1. Water shall only be taken from the public standpipes in buckets or other suitable receptacles, and in such a manner as to prevent its flow into any drain, side channel, or on to the surface of any road, footpath, or area.
2. No hose pipe, pipe, tube, shoot, or other contrivance of any nature whatsoever shall be attached either temporarily or permanently to any public standpipe.
3. No automatic self-closing valve or other automatic appliance attached to or forming part of any public standpipe shall be interfered with so as to prevent either temporarily or permanently its automatic action.
4. No water drawn from any private service, except an agreement in the form A in the schedule shall have been previously entered into with the Waterworks Engineer, shall be used in connection with any trade, manufacture, or business, or for any ornamental or mechanical purpose, or for purposes of irrigation.
5. Not more than one service pipe for the supply of water to any premises within the same curtilage and under the same occupation shall be permitted to be connected with the Waterworks.
6. Whenever water is found running to waste from any tap, meter, pipe, or other fitting which is supplied with water from the Waterworks, the Waterworks Engineer or person duly authorized by him under the provision of section 2 of the Waterworks Ordinance of 1886 may at once cut off the water, and such service shall not be re-connected until the owner or occupier of the premises has paid to the Waterworks Engineer, as ascertained and liquidated damages, the sum of five rupees; should such waste occur on any premises on more than three occasions, the supply may be cut off permanently.
7. The Waterworks Engineer may, upon being satisfied that the arrangement, size, position, nature, or condition of any pipe, tap, valve, meter, or other fitting situated within private premises and connected with Water-

works is such as in his opinion is likely to lead to waste, misuse, undue consumption or contamination of the water supplied from the Waterworks for public or private use or to be prejudicial to the proper control and distribution of water from the Waterworks, serve a notice upon the owner or occupier of such premises in the form B set forth in the schedule specifying the alterations required, and such alterations shall be made by the owner or occupier to the satisfaction of the Waterworks Engineer forthwith.

In the event of the name or residence of the owner or occupier being unknown, such notice shall be affixed in a conspicuous place upon the premises to which it refers, after which it shall be taken as duly served within the meaning of these regulations.

8. The Waterworks Engineer may diminish, withhold, or suspend, stop, turn off, or divert the supply of water through or by means of any pipe, service, public fountain, or other appliance connected to the Waterworks, either wholly or in part, or whenever such Waterworks Engineer may think fit and without prejudice to any water-rate, meter rent, or other sums due or to become due under "The Waterworks Ordinances, 1886 and 1891," or regulations hereunder:—

The connection will be made by the Waterworks Engineer only; and upon completion an account will be rendered to the applicant in the form D in the schedule, and the unexpended balance, if any, of the sum deposited with the Waterworks Engineer in respect of such service, shall be returned.
