber before they make their offers and they should bring to the notice of the Divisional Forest Officer any serious discrepancies which they may notice. They should also satisfy themselves by personal inspection as to the condition of the timber they offer for.

6. Any tenderer whose offer is accepted shall, within three days of notification of acceptance of his offer, pay the full purchase amount in the case of offers aggregating to Rs. 20 and as follows in the case of offers exceeding Rs. 25 in the aggregate :—

Over Rs. 20 up to Rs. 100, 50 per cent. ; and over Rs. 100, 25 per cent. ; the balance being paid within a fortnight of the previous payment. In the event of failure to complete the purchase, all amounts previously paid shall be forfeited and the timber, &c., revert to the Crown, and be liable for resale at the risk of the original purchaser.

Should any successful tenderer decline or fail to pay any sum or sums as above stipulated for, he shall further be pecuniarily liable for any resultant loss to Government.

The Conservator of Forests reserves however the discretionary power to enforce, modify, or waive any of the provisions in this clause to such extent as he may consider the circumstances justify.

7. The Conservator of Forests reserves to himself the right, without question, of rejecting any or all offers and of accepting any offer.

8. All materials shall be removed by purchaser within one month of completion of purchase when a permit for removal will be issued. Extension of time will not be granted except under exceptional circumstances.

9. All material purchased shall be at the risk of the purchaser until its removal by him on a permit.

10. The buyer, his agent, or his representative shall be liable for punishment under the Forest Ordinance for commission of any Forest Offence in the course of completing the transaction.

11. Any purchaser violating the conditions of purchase shall be liable to a fine not exceeding 25 per cent. of purchase amount, and to be included in the list of persons to whom no permits will be issued.

## NOTIFICATIONS UNDER "THE PATENTS ORDINANCE, 1906."

THE following Specifications have been accepted:—

No. 2,455 of May 26, 1930 (Date applied for under Section 48 of the Ordinance, June 26, 1928).

*Midden-Europeesche Octrooi-Maatschappij.*

A method of, and apparatus for, producing dense carbon dioxide snow from liquid carbon dioxide.

*Abstract.*—Wet snow is first produced by expansion of liquid carbon dioxide and this is then converted to ice by further expansion. In the first stage the CO<sub>2</sub> is expanded to slightly below the triple point, then compressed to somewhat above the triple point, before finally converting to ice by further expansion.

An apparatus is described.

The claims are :—

1. The process of producing carbon dioxide ice from liquid carbon dioxide or carbon dioxide snow, consisting in converting liquid carbon dioxide into wet snow by expansion, and then converting the snow into ice by further expansion.

2. In the process claimed in claim 1, first expanding the liquid carbon dioxide to a pressure below the triple point pressure, and then compressing it to above the triple point pressure, prior to final expansion.

3. In the process claimed in claim 1 or 2, freezing the moist snow by sucking the vapour evolved from the bottom of the expansion chamber through a permeable plate.

4. Apparatus for the process claimed in claim 1, 2 or 3, having a nozzle with a diffuser directly adjoining the same, opening into an expansion chamber.

No. 2,456 of March 31, 1930 (Date applied for under Section 50 of the Ordinance, May 10, 1929).

*Eugene Rabetrano.*

Process for the purification of graphites.

*Abstract.*—The graphite is digested with hot caustic alkali. It is then washed and treated with boiling dilute sulphuric or hydrochloric acid and finally washed and dried.

The claim is :—

Process for the purification of graphites, which consists in subjecting them to the successive action of a solution of a caustic alkali in the hot state and under pressure, and of a boiling solution of a mineral acid.

No drawings.

No. 2,474 of May 30, 1930.

*Edmund Lingard Walker.*

An improved device for suspending rubber sheets or similar material.

*Abstract.*—The strips are positioned so that the material is gripped between two edges instead of between two planes.

The strips are connected by a hairpin bridge down which a slide can be moved to tighten the device.

The claims are :—

1. An improved Hanger or Suspender that will grip a sheet of rubber between the edges of two pieces of square or triangular wood or other material and not by the flat faces of the wood or other material.

2. In a hanger as claimed above, a slide operating on the inclined legs of a wire bridge or yoke in order to contract and expand them so that pressure can be exerted or released through wooden grips upon a rubber sheet substantially as shown in the description of this invention.

3. An improved Hanger or Suspender substantially as described and illustrated.

One sheet of drawings.

No. 2,475 of May 31, 1930.

*Alfred Clarkson.*

Improvements in or relating to burners for crude oil.

*Abstract.*—The oil is atomized by a superheated steam jet passing through the centre of the burner. The flame heats water in superheater coils fed from a water box surrounding the burner and connected to a head of water. The steam so formed enters the jet by a needle valve. The flame can be started with compressed air.

The claims are :—

1. A burner for use with crude oil having means to eject the crude oil in an atomized state by use of the steam heated by the operation of the burner.

2. A burner for use with crude oil having a boiler and superheater coils for the supply of dry steam which is ejected through the burner for the purpose of atomizing the oil fuel.

3. A burner for use with crude oil in accordance with claims 1 and 2 comprising a diaphragm with a nozzle passing through it, means to lead the oil fuel round the nozzle and means to eject dry steam through the nozzle so that the steam may atomize the oil flowing in front of the nozzle.

4. A burner for use with crude oil as claimed in claim 3 having in combination a superheater coil and a steam chamber leading into a nozzle through a tapered or conical valve controlled by a valve stem and valve wheel.

5. A burner for use with crude oil as claimed in claims 1 to 4 having a steam chamber located opposite a nozzle, means to control the entry of said steam into the nozzle, an annular oil chamber surrounding said nozzle and an oil passage leading from said oil chamber to the end of the nozzle, so that the out-flowing oil is atomized and ejected through an opening in a water box until the flame heats a superheater coil or coils dependent from said water box and generates dry steam which steam is lead back through the steam chamber to the burner from whence it is utilized to atomize the oil.

6. A burner for use with crude oil constructed and adapted to operate substantially as described and as illustrated in the accompanying drawings.

Two sheets of drawings.

No. 2,478 of June 16, 1930.

*The Naugatuck Chemical Company.*

Improvements in treatment of latex.

*Abstract.*—When a creaming agent is used the serum from the first separation is used as diluent for the next batch; the serum from this is used on the third batch and so on: in this way the amount of total solid separating is increased. The amount of creaming agent can also be reduced after the first batch.

The claims are :—

1. In a method of creaming latex, the step of diluting a portion of latex to be creamed, with serum derived from a preceding latex creaming operation.

2. A method of creaming latex which comprises creaming a portion of latex with the addition of a creaming agent, separating the serum layer therefrom, adding to a fresh portion of latex separated serum and creaming agent, allowing the last mentioned latex to cream and removing the latex cream.

3. A method, as specified in claim 2, comprising repeating the creaming operation with the aid of serum as a diluent until a substantially constant value of total solids concentration in the latex cream is obtained.

4. A method as specified in claim 2 in which the amount of creaming agent that is used with the serum as a diluent is less than that first used.

5. A method as specified in claim 2 characterized by adding to a fresh portion of latex an amount of the separated serum in concentrated form.

6. A method of creaming latex which comprises diluting latex to a solids concentration of about 30–32 per cent. and adding ammonium alginate allowing the latex to cream, using separated serum thereof to dilute a fresh portion of latex to about 30–32 per cent. solids concentration and creaming the same with ammonium alginate, and then removing the latex cream.
