PREFACE

This publication *A Catalogue of Postgraduate Theses* is an updated edition of the same work which first came out in mimeographed form in 1978. It is a listing of holdings of the university and special libraries of Sri Lanka upto the end of year 1980.

The catalogue is in two parts: Part I is an author list with full bibliographic description and such other particulars as degree, the awarding institution, year of award, the location and library accession numbers. The coded location number is decoded in the 'key to libraries' on page vii. All titles are rendered in the Roman script irrespective of the language or script of the text and non English titles are translated into English, the translation following the transliterated title. Part II is a title keyword index purported to be a subject approach to the contents of part I. The number at the end of a keyword index entry refers to the entry number in the alphabetical author sequence in part I.

Rules regarding the use of theses vary slightly from library to library but generally they are available for reference only. A copy of thesis is obtainable from the custodian librarian on a written request by a reader subject to copyright and library regulations. Rules applicable to the use of theses in the University Library at Peradeniya, are reproduced in the following pages.

The cooperation extended to us in the compilation and updating of this catalogue by my colleagues in various libraries is gratefully acknowledged. I also wish to thank Padma Wickramasinghe, Nalini Mallawarachchi and Piyasena Wickramage of my staff for assistance rendered in editorial work.

RULES GOVERNING THE USE OF THESES IN THE UNIVERSITY OF PERADENIYA

Theses and dissertations presented by successful candidates for higher degrees of the University of Peradeniya are available in the Library for reference only. Two copies of such theses or dissertations are normally deposited in the Library after successful presentation. The theses register must be signed whenever a thesis is consulted. Signing the register amounts to a declaration that no information derived from a thesis will be used or published without the consent in writing of the author, to whom the copyright belongs.

Theses and dissertations may not be lent to individuals, but one copy may be lent, for a limited period, to an approved library for consultation in that library by a named reader. Applications to borrow a thesis in this fashion must be received from the Librarian of the Library requesting the loan, and should give the name of the reader wishing to consult the thesis. In every such case the person wishing to consult a thesis or dissertation must sign an undertaking not to quote or make a copy of the whole or any substantial part of it without obtaining the consent of the author and the University. Photocopies of a thesis are also subject to the author's consent.
