

SUPPLEMENT

TO

The Ceylon Government Gazette.

No. 5,135—FRIDAY, MAY 6, 1892.

VITAL STATISTICS OF CEYLON.

REPORT OF THE REGISTRAR-GENERAL FOR THE FOURTH QUARTER OF 1891.

I.—POPULATION.

THE estimated population of the Island on the last day of the quarter was 3,057,693, an increase of 19,052 on the previous quarter. The increase was due to an excess of births over deaths of 2,542, and to a still larger excess (16,510) of arrivals over departures of Indian coolies.

Table I. in the appendix gives the area and estimated population of each province and district of the Island in the quarter.

2. *Arrivals and Departures of Indian Coolies.*—The total number of arrivals in the quarter was 27,289, an increase of 10,280, or 60 per cent. on the mean annual number (17,009) in the corresponding quarter of the last four years (the period in the past decade during which the tide of immigration was in favour of the Island), while the departures were 10,779, which is a decrease of 164 on the average of the corresponding period under comparison (10,943).

The arrivals up to the end of the year amounted to 103,149, and the departures to 60,042. Thus the net increase to the cooly population of the Island this year was 43,107, an increase even greater than in last year (38,350), when the increase of arrivals recorded was in excess of any previous year since 1871, except 1876 and 1877.

Arrivals and Departures in the Fourth Quarter of each year from 1887–91, and also the Departures in the Third Quarter of those years.

Year.	Fourth Quarter. Arrivals.	Fourth Quarter. Departures.	Third Quarter. Departures.
1887	16,911	10,226	13,058
1888	14,568	9,203	11,415
1889	18,474	13,946	8,959
1890	18,085	10,398	8,258
1891	27,289	10,779	13,967

II.—MARRIAGES.

The number of general marriages, i.e., marriages other than Kandyan or Mohammedan, registered in the quarter was 3,027, and of Kandyan marriages 1,112, showing a decrease of 3 and 20 per cent. respectively on the number in the corresponding quarter of 1890.

3. Table III. shows the marriages solemnised among the general community in every province and district of the Island, the civil condition, nationality, the highest, lowest, and mean ages of the parties, the mode of solemnisation, the number of bridegrooms and brides who were unable to sign their names in the registers, &c.

Table IV. gives similar information in respect of the Kandyans.

4. *First Marriages: Re-marriages.*—Of the 3,027 general marriages, 2,671 (equal to 88 per cent.) were between bachelors and spinsters, 73 between bachelors and widows, 228 between widowers and spinsters, 51 between widowers and widows, 1 between a divorced man and a spinster, 2 between divorced women and bachelors, and 1 between a divorced woman and a widower.

Of the 1,112 Kandyan marriages, 885 (equal to 79 per cent.) were between bachelors and spinsters, 46 between bachelors and widows, 98 between widowers and spinsters, 41 between widowers and widows, 17 between divorced men and spinsters, 2 between divorced men and widows, 12 between divorced women and bachelors, 8 between divorced women and widowers, and 3 between divorced men and divorced women.

5. *Age at Marriage.*—The mean age at marriage for the general community was for males 27·3 and for females 19·4; for the Kandyans, 28·1 for males and 20·1 for females.

6. *Minors.*—In the general community 7 per cent. of the males and 73 per cent. of the females, and among the Kandyans 20 per cent. of the males and 71 per cent. of the females, were under 21 years of age at marriage.

7. *Mixed Marriages.*—In the quarter there were registered 20 mixed marriages: 10 between Sihaliese and Tamils, 6 between Burghers and Sihaliese, 2 between Burghers and Tamils, 1 between a European and a Burgher, and 1 between a European and a Sihaliese.

8. *Signatures in the Marriage Register.*—Of the 6,054 persons married among the general community this quarter, 700 men and 2,328 women signed the register with marks, that is to say, 77 per cent. of the men and 23 per cent. of the women were able to write their names. Of the 2,224 persons married among the Kandyans, 443 men and 1,058 women signed the register with marks, or, in other words, 60 per cent. of the men and less than 5 per cent. of the women were able to write their names.

III.—BIRTHS AND DEATHS.

9. *Births.*—The births registered in the quarter numbered 23,546, and were in the proportion of 31·0 to 1,000 persons living, a proportion very nearly the same as the average in the corresponding period of the preceding ten years, 31·1.

10. *Deaths.*—The deaths registered in this quarter amounted to 21,004, including 14 Europeans, 69 Burghers, 13,831 Sihaliese, 5,173 Tamils, 1,773 Moors, 92 Malays, and 52 others, and corresponded to an annual rate of 27·8 per 1,000, being 19 per cent. above the mean rate of the corresponding period in the ten years 1881–90 (23·3).

11. *The Births and Deaths and their Rates* in the quarter are compared in the following statement with results obtained in the previous quarters of the year, the fourth quarter of the past year, and the average of the corresponding quarter for the previous ten years:—

	Births.	Deaths.	Per Mille per Annum.	
			Birth-rate.	Death-rate.
Average of ten previous fourth quarters ...	225,917	164,713	31.1	23.3
Fourth Quarter of 1890 ...	29,114	18,248	39.9	25.0
First Quarter of 1891 ...	26,131	23,119	35.3	31.2
Second Quarter of 1891 ...	24,392	22,338	32.6	29.8
Third Quarter of 1891 ...	22,334	20,182	29.5	26.6
Fourth Quarter of 1891 ...	23,546	21,004	31.0	27.8

12. *Sex.*—Of the total number of births (23,546), 12,373 were males and 11,173 were females, i.e., 111 males to 100 females. Of the total number of deaths (21,004), 11,040 were males and 9,964 were females. Out of equal numbers living of each sex there died 97 males to 100 females.

13. *Health of the Districts.*—The continued unhealthiness of several of the districts comprised in the annexed statement in the first, second, and third quarters of the year was noticed in my last report. This quarter has been another unhealthy period. The district of Hambantota had a death-rate in the first quarter (96.8) nearly treble the mean rate for that period in the previous ten years (33.0); in the second quarter (51.2), a rate more than double that for that period (23.3); in the third (33.5), a rate over 40 per cent. in excess; and in the fourth, the last quarter of the year, the rate recorded was 35.9, which is still more than a third above the normal rate of the quarter (26.7). Matara is another district which has been continuously unhealthy during several quarters. The death-rate of this district in the first quarter was 38.0, an increase of 68 per cent. on the mean rate of the corresponding quarter in 1881-90 (22.6); in the second, 35.2, an increase of 112 per cent. on the mean rate of its corresponding quarter (16.6); in the third, 31.5, an increase of 61 per cent. on its corresponding quarter (19.5); and in the fourth, 26.5, an increase of 28 per cent., or more than a fourth in excess of the rate for that period. Negombo district is another which experienced abnormal mortality throughout each succeeding quarter in the year. The death-rate recorded in this district in the first quarter was 25.6, in the second 35.3, in the third 22.1, and in the fourth 20.6; whereas the rates recorded in these different periods during the preceding decade were respectively 18.7, 20.7, 18.8, and 15.8 per 1,000. Similarly, Puttalam, Chilaw, Badulla, Mullaitivu, Vavuniya, Kandy, Colombo, and Nuwara Eliya experienced continued unhealthiness during the four successive quarters of the year. The highest death-rate in the quarter was recorded in Trincomalee—the district noticed in my last report as being the only one which showed a death-rate lower than usual in each of the preceding three quarters of the year, and as an exception to the general unhealthiness of the Island. The sudden rise in the death-rate of this district (96 per cent., or nearly double the mean rate in the corresponding quarter of the previous ten years) is due to the heavy mortality from cholera, which caused as many as 233 deaths out of a total of 379 cases. Badulla, though showing the next highest death-rate (53.1), increased very considerably (136 per cent.) from the mean rate of the quarters in the preceding ten years (22.5) and, unlike Trincomalee, was also unhealthy during the previous quarters of the year. Batticaloa, Jaffna, and Mannár were healthier in the first two quarters and unhealthier in the two succeeding quarters. Kégalla and Kalutara were healthier in the first and third and unhealthier in the second and fourth. Galle and Ratnapura were, in point of health, worse throughout the year, save in the last quarter. In this quarter all districts without any exception show an increase on their death-rate.

The percentage of increase or decrease in the death-rate of each district in the quarter is shown in the following statement, as compared with the average for ten fourth quarters from 1881 to 1890:—

Death-rate per Mille per Annum.

District.	Fourth Quarter of 1891.	Average of Ten Fourth Quarters in 1881-90.	Percentage of Increase or Decrease.
Badulla ...	53.1	22.5	136
Trincomalee ...	58.7	29.9	96
Hambantota ...	35.9	26.7	34
Mátalé ...	37.6	28.6	31
Negombo ...	20.6	15.8	30
Mátara ...	26.5	20.7	28
Batticaloa ...	31.4	25.3	24
Jaffna ...	25.3	20.6	23
Mullaitivu and Vavuniya ...	46.9	38.2	23
Nuwara Eliya ...	24.1	19.9	21
Mannár ...	38.6	32.5	19
Kandy ...	27.5	23.2	18
Kalutara ...	22.3	19.0	17
Puttalam and Chilaw ...	22.4	19.8	13
Colombo ...	17.2	15.4	12
Galle ...	25.3	23.1	9
Anurádhapura ...	36.4	33.6	8
Kégalla ...	21.7	20.3	7
Ratnapura ...	34.1	32.3	5
Kurunégala ...	32.8	31.9	3

14. *Age at Death.*—Table IX. shows the number of deaths registered in the quarter at different periods of life for either sex in each province and district. Of the 21,004 deaths registered in the Island this quarter, 3,839, equal to 18 per cent. of the total deaths, occurred under one year; 9,142, or 44 per cent., under five years; 37 persons are reported to have been centenarians, and 1,217 persons to have died at various ages between 75 and 100.

15. *Registered Causes of Death.*—Table VII. in the appendix gives the causes of deaths registered in each district of the Island and of each nationality.

16. *Fever and Diarrhœal Diseases.*—Of the 21,004 deaths registered in the quarter, 4,226 were reported due to various forms of fever and 4,524 to diarrhœal diseases. The deaths ascribed to these two causes amount to 8,750, or 42 per cent. of the total number of deaths from all causes. Under this head* cholera accounts for 1,584 deaths, of which 447 occurred in Badulla, 233 in Trincomalee, 205 in Anurádhapura, 104 in Hambantota, and 99 in Matale.

* This is according to the statements of the registrars, wherein what is stated as cholera probably includes many cases of fever and dysentery.

17. Smallpox accounts for 28 deaths, of which 13 were in Kandy, 8 in Colombo, 6 in Batticaloa, and 1 in Badulla. To chickenpox 2 deaths are attributed and to measles 89 deaths, of which 16 were in Colombo, 15 in Ratnapura, and 12 in Galle.

18. The other chief causes of deaths were infantile convulsions 1,612, rickets 1,510, convulsions 792, anæmia 691, phthisis 612, collapse 559, worms 539, debility 518, dropsy 424, old age 336, puerperal convulsions 316, inflammation 215, childbirth 186, fractures and contusions 165, pneumonia 157, thrush 136, rheumatism 133, ulcer and bedsores 122, pleurisy 107, bronchitis 95, parangi 92 (of which 48 were in Kurunégala), want of breast milk 87 (of which 38 were in Badulla, 12 in Kandy, 11 in Matale, 6 in Nuwara Eliya, 4 in Kurunégala, and 4 in Kégalla), scrofula 83, premature birth 82 (of which 68 were in Badulla), paralysis 73, asthma 69, diabetes 39, hydrophobia 10 (of which 4 in Colombo, 2 in Negombo, and 2 in Jaffna).

19. *Accidental Deaths and Suicides.*—Of the 415 deaths attributed to these causes, 103 are attributed to drowning, 93 to falling from trees, 63 to snake-bites, 20 to fall of heavy substances, 17 to burns and scalds, 13 to gun-shot wounds, 7 to fall from heights other than trees, 5 to poison, 1 to injury by elephant, 1 by buffalo, 2 by crocodile, 2 to sunstroke, 1 to wasp sting, 1 to hornets. There were 21 cases of suicide, of which 13 were by hanging, 1 by drowning, 1 by gunshot wound, 1 by poison and 5 by other means. Three persons were run over by carts.

20. *Murders and Executions.*—Six deaths (all Siphalese) registered this quarter are attributed to murder and other forms of homicide, of which 2 were in Hambantota, 1 in Matara, 1 in Colombo, 1 in Kégalla, and 1 in Kurunégala. Four persons (all Siphalese) were judicially executed in the quarter.

IV.—HEALTH OF THE TOWN OF COLOMBO.

21. The health of the town of Colombo during the quarter (24·5) has been worse than in the corresponding quarter of 1888, 1889, or 1890 (when the rates recorded were 21·7, 21·8, and 20·8 per 1,000 respectively) and than in the preceding quarters of this year (second quarter 22·4; third 24·1), save in the first when the prevalence of smallpox in the town raised the rate to as high as 30·6 per 1,000. The causes of deaths may be summarised as follows:—

Simple continued fever	...	137	Debility	...	22
Enteric fever	...	21	Mania	...	20
Influenza	...	4	Childbirth	...	17
Whooping cough	...	3	Bronchitis	...	15
Measles	...	3	Pneumonia	...	14
Diarrhoeal diseases	...	104	All other causes	...	181
Infantile convulsions	...	104			
Phthisis	...	51			
Parasitic diseases	...	45			
Old age	...	28			
			Total	...	769

22. The subjoined table gives the births and deaths and their rates of each nationality living within the Colombo Municipality for the fourth quarter of the year, and the average of the corresponding period in the previous four years:—

Nationalities.	Popu- lation at the Census of 1891.	Births.		Deaths.		Births: Rate per Mille per Annum.		Deaths: Rate per Mille per Annum.	
		Average of the Fourth Quarters, 1887-90.	Fourth Quarter, 1891.	Average of the Fourth Quarters, 1887-90.	Fourth Quarter, 1891.	Average of the Fourth Quarters, 1887-90.	Fourth Quarter, 1891.	Average of the Fourth Quarters, 1887-90.	Fourth Quarter, 1891.
ALL RACES ...	126,926	634	617	597	769	19·2	19·3	21·3	24·1
Europeans, including Military	2,542	0	13	9	6	16·4	20·3	12·6	9·4
Burghers	9,979	39	29	23	23	17·6	11·6	10·7	9·2
Siphalese	53,329	231	224	224	284	18·9	16·7	19·0	21·2
Tamils	29,133	27	51	100	131	4·2	7·0	16·5	17·9
Moors	26,834	207	276	209	277	35·0	40·9	35·2	41·1
Malays	3,350	13	18	19	30	21·5	21·4	25·7	35·6
Others	1,759	8	6	13	18	19·9	8·6	33·4	40·7

23. *European Births and Deaths.*—The European deaths were 6 in number (1 from simple continued fever, 1 from chronic alcoholism, 1 from phthisis, 1 from infantile convulsion, 1 from enteritis, and 1 from cinchosis of liver), and corresponded to an annual rate of 9·4 per 1,000. The birth-rate in the quarter was equal to 20·3.

24. *Births and Deaths of other Races.*—The death-rates of the different nationalities living in the town are not strictly comparable with each other. The European population of the town is small and fluctuating, and the rate calculated on such a population is not likely to be trustworthy for purposes of comparison. Similarly the Tamil death-rate is not a standard of their healthiness in relation to other nationalities. The circumstances which account for the low rate of mortality prevailing in this community are due to the migratory character of the Tamils living in the town and to a difference in the age composition of their population, there being among the Tamils a very small proportion of people at early or advanced periods of life and an unduly large proportion at the middle period, as compared with the other races.

The Burgher death-rate (9·2) in the quarter was slightly less than the mean rate for the corresponding period in the previous four years (10·7), while the other races show an increase on their death-rates. The Siphalese death-rate was 21·2, an increase of 12 per cent. on the mean rate (19·0). The Moorish death-rate was 41·1, an increase of 17 per cent. on the mean rate (35·2), and the Malay death-rate was 35·6, an increase of 34 per cent. on the mean rate (25·7).

APPENDIX.

I.—Area, Estimated Population, Marriages, Births, and Deaths registered in the Fourth Quarter of 1891.
