(b) Where the notice referred to in paragraph (a) is not given, the consumer shall be held responsible for the licensee's equipment in his premises and shall be liable to pay for all the energy consumed on the premises until the lapse of three days from the date on which the licensee receives notice of the fact that the consumer does not require the supply:

Provided that when the supply to the premises is disconnected by the licensee before the lapse of the said three days, the consumer shall be liable to pay only for the energy consumed on the premises up to the time of such disconnection.

12. No electrical work such as installation work including additions, alterations and adjustments to existing installations shall be commenced except after notice of not less than two days has been given to the licensee, to enable an officer of the licensee to inspect the proposed work.

13. If any electrical work connected with any new installation in any premises is carried out without giving notice to the licensee and obtaining the licensee's prior approval, the licensee may refuse to supply electrical energy to the premises wherein such work has been carried out, until formal notice has been received by the licensee and the necessary tests have been carried out.

14. Where any extension is made to any installation which is already connected to the licensee's electricity supply mains without prior notice to and without the permission of the licensee, the whole installation shall be liable to disconnection from the licensee's electricity supply mains.

15. Every application for the re-connection of any installation shall be made on such form as may be provided for the purpose by the licensee, and shall be delivered at the office of the licensee not less than forty-eight hours before the supply of electrical energy is required.
