PART V published with this Issue contains Book List and list of applications for Public Carriers' Permits for use of Lorries for Fee or Reward, &c.

Trade Mark Notices

Trade Marks Office

All communications relating to Trade Marks should be addressed to the Registrar of Trade Marks, Department of the Registrar of Companies, Block 5, Echelon Square, Colombo 1

Hours of Inspection

The office shall be open to the public every week day, except Saturday, between the hours of ten to four, and on Saturdays between the hours of ten to one, except on public holidays. Applications for inspections will however be accepted up to 3 p.m. on week days and 12 noon on Saturdays

Trade Marks limited to colours

Where it is stated in the advertisement of an application that the mark upon its registration is to be limited to

certain colours, the colours are, as far as possible, indicated in the accompanying representation of the mark in the usual heraldic manner

Association

Where it is stated that an advertised mark is to be associated (under Section 22 of the Trade Marks Ordinance (Cap. 121)), with another mark, it is indicated by its official number.

Applications in Part A or Part B

Applications for registration in Part A of the Register are shown with the official number unaccompanied by any letter. Applications for Part B of the Register are distinguished by the letter B prefixed to the official number.

OPPOSITION

NOTICE is hereby given that any person who has grounds of objection to the registration of the following trade marks may, within two months from the date of this Gazette, lodge Notice of Opposition on form T. M. No. 7 bearing an uncanceled or impressed stamp of Rs. 25. The period of lodging Notice of Opposition may be enlarged by the Registrar if he thinks fit and upon such terms as he may direct.

Formal opposition should not be lodged until after reasonable notice has been given by letter to the Applicant for registration so as to afford him an opportunity of withdrawing his application before the expense of preparing the Notice of Opposition is incurred. Failure to give such notice will be taken into account in considering any application by an Opponent for an Order of Costs if the opposition is uncontested by the Applicant.

TRADE MARK APPLICATIONS ADVERTISED BEFORE REGISTRATION

The Trade Marks Office does not guarantee the accuracy of these publications or undertake any responsibility for errors or omissions or their consequences

(1) Trade Mark No 16,288 (2) Date of Receipt June 1, 1955 (3) Applicant (Proprietor of the Trade Mark) SCHERING CORPORATION, (a corporation organized and existing under the laws of the State of New Jersey United States of America), 60, Orange Street, Bloomfield, State of New Jersey, United States of America, manufacturers (4) Address for service in the Island C/o Messrs Julius and Creasy, P O Box 154, Colombo (5) Class 3 (6) Goods: Hormones and hormone preparations (7) Representation of the Trade Mark

To be associated with trade mark No. 13,163 and TMA 15,989 if and when registered.

W. M. SELLAYAH,
Registrar of Trade Marks

Department of Registrar of Companies,

Notifications under "The Patents Ordinance, 1906"

THE following specifications have been accepted —
No. 4,216 of April 6, 1955

John Robert Hobbs and the Kestrel
Engineering Company, Limited

"Improvements in or relating to power-driven centrifugal-blower delivery apparatus"

Abstract—This invention relates to power-driven centrifugal-blower delivery apparatus such as is employed for a dispersed delivery of powder insecticide

According to the invention, a power-driven centrifugal-blower delivery apparatus is provided with a blower casing which can be turned bodily about its axis relative to a power unit which carries said casing and drives the blower impeller, whereby a delivery nozzle incorporated with said casing can be brought to any desired position within the range of movement thus afforded for said casing. The said delivery nozzle preferably is straight and arranged to provide for a flow from the impeller to the discharge end of the nozzle in a direction tangential to said impeller or blower casing.

There are 8 claims and one sheet of drawings

No 4,228 of May 10, 1955

Vicente Aurelio Araneta

"Improvements in or relating to Tractor Wheels"

Abstract—According to this invention the wheel of a soil tilling tractor comprises a rim of sufficient flotation and bearing surface to provide traction, a plurality of angle-formed cleats disposed transversely and protruding outwardly of the periphery of said rim, said rim having openings between said cleats, wherein said cleats and openings coact to puddle and knead the soil as the field is traversed by the tractor.

There are 6 claims and one sheet of drawings

No 4,229 of May, 10, 1955 (Convention Application under Section 48 claiming priority date, May 11, 1954)

American Flange & Manufacturing Co Inc

"Fittings for Electrical Conduits"

Abstract—The nature of the invention can be ascertained from claims 1 and 2 which read as follows —

- 1 A bushing comprising a cylindrical body part, at least two lugs extending outwardly from one end of said body part and an inwardly formed curled edge on the other end of said body, the internal wall of said body being threaded from said one end to a point underlying said curled edge.
- 2 A bushing comprising a cylindrical body part, at least two lugs extending from one end of said body part and formed integrally therewith and an inwardly curled edge on the other end of said body part having a wall thickness slightly less than the thickness of said body, the internal wall of the said body having threads extending from said one end to a point at least underlying said curled edge.

There are 6 claims and one sheet of drawings

No 4,230 of May 10, 1955 (Convention Application under Section 48 claiming priority date, May 12, 1954)

American Flange & Manufacturing Co Inc

"Containers and closures therefor"

Abstract—The invention relates to sheet metal containers and closures for openings in the walls thereof. Its nature can be ascertained from claim 1 which reads as follows —

- 1 A closure opening for containers, comprising a section of container wall material formed with

an opening therethrough and a closure securing formation bordering said opening, said formation including a neck drawn from said material and extending upwardly therefrom, an inwardly and downwardly extending portion extending from the upper end of said neck and a sleeve extending downwardly from said downwardly extending portion in spaced relation with respect to said neck and an inwardly extending ledge formed at the inner end of the said sleeve.

Colombo, April 28, 1956

S L. DE SILVA,
Registrar of Patents.

THE following specifications have been accepted:—

No. 4,231 of May 10, 1955. (Convention application under Section 48, claiming priority date, May 12, 1954).

IMPERIAL CHEMICAL INDUSTRIES, LTD.

"Improvements relating to water purification and supply systems"

Abstract—The nature of the invention can be ascertained from claim 3 which reads as follows:—

3. An automatically-controlled water purification and supply system comprising a sedimentation tank, a gravity filter unit, an intermediate pure water tank, a pneumatically-pressurised storage tank adapted to supply purified water to a distribution point, a motor-driven pump for pumping water from the intermediate pure water tank to the storage tank, and a pressure-sensitive device adapted to operate the pump motor within pre-determined limits of pressure in the storage tank, the filter unit and the intermediate pure water tank being located on substantially the same level and thus constituting a self-compensating system in that water may flow from the sedimentation tank to the filter unit and thence to the intermediate pure water tank when the water-level in the latter is lowered below the water-level in the filter unit by the automatically-controlled pumping of water from the intermediate tank to replenish the storage tank.

There are 12 claims and 1 sheet of drawing.

No 4,232 of May 16, 1955.

AUSTRIA VEREINIGTE EMAILLIERWERKE,
LAMPEN—UND METALLWARENFABRIKEN AKTIENGESSELLSCHAFT.

"Cooking, heating or lighting apparatus operated with liquid fuel and method for its operation"

Abstract—This invention relates to apparatus for cooking, heating or lighting operated with liquid fuel.

The invention is based on the idea of connecting a device into the path of the liquid fuel between a low situated supply container and the higher situated burner, which device in the manner of a pulsometer or the like effects the conveying of the liquid fuel simply by local heating of a part of the same in a vapourizer above the vapourization temperature and subsequent condensation of the produced vapour owing to cooling.

There are 18 claims and 3 sheets of drawings.

No. 4,234 of May 25, 1955.

GNANAMUTTU ABRAHAM SAMUEL.

"Apparatus for carrying tea chests and the like".

Abstract.—This invention relates to an apparatus for carrying tea chests of the standard type used in factories in Ceylon. The nature of the invention can be ascertained from claim 1 which reads as follows:—

1. An apparatus for lifting and/or moving chests of tea and like receptacles comprising a fork carrying a track wheel, said fork being at its upper end obliquely fitted to one side of a rectangular frame which is adapted to slide around the sides of the chest or receptacle, and which chest or receptacle is held within the frame during such lifting and moving by the pressure exerted on the chest or receptacle by the curved ends of two blocks, the extensions of which form the handles for operating the apparatus

There are 3 claims and 1 sheet of drawing.

No. 4,238 of June 13, 1955 (Registration of U. K. Patent No 711,018 of September 11, 1952, under Section 46).

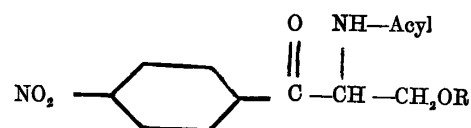

PARKE, DAVIS & COMPANY.

"Process for the production of 1-p-nitrophenyl-2-acylamido-propane-1, 3-diols".

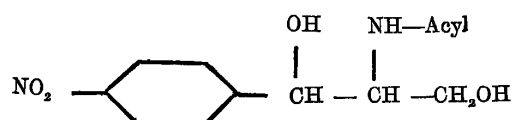

Abstract.—The nature of the invention can be ascertained from claims 1 and 2 which read as follows:—

1. Process which comprises reacting an a-acylamido- β -hydroxy-p-nitropropio-phenone compound

or a derivative thereof of formula,

with sodium borohydride or potassium borohydride in a non-acidic hydroxylic solvent and hydrolyzing the boron complex so formed thereby obtaining a 1-p-nitrophenyl-2-acylamido-propane-1, 3-diol compound of formula,

where R is hydrogen or a carboxylic acid acyl radical.

2. Process according to claim 1 wherein the reaction of the a-acylamido β -hydroxy-p-nitropropio-phenone compound with sodium borohydride or potassium borohydride is carried out at a temperature below 50 °C.

There are 9 claims and 7 examples.

Colombo, May 2, 1956.

S. L. DE SILVA,
Registrar of Patents.
