Notifications under "The Patents Ordinance, 1906"

THE following specification has been accepted:—

No. 3,661 of August 31, 1949 (Date applied for under section 46 of the Ordinance, October 2, 1946)

J. W. Roberts, Limited.

"Improvements relating to the production of insulating coatings by spraying asbestos fibre".

Abstract.—In the present invention, the fibre is sprayed with water or other damping agent while it is travelling in a thin layer. It is simplest to use water in as fine a jet as possible thereby creating a fog-like atmosphere which tends to cause any dust formed to settle within the apparatus. The damping is preferably effected in a casing through which the thin layer travels and which is

substantially closed. The thin layer of fibre is carried upward on a conveyor belt past a brush which serves to remove all the fibre except the desired thin layer as described in British specification No. 368,368 and modified suitably for spraying atomised water on to the thin layer while it is still on the conveyor belt. This layer is removed from the belt by a stripping brush. The particles on being projected into air by the stripping brush may fall down a funnel like duct to a continuously rotating valve of the star or gate type through which the particles pass into a pipe in which the air current is flowing. The spraying of the damping agent must be controlled in synchronism with the movement of the fibre.

The preferred form of the apparatus is described with reference to 4 sheets of drawings. Eleven claims are made.

S. L. DE SILVA,
Colombo, August 14, 1950. Registrar of Patents.
