3. Eight probationers will be selected for the Maritime area, seven for the Kandyan area, and five for the Tamil speaking area. Each Probationer will be attached to a Kachcheri and will rank as a Junior Staff Officer. He will undergo a period of training in Kachcheri as well as in district work in the course of which he will be expected to qualify himself for appointment as a Divisional Revenue Officer on the occurrence of a vacancy in a Chief Headman's post. He will not be appointed a Divisional Revenue Officer until the Government Agent has certified that he has fully qualified himself in all respects including the passing of an exacting test in the language chiefly spoken in the District and a less severe test in the other vernacular language.

*Pay and Conditions of Service.*

- (5) Successful candidates will be required to pass a Medical examination the fee for which must be paid by the candidate.

*Method of Selection.*

6. For the purpose of recruitment of Probationers the Island will be regarded as comprising three administrative areas, viz., Low-country, Kandyan, and Tamil speaking; in each case the successful candidate will be selected for service in one of these three areas and an officer will subsequently be transferable only within the area for which he was originally selected. The selection will be made by a Selection Board having regard to two considerations, viz.,—

- (i) the results of a competitive examination, and  
(ii) the requirements of the particular area in which the selected candidate is intended to serve.

*Examination.*

7. A competitive examination will be held for the selection of candidates wishing to join the Divisional Revenue Officers' Service. The examination will be in two parts, viz., (a) Written and (b) Personal Interview.

- (a) The written examination will be held at Batticaloa, Colombo, Galle, Jaffna, and Kandy commencing on February 9, 1940. Candidates should state in their application forms at which centre they wish to be examined. Any candidate who fails to indicate where he wishes to be examined will be entered for the centre closest to his place of address. Candidates will however be required to attend at Colombo or any other centre if circumstances so require.
- (b) The personal interview, which will be restricted to candidates attaining a certain standard in the written examination, will be held only in Colombo on a date which will be communicated to candidates after the written examination. Candidates will be required to produce at the interview the original certificates granted in respect of any examinations they have passed.

*Subjects and Syllabus of Examination.*

Deductions up to 20 per cent. of the marks awardable will be made on account of handwriting which is difficult to read.

*Refunds of Value of Stamps.*

## NOTIFICATIONS UNDER "THE PATENTS ORDINANCE, 1906."

THE following Specification has been accepted:—  
No. 3,070 of January 23, 1939.

John Brandwood.

"Process of and apparatus for the parti-colour treatment of yarns."

*Abstract.*—A process is described for applying colours in regular sequence on a length of yarn as follows:—The yarn is wound on a suitable reel such that the thickness of the winding is small in comparison with the diameter. This reel is then mounted on a hollow bearing which is in communication with a suction pump. Colour is applied by means of a nozzle which is made to traverse the package in a direction parallel to its axis and is drawn through the package by the action of the pump. By turning the package round the colour bands may be applied at equidistant angular points. Alternatively the colour may be applied by pressing a bottomless trough on the package, filling this with a sufficient amount of dye, and drawing the dye through the package.

By providing two or more nozzles connected to troughs containing dye, bands of different colours may be applied to the package. A plurality of colour applying machines may be arranged to draw this supply from a common trough or set of troughs.

Suitable apparatus for carrying out the process is described in the specification. The nozzle traversing means comprise a double threaded rotating shaft and a half nut which can be brought in and out of engagement with it. The reel for winding the package may consist of two flanges connected by equidistantly spaced rods. It is so arranged that the colour bands come in between two of these rods. The hollow bearing on which the reel is rotatably mounted has a slot at its uppermost surface corresponding to the dimensions of the colour band to be applied.

R. H. PAUL,  
Registrar of Patents.
