THE IRRIGATION ORDINANCE.

RULES under section 11 of the Irrigation Ordinance No. 32 of 1946, made by the prescribed majority of the proprietors within each of the irrigation districts set out in the Schedule hereto, and approved by the Executive Committee of Agriculture and Lands by virtue of the powers vested in it by section 14 of the Ordinance.

D. S. SENANAYAKE,

Minister for Agriculture and Lands.

Colombo, February 10, 1947.

*Rules.*

Special rules relating to the maintenance of irrigation works, within the irrigation district which are in charge of the Government Agent, Province of Sabaragamuwa, and for which no irrigation rate is recovered.

1. (1) In distributing water from the tank to the fields in a tract, the water shall first be taken to the fields on the higher level and thence to those on the lower level.

(2) No person shall in any way interfere to the prejudice of others with the distribution of water.

2. No person other than the proprietor or lessee of any land under the tank shall be entitled to the use of water from the tank for agricultural purposes.

3. It shall not be lawful for any person to issue the water of the tank for the cultivation of any land under any other tank, or for the shareholders of lands cultivated under the tank to utilize for their cultivation the water of any other tank without first containing the sanction of the Government Agent.

4. No person shall cut the bund, or do any act likely to damage the bund, or block up the spill of the tank, without the permission of the Government Agent or Cultivation Officer or Irrigation Superintendent or Supervising Officer, or carry out any work upon the bund, spill, or channels contrary to the orders of any of these officers: Provided that in any case where such action is necessary to prevent otherwise inevitable damage to the tank, and it is impossible to communicate with any of the above-mentioned officers in time, permission may be dispensed with, but the burden of proving such special circumstances shall lie upon the persons taking such action.

5. No fence shall be put on any part of the tank bund without the authority of the Government Agent or Cultivation Officer or Irrigation Superintendent or Supervising Officer.

6. For the repair of the improvement of the tank and the dams, minor channels of water courses, and for such other minor works, as the Government Agent may consider necessary, each proprietor shall be liable to contribute labour in proportion to the extent of his land which is to be benefited by the work in question.

7. The bund of the tank shall be divided among the proprietors of the lands under it in proportion to the extent of land owned by each proprietor, and each proprietor shall keep the portion assigned to him properly turfed and free at all times from jungle, brushwood, and overgrowth of every description, and from white ants nests.

8. (1) The full amount of labour which each proprietor shall be liable under rule 6 to contribute shall not exceed:—

(i) 2 cubes of earthwork per acre, or

(ii) 4 days' labour per acre, or

(iii) a money payment in commutation of such labour, at such rate per acre, in accordance with the rate prevailing in the district at the time, as may be specified by notice in that behalf each year.

(2) A day's labour shall for purposes of this rule be taken to mean a day of six hours at any time between sunrise and sunset.

9. In addition to the ordinary work of the year as above provided for, whenever the Government Agent, or any person authorised by him to supervise the work, gives notice of the need of labour for any urgent work of repair or of prevention of impending damage, every proprietor shall at once contribute the necessary labour or cause his share of the work to be done at his own expense: Provided that double the ordinary amount of labour prescribed under rule 8 shall not be exceeded in any year under this rule.

10. No person other than the Irrigation Superintendent or Supervising Officer, or a person duly authorised by either of these officers in that behalf shall in any way interfere with or alter the level of the spill or sluice of the tank.

11. The tank bed shall not be cultivated, unless the majority of the proprietors under the tank decide to cultivate the bed, and the permission of the Government Agent is obtained.

12. If any proprietor fails to perform his share of any work required under these rules, the Irrigation Superintendent or Cultivation Officer or Supervising Officer may cause the work to be done and the cost thereof may be recovered in the manner described by section 30 of the Irrigation Ordinance, No. 32 of 1946.

13. In these rules, unless the context otherwise requires :—  
 "Irrigation Superintendent" means the officer seconded from service in the Irrigation Department to superintend the major irrigation works and the construction and maintenance of minor irrigation works under the supervision of the Government Agent ;  
 "Cultivation Officer" means the officer appointed by the Government Agent to supervise cultivation in all irrigable lands, and may or may not be identical with the Irrigation Superintendent ;  
 "Supervising Officer" means the officer appointed by the Government Agent under section 113 of the Irrigation Ordinance.

### NOTIFICATIONS UNDER "THE PATENTS ORDINANCE, 1906."

THE following specification has been accepted :—

No. 3,373 of March 23, 1946 (Date applied for under Section 48 of the Ordinance, March 3, 1945).

Rollo Gillespie Williams.

"New or improved means for colour lighting apparatus".

*Abstract.*—The invention relates to apparatus for controlling individually the intensities of light from a number of primary sources in such a way that the combination produces light of any desired colour. According to the invention, a disc is provided which is rotatable into a number of positions to preselect the colours required, and is displaceable in an axial direction to bring about the required change in colour. The desired variation in the intensities is obtained by means of pegs mounted on the periphery of the disc, two of which are provided per light source for each position of the preselector. When the preselector is moved into the operative position these two pegs act in pull-push fashion on a transmitter which varies the intensity of the associated light by either varying a resistance or moving a graduated filter.

It is thereby possible when a certain colour is being produced by the apparatus, to withdraw the preselector into inoperative position, rotate it so as to preselect another colour, and then to move it forward so that the desired change in colour is brought about. The latter movement can be effected at any desired speed.

Suitable modifications of the apparatus are described.

There are 23 claims and 7 sheets of drawings.
