

SUPPLEMENT
TO
The Ceylon Government Gazette.
PART I.

No. 5,763—FRIDAY, FEBRUARY 22, 1901.

VITAL STATISTICS OF CEYLON.

REPORT OF THE REGISTRAR-GENERAL FOR THE SECOND QUARTER OF 1900.

I.—Population.

1. The estimated population of the Island on the last day of the quarter was 3,548,457, as against 3,484,035 in the previous quarter, an increase of 64,422, due to an excess of 10,738 of births over deaths, and a further excess 53,684 of arrivals over departures of Indian coolies. Table I. in the appendix gives the area of each Province and district of the Island with its estimated population for the quarter.

2. *Arrivals and Departures of Indian Coolies.*—The total number of Indian coolies who arrived in the Island during the quarter (85,384) was 92 per cent. above the average for the corresponding period in the last five years, while the total number of departures (31,700) was about 4 per cent. above the average. The excess of arrivals over departures was 53,684, as against 13,856, the average excess of arrivals over departures during the corresponding period of 1895 to 1899.

II.—Marriages.

3. *Marriages.*—The marriages registered during the quarter numbered 6,400, of which 3,776 were general (*i.e.*, other than Kandyan or Mohammedan) marriages, and 2,624 Kandyan marriages.

Table VI. in the appendix shows the marriages solemnized among the general community in every Province and district of the Island, the civil condition, nationality, the highest, lowest, and mean ages of the parties, the mode of solemnization, the number of bridegrooms and brides who were unable to sign their names in the register, &c.

Table VII. gives similar information in respect of Kandyan marriages.

4. *First Marriages; Re-marriages.*—Of the 3,776 general marriages, 3,293 (equal to 87 per cent.) were between bachelors and spinsters, 329 between widowers and spinsters, 86 between bachelors and widows, 61 between widowers and widows, 5 between divorced men and spinsters, 1 between a bachelor and a divorced woman, and 1 between a widower and a divorced woman. Of the 2,624 Kandyan marriages, 1,993 (equal to 76 per cent.) were between bachelors and spinsters, 255 between widowers and spinsters, 140 between bachelors and widows, 132 between widowers and widows, 42 between bachelors and divorced women, 9 between divorced women and widowers, 8 between divorced men and divorced women, and 6 between divorced men and widows.

5. *Age at Marriage.*—The mean age at marriage for the general community was 26·8 for males and 19·8 for females, and for Kandyans 29·5 for males and 21·9 for females.

6. *Minors.*—In the general community nearly 5 per cent. of the bridegrooms and 52 per cent. of the brides', and amongst the Kandyans 9 per cent. of the bridegrooms and 58 per cent. of the brides, were under 21 years of age.

7. *Mixed Marriages.*—There were 31 mixed marriages during the quarter : 14 between Sinhalese and Tamils, 10 between Burghers and Sinhalese, 3 between Burghers and Tamils, and 4 other mixed marriages.

8. *Signatures in Marriage Register.*—Of the 7,552 persons married among the general community during the quarter, 902 men and 2,870 women signed the register with marks ; that is to say, 76 per cent. of the men and 24 per cent. of the women were able to write their names. Of the 5,248 persons married among the Kandyans, 1,028 men and 2,554 women signed the register with marks ; *i.e.*, 60 per cent. of the men and 3 per cent. of the women were able to write their names.

III.—Births and Deaths.

9. *Births.*—The births registered in the quarter numbered 34,607 (47 Europeans, 151 Burghers, 25,220 Sinhalese, 6,800 Tamils, 2,275 Moors, 85 Malays, and 29 others), and were in the proportion of 43·3 to 1,000 persons living, as against 34·9, the average of the corresponding period in the ten years 1890-99, and 41·8, the rate in the second quarter of 1899.

10. *Deaths.*—The deaths registered in the quarter amounted to 23,869 (including 29 Europeans, 136 Burghers, 15,345 Sinhalese, 6,453 Tamils, 1,678 Moors, 90 Malays, and 48 others), and corresponded to an annual rate of 29·9 per 1,000, as against 27·9, the average rate for the corresponding period during the last ten years, and 33·1, the rate in the corresponding quarter of the previous year.

11. The births and deaths and their rates in this quarter are compared in the following table with the results obtained in the previous quarter, the second quarter of the past year, and the average rate for the second quarter in the ten years 1890–99 :—

TABLE A.

	Births.	Deaths.	Per Mille per Annum.		
			Birth-rate.	Death-rate.	
Average of ten previous second quarters in 1890–99 ...	26,574	21,237	34·9	27·9	
Second quarter of 1899 ...	32,688	25,870	41·8	33·1	
First quarter of 1900 ...	34,051	24,566	43·2	31·1	
Second quarter of 1900 ...	34,607	23,869	43·3	29·9	

12. The birth-rate for the quarter (43·3) has risen 8·4 per 1,000 over the average for the corresponding quarter of the last ten years (34·9), while the death-rate (29·9) shows a rise of 2 per 1,000 above the average for the second quarters in 1890–99 (27·9).

13. Table II. in the appendix gives information similar to that given in Table A in respect of each Province and district in the Island ; Table I. gives the births and deaths according to sex ; Table VIII. the births according to nationality and sex ; Table IX. the deaths for each month of the quarter according to nationality for each Province and district. The causes of deaths for each district are shown in Table X. ; and for the estates in the Central, Uva, and Sabaragamuwa Provinces, and in the Kalutara and Colombo Districts of the Western Province in Table XI. ; and for the town of Colombo (according to wards and nationalities) in Table XII. Table XIII. shows the period of life at which the deaths of the various races occurred in every district.

14. *Sex.*—Of the total number of births (34,607), 17,768 were males and 16,839 were females, i.e., 105 males to 100 females. Of the total number of deaths (23,869), 12,027 were males and 11,842 were females. Out of equal numbers living of each sex, there died 900 males to 1,000 females.

15. *Age at Death.*—The deaths of infants under one year of age numbered 5,644, and were in the proportion of 163 to a thousand registered births. The rate of infant mortality varied in different districts from 283 (for Tamils) in Trincomalee, 270 (for Sinhalese) in Anuradhapura, 261 (for Tamils) and 259 (for Moors) in Batticaloa, 250 (for Tamils) in Mullaitivu, 242 (for Tamils) in Mannar, 236 (for Sinhalese) in Kurunegala to 120 (for Sinhalese) in Negombo, 114 (for Sinhalese) in Colombo, 106 (for Sinhalese) in Chilaw, and 100 (for Sinhalese) in Kalutara.

16. *Centenarians.*—Thirty-eight deaths (13 males and 25 females) were reported to be of centenarians, but the ages cannot be relied on.

IV.—State of Public Health.

17. The general health of the population during the quarter was not worse than usual, the slight increase in the death-rate to 29·9 from 27·9, the average rate for the second quarter in the years 1891–99 being due to improved registration.

18. Tables III., IV., and V. in the appendix show the births and deaths, the birth-rates and the death-rates for all ages and for infants in the several Provinces and districts of the Island, and in the revenue subdivisions of those districts for the quarter under review, for the preceding quarter, and for the corresponding quarter of last year, and the average rate for the corresponding period in the last nine years 1891–99. The rates shown are for the Sinhalese only in the districts which are mainly inhabited by the Sinhalese, and for the Tamils only where the Tamils form the bulk of the population. These separate rates furnish more trustworthy data for comparing the relative sanitary condition of those districts and subdivisions of the Island than if the rates included other nationalities temporarily resident in them. In the Puttalam District, where the Sinhalese and Mohammedans are found in almost equal numbers, and in the Batticaloa District, which is inhabited almost in equal numbers by Tamils and Mohammedans, the rates are given for those races separately.

19. The healthiest Province during the quarter was, as usual, the Western (21·8) ; the healthiest district Matara (20·0), followed by Kalutara (20·7) and Colombo (20·9). The healthiest subdivisions were Siyane korale (16·5), Gangaboda patty (16·6), and Hewagam korale (16·7).

20. *Western Province.*—During the quarter under report, the Western Province experienced better health than in the previous quarter, with a Sinhalese mortality rate of 21·8 as against 23·0. Compared with the average for the second quarter in 1891–99, there was, however, an increase in the mortality of 2·1 per thousand. The rate of mortality among infants under one year of age was in this Province in the proportion of 111 to a thousand births registered, the lowest rate recorded for any Province in the quarter.

21. In the Colombo District the death-rate was 20·9, i.e., 1·6 per thousand higher than the average 19·3. Two of its five subdivisions—viz., Siyane korale and Hewagam korale—enjoyed better health than usual. The Colombo Municipality was the unhealthiest division with a mortality rate of 36·3. This division is treated of at greater length in chapter VII.

22. In the Negombo District the death-rate rose to 26·7 from an average of 22·7. Every subdivision of the district fared worse than usual, the largest increase in the mortality being in Hapitigam korale (36·1).

23. The Kalutara District had a mortality rate of 1·2 per thousand higher than the average (19·5), though 5·2 less than in the preceding quarter (25·9). Every division in the district shows enhanced mortality.

24. *Central Province.*—The mortality among the Sinhalese in this Province was normal, being at the rate of 31·6 per thousand, as against an average of 31·9.

25. In the Kandy District the Sinhalese death-rate rose to 33·2 from an average of 31·3, while among the estate Tamil population (numbering over 110,000) the deaths were in the proportion of 36·3 to a thousand, as against an average of 32·6. Five of its ten subdivisions showed diminished death-rates, viz., Harispattu, Pata Dumbara, Pata Hewaheta, Udunuwara, and Yatinuwara. All the other subdivisions had enhanced death-rates, the unhealthiest being Kandy Municipality (52·9) and Tumpane (46·5).

26. The Matale District showed a Sinhalese death-rate of 32·1, being 6·4 per thousand less than the average (38·5). All its subdivisions shared in the improvement, the healthiest being Matale east with a death-rate of 29·9. The mortality rate among the estate Tamil population was 41·2, as against the average (32·9).

27. The health of the Nuwara Eliya District was normal, the death-rate being 24·9, the average rate. Of its subdivisions, Uda Hewaheta and Kotmale show diminished death-rates, 21·6 and 24·5 respectively, as against averages of 23·1 and 25·8. Uda Hewaheta was the healthiest subdivision, the unhealthiest being Nuwara Eliya Local Board and outside and Walapane, with death-rates of 41·2 and 28·6 per thousand respectively. The mortality among the estate Tamil population was 21·1 against an average of 29·1.

28. *Northern Province.*—The death-rate of this Province (24·6) was 1·1 per thousand higher than the average (23·5), but a great improvement in the health of the population would appear on a comparison of the rates with those for the preceding quarter and the corresponding quarter of last year, which were respectively 34·4 and 39·8 per thousand of the population.

29. In the Jaffna District the death-rate was 23·1, an increase of about 2 per thousand over the mean average 21·5. Eight of its subdivisions shared in the deterioration. The unhealthiest subdivision was Vadamaradchi east with a death-rate of 47·3, the healthiest being Valikamam east with a mortality rate of 13·8 per thousand.

30. The death-rate in the Mannar District declined to 39·6 from an average of 46·8. All its subdivisions shared in the improvement, the healthiest being Nanaddan division with a death-rate of 38·9.

31. The Mullaittivu District has maintained its normal health, the rate of mortality (43·9) being nearly the same as the average (43·2). The healthiest of its subdivisions was Kilakkumulai with a death-rate of 42·6, and the unhealthiest Mulliyawalai with a death-rate 63·8 per thousand.

32. *Southern Province.*—The Southern Province, which, next to the Western Province, contains the largest Sinhalese population, was the second healthiest Province in the Island during the quarter, and showed a slightly reduced mortality rate (22·0) compared with the average (22·7).

33. In the Galle District the mortality increased from the average 21·8 to 22·5. All its subdivisions contributed towards this increase except Galle Municipality, Gangaboda pattu, Talpe pattu, and Hinidum pattu, which showed diminished death-rates. The unhealthiest subdivision was Walallawiti korale with a death-rate of 25·4.

34. The death-rate of the Matara District declined to 20·0 from an average of 21·4. Three out of its seven subdivisions showed decreased death-rates, notably Kandaboda pattu, where the death-rate declined to 19·2 from an average of 28·0. The healthiest subdivision was Gangaboda pattuwa with a death-rate of 16·6. The highest death-rate in the district was in the Matara Local Board division, viz., 37·4 per thousand.

35. The death-rate in the Hambantota District was 24·9 as against 37·6 in the previous quarter, and the average 27·8. The only subdivision which showed an improvement was Giruwa pattu west with a death-rate of 22·0 against an average of 26·3, and this was the healthiest subdivision in the district. The unhealthiest division was Magam pattu, exclusive of Four Gravets, with a death-rate of 57·0 as against 45·0 the average.

36. *Eastern Province.*—The rate of mortality among the Tamils in this Province was 38·8, i.e., an increase of 4·4 per 1,000 over the average (34·4). Batticaloa District was responsible for this increased rate. Deaths among the Moors were 36·0 per 1,000 as against an average of 32·9.

37. In the Batticaloa District the Tamil death-rate rose to 38·5 from an average of 32·1, while among the Moors it increased to 36·6 from an average of 34·3, and among the Sinhalese (numbering about 6,500) to 36·9 from 32·6. In two of the subdivisions, Chammanturai and Nadukadu, and Eruvil, Porativu, and Karavaku, the Tamils enjoyed better health than usual. In Panawa pattu, Nintavur, and Akkarai pattu, and Eruvil, Porativu, and Karavaku the Moorish death-rates diminished from the averages 35·9, 39·1, and 32·3 to 34·7, 30·9, and 22·5, respectively. The lowest Tamil rate for the quarter was in Chammanturai and Nadukadu division (24·1), while the Moorish rate was lowest in Eruvil, Porativu, and Karavaku division (22·5).

38. In the Trincomalee District the Tamil death-rate fell to 40·3 from an average of 45·2, an improvement shared in by all its subdivisions except Koddiyar pattu, in which the mortality rate rose to 38·1 from an average of 20·8. The unhealthiest division in the district was Trincomalee town with a death-rate of 45·7; and the healthiest division was Tampalakamam pattu with a death-rate of 29·8.

39. *North-Western Province.*—The North-Western Province enjoyed better health than usual, the death-rate recorded for the quarter being 35·5 as against an average 38·1.

40. The death-rate of the Kurunegala District decreased to 39·3 from an average of 42·3. Four out of its seven subdivisions shared in the improvement. The death-rate exceeds the average in the three subdivisions, Kurunegala Local Board, Dambadeni hatpattu, and Katugampola hatpattu. The highest death-rate recorded was against Kurunegala Local Board division (179·0). The healthiest subdivision during the quarter under report was Katugampola hatpattu with a death-rate of 31·3.

41. In the Puttalam District the Sinhalese death-rate diminished from 48·7 to 32·9, and the Moorish death-rate from 30·8 to 27·3, while the Tamil rate increased to 58·7 from an average of 46·8.

42. The death-rate in the Chilaw District was 21·8, an increase of 1·1 per thousand on the average (20·7). All its subdivisions have fared badly during the quarter, the unhealthiest being Pitigal korale north with a death-rate of 24·6.

43. *North-Central Province.*—In the North-Central Province the rate of mortality declined to 35·0 from an average of 40·5. All the subdivisions shared in the diminished mortality except Tamankaduwa, in which the rate rose from 37·9 to 41·2. The healthiest division in the Province during the quarter was Hurulupalata with a death-rate of 33·0 against an average of 42·2.

44. *Province of Uva.*—The Province of Uva experienced normal health during the quarter. The rate of mortality (35·1) being 4 per 1,000 less than the average (35·5). Four out of its eight divisions showed a diminished death-rate compared with the average for the nine years 1891-99. The unhealthiest division was Buttala (49·5) followed by Bintenna (38·6). The healthiest division in the Province was Udukinda with a death-rate of 29·5 per 1,000. The mortality among the estate Tamil population of this Province was 30·9, the average for the quarter being 30·0.

45. *Province of Sabaragamuwa.*—The death-rate for the quarter increased to 37·8 from an average of 32·8, the Kegalla District being responsible for the increase.

46. In the Ratnapura District the Sinhalese death-rate was 29·0 against an average of 32·5. This district would seem to have enjoyed good health during the quarter. All its subdivisions show reduced death-rates with the exception of Kolonna korale, where the death-rate rose to 32·5 from an average of 30·3. The healthiest division was Kadawata korale with a mortality rate of 23·6.

The rate of mortality among the estate Tamils was 45·4 as against the average 41·0.

47. The death-rate among the Sinhalese in the Kegalla District rose to 44·8 from an average of 33·0. All its subdivisions showed an increased death-rate except Atulugam korale, which was the healthiest subdivision in the district with a death-rate of 26·1. The unhealthiest division was Kinigoda korale with a death-rate of 63·4.

The estate Tamil mortality in the district was 45·5 as against the average 42·2.

V.—Causes of Deaths.

47. The causes of deaths registered in the Island during the quarter are given in Table X., and are summarized below:—

TABLE B.

District.	Cholera.	Small-pox.	Diarrhoea & Dysentery.	Fevers.	Violence.				All other Causes.	Total.
					Accident.	Suicide.	Homicide	Execution.		
CEYLON ...	—	14	4,646	5,519	346	31	33	6	13,274	23,869
Colombo	—	5	453	612	34	6	10	4	1,823	2,947
Negombo	—	—	85	368	9	3	5	—	518	988

Kegalla	—	—	437	331	24	—	2	—	1,114	1,908

48. *Fever and Diarrhoeal Diseases.*—Of the 23,869 deaths registered in the Island, 5,519 were reported as due to various forms of fever and 4,646 to diarrhoeal diseases, i.e., fever and diarrhoeal diseases contributed nearly 43 per cent. of the total number of deaths.

49. There were 14 deaths from smallpox during the quarter, of which 5 were in Colombo, 4 in Kandy, 3 in Nuwara Eliya, and 1 each in Badulla and Galle. Two deaths were attributed to chickenpox (1 each in Kandy and Galle) and 32 to measles (6 in Jaffna, 5 in Kandy, 4 each in Negombo, Kalutara and Chilaw, 3 in Colombo, 2 in Kurunegala, and 1 each in Matale, Nuwara Eliya, Galle, and Matara). Twenty-four deaths (10 in Batticaloa, 3 each in Colombo and Trincomalee, and 2 each in Anuradhapura and Kalutara, and 1 each in Jaffna, Mannar, Galle, and Badulla) resulted from whooping cough. Influenza was the cause of 27 deaths, of which the majority (11) were in Nuwara Eliya.

50. The other chief natural causes of death were infantile convulsions 2,587, general debility 916, worms 844, phthisis 732, pneumonia 701, general dropsy 571, anaemia 542, old age 441, thrush 345, puerperal convulsions 296, childbirth 268, rheumatism 155, premature birth 153 (85 in Badulla, 16 in Colombo, 13 in Kandy, 6 each in Jaffna and Kegalla, 4 in Matale, 3 each in Kalutara, Nuwara Eliya, Matara, Kurunegala, and Ratnapura, 2 each in Chilaw and Mullaittivu, and 1 each in Negombo, Mannar, Galle, and Puttalam), bronchitis 151, puerperal fever 110, paralysis 100, and dochmias duodenalis 53 (16 in Colombo, 12 in Kegalla, 10 in Kandy, 8 in Ratnapura, 2 each in Kalutara, Jaffna, Kurunegala, and 1 in Chilaw). Parangai proved fatal in 18 cases, of which 6 were in Kurunegala, 4 in Hambantota, 3 in Batticaloa, 2 each in Colombo and Matara, and 1 in Negombo.

51. *Deaths by Violence.*—346 deaths were attributed to accidents, of which 81 were due to drowning; 67 deaths resulted from falling from trees, 47 from snake bite, 27 from fall of heavy substances, 25 from burns and scalds, 16 from injury at birth, 14 from fall from heights, and 1 from fall from a camel; 2 persons were killed by railway trains, 1 by a tram car, and 5 by cart and carriage accidents; 4 deaths were caused by bulls, 3 by crocodiles, 2 by wild boars, 1 by a deer, 1 by a buffalo, 1 by a Brahmin lizard, 1 by a fish bite, 1 by a rat, and 1 by bees; 2 deaths were attributed to explosion in quarries, and 1 to sunstroke, and 8 to lightning.

52. *Suicide.*—Thirty-one deaths were attributed to suicide, of which 18 were by hanging, 5 by poison, 3 by drowning, 2 by cuts, and 2 by gunshot wounds. Of these, 6 occurred in Colombo, 4 each in Kandy and Kurunegala, 3 each in Negombo and Matara, 2 in Jaffna, and 1 each in Kalutara, Matale, Nuwara Eliya, Mullaittivu, Galle, Hambantota, Anuradhapura, Badulla, and Ratnapura.

53. *Homicide.*—Thirty-three deaths were attributed to murder and other forms of homicide, of which 10 were in Colombo, 5 in Negombo, 3 each in Galle and Kurunegala, 2 each in Kandy, Jaffna, Matara, and Kegalla, and 1 each in Kalutara, Matale, Hambantota, and Anuradhapura. Of the victims, 28 were Sinhalese and 5 Tamils.

54. *Executions.*—Six men were judicially executed (4 in Colombo, 1 in Galle, and 1 in Matara).

VI.—Health of the Estate Population.

55. The total number of births reported for registration from the estates in the Central, Uva, and Sabaragamuwa Provinces, and in the Colombo and Kalutara Districts of the Western Province, was 2,062 (of which 8 were Europeans, 3 Burghers, 61 Sinhalese, 1,963 Tamils, 25 Moors, and 2 Malays), and the total number of deaths was 2,507 (2 Europeans, 2 Burghers, 45 Sinhalese, 2,438 Tamils, 19 Moors, and 1 Malay), corresponding respectively to an annual birth-rate of 27·1 and a death-rate of 33·7 per 1,000. The causes of death are given in detail in Table XI., and may be summarized as follows:—

TABLE C.

Diarrhoea 481	General dropsy 90
Dysentery 457	Old age 72
General debility	... 395	Childbirth 36
Fever 182	Bronchitis 33
Pneumonia 161	Dochmias duodenalis	... 24
Malaria cachexia	... 124	Other causes 33C
Infantile convulsions	... 122		

56. The following Table D gives the estimated population of estate Tamils in each district, its birth- and death-rates for the second quarters of 1899 and 1900, the first quarter of 1900, and the average for the second quarters in 1891–99:—

TABLE D.

District.	Population.	Birth-rate per Mille per Annum.				Death-rate per Mille per Annum.			
		Average of Second Quarters, 1891–99.	Second Quarter of 1899.	First Quarter of 1900.	Second Quarter of 1900.	Average of Second Quarters, 1891–99.	Second Quarter of 1899.	First Quarter of 1900.	Second Quarter of 1900.
Kandy ...	110,983	26·2	25·0	24·5	25·1	32·6	35·9	27·0	36·3
Matale ...	17,439	28·8	24·2	25·2	30·4	32·9	46·9	36·5	41·2
Nuwara Eliya ...	74,302	28·7	24·7	20·3	21·6	29·1	25·5	16·4	21·1

57. *Kandy District*.—The total number of births reported for registration from the estates in the Kandy District was 727 (of which 695 were Tamils, 12 Sinhalese, 12 Moors, 1 Burgher, 6 Europeans, and 1 Malay), and the deaths numbered 1,024 (of which 1,004 were Tamils, 13 Sinhalese, 6 Moors, and 1 Malay). The Tamil birth-rate in the quarter was equal to 25·1, as against a mean rate of 26·2 in the second quarter of 1891–99; and the Tamil death-rate was equal to 36·3 per 1,000 as against 32·6, the mean rate for the corresponding period of 1891–99. As usual, the most fatal causes were diarrhoeal diseases, which caused 398 deaths (201 from diarrhoea and 197 from dysentery), or nearly 39 per cent. of the total number of deaths (1,024). The other chief causes of death were debility 149 (mostly deaths of infants from inability to suck milk), fevers 88, malarial cachexia 52, general dropsy 51, pneumonia 45, infantile convulsions 41, old age 23, anaemia 11, bronchitis 10, starvation and want of breast milk 9, dochmias duodenalis 9, childbed 9, worms 9, and phthisis 8.

58. *Matale District*.—The total number of births reported for registration from the estates in the Matale District was 137 (132 Tamils, 4 Sinhalese, and 1 Malay), and the deaths numbered 184 (179 Tamils, 4 Sinhalese, and 1 Burgher), and corresponded to an annual birth-rate of 30·4 against a mean rate of 28·8 for the corresponding period of 1891–99, and a death-rate of 41·2 against a mean rate of 32·9. Dysentery and diarrhoea caused 67 deaths, i.e., 36 per cent. of the total number of deaths (184), debility 28, fevers 22, pneumonia 18, infantile convulsions 8, old age 6, and general dropsy 5.

59. *Nuwara Eliya District*.—The total number of births reported for registration from the estates in the Nuwara Eliya District was 413 (399 Tamils, 11 Sinhalese, and 3 Moors), and the deaths numbered 405 (391 Tamils, 7 Moors, 6 Sinhalese, and 1 European), and corresponded to an annual birth-rate of 21·6 against a mean rate of 28·7 in the second quarters of 1891–99, and a death-rate of 21·1 against a mean rate of 29·1. Dysentery and diarrhoea were fatal in 175 cases, or 43 per cent. of the total deaths (405). 80 deaths were attributed to debility (mostly of infants from inability to suck), 46 to pneumonia, 16 to infantile convulsions, 14 to dropsy, 13 to fevers, 13 to old age, and 9 to influenza.

60. *Badulla District*.—The total number of births reported for registration from the estates in the Badulla District was 295 (1 European, 1 Sinhalese, 1 Burgher, 291 Tamils, and 1 Moor), and the deaths numbered 256 (253 Tamils and 3 Sinhalese), and corresponded to an annual birth-rate of 35·5 against a mean rate of 32·8 in the corresponding period of 1891–99, and a death-rate of 30·9 against a mean rate of 30·0. Dysentery and diarrhoea were fatal in 68 cases, or nearly 26 per cent. of the total number of deaths (256), debility in 53 cases (mostly of infants from inability to suck), pneumonia in 30, fevers in 18, infantile convulsions in 13, malarial cachexia in 12, old age in 8 bronchitis in 4, and general dropsy in 4.

61. *Ratnapura District*.—The total number of births reported for registration from the estates in the Ratnapura District was 127 (118 Tamils, 7 Sinhalese, 1 Burgher, and 1 European), and the deaths numbered 107 (103 Tamils, 3 Sinhalese, and 1 Burgher), and corresponded respectively to an annual birth-rate of 52·6 and a death-rate of 45·4, as against averages of 31·0 and 41·0 respectively. Dysentery and diarrhoea were fatal in 40 cases, or nearly 31 per cent. of the total number of deaths. 17 deaths were attributed to debility, 10 to infantile convulsions, 8 to malarial cachexia, 6 to dochmias duodenalis, 5 to childbed, and 4 to pneumonia.

62. *Kegalla District*.—The total number of estate births reported for registration was 243 (220 Tamils, 16 Sinhalese, and 7 Moors), and the deaths numbered 359 (343 Tamils, 9 Sinhalese, 6 Moors, and 1 European), and corresponded to an annual birth-rate of 29·2 as against 21·5, the mean rate for the last nine years 1891–99, and a death-rate of 45·5 against the mean rate (42·2) for the corresponding quarter of 1891–99. Here, as elsewhere, the most fatal causes were diarrhoeal diseases 142 (87 diarrhoea, 55 dysentery), or nearly 40 per cent. of the total number of deaths (359). The other chief natural causes were debility 37, malarial cachexia 35, fevers 24, infantile convulsions 21, pneumonia 13, old age 11, childbed 10, dochmias duodenalis 9, and general dropsy 8.

63. *Colombo District*.—The total number of births reported for registration from the estates of the Colombo District, by which is meant the Avisawella division of the district, was 55 (51 Tamils and 4 Sinhalese), and the number of deaths was 65 (64 Tamils and 1 Sinhalese), and corresponded to an annual birth-rate of 38·0 and a death-rate of 47·7, as against averages of 18·9 and 75·4 respectively. The birth- and death-rates among the Sinhalese inhabitants of the division (Hewagam korale) were 43·1 and 16·7. Diarrhoea and dysentery were fatal in 17 cases. Eleven deaths were attributed to fevers, 10 to debility, 7 to infantile convulsions, 4 to old age, and 4 to general dropsy.

64. *Kalutara District*.—The total number of estate births registered in the Kalutara District was 65 (57 Tamils, 6 Sinhalese, and 2 Moors), and the deaths numbered 107 (101 Tamils and 6 Sinhalese), and corresponded to an annual birth-rate of 22·3 and a death-rate of 39·6, as against averages of 11·8 and 43·4 respectively. The largest number of deaths in this district, as elsewhere, was due to diarrhoeal diseases, to which 31 deaths, i.e., nearly 30 per cent. were attributed. The other principal causes of death were debility 21, fevers 10, malarial cachexia 7, infantile convulsions 6, old age 5, and pneumonia 4.

VII.—Health of the Town of Colombo.

65. The deaths registered in the town of Colombo during the quarter numbered 1,151. This, added to three deaths of town residents which occurred in the Infectious Diseases Hospital, Kanatta (outside the town), and were registered by an extra-urban registrar, makes a total of 1,154, corresponding to a rate of 32·0 per 1,000 per annum, being a decline of 4 per cent., compared with the mean rate for the second quarter in the last seven years (33·5).

66. The births registered in the quarter numbered 788, representing an annual rate of 21·9 per 1,000, which is an increase of 2 per cent. on the mean rate for the quarters in the last seven years (21·4).

67. As usual, the death-rate exceeded the birth-rate, due mainly to the preponderance of males over females (chiefly among the Europeans, Indian Tamils, and Mohammedans), to the presence of hospitals, which add to the mortality of the town, and to the registration of births, which, though much improved, is still defective, especially among the Moors.

68. The subjoined Table E gives the births and deaths and their rates for each nationality during the second quarter of this year and last year and the average rates for the second quarters in 1893–99:—

TABLE E.

Nationality.	Population at the Census of 1891.	Births.			Deaths.			Birth-rate per 1,000 per Annum.	Death-rate per 1,000 per Annum.
		Average of Second Quarters, 1893–99.	Second Quarter, 1899.	Second Quarter, 1900.	Average of Second Quarters, 1893–99.	Second Quarter, 1899.	Second Quarter, 1900.

								21·9	28·8
								33·5	32·0
								38·9	34·0

* Including three deaths of town residents which occurred at the Infectious Diseases Hospital, Kanatta (outside the town limits).

69. The birth- and death-rates given in the above table for Europeans, Malays, and "Others" are not reliable, owing chiefly to their population being too small for purposes of rate calculation.

70. Excluding the rates of these sections of the population, the lowest death-rate was, as usual, among the Burghers (27·8, against an average of 29·4 in 1893–99) and the highest among the Tamils (43·8, against an average of 39·8). The Sinhalese death-rate (36·3) shows a rise of about 5 per cent. and the Moorish death-rate a decline of about 10 per cent.

71. All the nationalities except Moors and "Others" show considerably increased birth-rates as compared with the averages—the Burghers an increase of 49 per cent., the Sinhalese of 31 per cent., and the Tamils of 53 per cent. On the other hand, the Moorish birth-rate (21·3) has declined 43 per cent. below the average (38·0).

72. The number of births and deaths of the different races in the different wards of the town, their rates per 1,000, the principal zymotic causes of death, &c., during the second quarter of 1900, are shown in the following table:—

TABLE F.

Name of Ward.	Population at Census of 1891.	Births.						Deaths.						Causes of Death.						Annual Rate per 1,000.				
		Total Births.		Class.				Total Deaths.		Class.				Causes of Death.

73. The unhealthiest division of the town was the Slave Island Ward with an annual death-rate of 33·6 per 1,000 followed by Kotahena (32·5). The low birth- and death-rates of the Fort and Galle Face and the Pettah Wards are due to their population being chiefly a floating adult male one. Excluding these two divisions, the

healthiest division in the quarter was St. Paul's Ward with a death-rate of 25·3, being slightly better than the Kollupitiya Ward, where the death-rate was 25·9. The highest birth-rate was in New Bazaar Ward (27·7).

74. There were no deaths from cholera. Two deaths from smallpox occurred in the Infectious Diseases Hospital, Kanatta, to which the patients were removed from Slave Island, while three deaths were attributed to influenza.

75. Phthisis, bronchitis, and pneumonia were fatal in 241 cases (against an average of 199 in the corresponding period of the last five years), diarrhoea and dysentery in 188 (average 159), infantile convulsions in 113 (average 135), debility in 100 (average 94), simple and ill-defined fever in 72 (average 47), enteric fever in 34 (average 24), remittent fever in 30 (average 58), diseases of the circulatory system in 30 (average 14), worms in 24 (average 45), tetanus in 19 (average 27), anaemia in 17 (average 13), premature birth in 14 (average 13), parturition in 14 (average 20), malarial cachexia in 10 (average 33). Other causes of death were diseases of the liver 9, appolexy 9, diseases of the brain 8, enteritis 6, Bright's disease 5, diabetes 5, epilepsy 4.

76. Seven deaths were attributed to accidents, of which 3 were due to drowning, 1 to poison, 1 to fall of a heavy substance, 1 to being run over by a tram car.

77. Six deaths were attributed to homicide and four to suicide.

VIII.—Health of other Towns.

78. The total number of births registered in the principal towns (exclusive of Colombo) during the quarter numbered 2,096, corresponding to an annual rate of 36·9 per 1,000, slightly lower than the average for the corresponding period in 1891–99 (37·2).

79. The deaths numbered 2,086 and were at the annual rate of 36·7 per 1,000, a rise of 6 per cent. over the average (34·6).

80. The following Table G shows the birth- and death-rates in each of the principal towns of the Island for the second quarters of 1900 and 1899 and the average rates for the second quarters in 1891–99.

81. In the case of the towns of Moratuwa, Panadure, Gampola, Nawalapitiya, Mannar, Mullaittivu, Vavuniya, Tangalla, and Kegalla, the rates from 1891–97 not being available the averages given are for 1898 and 1899.

TABLE G.

Town.	Population at the Census of 1891.	Second Quarter, 1900.			Birth-rate per Mille per Annum			Death-rate per Mille per Annum			Second Quarter, 1900

<i>Province of Sabaragamuwa.</i>											
Ratnapura	3,527	29	42	9	35·8	40·9	33·0	49·7	71·6	47·8	37·5
Kegalla	3,143	23	33	22	23·6	25·5	29·4	38·9	43·4	42·1	14·0

82. The death-rates are given inclusive as well as exclusive of hospital and jail deaths. In some of the towns which attract large numbers of estate coolies and destitute poor to the hospitals, the difference between the two rates is striking, e.g., Gampola 102·5 and 20·2, Nawalapitiya 100·1 and 33·1, Kurunegala 87·1 and 40·6, Anuradhapura 76·8 and 46·4, Matale 66·9 and 33·4, Kegalla 42·1 and 14·0. Excluding hospital and jail deaths, the highest death-rate for the quarter was in Anuradhapura 46·4 followed by Batticaloa 45·3, and the lowest in Kegalla 14·0 followed by Panadure 18·5 and Chilaw 19·5.

Registrar-General's Office,
Colombo, October 17, 1900.

SAM. HAUGHTON,
Registrar-General.
