# NOTIFICATIONS UNDER "THE PATENTS ORDINANCE, 1906."

THE following Specifications have been accepted:—
No. 2,626 of December 16, 1932 (Date applied for under section 50 of the Ordinance, December 23, 1931).

Sardik Incorporated.

Improvements in Food Products and their manufacture.

Abstract.—The inventors describe a process of preparing concentrated food-products, by rapidly drying the pulp of cellular and acid and/or sugar containing vegetables, fruits and the like. The pulp is dried on a rotary drum heated by high pressure steam and the film formed removed by an appropriately cooled knife, yielding finally a laminated mass with crepe-like surface which readily absorbs liquids in which it is immersed. Its moisture content is low enough to resist the growth of moulds.

There are nine claims and three sheets of drawings.

No. 2,635 of March 3, 1933 (Date applied for under section 50 of the Ordinance, March 7, 1932).

Leon Sylvain Max Lejeune and Jean Etienne Charles Bongrand.

Improvements in or relating to processes for facilitating the penetration of latex into films, threads or yarns.

Abstract.—The inventors describe a process for facilitating the penetration of latex into fibres and yarns while avoiding premature coagulation. It consists in adjusting the hydrogen ion concentration of the fibre or yarn or of the latex or of both, so that in each case both have substantially the same pH or in the case where the pH both of the latex and of the fibre is adjusted, so that both will have pH values which will automatically become adjusted to the same value without coagulation of the rubber. pH of the latex is lowered by the addition of acids in presence of peptisers which prevent coagulation.

There are six claims and no drawings.
