“THE CEYLON STATE MORTGAGE BANK  
ORDINANCE, 1931.”

THE following Rules have been made under section 90 (d) of “The Ceylon State Mortgage Bank Ordinance, 1931,” by the Board of Directors and are hereby published for general information.

H. MARCUS FERNANDO,  
Chairman, Board of Directors.

Colombo, July 14, 1932.

1. The market value of a piece of land may be determined *inter alia* on one or more of the following bases:—

(1) The price paid for the same land or a portion of it in recent years, after making all necessary allowances for lapse of time, difference of situation and any other possible differences between the land sold and that offered as security. Inquiry should also be directed to ascertaining—

- (a) whether for any special reason the purchaser has paid a fancy price for it and  
(b) whether there has been any rise or fall in the value of land in the neighbourhood since the date of his purchase.

(2) The price paid for lands of similar description and quality in the vicinity in recent years, after making all proper allowances for lapse of time, advantage of situation, &c. In considering such sales, care should be taken to exclude all transactions in which, taking advantage of the pressing need of the buyer, the seller obtained as the price of the land a much larger amount than its proper value. The buyer may have paid the particular price for the land because no other land suited his requirements. The value to be fixed by the Bank will, however, be only such an amount as the owner would have been likely to get if he had wanted to sell it in the open market and there had been no neighbour compelled by circumstances to purchase it. When considering the case of neighbouring lands which have been sold, the transactions should be compared with the case of the land to be mortgaged to see in what points they do or do not resemble each other.

(3) Awards made by courts in cases of acquisition of lands.

(4) Sale value of similarly situated property in the vicinity, at an auction.

“THE CEYLON STATE MORTGAGE BANK  
ORDINANCE, 1931.”

(7) The Valuers shall take special care as to the identity of the property and report every case where they have any doubt on the point.

(8) In regard to an application for loan for the improvement of agricultural land the Valuers shall report on the desirability of the proposed improvement and on the cost of such improvement.

TEXT OF THE CONVENTION.

Treaty Series No. 11 (1930).

International Convention relative to Motor Traffic.

Paris, April 24, 1926.

(His Majesty's ratification deposited October 24, 1929.)

(Translation.)

The undersigned, Plenipotentiaries of the Governments of the States mentioned below, gathered in Conference in Paris, from the 20th to 24th April, 1926, in order to examine the modifications to be made in the International Convention of the 11th October, 1909,\* relative to motor traffic, have agreed upon the following stipulations:—

GENERAL PROVISIONS.

Article 1.

The Convention applies to road motor traffic in general irrespective of the object and nature of the transport, subject, however, to the special national regulations regarding public passenger transport services and public goods transport services.

Article 2.

All passenger and goods-carrying motor vehicles running on any road to which the public have access, other than vehicles running on rails, are regarded as motor-vehicles for the purposes of the present Convention.

*Conditions to be fulfilled by Motor Vehicles in order that they may be admitted to travel on a Road to which the Public have Access.*

Article 3.

Every motor vehicle, in order to receive international authorisation to travel on any road to which the public have access, must either have been recognised as suitable for use on any road to which the public have access after an examination by the competent authority or by an association authorised by that authority or must conform to a type approved in the same manner. The vehicle must, in any case, fulfil the following conditions:—

I.—The motor vehicle must be equipped with the following:—

- (a) A strong steering apparatus which will allow the vehicle to be turned easily and with certainty.
- (b) Either two systems of brakes, independent of each other, or one system of brakes with two independent means of operation, of which one means of operation will function, even if the other fails to function, provided that in all cases the system used is really effective and rapid in action.
- (c) If the weight of the motor vehicle when empty exceeds 350 kilog., a mechanism by means of which the vehicle can from the driver's seat be made to move backwards under its own power.
- (d) When the combined weight of the empty motor vehicle and the weight of the maximum load which it is officially declared to be capable of carrying exceeds 3,500 kilog., a special mechanism, such as can prevent, in all circumstances, the vehicle from running backwards, and in addition a reflecting mirror.

The controls and steering apparatus must be so placed that the driver can manage them with certainty and at the same time have a clear view of the road.

The machinery must be such as to work with certainty and disposed in such a way as to avoid, as far as possible, all danger of fire or explosion; as not to constitute any sort of danger to traffic and so as not to frighten or seriously inconvenience by noise, smoke, or smell. The vehicle must be equipped with a silencer.

The wheels of motor vehicles and trailers drawn by them must be fitted with rubber tyres or with some other tyres of equivalent elasticity.

The distance between the ends of the hub-caps must not exceed the maximum width of the remainder of the vehicle.

II.—The motor vehicle must carry:—

1. At the front and the back, marked on plates or on the vehicle itself, the registration number which has been allotted to it by the competent authority. The registration number placed at the back as well as the distinctive mark referred to in Article 5 must be lit up as soon as they cease to be visible by the light of day.

In the case of a vehicle followed by a trailer the registration number and the distinctive mark referred to in Article 5 are repeated behind the trailer, the regulation regarding the lighting of these marks applies to the trailer.

2. In an easily accessible position and in a form easily legible, the following particulars:—

- Name of maker of chassis.
- Maker's chassis number.
- Maker's engine number.

III.—Every motor vehicle must be fitted with an audible warning device of sufficient strength.

IV.—Every motor vehicle travelling alone must, during the night and from sunset, be fitted in front with at least two white lights placed one on the right and the other on the left, and, at the back, with a red light.

For motor bicycles unaccompanied by a side-car, the number of lights in front may be reduced to one.

V.—Every motor vehicle must also be equipped with one or more devices capable of effectively illuminating the road for a sufficient distance ahead unless the two white lights prescribed above already fulfil this condition.

If the vehicle is capable of proceeding at a speed greater than 30 kilom. an hour this distance must not be less than 100 metres.

VI.—Lamps which may produce a dazzling effect must be provided with means for eliminating the dazzling effect when other users of the road are met, or on any occasion when such elimination would be useful. The elimination of the dazzling effect must, however, leave sufficient light to illuminate the road clearly for at least 25 metres.

VII.—Motor vehicles drawing trailers are subject to the same regulations as separate motor vehicles in so far as forward lighting is concerned; the rear red light is to be carried on the back of the trailer.

VIII.—In so far as the limits regarding weight and dimensions are concerned, motor vehicles and trailers must satisfy the general regulations in force in the countries in which they travel.

DELIVERY AND RECOGNITION OF INTERNATIONAL CERTIFICATES FOR MOTOR VEHICLES.

Article 4.

With the object of certifying that every motor vehicle which has received international authorisation to travel on a road to which the public have access fulfils the conditions laid down in Article 3 or is able to fulfil them, international certificates are delivered on the model and according to the remarks contained in Annexes A and B to the present Convention.

These certificates are valid for one year from the date of their delivery. The written particulars which they bear must always be written in Latin characters or in so-called English script.

The international certificates delivered by the authorities of one of the contracting states or by an association authorised by them with the counter-signature of the authority give the right to travel freely in all other contracting States and are recognised therein as valid without further examination. The right to use the International Certificate may, however, be refused if it is clear that the conditions laid down in Article 3 are no longer being fulfilled.

DISTINGUISHING MARK.

Article 5.

Every motor vehicle, to receive international authorisation to travel on a road to which the public have access, must carry, in a visible position in the rear, a distinguishing mark consisting of from one to three letters written on a plate or on the vehicle itself.

For the purposes of the present Convention the distinguishing mark corresponds either to a State or to a territory which constitutes a distinct unit from the point of view of the registration of motor vehicles.

The dimensions and colour of this sign, the letters, their dimensions and their colour are given in the table contained in Annex C of the present Convention.

\* Treaty Series No. 18 (1910)—Cd. 5125.

CONDITIONS TO BE FULFILLED BY DRIVERS OF MOTOR VEHICLES BEFORE RECEIVING INTERNATIONAL AUTHORISATION TO DRIVE A MOTOR VEHICLE ON A PUBLIC ROAD.

Article 6.

The driver of a motor vehicle must possess qualifications which provide a reasonable guarantee of public safety.

In so far as international traffic is concerned, nobody may drive a motor vehicle without having received a special authorisation delivered by a competent authority or by an association authorised by it after giving proof of his competence.

This authorisation cannot be granted to persons of less than 18 years of age.

DELIVERY AND RECOGNITION OF INTERNATIONAL DRIVING PERMITS.

Article 7.

In order to certify, for international traffic, that the conditions laid down in the preceding article have been fulfilled, international driving permits are delivered on the model and according to the remarks contained in Annexes D and E of the present Convention.

These permits are valid for a year from the date of their delivery and for the categories of motor vehicles for which they have been delivered.

For the purposes of international traffic the following categories have been drawn up:—

- A.—Motor vehicles of which the combined weight of the empty vehicle and the weight of the maximum load which it is officially declared to be capable of carrying does not exceed 3,500 kilog. ;
- B.—Motor vehicles of which the total weight, made up as above, exceeds 3,500 kilog. ;
- C.—Motor cycles with or without a side-car.

The written remarks on international permits are always written in Latin characters or in so-called English script.

International driving permits delivered by the authorities of a contracting State or by an association authorised by them with the counter signature of the authority authorise the holder, in all other contracting States, to drive motor vehicles which come within the categories for which they have been delivered and are recognised as valid, without re-examination, in all the contracting States. The right to use the international driving permit may, however, be refused if it is evident that the conditions prescribed in the previous article have not been fulfilled.

OBSERVANCE OF NATIONAL LAWS AND REGULATIONS.

Article 8.

The driver of a motor vehicle travelling in a country is bound to conform to the laws and regulations regarding traffic which are in force in that country.

An extract from these laws and regulations may be given to motorists on entry into a country at the office at which the Customs formalities are carried out.

DANGER SIGNALS.

Article 9.

Each of the contracting States undertakes to see that, in so far as lies in its power, there shall be placed, along the roads, to give notice of dangerous places, only those signs which are given in Annex F to the present Convention.

These signs are inscribed on plates in the form of a triangle, each State undertaking, as far as possible, to reserve exclusively the triangular form for these signs and to forbid the use of that form in all cases in which it might cause confusion with the signs in question. The triangle is, in principle, equilateral, each side being at least 0 m. 70 in length.

When the atmospheric conditions are unfavourable to the use of solid signs, the triangular sign may be made hollow (open).

In this case it need not carry the sign indicating the nature of the obstacle, and its dimensions may be reduced to a minimum of 0 m. 46 for each side.

The signs are placed perpendicularly to the road and at a distance from the obstacle which must not be less than 100 m. nor more than 250 m. unless the nature of the ground renders this impracticable.

When the distance of the sign from the obstacle is substantially less than 150 m. special arrangements must be made.

Each of the contracting States will oppose, as far as possible within its power, the erection near the roads of any signs or notices which might be confused with the authorised signs or render it more difficult to observe them.

The system of triangular signs will be brought into force in each State as soon as the new signs are erected or the existing ones are renewed.

EXCHANGE OF INFORMATION.

Article 10.

The contracting States undertake to communicate to each other such information as will establish the identity of the persons holding international certificates or international driving permits when their motor vehicle has been involved in a serious accident or when they have been declared guilty of an infraction of the traffic regulations. They further undertake to make known to the States which have delivered the certificates or international permits the names, Christian names, and addresses of the persons whose right to make use of these certificates and permits has been withdrawn.

FINAL PROVISIONS.

Article 11.

The present Convention will be ratified.

A.—Each Government will inform the French Government as soon as it is ready to deposit its ratifications. As soon as twenty States actually bound by the Convention of the 11th October, 1909, shall have declared themselves ready to effect this deposit, the deposit will be proceeded with within the space of the month which follows the receipt of the last declaration by the French Government and on the day fixed by this Government.

The States, not parties to the Convention of the 11th October, 1909, which, before the date thus fixed for the deposit of ratifications, shall have declared themselves ready to deposit the instrument of ratification of the present Convention, will participate in the deposit referred to above.

B.—The ratifications will be deposited in the archives of the French Government.

C.—The deposit of ratifications will be recorded in a *proces-verbal* signed by the representatives of the States which take part in it and by the Minister for Foreign Affairs of the French Republic.

D.—The Governments which have not been able to deposit the instrument of their ratification in the conditions laid down in paragraph A. of the present article, will be able to do it by means of a written notification addressed to the Government of the French Republic and accompanied by the instrument of ratification.

E.—A certified exact copy of the *proces-verbal* of the first deposit of ratifications, of the notifications mentioned in the preceding paragraph and of the instruments of ratification which accompany them will be immediately transmitted, by the French Government, through the diplomatic channel, to the Governments which have signed the present convention. In the cases mentioned in the preceding paragraph, the French Government will make known to them, at the same time, the date on which they have received the notification.

Article 12.

A.—The contracting States are bound to apply the present Convention only in their metropolitan territories.

B.—If a contracting State desires that it should be applicable in its colonies, possessions, protectorates, oversea territories or territories under its mandate, its intention will be mentioned in the instrument of ratification or will be the object of a special notification which shall be addressed in writing to the French Government and deposited in the archives of that Government. If the State making the declaration chooses the last method the French Government will immediately transmit to all the other contracting States a certified exact copy of the notification and will indicate the date on which they have received it.

Article 13.

A.—Every State which is not signatory of the present Convention shall be able to accede to it at the moment of the deposit of the ratifications referred to in Article 11, paragraph A, or after this date.

B.—The accession shall be made by the transmission to the French Government, through the diplomatic channel, of the act of accession which shall be deposited in the archives of that Government.

C.—That Government will immediately transmit to all the contracting States a certified exact copy of the notification as well as of the act of accession and will indicate the date on which they have received the notification.

Article 14.

The present Convention will come into force for the contracting States, which shall have taken part in the first deposit, of ratifications, one year after the date of this deposit, and, for the States which shall ratify it later or shall accede to it, as well as for the colonies, protectorates, oversea territories and territories under mandate, not mentioned in the instruments of ratification, one year

after the date on which the notifications mentioned in Article 11, paragraph D, Article 12, paragraph B, and Article 13, paragraph B, have been received by the French Government.

*Article 15.*

Each contracting State, party to the Convention of the 11th October, 1909, undertakes to denounce that Convention at the moment of the deposit of the instrument of its ratification or of its accession to the present Convention.

The same procedure will be followed in the case of the declarations referred to in Article 12, paragraph B.

*Article 16.*

Should one of the contracting States denounce the present Convention, the denunciation will be notified in writing to the French Government, which will immediately communicate to all the other States a certified true copy of the notification, informing them of the date on which they have received it.

The denunciation will only be effective as regards the State which has notified it and one year after the receipt of the notification by the French Government.

The same provisions apply to the denunciation of the present Convention for the colonies, possessions, protectorates, oversea territories and territories under mandate.

*Article 17.*

The present Convention will be open until the 30th June, 1926, for signature by the States represented at the conference held in Paris from the 20th to the 24th April, 1926.

Done at Paris, the 24th April, 1926, in one copy, of which an exact copy will be delivered to each of the signatory Governments.

## NOTIFICATIONS UNDER "THE PATENTS ORDINANCE, 1906."

### Amendments made and allowed.

No. 2,535—*Graham Parsons Earwaker*.—In pursuance of leave granted on April 8, 1932, the above-mentioned specification has been amended in the following manner:—

Striking out the Title of the invention and substituting "Improved method of sorting tea and apparatus therefor".

#### On Page 2.

Striking out lines 1 to 10 and substituting "This invention relates to an improved method of sorting tea and to apparatus therefor and consists in feeding the material (tea and stalk) to be sorted into a space of such dimensions that tea and stalk greater than predetermined lengths are prevented from assuming positions sufficiently perpendicular with respect to the surface of a sieve that would permit them to pass through the sieve. The particles of tea of and less than the predetermined lengths are permitted to assume perpendicular or substantially perpendicular positions and therefore pass through the sieve and the particles and stalk greater than the predetermined lengths pass along the sieve and over the end or the edge thereof."

"A tea sorting machine according to the invention includes a surface or platform forming in conjunction with a sieve thereadjacent, a space into which the tea to be sorted is fed. The sieve has a mesh such that all or most of the unsorted tea could pass through the sieve and the platform is so spaced from the sieve that the stalk and longer particles of tea are restrained from assuming perpendicular positions relative to the sieve when said machine is agitated, oscillated, or rotated in any known manner whereby the stalk and longer particles of tea are retained on the sieve till passed over its end while the smaller particles of tea pass freely through the sieve."

Striking out lines 26 to 28.

#### On Page 3.

Striking out lines 1 to 7 up to the word "case" and substituting "I am aware that it has been proposed to husk or peel coffee berries and the like by introducing them into an adjustable space formed between two inclined sieves or inclined perforated plates either or both of which sieves or plates were reciprocated by mutilated pinion gearing or cranks and pitmen; and I am aware that it is known to clean grain and separate it from water, grass seed, and other undesired elements by passing uncleaned grain into a space between an imperforate conical frustum and a semi-circular screen, the cone when rotated removing beards and husks from the grain, forcing seed through the screen and in virtue of having spiral flights or ribs around its periphery carrying the grain from one end of the screen to the other".

"The present invention differs from these proposals in that it relates to a method of sorting tea and to a machine adapted for carrying out the said method as above set forth, i.e., the material (tea and stalk), to be sorted, is fed into a space having dimensions such that the stalk and longer

pieces of tea cannot become sufficiently perpendicular with respect to a sieve to enable them to pass through the sieve; and the mesh of the sieve is such that all or most of the said material could pass through the sieve were some of its particles not prevented by an adjustable platform or plate from assuming the requisite position, the tea that is allowed to pass through the sieve being of or less than predetermined lengths."

Line 7: Altering "t" to "T" in the word "the".  
Line 8: Inserting "or" after "and" and striking out "in".

Line 9: Striking out "addition".  
Line 11: Altering "." after "sieve" to ",", and adding the words "when the machine is operating".

Line 13: Striking out "with" and substituting "and", and striking out "attached is" and substituting "are flat surfaces".

Line 14: Striking out "is" and inserting "mechanism" after "crank".

Line 15: Striking out "and broken is caused to pass" and substituting "being fed".

Line 16: Inserting "at the upper end" after "sieve".

Line 19: Striking out "The moving platform causes a crushing".

Line 20: Striking out "action to take place".

Line 22: Inserting "more or less" after "a".

Line 23: Inserting "lower" before "end".

Line 24: Inserting "for" after "adjusted".

Line 27: Striking out "horizontally but not vertically" and substituting "relative to and parallel to the movement of the sieve" and altering "." after "agitated" to ",", and inserting "or".

#### On Page 4.

Line 1: Altering "T" to "t" in "The" and striking out "upper".

Line 2: Striking out "incline" and substituting "angle".

Line 3: Striking out "will vary at different points" and substituting "may be made to vary slightly".

Line 4: Striking out "the" and substituting "each" and striking out "or agitation. For example the".

Striking out line 5 to 8.

Line 10: Striking out "one of the surfaces" and substituting "the sieve".

Line 11: Striking out "centre, the other surface being fixed and the space" and substituting "axis, the platform may be fixed or rotatable at the same speed as or speeds different from that of the sieve and about the same axis or another axis eccentric with respect to the said fixed axis, the space between the two being made adjustable and the sieve and platform being flat surfaces".

Line 12: Striking out "between the two made adjustable".

Line 13: Inserting "of rotation" after "centre".

Line 19: Inserting "frusto-" before "conical".

Line 23: Striking out "would".

#### Claims.

Deleting Claims 1 and 2 and substituting:

"1. Improved method of sorting tea consisting in feeding the unsorted tea or the tea to be sorted into a space of such dimensions that tea and stalk greater than predetermined lengths are prevented from assuming positions sufficiently perpendicular with respect to the surface of a sieve that would permit them to pass through the said sieve, the particles of tea of and less than the predetermined length passing through the sieve and the other particles and stalk passing over the edge or the end of the sieve substantially as herein described."

"2. An improved tea sorting machine wherein is provided a surface or platform positioned adjustably adjacent to and above a sieve forming a space into which the tea to be sorted is fed, the sieve having a mesh such that all or most of the unsorted tea could pass through the sieve, and the platform being so spaced from the sieve that the stalk and longer particles of tea are restrained from assuming perpendicular positions relative to the sieve when said machine is agitated, oscillated, or rotated in any known manner whereby the stalk and longer particles of tea are retained on the sieve till passed over its end while the smaller particles of tea pass freely through the sieve substantially as herein described."

Claim 3, Line 22: Striking out "known" and substituting "suitable".

*On Page 8.*

Claim 4, line 1: Striking out "may be in the same direction or" and substituting "is".

Claim 5, line 3: Striking out "3 and 4" and substituting "2 to 4" and deleting lines 4 and 5 and substituting "wherein the platform may be fixed and the under surface of the platform ribbed or roughened and/or have brushes, said brushes comprising tufts of wire, fibre or hair located in suitable positions so as to brush over and disturb the material on the sieve".

Claim 6, Line 6: Striking out "as claimed in claims 3 and 4" and substituting "according to any of claims 2 to 5" and deleting lines 7 and 8 and substituting "wherein the sieve and platform are flat surfaces placed in an inclined position, the material to be sorted being fed between the sieve and platform at the upper end, the stalk and longer particles of tea being discharged at the lower end while the smaller particles fall through the sieve".

Claim 7, line 1: Striking out "the" and deleting lines 10 to 13 and substituting "claims 2 to 5, wherein the sieve and the platform are flat surfaces and are rotated horizontally about the same axis or about axes a slight distance apart and at the same speed or at different speeds, the material to be sorted being fed through an opening in the platform near the centre of rotation and subjected to centrifuga force by which the stalk and longer particles are discharged at the outer edge of the sieve while the sorted material passes through the sieve".

Striking out claims 8, 9, 10, 11, and 12.

*On Page 9.*
