

SUPPLEMENT

TO

The Ceylon Government Gazette.

PART I.

No. 5,786—FRIDAY, JUNE 14, 1901.

VITAL STATISTICS OF CEYLON.

REPORT OF THE REGISTRAR-GENERAL FOR THE FOURTH QUARTER OF 1900.

I.—Population.

1. The estimated population of the Island on the last day of the quarter was 3,599,460, an increase of 19,932 on the previous quarter, due to an excess of 10,864 births over deaths and of 9,068 arrivals over departures of Indian coolies. Table I. in the appendix gives the area and estimated population of each Province and district of the Island in the quarter and the number of marriages, births, and deaths registered therein.

2. *Arrivals and Departures of Indian Coolies.*—The total number of Indian coolies who arrived in the Island this quarter was 32,237 and of departures 23,169. As compared with the averages for the corresponding quarter of the last five years, the arrivals show an excess of 33 per cent. and the departures of 27 per cent.

II.—Marriages.

3. *Marriages.*—The number of general marriages—i.e., marriages other than Kandyan or Mohammedan—registered in this quarter was 4,399 and of Kandyan marriages 2,184.

Table VI. in the appendix shows the marriages solemnized among the general community in every Province and district in the Island, the civil condition, nationality, the highest, lowest, and mean ages of the parties, the mode of solemnization, the number of bridegrooms and brides who were unable to sign their names in the register.

Table VII. in the appendix gives similar information in respect of the Kandyans.

4. *First Marriages; Re-marriages.*—Of the 4,399 general marriages, 3,842 (equal to 87 per cent.) were between bachelors and spinsters, 110 between bachelors and widows, 378 between widowers and spinsters, 63 between widowers and widows, 3 between divorced men and spinsters, 2 between bachelors and divorced women, and one between a divorced woman and a widower. Of the 2,184 Kandyan marriages, 1,688 (or 77 per cent.) were between bachelors and spinsters, 233 between widowers and spinsters, 97 between bachelors and widows, 79 between widowers and widows, 38 between divorced men and spinsters, 25 between divorced women and bachelors, 12 between divorced women and widowers, 7 between divorced men and divorced women, and 5 between divorced men and widows.

5. *Age at Marriage.*—The mean age at marriage for the general community was 25·2 for males and 21·0 for females, and for Kandyans 28·2 for males and 21·4 for females.

6. *Minors.*—In the general community 4 per cent. of the bridegrooms and 50 per cent. of the brides and amongst the Kandyans 13 per cent. of the bridegrooms and 62 per cent. of the brides were under 21 years of age.

7. *Mixed Marriages.*—There were 40 mixed marriages in the quarter: 6 between Europeans and Burghers, 11 between Burghers and Sinhalese, 3 between Burghers and Tamils, 19 between Sinhalese and Tamils, and 1 other mixed marriage.

8. *Signatures in Marriage Register.*—Of the 8,798 persons married among the general community this quarter, 980 men and 3,350 women signed the register with marks, that is to say, 78 per cent. of the men and 24 per cent. of the women were able to write their names. Of the 4,368 persons married among the Kandyans, 801 men and 2,116 women signed the register with marks, i.e., 63 per cent. of the men and 3 per cent. of the women were able to write their names.

III.—Births and Deaths.

9. *Births.*—The births registered in the quarter numbered 37,151 (42 Europeans, 172 Burghers, 26,764 Sinhalese, 7,605 Tamils, 2,442 Moors, 93 Malays, and 33 others), and were in the proportion of 45·8 to 1,000 persons living as against 37·8, the average of the corresponding quarters in the ten years 1890 to 1899, and 40·7, the rate in the fourth quarter of last year.

10. *Deaths.*—The deaths registered in the quarter amounted to 26,287 (39 Europeans, 141 Burghers, 16,651 Sinhalese, 7,436 Tamils, 1,809 Moors, 96 Malays, 36 war prisoners, and 79 others), and corresponded to an annual rate of 32·4 per 1,000 as against 27·8, the average for ten preceding fourth quarters, and 29·2 in the fourth quarter of last year.

11. The births and deaths and their rates in this quarter are compared in the following statement with the results obtained in the previous quarter, the fourth quarter of last year, and the averages of the corresponding quarters in the years 1890 to 1899:—

TABLE A.

	Births.	Deaths.	Per Mille per Annum.	
			Birth-rate.	Death-rate.
Average of ten previous fourth quarters in 1890-99 29,276	... 21,557	37·8	27·8
Fourth quarter of 1899 32,720	... 23,449	40·7	29·2
Third quarter of 1900 30,242	... 26,150	37·3	32·3
Fourth quarter of 1900 37,151	... 26,287	45·8	32·4

12. Table II. gives similar information to A in regard to each Province and district ; Table I. gives the births and deaths according to sex, with the marriages, population, and area of each Province and district ; Table VIII. the births according to nationality and sex ; Table IX. the deaths for each month of the quarter according to nationality in every Province and district. The causes of deaths are shown in table X. for every Province and district, and in Table XI. for the estates in the Central, Uva, and Sabaragamuwa Provinces, and in Kalutara and Colombo Districts of the Western Province ; and in Table XII. for the town of Colombo according to wards and nationalities. Table XIII. shows the period of life at which the deaths of various races occurred in every district.

13. *Sex.*—Of the total number of births (37,151), 19,120 were males and 18,031 were females, i.e., 106 males to 100 females. Of the total number of deaths (26,287), 13,481 were males and 12,806 were females. Out of equal numbers living of each sex, there died 932 males to 1,000 females.

14. *Infant Mortality.*—The deaths of infants under one year numbered 6,378, and were in the proportion of 172 to 1,000 births. The rate of infant mortality varied in different districts from 341 (for Tamils) in Puttalam, 304 (for Tamils) in Mannar, 266 (for Tamils) in Trincomalee, 251 (for Sinhalese) in Badulla, 247 (for Sinhalese) in Anuradhapura, 207 (for Moors) in Puttalam, to 121 (for Sinhalese) in Matara, 119 (for Sinhalese) in Colombo and Negombo, 116 (for Sinhalese) in Chilaw, and 108 (for Sinhalese) in Kalutara.

15. *Centenarians.*—Forty-seven deaths (18 males and 29 females) were reported to be of centenarians, but the ages reported cannot be relied on.

IV.—State of Public Health.

16. The general health of the population during the quarter was worse than usual, the death-rate (32·4) having being 5·4 per mille higher than the rate (27·8) for the corresponding period of 1890-99. The increase in the mortality rate is due to the large number of cooly immigrants who arrived in the Island during the second and third quarters of 1900.

17. Tables III., IV., and V. in the appendix show the births and deaths, the birth-rates and the death-rates for all ages and for infants in the several Provinces and districts of the Island, and in the revenue subdivisions of those districts for the quarter under review, for the preceding quarter, for the corresponding quarter of last year, and the average rate for the corresponding period in the last nine years 1891-99. The rates shown are for the Sinhalese only in the districts which are mainly inhabited by the Sinhalese, and for the Tamils only where the Tamils form the bulk of the population. These separate rates furnish more trustworthy data for comparing the relative sanitary condition of those districts and subdivisions of the Island than if the rates included other nationalities temporarily resident in them. In the Puttalam District, where the Sinhalese and Mohammedans are found in almost equal numbers, and in the Batticaloa District, which is inhabited almost in equal numbers by Tamils and Mohammedans, the rates are given for the principal sections of the population.

18. Judged by the mortality of the indigenous population, the healthiest Province in the quarter was the Western (21·0) ; the healthiest district Negombo (19·2) ; and the healthiest subdivision Chammanturai and Nadukadu in the Eastern Province (11·2).

19. *Western Province.*—As usual, the Western ranks as the healthiest Province in the Island. The Sinhalese mortality of this Province, which contains about a third of the entire Sinhalese population of the Island, was at the annual rate of 21·0 per 1,000 as against 18·1, the average of the fourth quarter in the years 1891-99 and 22·6 the rate for the preceding quarter.

20. In the Colombo District the mortality was in the proportion of 20·8 deaths to a 1,000 of the estimated population as against an average of 17·5. All its subdivisions fared worse than usual. The Colombo Municipality was as usual the unhealthiest division in the district with a death-rate of 40·6 as against an average of 36·1, and is considered at greater length in another part of the report (chapter VII.).

21. The Negombo District, although the healthiest in the Island during the quarter, fared worse than usual with a death-rate of 19·2 as against the average 17·8. All its subdivisions showed enhanced death-rates with the exception of Hapitigam korale, where the mortality rate slightly declined (17·2 as against the average 17·4). The unhealthiest division was Negombo Local Board with a death-rate of 51·0 against an average of 39·2.

22. In the Kalutara District deaths were in the proportion of 22·8 per mille, an increase of 3·2 per 1,000 compared with the average (19·6). Every division in the district contributed to this increase, notably Kalutara Local Board, where the death-rate rose to 27·1 from an average of 23·1.

23. *Central Province.*—The health of the Sinhalese population in the Central Province was not satisfactory, the deaths recorded corresponding to an annual rate of 35·7, or 3·4 per 1,000 more than the average 32·3, Kandy and Nuwara Eliya Districts being responsible for the deterioration.

24. In the Kandy District the Sinhalese death-rate was equal to 35·0 per mille as against 40·1 in the third quarter of 1900 and 29·2 in the corresponding period in 1891-99. All its subdivisions fared worse than usual with the exception of Yatinuwara, which was the only division that showed an improvement in the health of the population, its mortality rate diminishing to 30·6 from an average of 35·1. The unhealthiest division was as usual the Kandy Municipality, where the death-rate was as high as 53·8, or more than double the average (26·2). The mortality rate of the estate Tamil population of the district was 53·5 against an average of 29·4.

25. In the Matale District there was an appreciable improvement in the Sinhalese death-rate for the quarter (35·8), being about 8 per 1,000 less than the average (43·2). This improvement was shared by all its subdivisions, with the exception of Matale Local Board, where the mortality rate rose to 67·7 from an average of 43·8. The healthiest subdivision was Matale north, in which the death-rate diminished to 24·1 from an average of 42·1. Among the estate population of the Matale District estimated at 17,439 deaths were in the proportion of 60·3 per 1,000.

26. Nuwara Eliya District fared badly during the quarter, its death-rate having increased to 37·9 from an average of 30·1. With the exception of Kotmale where the mortality diminished to 24·1 from an average of 26·1, all the other divisions showed increased death-rates, the unhealthiest having been Uda Hewaheta with a death-rate of 47·1 against the average 31·9. The estate Tamil mortality during the quarter was 23·2 against an average of 29·5.

27. *Northern Province.*—The death-rate of this Province (21·9) was 3·9 per 1,000 less than the average 25·8 for the corresponding period of 1891-99. Jaffna and Mullaitivu Districts shared in the improvement, while Mannar District showed enhanced death-rates.

28. In the Jaffna District the deaths corresponded to an annual rate of (20·3), a fall of (4·5) per 1,000 when compared with the average (24·8). All its subdivisions shared in the improvement, with the exception of Pachchilaippalli, where the death-rate rose to 35·7, or 8·7 per 1,000 when compared with the average 27·0. The

healthiest division during the quarter was Vadamaradchi west, where the mortality rate declined to 15·4 from the average 25·6.

29. The District of Mannar fared worse than usual, the rate of mortality having increased to 40·1 from the average of 29·3. There was, however, a slight improvement in the health of the people when compared with the third quarter of 1900 (42·0). The healthiest division during the quarter under review was Mannar islands (36·3).

30. The Mullaittivu District fared better than usual, its death-rate (39·6) showing a diminution of 2·6 per 1,000 compared with the average (42·2). This improvement was shared by all its subdivisions, with the exception of Mulliynwala, where the mortality rate rose from 39·6 to 50·7 per 1,000 of the population. The healthiest division was Kilakkumulai with a death-rate of 36·3.

31. *Southern Province.*—The Southern Province did not enjoy good health during the quarter, the death-rate having been 30·3 per 1,000 of its population as against the average 26·4. Galle and Matara Districts were responsible for the deterioration, Hambantota District having showed a slight improvement.

32. In the Galle District the deaths were equal to an annual rate of 31·6 as against an average of 26·8, a deterioration shared by all its subdivisions without exception. The unhealthiest division during the quarter was Talpe pattu, where the rate of mortality increased to 34·2 from an average of 27·9.

33. The health of the Matara District during the quarter was not satisfactory, the mortality rate having risen to 30·8 from an average of 25·3. Six out of the seven divisions in the district shared in the deterioration, the unhealthiest being Matara Local Board with a death-rate of 48·9. The only division which has showed an improvement in the health of the people was Kandaboda pattu, where the rate diminished to 26·4 per mille compared with the average 28·1.

34. In the Hambantota District there was an improvement in the health of the people, the death-rate falling to 26·2 from an average of 27·6. This improvement extended to three out of its four divisions, the healthiest having been Giruwa pattu west (24·0). The only division which showed an enhanced death-rate during the quarter was Giruwa pattu east (28·9) against the average 24·7.

35. *Eastern Province.*—The health of the Tamils in the Eastern Province was satisfactory, their death-rate having diminished to 28·0 from an average of 29·9. This improvement was shared by both Batticaloa and Trincomalee Districts. The health of the Sinhalese and Mohammedan population was normal.

36. In the Batticaloa District the death-rate among the Tamils declined to 27·3 from the average 29·3, and among the Moors to 22·9 from the average 23·0. There was an improvement in the health of the Tamil population in Manmunai pattu, Eruvil, Porativu, and Karawaku pattu, Nintavur and Akkarai pattu, and notably in Chammanturai and Nadukadu pattu, in which the death-rate declined to 11·2 from an average of 22·7. The divisions which showed enhanced death-rates were Eravur, Rukam, and Koralai pattu and Batticaloa Local Board, the latter having been the unhealthiest with a death-rate of 48·1 against the average 19·6.

37. In the Trincomalee District the Tamils fared better than usual, their death-rate having been 31·6 as against the average 37·2. All its subdivisions showed diminished death-rates, except Koddiyar pattu, where the rate increased to 29·3 from an average of 24·5.

38. *North-Western Province.*—The rate of mortality among the Sinhalese of the North-Western Province was equal to 29·4 per 1,000 of the estimated population, while the average for the quarter was 32·6 and the average for the corresponding quarter of last year was 30·2, an improvement for which the Kurunegala and Puttalam Districts were responsible, Chilaw District having fared worse than usual.

39. In the Kurunegala District the Sinhalese death-rate fell to 31·9 from 35·6, the average for the quarter, and from 41·1, the rate for the third quarter of 1900. To this improvement the majority of its subdivisions contributed, the exceptions being Kurunegala Local Board, of which the rate is usually high and, owing to the scantiness of its population, untrustworthy. Dambadeni hatpattu, and Katugampola hatpattu, in both of which the increase in the rate was but slight. The healthiest division in the district was Wanni hatpattu (29·6).

40. In the Puttalam District the Sinhalese and Moors fared better and the Tamils worse than usual. The death-rate for the Sinhalese and Moors were 32·5 and 34·3, as against the averages 39·8 and 35·8 respectively. The Tamil death-rate rose to 45·7 from the average 43·9.

41. The health of the Chilaw District was worse than usual, the mortality rate having risen from 16·7 to 20·3 per 1,000 of its population. All its subdivisions shared in the deterioration, the unhealthiest having been Chilaw town with a death-rate of 31·2 against an average of 25·8.

42. *North-Central Province.*—The North-Central Province was healthier than usual during the quarter under review. The mortality among the Sinhalese population was in the proportion of 34·2 per 1,000 against an average of 36·3. The majority of its subdivisions showed diminished death-rates, the healthiest having been Nuwaragam palata with a death-rate of 32·5 against an average of 39·7. In Kalagam palata and Tamankaduwa the mortality rates increased to 31·7 and 35·6 from the averages 31·6 and 34·5 respectively.

43. *Province of Uva.*—The mortality among the Sinhalese population of this Province was in the proportion of 56·4 per 1,000, a rise of 8·3 per 1,000 when compared with the average (48·1). This increase is chiefly due to an epidemic of cholera which prevailed in the district during the quarter. All its subdivisions showed enhanced death-rates, notably Badulla Local Board, in which the death-rate (87·8) more than doubled the average (42·8). Only Wellawaya (49·6) and Wellassa (57·6) divisions showed diminished rates of mortality when compared with the average rates. Deaths among the estate Tamil population of this Province estimated at 32,838 were equal to an annual rate of 37·5 per mille.

44. *Province of Sabaragamuwa.*—The health of this Province was worse than usual, the Sinhalese death-rate having risen to 31·4 per 1,000 from an average of 29·2, although compared with the rate for the preceding quarter (35·4) of 1900, there was a slight improvement in the health of the people. Kegalla District was responsible for the enhanced mortality rate during the quarter under report.

45. In the Ratnapura District the Sinhalese mortality rate declined to 33·3 from an average of 35·1. Five out of its eight subdivisions shared in the improvement. The exceptions were Kolonna korale (37·0), Ratnapura Local Board (44·7), and Kadawata korale, the unhealthiest division (52·6). Among estate Tamils the mortality rate was 60·8 as against an average of 38·7.

46. In the Kegalla District the Sinhalese death-rate rose from an average of 24·3 to 29·9, which however was an improvement on the rate for the third quarter of 1900 (39·5). The majority of the subdivisions of this district had higher rates than their averages. The healthiest division in the district was Panawal korale (22·4) and the unhealthiest Paranakuru korale (40·0). To every 1,000 of the estate Tamils in this district, which is estimated to contain over 30,000, there were 47·2 deaths as against an average of 30·9.

V.—Causes of Deaths.

47. The causes of deaths registered during the quarter are given in Table X., and are summarized below :—

TABLE B.

District.	Cholera.	Small-pox.	Fevers.	Diarrhoea & Dysentery.	Violence.				All other Causes.	Total.
					Accident.	Suicide.	Homicide	Execution.		
CEYLON	202	8	4,652	6,451	430	35	30	6	64,473	26,287
Colombo	—	1	482	551	44	7	6	3	2,106	3,200
Negombo	5	—	208	96	14	1	3	—	454	781

Kurunegala	—	—	367	176	37	1	4	1	1,306	1,892
Puttalam	—	—	55	31	3	—	2	—	136	227
Chilaw	7	—	90	24	5	—	3	—	246	375
Badulla	47	—	219	60	11	1	—	—	372	710
Anuradhapura	95	—	402	773	29	2	1	—	997	2,299
Ratnapura	—	—	147	368	39	1	1	1	513	1,070
Kegalla	—	—	176	409	36	2	1	1	830	1,455

48. *Fever and Diarrhoeal Diseases.*—Of the 26,287 deaths registered in the quarter, 4,652 were reported as due to various forms of fever and 6,653 to diarrhoeal diseases, i.e., fevers and diarrhoeal diseases contributed 43 per cent. of the total number of deaths.

Under the head "Diarrhoeal Diseases" is included cholera, which accounted for 202 deaths, of which 95 were in Anuradhapura, 47 in Badulla, 18 in Batticaloa, 14 each in Kandy and Matale, 7 in Chilaw, 5 in Negombo, and 2 in Nuwara Eliya.

49. There were 8 deaths from smallpox this quarter (5 in Matale, 2 in Kandy, and 1 in Colombo). Chickenpox proved fatal in 5 cases (3 in Kandy, 1 each in Kalutara and Badulla), and measles 42 (13 in Kandy, 10 in Badulla, 4 each in Matale and Jaffna, 2 each in Colombo and Nuwara Eliya, and 1 each in Negombo, Kalutara, Mullaittivu, Matara, Kurunegala, Anuradhapura, and Kegalla). Thirty-two deaths were attributed to whooping cough (9 in Batticaloa, 7, in Colombo, 6 in Galle, 4 in Kalutara, 3 in Trincomalee, and 1 each in Negombo, Nuwara Eliya, and Ratnapura). Thirty-three deaths resulted from influenza (14 in Nuwara Eliya, 4 each in Colombo and Chilaw, 3 each in Kalutara and Kandy, 2 in Ratnapura, and 1 each in Matale, Matara, and Hambantota) and 1 from mumps in Ratnapura.

50. The other chief natural causes of death were infantile convulsions 2,596, debility 1,276, phthisis 867, anaemia 785, general dropsy 720, pneumonia 698, old age 602, worms 601, malarial cachexia 385, childbirth 323, puerperal convulsions 308 (91 in Kurunegala, 41 in Badulla, 23 in Colombo, 21 each in Matale and Kegalla, 17 in Anuradhapura, 15 each in Galle and Kalutara, 12 in Ratnapura, 11 in Matara, 10 in Kandy, 9 in Chilaw, 7 in Hambantota, 6 in Negombo, 3 in Nuwara Eliya, 2 each in Jaffna and Batticaloa, and 1 each in Mullaittivu and P puttalam), premature birth 213 (97 in Badulla, 29 in Colombo, 18 in Galle, 16 in Kandy, 12 each in Nuwara Eliya and Jaffna, 11 in Ratnapura, 7 in Kalutara, 4 each in Mullaittivu and Chilaw, 1 each in Matara, Anuradhapura, and Kegalla), thrush 193, bronchitis 174, rheumatism 163, tetanus 102, dochmias duodenalis 72 (35 in Colombo, 14 in Kandy, 11 in Kegalla, 3 in Chilaw, 2 each in Nuwara Eliya and Ratnapura, and 1 each in Jaffna, Galle, Matara, Kurunegala, and Badulla), want of breast-milk 67 (20 in Kandy, 10 in Badulla, 8 in Kegalla, 7 in Trincomalee, 4 in Negombo, 3 in Nuwara Eliya, 2 each in Kalutara, Matara, Kurunegala, Puttalam, Chilaw, and Ratnapura, 1 each in Matale and Batticaloa), hydrophobia 14 (2 each in Colombo, Kandy, Kurunegala, and Chilaw, and 1 each in Negombo, Kalutara, Galle, Hambantota, Badulla, and Kegalla), and parangi 12.

51. *Deaths by Violence.*—Of the 501 deaths attributed to violence, 111 deaths were reported to be due to drowning, 96 to fall from trees, 56 to snake bite, 27 to burns and scalds, 22 to poison, 22 to injury at birth, 18 to gunshot wounds, 12 to falls other than from trees, 9 to being run over by cart, 6 to being run over by train, 7 to lightning, 6 to fall of heavy substance ; 2 deaths were caused by fall into pits and 2 by machinery ; 2 deaths were attributed to bulls, 2 to alligators, 1 to a buffalo, 1 to wasps, and 1 to a rat bite ; 1 death resulted from a surgical operation and 1 from being run over by a tram car.

52. *Suicide.*—Thirty-five deaths were attributed to suicide, of which 15 were by hanging, 6 by drowning, 3 by poison, and 2 by cut stab, and 9 otherwise. Of these, 1 was a European, 19 Sinhalese, 13 Tamils, 1 Moor, and 1 other.

53. *Murder.*—As many as 30 deaths were attributed to murder and other forms of homicide (25 Sinhalese, 4 Tamils, and 1 Moor). Of these, 6 occurred in Colombo, 4 in Kurunegala, 3 each in Negombo and Chilaw, 2 each in Kandy, Galle, and Puttalam, and 1 each in Kalutara, Matale, Jaffna, Matara, Hambantota, Badulla, Ratnapura, and Kegalla.

54. *Executions.*—Six men (5 Sinhalese, 1 Tamil) were judicially executed, 3 in Colombo, and 1 each in Kurunegala, Ratnapura, and Kegalla.

VI.—Health of the Estate Population.

55. The total number of births reported for registration from the estates in the Central, Uva, and Sabaragamuwa Provinces, and in the Colombo and Kalutara Districts of the Western Province, was 2,419 (of which 3 were Europeans, 4 Burghers, 71 Sinhalese, 2,322 Tamils, 16 Moors, and 3 Malays), and the total number of deaths was 3,442 (6 Europeans, 3 Burghers, 53 Sinhalese, 3,361 Tamils, 18 Moors, and 1 other), corresponding respectively to an annual rate of 31.7 and 45.9 per 1,000. The causes of death are given in detail in Table XI., and may be summarized as follows :—

TABLE C.

Dysentery	...	698	Malarial cachexia	...	186	Childbirth	...	35
Diarrhoea	...	659	General dropsy	...	154	Anæmia	...	34

Total ...	290,391	28·2	24·4	28·0	31·7	32·6	28·3	40·5	45·9

57. *Kandy District.*—The total number of births reported for registration from the estates in Kandy District was 1,014 (of which 983 were Tamils, 19 Sinhalese, 8 Moors, 2 Malays, 1 Burgher, and 1 European), and the deaths numbered 1,536 (of which 1,497 were Tamils, 22 Sinhalese, 11 Moors, 1 other, and 5 Europeans). The Tamil birth-rate in the quarter was equal to 35·1 as against a mean rate of 27·4 in the fourth quarters of 1891–99, and the Tamil death-rate was equal to 53·5 per 1,000 as against the mean rate of 29·4 for the corresponding period of 1891–99. As usual, the most fatal causes were diarrhoeal diseases, which caused 620 deaths (266 from diarrhoea, 343 from dysentery, and 11 from cholera), or nearly 40 per cent. of the total number of deaths. The other chief causes of deaths were debility 242 (including mostly deaths of infants from inability to suck milk), malarial cachexia 107, general dropsy 94, pneumonia 74, infantile convulsions 68, old age 50, bronchitis 24, anaemia 15, dochmias duodenalis 12, childbirth 10, starvation and want of breast-milk 7, and phthisis 7.

58. *Matale District.*—The total number of births reported for registration from the estates in the Matale District was 149 (144 Tamils, 1 Malay, 1 Moor, and 3 Sinhalese), and the deaths numbered 269 (265 Tamils, 2 Sinhalese, and 2 Burghers), and corresponded to an annual birth-rate of 32·8 against a mean rate of 28·2 for the corresponding periods of 1891–99, and a death-rate of 60·3 against a mean rate of 34·3 in the fourth quarters of 1891–99. Dysentery and diarrhoea caused 90 deaths, i.e., 33 per cent. of the total number of deaths, fevers 18, debility 29, pneumonia 33, cholera 14, general dropsy 11, infantile convulsions 10, and old age 7.

59. *Nuwara Eliya District.*—The total number of births reported for registration from the estates in the Nuwara Eliya District was 455 (435 Tamils, 15 Sinhalese, 2 Moors, 2 Europeans, and 1 Burgher), and the deaths numbered 443 (434 Tamils, 8 Sinhalese, and 1 Moor), and corresponded to an annual birth-rate of 23·3 against a mean rate of 27·4 in the fourth quarters of 1891–99, and a death-rate of 23·2 against a mean rate of 29·5. Dysentery and diarrhoea were fatal in 161 cases, or nearly 39 per cent. of the total number of deaths. Ninety deaths were attributed to debility (mostly of infants from inability to suck), 41 to pneumonia, 27 to fevers, 20 to general dropsy, 17 to old age, and 16 to infantile convulsions.

60. *Badulla District.*—The total number of births reported for registration from the estates in the Badulla District was 296 (293 Tamils, 2 Burghers, and 1 Sinhalese), and the deaths numbered 320 (311 Tamils, 7 Sinhalese, 1 European, and 1 Moor), and corresponded to an annual birth-rate of 35·4 against a mean rate of 38·2 in the corresponding periods of 1891–99, and a death-rate of 37·5 against a mean rate of 35·9 in the fourth quarters of 1891–99 respectively. Dysentery and diarrhoea were fatal in 120 cases, or nearly 38 per cent. of the total number of deaths (320), debility in 68 cases (mostly of infants from inability to suck), fevers in 28, pneumonia in 22, bronchitis in 12, malarial cachexia in 10, old age in 8, and infantile convulsions in 4.

61. *Ratnapura District.*—The total number of births reported for registration from the estates in the Ratnapura District was 116 (110 Tamils and 6 Sinhalese), and the deaths numbered 138 all Tamils, and corresponded respectively to an annual birth-rate among the Tamils of 48·5 and a death-rate of 60·8. Here, as elsewhere, the most fatal causes were diarrhoeal diseases, which caused 56 deaths (18 from diarrhoea and 38 from dysentery), or 40 per cent. of the total number of deaths. The other principal causes of deaths were debility 16, infantile convulsions 13, pneumonia 8, fevers 7, and phthisis 4.

62. *Kegalla District.*—The total number of births reported for registration from the estates in the Kegalla District was 264 (241 Tamils, 19 Sinhalese, and 4 Moors), and the deaths numbered 372 (358 Tamils, 9 Sinhalese, 4 Moors, and 1 Burgher), and corresponded respectively to an annual birth-rate among the Tamils of 31·7 against a mean rate of 19·0 in the corresponding period for the last nine years, and a death-rate of 47·2 against a mean rate of 30·9 in the corresponding period in the last nine years. The largest number of deaths in the district, as elsewhere, was due to diarrhoeal causes, being 165 (95 from diarrhoea and 70 from dysentery), or 44 per cent. of the total number of deaths. Of the other principal causes of deaths, debility accounted for 31 deaths (mostly infants due to inability to suck), infantile convulsions 26, malarial cachexia 25, fevers 22, old age 17, general dropsy 16, pneumonia 10, dochmias duodenalis 9, and starvation and want of breast milk 7.

63. *Colombo District.*—The total number of births reported for registration from the estates in the Colombo District, by which is meant the Avisawella division of the district, was 38 (37 Tamils and 1 Sinhalese), and the number of deaths was 80 (77 Tamils, 2 Sinhalese, and 1 Moor), and corresponded to an annual birth-rate of 27·3 and a death-rate of 56·8. Diarrhoeal diseases were fatal in 31 cases (12 dysentery and 19 diarrhoea), i.e., 39 per cent. of the total number of deaths (80). The other principal causes of deaths were fevers 17, debility 9, infantile convulsions 6, and old age 3.

64. *Kalutara District.*—The total number of estate births registered in this district was 87 (79 Tamils, 7 Sinhalese, and 1 Moor), and the deaths numbered 284 (281 Tamils and 3 Sinhalese), and corresponded to an annual birth-rate among the Tamils of 30·6 and a death-rate of 108·8. The most fatal causes were diarrhoeal diseases, to which 117 deaths (53 from dysentery and 64 from diarrhoea), i.e., 41 per cent. of the total number of deaths (284) were attributed. The other principal causes of deaths were fevers 23, malarial cachexia 20, phthisis 17, general dropsy 15, pneumonia 14, debility 14, infantile convulsions 10, and old age 9.

VII.—Health of the Town of Colombo.

65. The deaths registered in the town of Colombo during this quarter numbered 1,505, corresponding to an annual rate of 41·0 per 1,000, being 18 per cent. higher than the mean rate for the fourth quarter in the preceding seven years (34·6).

66. The births registered in the quarter numbered 885, representing an annual rate of 24·1 per 1,000, which is about 3 per cent. higher than the average of the fourth quarter in 1893-99.

67. As usual, the death-rate exceeded the birth-rate, due mainly to the preponderance of males over females (chiefly among the Europeans, Indian Tamils, and Mohammedans), to the presence of hospitals, which add to the normal mortality of the town, and to the registration of births still being somewhat defective.

68. The subjoined Table E gives the births and deaths and their rates for each nationality in the fourth quarters of this and last year, and the average rates for the fourth quarters in 1893-99:—

TABLE E.

69. The birth- and death-rates given in the above table for Europeans, Malays, and the races classed as "Others" are not reliable, owing chiefly to their population being too small for purposes of rate calculation.

70. Excluding the rates for these sections of the population, the lowest death-rate was, as usual, among the Burghers (29·7, against an average of 28·0 in the last seven years), and the highest among the Tamils (64·9, nearly 50 per cent. higher than their average 43·3). The increased death-rate has been shared more or less by every race living in the town. The improvement in the registration of births is noticeable among every race except Moors and Malays, whose birth-rates are lower than the average.

71. The number of births and deaths of the different races in the different wards in the town, their rates per 1,000, the principal zymotic causes of death, &c., during the fourth quarter of 1900, are shown in the following table.—

TABLE F.

Name of Ward.	Population at Census of 1891.	Births.												Deaths.												Annual Rate per Mille.								
		Total Births.				Class.				Total Deaths.				Class.				Causes of Death.

																													22·1	25·1	—			

72. The unhealthiest division of the town in the quarter was the New Bazaar Ward with a death-rate of 43·5, followed by St. Paul's (40·1). The low rates shown by the Fort and the Pettah Wards are due to their population being chiefly a floating male adult one. Excluding therefore these two divisions from consideration, Kollupitiya Ward (25·1) is the healthiest in the town.

73. There were no deaths from cholera or smallpox in the town. Measles caused the death of one person and whooping cough of 4. Phthisis, bronchitis, and pneumonia were fatal in 315 cases (against an average of 210 in the corresponding period of the last five years), diarrhea and dysentery in 269 (average 174), infantile convulsions in 159 (average 152), debility in 128 (average 89), fever, including 29 cases of enteric fever and 35 of remittent fever, in 104 (average 118), old age in 100 (average 60), malarial cachexia in 37 (average 31), diseases of the circulatory system in 35 (average 20), dochmiasis duodenalis in 34 (average 9), parturition in 30 (average 24), worms in 26 (average 32), anaemia in 19 (average 15), paralysis in 18 (average 16), tetanus in 17 (average 39). Other causes of deaths were apoplexy 7, Bright's disease 7, enteritis 7, cancer 5, leprosy 5.

74. Seventeen deaths were attributed to accidents, of which 4 were by drowning, 2 by burns or scalds, 1 by poison, 1 by fall from a tree, 2 by fall from heights other than trees, 1 by fall of a heavy substance, 1 by being run over by a tram car, 1 by shock resulting from a surgical operation. Four deaths were attributed to homicide and three to suicide.

VIII.—Health of other Towns.

75. The total number of births registered in the principal towns (exclusive of Colombo) during the quarter numbered 2,247, and corresponded to an annual rate of 39·1 per 1,000.

76. The deaths numbered 2,536, and were at the annual rate of 44·2 per 1,000.

77. The following Table G shows the birth- and death-rates in each of the principal towns of the Island for the fourth quarters of 1900 and 1899, and the average rates for the fourth quarters in 1891–99:—

TABLE G.

Town.	Population at the Census of 1891.	Fourth Quarter, 1900.			Birth-rate per Mille per Annum		Death-rate per Mille per Annum.				
		Total Births.	Total Deaths.	Deaths in Hospitals and Jails.	Average of Fourth Quarters, 1891–99.*	Fourth Quarter, 1899.	Fourth Quarter, 1900.	Average of Fourth Quarters, 1891–99.*	Fourth Quarter, 1899.	Fourth Quarter, 1900.	Inclusive of Hospital and Jail Deaths.

Kegalla	3,143	18	54	44	20·2	22·7	22·7	41·7	42·9	68·2	12·6

* For the towns of Moratuwa, Panadure, Gampola, Nawalapitiya, Mannar, Mullaithivu, Vavuniya, Tangalla, and Kegalla the averages are for 1897–99 only.

78. The death-rates are given inclusive as well as exclusive of hospital and jail deaths. In some of the towns which attract large numbers of estate coolies and destitute poor to the hospitals, the difference between the two rates is striking, e.g., Nawalapitiya 157·6 and 29·7, Matale 122·9 and 39·7, Gampola 118·7 and 34·7, Kegalla 68·2 and 12·6. Excluding hospital and jail deaths, the highest death-rate was in Badulla (53·7), followed by Batticaloa (45·4) and Anuradhapura (44·3), and the lowest Kegalla (12·6).

Registrar-General's Office,
Colombo, April 14, 1901.

SAM. HAUGHTON,
Registrar-General.

APPENDIX.

Table I.—Area, Estimated Population, and the number of Marriages, Births, and Deaths registered in the Fourth Quarter of 1900.
