## THE CEYLON GOVERNMENT GAZETTE

අංක 11,618 — 1958 දෙසැම්බර් 19 වැනි සිකුරාදා — 19.12.1958

No. 11,618 — FRIDAY, DECEMBER 19, 1958

(Published by Authority)

### PART I: SECTION (III) — TRADE MARK AND PATENT NOTICES

(Separate paging is given to each Part in order that it may be filed separately)

	PAGE		PAGE
Trade Mark Notices .. .. .	273	Notifications under the Designs Ordinance .. .. .	—
Trade Mark Notifications .. .. .	279		
Notifications under the Patents Ordinance .. .. .	279	Miscellaneous .. .. .	—

PART V published with this issue contains List of Applications for Public Carriers' Permits for use of Lorries for Fee or Reward, &c.

### Trade Mark Notices

#### Trade Marks Office

All communications relating to Trade Marks should be addressed to the Registrar of Trade Marks, Department of the Registrar of Companies, Block 5, Echelon Square, Colombo 1.

#### Hours of Inspection

The office shall be open to the public every week day, except Saturday, between the hours of ten to four, and on Saturdays between the hours of ten to one, except on public holidays. Applications for inspections will, however, be accepted up to 3 p.m. on week days and 12 noon on Saturdays.

#### Trade Marks limited to colours

Where it is stated in the advertisement of an application that the mark upon its registration is to be limited to

certain colours, the colours are, as far as possible, indicated in the accompanying representation of the mark in the usual heraldic manner.

#### Association

Where it is stated that an advertised mark is to be associated (under Section 22 of the Trade Marks Ordinance (Cap. 121)) with another mark, it is indicated by its official number.

#### Applications in Part A or Part B

Applications for registration in Part A of the Register are shown with the official number unaccompanied by any letter. Applications for Part B of the Register are distinguished by the letter B prefixed to the official number.

### OPPOSITION

NOTICE is hereby given that any person who has grounds of objection to the registration of the following trade marks may, within two months from the date of this Gazette, lodge notice of Opposition on form T. M. No. 7 bearing an uncanceled or impressed stamp of Rs. 25. The period of lodging Notice of Opposition may be enlarged by the Registrar if he thinks fit and upon such terms as he may direct.

Formal opposition should not be lodged until after reasonable notice has been given by letter to the Applicant for registration so as to afford him an opportunity of withdrawing his application before the expense of preparing the Notice of Opposition is incurred. Failure to give such notice will be taken into account in considering any application by an Opponent for an Order of Costs if the opposition is uncontested by the Applicant.

## Notifications under "The Patents Ordinance"

THE following specifications have been accepted:—

No. 4,526 of February 20, 1958. (Convention application under Section 48, claiming priority date, February 22, 1957.)

N. V. DE BATAAFSCHE PETROLEUM MAATS-  
CHAPPIJ.

"Process for preparing gas mixtures containing hydrogen and carbon monoxide."

*Abstract*—The nature of the invention can be ascertained from Claim 1 which reads as follows:—

1. Process for preparing gas mixtures containing hydrogen and carbon monoxide by partial combustion at superatmospheric pressure of a hydrocarbon with

oxygen, steam being supplied if desired, in which the hydrocarbon is atomized through an opening in the wall of a reaction chamber, the oxygen being supplied rotatively into the reaction chamber with a movement rotating about the axis, such that the hydrocarbon is rapidly mixed with the gases, with the result that the reaction proceeds very rapidly, wherein the oxygen and any steam used is introduced into a whirl chamber situated in front of the reaction chamber from a space surrounding this whirl chamber via a number of tangential slots, characterized in that the oxygen and any steam used is passed through the slots at such a rate that the greatest difference in pressure on the inside of the space surrounding the whirl chamber is small compared to the pressure drop over the slots.

There are 5 claims and 1 sheet of drawings.

No. 4,527 of February 24, 1958. (Convention application under Section 48, claiming priority date February 25, 1957.)

BRITISH-AMERICAN TOBACCO CO., LTD.

"A carton for packing cigarettes and the like."

*Abstract*.—The nature of the invention can be ascertained from Claim 1 which reads as follows:—

1. A carton for packing cigarettes or the like comprising side walls, end walls, top and bottom walls, said top wall having an opening therein adjacent one of said end walls, the other end wall remote from said opening in the top wall comprising a panel terminating below the top wall, an end wall flap hingedly connected to the upper end of said panel and extending upwardly therefrom and terminating adjacent the top wall, and a slidably mounted closure flap hingedly connected to the upper edge of said end wall flap and extending inwardly below the top wall, said closure flap having a length to extend inwardly below the top wall to normally close the opening therein, and said closure flap having at least a portion thereof of a width substantially the same as the distance between the side walls so as to be guided thereby in its movement from one position to another.

There are 13 claims and 3 sheets of drawings.

No. 4,529 of February 26, 1958. (Convention application under Section 48, claiming priority date, March 1, 1957.)

DAVIDSON & CO., LTD.

"Improvements in or relating to tea rolling devices."

*Abstract*.—This invention relates to tea rolling devices.

According to this invention a tea rolling device of the kind comprising a table and a container which move relative to each other, the table having a cone at, or approximately at, its centre is characterized in that the cone is provided with ports in its wall through which rolled tea leaf may flow from the table top to below the table. A moveable valve device is associated with the cone. The valve device is provided with ports through which the flow of tea leaf may be regulated.

There are 8 claims and 2 sheets of drawings.

“Improvements in or relating to method of separating tobacco leaf and apparatus therefor.”

*Abstract.*—This invention relates to a separator and a separator method for use in a leaf tobacco threshing and separating line.

The nature of the invention can be ascertained from Claim 1 which reads as follows:—

1. A method of separating the light loose lamina product from the heavy stem-attached-lamina product in a threshed tobacco mixture which consists in flowing air through a separation chamber at an increasing velocity from a relatively low velocity at an entrant opening of the chamber to a relatively high velocity at an exit opening of the chamber and moving the threshed tobacco mixture into the path of the air flow at the low velocity region thereof, thereby separating the light product from the heavy product in the direction of the air flow, with the products being caused to move into two generally separate travel paths in the chamber, the light product being carried by the air flow into the exit opening and the heavy product being gravitated to the bottom of the chamber.

There are 20 claims and 4 sheets of drawings.

No. 4,531 of February 26, 1958. (Registration of British Patent No. 695,273 of July 11, 1949, under Section 46 of the Ordinance.)

**MERCK & CO. INC.**

“Improvements in or relating to method for the production of vitamin substances.”

*Abstract.*—The nature of the invention can be ascertained from Claim 1 which reads as follows:—

1. In a process for the production of vitamin B12 or other LLD active substances by fermenting a nutrient medium by means of an LLD activity-producing strain of a micro-organism belonging to the sub-phylum Fungi, the improvement which comprises conducting the fermentation in a nutrient medium containing cobalt in a non-toxic concentration and to an amount not less than about 0.1 part of cobalt per million parts of the medium.

There are 14 claims and 5 examples.

No. 4,533 of March 3, 1958. (Convention application under Section 48, claiming priority date, March 5, 1957.)

**THE CHAIRMAN, INDIAN TEA ASSOCIATION.**

“Improvements in or relating to machines for processing tea leaf.”

*Abstract.*—The nature of the invention can be ascertained from Claim 1 which reads as follows:—

1. A machine for processing tea leaf after withering and before drying, comprising a stationary cylinder wholly or partially open, or adapted to be wholly

or partially opened, at one end and closed at the other end and provided at said closed end with means for feeding leaf into a helical feed worm provided on a rotatable axial drive shaft, said helical feed worm being adapted to feed the leaf into an annular space formed by the cylinder bore and a substantially cylindrical extension of said rotatable axial drive shaft, said cylindrical extension being provided with a plurality of sets of vanes or the like protruding into said annular space and adapted to propel the leaf towards, and to discharge it through, said open end of the cylinder, and said cylinder bore being provided with a plurality of sets of pins or the like also protruding into said annular space, said sets of vanes or the like and said sets of pins or the like being staggered with respect to one another.

There are 11 claims and 1 sheet of drawings.

**HENRIC THEODORE PERERA** (communicatee of  
**GENERAL FOODS CORPORATION**)

“Coconut paring machine.”

*Abstract.*—This invention relates to coconut paring machines. According to this invention the coconut paring machine includes an endless conveyor which brings the individual pieces of coconut to be pared to a fixed knife. An endless presser is arranged above the endless conveyor adjacent the knife and is manually adjustable with respect to its distance from the endless conveyor and the knife so that coconut pieces of various thicknesses may be flattened and presented to the knife for skinning. The endless conveyor is resiliently mounted adjacent the fixed knife to accommodate its position with respect to the knife for pieces of coconut of various thicknesses so that the paring of the pieces of coconut will remove a minimum of edible coconut meat.

There are 5 claims and 1 sheet of drawings.

**RHEINBAU G.m.b.H.**

“Improvements in or relating to expanded metal girders.”

*Abstract.*—This invention relates to girder-like members expanded from sheet metal.

According to the invention a girder-like member is expanded from a single strip of incised or slotted sheet metal to form an upper boom, two lower booms, and two series of oppositely slopping braces connecting the upper boom to each of the lower booms respectively, clips or ties being provided which prevent the lower booms from spreading and from moving longitudinally relatively to one another.

There are 11 claims and 2 sheets of drawings.

No. 4,525 of 11th February, 1958. (Registration of British Patent No. 778,284 of 21st December, 1953, under Section 46 of the Ordinance.)

RHEINBAU G.m.b.H.

“Improvements in reinforced concrete constructional elements.”

*Abstract.*—The nature of the invention can be ascertained from Claim 1 which reads as follows:—

(1) A reinforced-concrete structural element comprising a girder-like member of sheet metal having

as integral components an upper boom, two lower booms, and two series of oppositely slopping braces connecting the upper boom to each of the lower booms respectively, the lower booms being embedded in a slab of concrete with substantially the whole of the remaining part of the girder projecting therefrom.

There are 9 claims and 1 sheet of drawings.
