## Notifications under "The Patents Ordinance, 1906"

THE following specifications have been accepted:—  
No. 3,837 of August 8, 1951. (Date applied for under Section 48 of the Ordinance, August 17, 1950).  
Heinrich Koppers G.m.b.H.

"Arrangement for the gasification of finely divided fuels".

Abstract.—This invention relates to the gasification of finely divided fuels.

In a preferred method of carrying out the gasification in suspension this is achieved by performing outside the reaction chamber a homogeneous mixture of the finely divided fuel and oxygen or oxygen enriched air. This mixture is introduced into the reaction chamber in one or more jets with such a speed through nozzle-like openings at such a speed that it ignites not earlier than within the reaction chamber.

The part of the reaction chamber walls (the inlet side) can be formed of water cooled metal surfaces whilst the remainder is made of refractory ceramic material.

There are 4 claims and 1 sheet of drawing.

No. 3,838 of August 8, 1951. (Date applied for under Section 48 of the Ordinance, May 31, 1951).  
Heinrich Koppers, G.m.b.H.

"Apparatus for the gasification of finely divided fuels".

Abstract.—This invention relates to the gasification of finely divided fuels.

It has been found that adequate cooling of the annular nozzle for the so called "veiling gas" can still be attained by providing as the outer limiting surface of the annular nozzle as before a special cooling space associated only with the annular nozzle. The inner limiting surface is formed by the cooled jacket of the central nozzle for the fuel oxygen mixture. This permits of the simpler construction of the building elements forming the annular nozzle.

There is 1 claim and 1 sheet of drawing.

S. L. DE SILVA,  
Registrar of Patents.

Colombo, July 29, 1952.
