## Notifications under "The Patents Ordinance, 1906"

THE following specification has been accepted:—  
 No. 3,609 of January 29, 1949.

*Alvapillai Sundralingam.*

"Neutralizing the natural yellow colouring in rubber  
 and latex; and the neutralization of any colour in any

natural or artificial product by the use of complementary  
 colours."

*Abstract*—The long known principle of complemen-  
 tary colours, viz., that any colour can be made white by  
 the addition of one or more colours, is made use of in this  
 process for the neutralization of the yellow colour of  
 natural rubber latex. Thus the yellow colouration is  
 corrected to a workable minimum by the use of a very  
 dilute solution of blue and violet dyes or a bluish violet  
 dye. The slight excess yellow colouration is then offset  
 by the use of a very small percentage of ultra violet  
 absorbing materials, for example, such as those  
 belonging to the dihydroxy coumarins.

The principle applies to all yellow natural or artificial  
 products. Although a water soluble dye resistant to the  
 action of strong solutions of sodium bisulphite and  
 acetic acid is preferable, water insoluble dyes made into  
 suitable dispersions can be used provided the dyes are  
 resistant to bisulphite and acetic acid. The principle  
 may also be extended for application to the neutrali-  
 zation of any colour, speck or stain in any artificial or  
 natural product.

There are 7 claims and 1 example.

DR. S. L. DE SILVA,  
 Registrar of Patents

Colombo, March 3, 1950.
