Notifications under "The Patents Ordinance, 1906"

The following specification has been accepted:—
No. 3,835 of July 28, 1951. (Date applied for under Section 48 of the Ordinance, August 16, 1950)

Mohamed Medhat Sharara.

"Improvements in or relating to constructional materials."

Abstract.—This invention relates to the production of new forms of bricks, slabs and similar constructional materials.

According to the present invention the constructional brick, slab or similar material comprises essentially burnt rice husks and a calcium containing material. The process consists of mixing together burnt rice husks and calcium containing cementing material with minor proportions of other ingredients, moistening with water, pressure moulding to required shape, partially drying the moulded product at ordinary temperature, subjecting it to soaking in a dilute solution of an aluminium salt and thereafter drying it at a temperature not exceeding 35°C. One example is given and 12 claims are made.

S. L. DE SILVA,
Colombo, June 23, 1952. Registrar of Patents.

The following specifications have been accepted:—

“A safety oil lamp”.

Abstract.—A safety oil lamp comprising of a square or flat or rectangular bottle with screw threaded neck and a lid with a cylindrical tube in the middle and a cone shaped funnel arrangement attached to the lid round the tube, the lid combination being able to be screwed on to the neck of the bottle. The inventor states that the cone arrangement prevents the oil from escaping. There are 2 claims and one sheet of drawings.

No. 3,907 of April 28, 1952

Arthur Cyril Kempitiya.

“A hone or sharpener for rubber tapping knives”.

Abstract.—The invention relates to a hone or appliance for sharpening rubber tapping knives and consists of a particular composition of earthenware clay which on analysis yields the following results.—Silica 70.0 per cent., Alumina 26.3 per cent., Iron Oxide 2.3 per cent., Calcium Oxide 0.3 per cent., Magnesia 0.1 per cent. and Ignition Loss 0.80 per cent. Two slabs of clay of a uniform thickness of 0.4 inches, each 1.2 inches wide and 2 inches in length are cast or moulded together to form one whole so that one of the said slabs forms a horizontal base while the other stands vertical to the said horizontal base bisecting it to represent the letter “T” inverted as shown in drawing sheet 1

The inventor states that the hone is designed for rapid sharpening of the rubber tapping knife resulting in a higher yield of latex and preventing damage to the bark of the Tree.

There are 5 claims and two sheets of drawings.
