17 In this Ordinance, unless the context otherwise requires— Interpretation.

“Board” means the Electricity Board of Ceylon established by this Ordinance;

“Department” means the Department of Government Electrical Undertakings;

“licensed undertakings” means a Municipal Council, District Council, Local Board or other person licensed under the Electricity Ordinance, 1906, to supply electrical energy to the public or for the purpose of electric traction or to lay down electric supply lines for the conveyance and transmission of electrical energy.

*Objects and Reasons.*

The object of this Bill, which is modelled on the relevant provisions of the Electricity Supply Act, 1926, is to establish an Electricity Board which will be responsible for the administration of the Electricity Ordinance, 1906, and for the control of the Government Department of Electrical Undertakings.

The Board will be empowered generally to take such measures as may be necessary for the promotion, improvement, and development of the generation, transmission, distribution and sale of electricity in the Island and will, in particular, be authorised to undertake the construction of the Aberdeen-Laxapana Hydro-Electric Works.

2. The Board will be a corporation consisting of a Chairman appointed by the Governor, the Financial Secretary, and three others nominated by the Executive Committee of Communications and Works. Clause 9 provides that no member of the State Council shall be eligible for nomination as a member of the Board. In this respect the Bill follows the corresponding provisions of the Electricity Supply Acts of Great Britain and of Northern Ireland.

3. In order to conserve the general control of the Executive Committee and the State Council in matters of policy, provision is made in Clause 13 that the budget of the Board should be presented annually to the Executive Committee for submission to the Council and that the budget should be accompanied by a report on the administration of the electrical undertakings of the Board together with details and estimates of schemes proposed for the development of the generating, transmitting and distribution system of the Board.
